

## 7. FUNDING

Production and publication of the Definitive Map and Statement and immediate Modification Orders (Core Actions A1-A5 above) are being funded from existing Revenue budgets

Funding for subsequent work to bring the DMS up to date will be included in future budgets.

With regards to improvements to the network, there are currently no additional funds available from Government to deliver the actions set out in the Statement of Action. It will therefore be necessary to fund delivery of these actions from a range of other sources, namely;

- Existing management and maintenance budgets
- LIP
- Transport for London (TfL)
- Section 106 Agreements

The LIP document will act as a mechanism for submissions for additional funding should they become available.

Whilst it may be possible to seek funding from these sources, it takes time and resource in processing such applications. Funds will therefore need to be made available to seek the grants that may assist.
