

Covid-19 vaccines for 12-15 year olds

The process

Parents/carers will be contacted to ask if it's okay for their child to have the Covid-19 vaccine

Parents/Carers and children will have a discussion together about having the vaccine

If 'YES' then return the form by ticking yes

If 'NO' then return the form by ticking no

Have the vaccine on the day it's offered in school

If the form is not returned, it is then assumed your child cannot have the vaccine

If your child has side effects (aches and pains) use normal pain relief. If they do not go in a few days, call 111.
