Peter Saunders				S449- Sainbury's Hall Lane	No	Response	No	In theory I agree with the plan my concern is the number of residential units being put in the area where the road and traffic structure is already at capacity with long queues of traffic and journeys taking longer than they used to, and how this will impact on other resources ie access to NHS GP and dentist.	I would not know what would make the plan legally compliant and sound as I am not qualified to give this advice.	No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and healthcare facilities.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base involving: Research/ fact finding, the choices made in the plan are backed up by facts. Evidence of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: Affordable infrastructure delivery plan.</p>
Karen Williams				S449- Sainbury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-loaded, loss of privacy, daylight and sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, infrastructure	Build homes to height of existing buildings, provide parking, healthcare, education, infrastructure	No	-	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: Affordable infrastructure delivery plan. Sound infrastructure delivery planning. Mitigation or regulatory or rational planning barriers to delivery. Delivery partners who are signed up to it, and Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as loss of funding for major projects proposals, although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Maria Broom				S449- Sainbury's Hall Lane	No	No	No	Yet again the use of wording doesn't make sense to me! All I know is there is far, far too much proposed redevelopment in all areas of Chingford. Five of these sites will not benefit this area. Now about a mix instead of a few houses instead of high rise, I didn't work in the past and in years to come will be the same as the old Chingford residents. I remember I lived and you mixed your life in the under ground car park, but oh, you're not giving parking spaces. Banish idea. Why not build out of London with new schools, doctors and dentists. Stop cramming more in an already crowded and overcrowded town. Focus on making what we have better, clearing the street more, fixing bad roads, clean up the rough areas. Put adverts encouraging people to look after their properties and roads and keep Britain tidy. I want to start living Chingford again but it's hard as so many areas are neglected. Stop adding to the overcrowding. We need nice shops but the rent is too high. Oh my I could go on and on and.....	As above please. Your wording is for solicitors and the like, not me. I oppose all these massive flats with banery any parking. People will have cars and will add to street congestion. I sat in my house, we all need them for various reasons, we park 2 on the drive and one out the front, not causing any more congestion. Families need cars. Cycling is not an option for any of us. If 40 cycles I worry my bike will be pinched as there are so many scumbags here. If you're going to build, put no more than 2 or 3 floors maximum and give them parking too. Stop the developers drinking money, money money. I wanted to grow old in Chingford but at this rate it's be off in years as I won't recognise this town.	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Valen Bjarte				S449- Sainbury's Hall Lane	No	No	No	The plan is seeking to build significantly more homes than required by the London Plan. To achieve that higher number, the form of development (high rise) is significantly out of keeping with the existing character of the area and will cause "chaos" (in planning terms) to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people. The Consultation is flawed as non online residents have not had a chance to comment as they received no leaflets advising of the plans. There has been no public meeting.	I DONT WANT THIS SITE DEVELOPED AT ALL. we will lose sainbury's while its being built, which is a shame for older and disabled local residents who cannot travel, should our needs be ignored, then any building would have to be a -no high rise, no overlooking/over-shading existing homes, provide parking for ALL new residents, plus replace the existing shoppers car park for everyone to use. ITS THE ONLY CAR PARK IN SOUTH CHINGFORD.	No	we all want to be involved, this is our life!	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. Mike Chimes				S449-Sambury's Hall Lane	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation SP2 element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (L1) for 2020-2026. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been cancelled by political point scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had difficulty low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from L1 and what has been stated at consultation meetings a major driver for the reorientation of development across the borough has been a housing target of c. 1000 homes a year. While EWFF has a large target of 60000, and central government guidance is driving all local authorities to ensure they develop affordable sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More information is needed on how the plan will meet the need for affordable housing.	Some consultation on CP2 sites has taken place, but many of these sites are individual sites in larger retail or industrial centres where a holistic approach would make sense, both to residents and other stakeholders, and to planners. Masterplans have started to appear, for some areas has South Chingford; Highams Park has its own plan, but looking at the North of the Borough surely this should be done for Station Road, and by extending the North Circular Corridor to the north and east. In some cases such a masterplan approach would ensure a better understanding of an area's character and distinctiveness, which may be totally missed in consideration of an individual site. It is suggested that until master plans are developed, through consultation, for the main centres identified in L1 as major consultation on individual sites is paused. With reference to site S449 the chief driver in build point order is to provide 30 homes. It is unclear how that many homes can be provided in this site with the other proposed ones. One choice might be to build high but research eg LCL (2017) High rise buildings energy and density has demonstrated above 6 storey energy use increases difficult to reconcile with the Borough's green policies. A taller building on this site (apparently not proposed according to the planning plans) would overlook gardens on two sides and potentially negatively impact their character. It is suggested that there could be enhanced cycle and pedestrian connectivity, yet the site already benefits from a wide pavement, which could only be compromised by cycle provision. It is suggested the site would continue to provide town centre parking and retail use yet also accommodate community uses and housing. Such multi-use would surely offset the loss of the retail centre, or disabled access to any community facilities/ parking. Loss of the Sambury retail unit for an extended period would have a negative impact on a key anchor for this retail centre and its value as a business hub.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared. This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified. This means that the Local Plan should be based on a robust and credible evidence base including: -Market/Fair Finding: the choices made in the plan are based up by facts. Evidence and participation of the local community and others having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective. This means the Local Plan should be deliverable, requiring evidence of: -How infrastructure delivery planning; -Mapping or regulatory or national planning barriers to delivery; -Delivery partners who are signed up to it, and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the OPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Boroughs, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Monica Di Natale				S449-Sambury's Hall Lane	No	No	No	Proposed development cannot be delivered with policy compliant levels of affordable housing. Building new high rise building means loss of privacy, daylight/twilight. More demand for parking, as plan does not consider more parking spaces, there will be more people but no more services, medical centres, schools, dentists, hospitals already stretched as they are. Moreover plan is not being properly advertised to the public. We only found out through a leaflet dropped at our door.	Build new homes, no high rise buildings, already there are too many in Chingford. Provide more parking spaces, more medical centres, schools, educational services. The few medical centres we see are so stretched they no longer see patients who they used to. Public services in Chingford would have worsened over the past few years.	Yes	Would like to find out personally what the Council plans to	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy elevation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through a s.136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
David Hill				S449-Sansbury's Hall Lane	No Response	No Response	No Response	<p>It is quite clear that by using such legal terms instead of "simple English" that you do not expect the "average" person to respond to your question Chingford Mount has a high percentage of ELDERLY persons who have no idea what you are trying to tell us and therefore will not bother to respond to your questions. What we need is GOOD LOCAL SHOPS which do not require us to rely on having a car and which are easily accessible to the elderly and disabled persons.</p>	PLEASE give us a clue what you are proposing in simple English so we can understand what it is you intend to do. The current Sansbury serves to provide the needs of those who find it difficult (or impossible) to drive to the shop area at all - without Chingford Mount does not have a heart.	Yes		<p>This response is noted.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>In order for a Local Plan Document to be adopted, it will be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four conditions which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <p>Research/Evidence: the choices made in the plan are backed up by facts.</p> <p>Evidence of participation of the local community and others having a stake in the area; and</p> <p>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>Sound infrastructure delivery planning;</li> <li>Having no regulatory or national planning barriers to delivery;</li> <li>Delivery partners who are signed up to; and</li> <li>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should be flexible and able to monitor.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
										No		Consistent with National Planning Framework and relevant Government Policies, this Local Plan does

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Janet Bloomfield				S449-Sainsbury's Hall Lane	No	No	No	No	The proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing. There are no parking provisions, which will disadvantage older, and disabled people. The plan includes the building of more homes than required by the London Plan and would increase the demand for parking. There would be an increased need for doctors, dentists and school places. Any new homes should be built to the height of existing buildings. There should be parking spaces provided with new building. Consultation has not included leaflets or public meetings (except on Zoom) to advise residents of the proposals.	Provide policy compliant levels of affordable housing. Build no more homes than required by the London Plan. Supply information of the proposals to all of the borough's residents. Hold public meetings to discuss the proposals. Build homes of the same height as existing buildings. Provide parking to accommodate the additional residents. Provide additional local healthcare and schooling.		-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites to 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 42,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Alison Thompson				S449-Sainsbury's Hall Lane	No	No	No	No	The Local Plan we've to comment doesn't seem to have been set out with any clarity or specifics here. The inspection cannot reply to the 3 questions above, as how from the info supplied can we know what the local plan is, or know what the legalities involved are or the duties for compliance? More importantly for the people being asked to respond to these "plans", is where are the details? It's all very vague. Points of concern are: to fit 90 new homes in above the existing retail and parking space will mean building shoebox homes that no one wants to live in, and building too high to be out of keeping with the surrounding homes, casting shade, loss of privacy making the area less desirable overall. Cycle provision down Hill Lane will cause problems where the road bends outside the old library, many accidents already occur here. Parking space is already limited, more homes will exacerbate issues especially with provision. No real attempt to consult with the population to be affected directly to these plans. Zoom meeting over busy times period doesn't count as consultation to me. Letters with clear details of plans by all, so those not online can be aware and make comment within a generous timeframe would be fair.	Consult the population by post giving a generous timeframe for response, go door to door, make plans much clearer, ask questions the population can actually answer rather than ask about whether we think legal compliance etc. is met, we aren't solicitors so can't answer, and shouldn't have been asked these questions. We want plans that take in keeping with the area that won't infringe on any residents existing happiness with the area, there's no point spending money to build homes no one wants to live in, make people in surrounding streets want to move away and devalue their homes and makes people not want to travel here to spend money in the shops because the area is unappealing due to high risks, and poorly accessible with all traffic forced through the one busy junction of Chingford Mount, and no parking.	No	I've only said yes so I can say the question you ask makes sense to the inspection, so why ask it. I've no idea about an examination hearing session.	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unit requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: -Market/Fair findings, the choices made in the plan are based up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals will ensure that the social, environmental, economic and resource use through of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Planning or regulatory or national planning barriers to delivery; -Delivery partners who are signed up to it; and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. -The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process. The Duty to Cooperate which demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.
Ian McGill				S449-Sainsbury's Hall Lane	No	No	No	No	I feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to co-operate. This letter is in strong opposition to the proposed developments around Chingford Mount at Sainsbury's Hall Lane, Albert Corner and the former South Chingford Library Sites. To achieve the number of homes planned to be built on these sites, the only way of fitting them in each area would be to go up in the air with High Rise! This form of housing is totally out of keeping with the existing character of the area and will cause "harm" to existing residents who will suffer the consequences of over-building, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residential Chingford Mount and would disadvantage other people. If the 90 homes at Sainsbury's Hall Lane are built then residents of Albert Avenue which backs on to Sainsbury's in Hall Lane will be very affected. By building 90 flats on this site, obviously several of five plus storeys, would completely destroy residents' way of life. Sitting in the garden would be a thing of agony not pleasure as it is now. An important thing to consider is that Albert Avenue, which backs on to Sainsbury's in Hall Lane, is shown in the Draft Chingford Mount Town Centre Framework as Orchard Close. This is incorrect and could confuse a planning officer unaware of the streets in the area.	Please only build homes to the height of existing buildings and no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats as trying to get a doctor's/dentist appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents. We also do not want to lose our existing supermarkets and certainly do not want them to be replaced by smaller ones.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development new infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that an undermine cycling, walking and public transport use. The site allocation requires that commercial floorspace is provided as part of new development.
R Stoddart Esq				S449-Sainsbury's Hall Lane	No	No	No	No	My house is at the back of the Sainsbury's site and I will lose all my privacy as I will be overlooked by the flats. There will be loss of light to my garden and too more noise. The flat 5 plus storeys is too high. In addition, if you are not providing parking for these flats what will people park? All the local roads are full and congested already and this will only lead to a gridlock at the Mount. I am very unhappy with these proposals and feel all the noise and disruption would adversely affect my mental health.	Obviously I would prefer not to have any changes. I do not want the noise or disruption and feel this would adversely affect my mental health.	No	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development new infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mark Knowles				S449-Sainsbury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered as policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overburdened, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no half/half/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide adequate parking, healthcare, education etc.		We need to know what is planned as we may believe it to be unsuitable and need changes made.	<p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Gary Bagley				S449-Sainsbury's Hall Lane	No	No	No	Proposal is out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing. There is no parking provision and it will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overburdened, with a loss of privacy, daylight/sunlight, plus there will be an additional demand for parking. The consultation is flawed, as no half/half/public meeting to advise residents, only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings only, provide parking, healthcare, education, etc.	Yes		<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Conservative Councillors (General)				S449-Sainsbury's Hall Lane				S449 - Sainsbury and Hall Lane Car Park - We do not support the designation of this site as "Transformational". It does not meet the criteria for this designation in the IDP policies. The greater reception exercise has raised immense local concerns, especially from adjacent residents who fear a significant loss of privacy. We also do not believe that the designation is effective as it is unlikely to be viable taking account of the need to protect existing residents amenity, replace a well-used town centre car park and meet the Council's policy of providing 50% affordable housing, alongside buying out the embedded value of the existing supermarket.		No		<p>S449 is not identified as Transformational. All consultation responses to the Chingford Mount Area Framework will be taken into account as Local Plan Part 2 is further reviewed.</p> <p>The two part Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. It also expects new development to be car-free in order to create safer places and improve air quality, unless it can be demonstrated through a robust Transport Assessment that additional car parking is required. Any additional car parking would have to comply with London Plan standards. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion and parking problems as well as significantly improving air quality.</p> <p>S449 requires retained or reconfigured retail and town centre uses, the exploration of potential for new community facilities and co-location of nearby service provision, and active ground floors and visible street frontages that contributes to high street and act as an eastern gateway to the town centre.</p> <p>All submitted planning applications that do not meet the London Plan "fast track" definition are subject to viability review, which the Council has independently assessed.</p>
Carole Redhead				S449-Sainsbury's Hall Lane	No	No	No	Creating housing without stating how many GP surgeries, schools, free parking, estimated pollution levels. Expansion of roads (Chingford Road) already resembles a car park most days. You cannot continue to add housing without infer structures.	More detail and less housing			<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of benefit for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car reduced. Additionally, the policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Michael Ward				S449-Sainsbury's Hall Lane				A 5 storey development on the Chingford Sainsbury's site will be an eyesore. Furthermore, the area could not cope with the additional traffic, parking, schools requirements etc. A lower storey building would be more acceptable and more serene.		No		<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Stephen Tyler				S449-Sainsbury's Hall Lane	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/nightlight, additional demand for parking. Consultation flawed as no letters/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc		-	<p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Ferose Fazalaly				S449- Sainsbury's Hall Lane	No	No	No	Proposed development would be out of keeping with the historical area, and they cannot be delivered with the policy compliant level of affordable, along with no additional parking provision in place, which will disadvantage the older residence. The plan seeks to build more homes than set out by the London Planning Commission. Existing residents will be disadvantaged, loss of privacy, daylight/sunlight and the impact on the residential parking has also not been taken into account. The Consultation has been flawed as no feedback has been distributed by the council and no public meeting has been arranged to advise residence of the proposal, which a Zoom meeting doesn't count as many residences were not aware of and some cannot have been able to join, even if they've known. The increase of people and families in the small area will increase the pressure on the doctors, hospital, dentists, schools etc, which are already under increasing pressure, including the transport infrastructure in the area, in turn will increase pollution and affect the older residence and children with respiratory conditions	Build affordable homes which are in line with the surroundings that do not overlook or impose on the existing residence. Provide additional parking facilities, along with restructuring the transport links to and from Chingford Mount. The Healthcare and Education will also need to be increased to cope with the influx of new residents. The services (downwags) will also need upgrading, as well as the gas and electricity supply.		Need to understand the reasoning behind the council's objections to this evidence proposal and suggestion	In Local Plan Part 1, Policy T2: Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  This response is noted.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Emily B				S449- Sainsbury's Hall Lane	Yes	No	No	Hill Lane and Chingford Mount Road are already severely congested with traffic. Add to this the new supermarket coming to Cork Tree retail unit and the area will be even more gridlocked. Adding more homes to an already congested area will only add to the existing traffic problems. Older residents also rely on this Sainsbury's - many of them travel there by foot. If this is the area you are elevating a large part of the community, cutting them off. Not all of them have access to a car or could walk as far as Cork Tree when the new supermarket is there. The area needs a cove on ASB, and better shops. Not more homes!!	Keep Sainsbury's and build the homes elsewhere. If you go ahead with this, and plans for Cork Tree and New Road near the Harvester you are basically telling people it's not worth leaving their homes as the area will be a nightmare.	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Walkway Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Lai Azubila				S449- Sainsbury's Hall Lane	No	No	No	This letter is in strong opposition, specifically but not exclusively, to LBWV's 4 proposed development sites around Chingford Mount.  Namely: 1. Up to 90 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Courtyard. 3. Up to 25 new homes on former South Chingford Library. 4. Up to 280 new homes on Larkwood Leisure Centre & Nursery site.  Whilst we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. Also this cannot be delivered with policy compliant levels of affordable housing.  If these flats are to be built they should be no more than 3 storeys. Any higher would be out of character with the area and would definitely disadvantage existing residents, whose properties will be overlooked.  Parking for cars has already reached a desperate level in Chingford despite many households being forced into forsaking their front gardens and going to the expense of paying for a drop kerb driveway.  Any new builds in the area must therefore provide suitable parking for these new dwellings. To not provide this facility will, without doubt, cause massive parking wars with the already very limited street parking around residential Chingford Mount.  Whilst we appreciate reducing car ownership is something London is eager to achieve, many of the older residents around Chingford Mount may not be able to access cars with their own, and as a result, many of the older residents will be disadvantaged if they are unable to access the services of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and landscapes. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially overused) and schools provision.  It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising if it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	Build to a max 3 storeys Provide car parking for new dwellings Provide infrastructure to accommodate expanded population	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Paul Willard				S449- Sainsbury's Hall Lane	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and landscapes. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially overused) and schools provision.  It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising if it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a lower density to reduce the additional stress on services. A public consultation of a far higher standard than that proposed should also be undertaken.		-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

Karen Muggill				S449-Sainsbury's Hall Lane	No	No	No	I strongly object to your plans for the area in which I have lived all my life. By building high rise flats and putting people in little boxes you are increasing the number of people in the area but by making our local supermarket, Sainsbury's (Hall Lane) and Iceland and Superdrug (Albert Centre), much smaller, you will reduce the reason for people coming to shop in the area. In fact, people will shop elsewhere and it will just become a massive housing estate without parking facilities and without a decent sized supermarket. Obviously, without parking for new residents, the area will get even more congested and residents will avoid the area and shop elsewhere. They would probably shop at larger stores at Tesco in Highams Park, Morrison or Sainsbury's (at the Billes). Obviously this would cause more traffic, pollution, congestion and use of petrol/electricity. This goes against the Council's policy of becoming more green. Unfortunately people will be unable to take their weekly shopping home on a bike along new cycle lane. Without these decent shops all other shops will start to fail and close up and Chingford will no longer be a good shopping area. To regenerate an area and make it more appealing, we need some good shops giving people a reason to come to the area. Perhaps the Council could reduce business rates. We also need ample parking, not less. We need more parking for shoppers to make it easy for them to park. The current car park is dark, run down and expensive. We need a good car park, well maintained with sensible size spaces to park in, not tiny ones as are the existing ones. The angle of these spaces could also be changed to make it easier to access. Sensible two storey homes with parking provision is obviously a good thing but certainly not high rise flats, overlooking residents' need door to them. I	Provide ample parking for shoppers and any new residents. Encourage new shops to the area by providing more free parking and lower business rates. Keep any new flats to same height as existing buildings. Chingford would then thrive. By clicking with your plan, Chingford shops will close up and it will just be a huge housing estate with some/convenience shops which cost the earth.	No	-	<p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Rosemary Langlands				S449-Sainsbury's Hall Lane	No	No	No	The proposals are completely out of keeping with the area, high rise blocks were demolished as they failed to provide decent homes for families, so why put up more. A high rise block does not consider the privacy of the residents, the quality of life of the residents, the value of the properties, the access to light and sunshine for the properties and residents, the mental and physical health of the residents of Albert Ave. In addition there are underground streams and at least one underground river in the vicinity. Local residents are further alienated residents of the borough need the large Sainsbury's, it provides goods that are not available anywhere else in the area of the Mount. It attracts shoppers to the area which supports the smaller retail outlets.	The area needs to be kept as it is NOT to become an area like Blackhorse Road and be surrounded by high rise blocks. This is a semi rural suburb of London NOT a part of New York or Canary Wharf.	-	-	The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The site allocation requires that commercial floorspace is provided as part of new development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Susan Reynolds				S449-Sainsbury's Hall Lane	No	No	No	Oversdevelopment	Smaller build	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of revenue to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Lloyd Parkinson				S449-Sainsbury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	No	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, encroachment, loss of privacy and loss of daylight/sunlight.
										No		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Zahra Kabeem				S449-Sambury's Hall Lane	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/nightlight, and also additional demand for parking.  Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	Consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary; the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.		As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
L Stephens				S449-Sambury's Hall Lane	No	No	No	This is one of the only good shops left at Chingford mount. The area is run down, neglected and antisocial behaviour is worse than ever. We need more good shops. I don't mind more housing but it should be around good shops (not over the top of them) or on neglected lands/shops. Getting rid of this will only lead to more congestion at the A416 roundabout. You're not considering local people - especially the elderly/vulnerable who often might not drive any more, or those for which a giant supermarket might be overwhelming. There are other ways to build other than squashing Sambury.				The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Streets, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Terry Milnes				S449-Sambury's Hall Lane	No	No	No	What does "Explore" mean! This language seems to have no legal standing. Not all residents who will be affected have been effectively consulted. Where are the elderly supposed to shop if we lose Sambury?	Firm legally binding language- not woolly "explore" which means nothing! Elderly residents need local shops/supermarkets that they can walk to. Infrastructure such as Doctors, Dentists, Schools, Nurseries, sewage, water supply needs to be detailed.		no one is listening to the residents of Chingford-!!	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Dieme Opel				S449-Sambury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/nightlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc	build homes to height of existing buildings, provide parking, healthcare, education, etc.		Everything should be open for the public to participate in	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/nightlight.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/2. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,811 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p><b>Positively Prepared</b> This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p><b>Justified</b> This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding: the choices made in the plan are based on by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p><b>Effective</b> This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barriers to delivery; - <a href="https://www.communities.gov.uk/planning">https://www.communities.gov.uk/planning</a></p>
				S449-Sainsbury's Hall Lane	Yes	Yes	Yes			No	-	This response is noted.
-				S449-Sainsbury's Hall Lane	No	No	No	I know nothing about these plans until I received a letter from an action group. I am not on facebook or zoom so I know nothing about any of this. I know I am not the only one to be in this position and so should you!	I receive emails from the council leader each week and think that this could be incorporated as a section in this.	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Mrs Malaine Benfield				S449-Sainsbury's Hall Lane	No	No	No	This is the only car park in Chingford Mount for shoppers. Where else do you expect them to park if you take the car park away? Where will these new residents park? Will there be parking spaces for them or will they be taking spaces in the roads around, which are already full of cars? If you build 50 more homes this will have a huge impact on the provision of doctors, schools, dentists, hospitals etc for people who already live in the area. Are you going to provide more of these? I don't think so. I live in Chingford Mount and had no idea that this was being planned. Why didn't I receive leaflets through my door advising me this was going ahead? Are you covering this up because you know no one wants this? How tall is this thing going to be? It should not be taller than the building that is already there because if it is, it will interfere with the local residents privacy and light as they will be overlooked.	If you insist on proceeding with this plan you need to provide a car park for shoppers, parking for the new residents, ensure the building is limited to the current height and provide healthcare and schools.	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Nicola Dixie				S449-Sainsbury's Hall Lane	No	Response	No	No	Please for once listen to your residents! We do not want Chingford built up and over populated like what has happened in Walthamstow. Sainsbury's is key to the local community and the only available source of parking for most residents and many of my elderly and disabled relatives. Why take this away?	Just leave it alone and dont make life harder for your most vulnerable residents	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Isobel Mara				S449-Sainsbury's Hall Lane	No	No	No	No	Infringes public space and clean air	as above	No	-	In April 2023, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-repelled. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a positive measure. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
-				S449-Sainsbury's Hall Lane	No	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Anthony G Thorne Lip				S449-Sainsbury's Hall Lane	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 19. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 31(1). 18.(1) A local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chisford suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LAUF zone and given the fact of the road widening these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LAUF charge. But the rest of the area will also be subject to these increases and the proposed suggest the natural air flows possibly result in pockets with even higher concentrations. Watlington reveals current population density is far too high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the area to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chisford Hall Estate where the 1967 tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In that it was realised in the 1930's that people needed space and New Towns were built with green spaces, development and infrastructure. This is the SMOG A.	No	Because there are too many unanswered up	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a healthier population, parking problems and improve air quality. Additionally, Watlington Waste and Recycling guidance for the Borough sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevlopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.136 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
				S449-Sainsbury's Hall Lane	Yes	Yes	Yes			Yes		This response is noted.
Jill Russell				S449-Sainsbury's Hall Lane	No	No	No	Because I have no idea what 'legally compliant' or 'sound' means in terms of this questionnaire. What exactly is 'an active ground floor and visible street frontage that contributes to high street activity and acts as an access gateway to the town centre'? Please write in a language that the common person can understand (including me).		-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding: the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Having no regulatory or national planning barriers to delivery. -Delivery partners who are signed up to it, and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.
				S449-Sainsbury's Hall Lane	No	No	No	It would completely destroy the local village feel of the area and I do not feel there has been enough publicity on these developments. Local residents should have been written to. Many not on social media have no idea what is planned. Local properties will be dominated by this 5 storey development a few metres from their rear boundary with over-looking and attendant loss of privacy. High rise blocks would be very ugly and not in keeping with local buildings, ie houses with gardens and low rise shops.	It would completely destroy the local village feel of the area and I do not feel there has been enough publicity on these developments. Local residents should have been written to. Many not on social media have no idea what is planned. Local properties will be dominated by this 5 storey development a few metres from their rear boundary with over-looking and attendant loss of privacy. High rise blocks would be very ugly and not in keeping with local buildings, ie houses with gardens and low rise shops.	-	-	The Local Plan requires a character-led approach to regeneration, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). This response is noted. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

SA Sabit				S449-Sainsbury's Hall Lane	No	No	No	90 new homes? no mention of improvement to local services such as overburdened schools, GP services, dentists, over used and inadequate water and sewage systems.	improvement to local services such as schools, GPs, dentists, upgrade water and drainage systems to accommodate new homes, extend the Victoria line from Walthamstow to Chingford Mount.		Fed up of the over population of Chingford Mount without the necessary upgrade to services to support it.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s126 planning obligation.
Jennie Heath				S449-Sainsbury's Hall Lane	No	No	No	This over development. The area does not have the infrastructure to support these homes. A development of this scale, in the area, is not sustainable or conducive to residents		Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Sam				S449-Sainsbury's Hall Lane	No	No	No	This is absolutely embarrassing how can these flats be created without considering the parking issue, the majority of local residents already struggle with parking and their drives being blocked as do I. This is despite a lack of the duty to cooperate you are not considering the needs of the local residents. Furthermore Chingford is already heavily populated this will cause a tremendous amount of unease and stress for the older members of the community.	Do not create these flats without parking, the sainsburys car park is used regularly by customers why deprive them? Why impact the local residents in such a terrible way		-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Jonathan Marino				S449-Sainsbury's Hall Lane	No Response	No	No Response	I do not know what the duty to cooperate means	There are too many new homes to be built, perhaps reduce the number to 30? 50 homes will cause pressure on local facilities such as GP surgeries, traffic congestion etc		So I can hear in detail what the plans for all these changes are	This response is noted.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. R Mills				S449-Sainsbury's Hall Lane	No	No	No	What exactly are these plans being made? Yes to 100% social and honestly affordable housing (based on local average salaries which will not be in the range of the poorer more affluent M25/suburbs) but no to basically reading land for profit which currently provides essential, valued and much needed amenities. Not in keeping with the local area. Not with concern for church residents at its heart not those employed within the existing business based here.	Retaining current level of height in line with the rest of the area (two storeys). Not withdrawing current business/service provided. Not drawing additional to traffic off the bus turning point further into the neighbouring residential areas.	No	-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Mr King				S449-Sainsbury's Hall Lane	No	No	No	You will be depriving the local community, particularly the elderly & disabled who cannot travel to Big supermarkets, of their long standing shops, i.e. Sainsbury's & Iceland. Chingford High Street has already been taken over by nail shops, Barba's, coffee bars etc. We NEED these two supermarkets, we haven't the room for more flats, parking is already a nightmare in surrounding roads.	More people moving into Chingford - where are the social facilities to accommodate them?	No	I think all residents in the Area should be allowed to have access to what the council are proposing & have their say.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Clifford Gray				S449-Sainsbury's Hall Lane	No					Yes	I do not agree with the proposed plan as they not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.

Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Miss Vignali				S449-Sainsbury's Hall Lane	No	No	No		see above			<p>The site allocation requires that commercial floorspace is provided as part of new development.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use classes that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres, delivering housing above an active frontage and having residents located within the borough's centres, ensuring that most people daily needs can be met within a closely to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.</p>
Bill Rodney				S449-Sainsbury's Hall Lane	No	No	No	<p>It is increasing population without increasing retail and social infrastructure provision.</p> <p>It is over development.</p> <p>It will increase pressure on car parking spaces causing pressure on surrounding residential areas.</p> <p>You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.</p>	Comply with local building heights and appropriate street scale.			<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. John Sadlers				S449-Sainsbury's Hall Lane	No	No	No	No	Communication and consultation of Residents has been lacking. Landfill distribution poor (badly are not). Potholes in shops minimal and the format of the road is not clear. Close to bus stop. Older more computer literate residents are excluded. High rise buildings will create a feeling of isolation.	The consultation need to start again with a real engagement with local residents and businesses	Yes	The system needs local input	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in Covid-19 infections around the time of the consultation period, it was decided for the safety of our residents and council officers to hold the engagement meetings as online events. Throughout the consultation period the council was still accepting consultations posts by email and post. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Julie Francis Field				S449-Sainsbury's Hall Lane	No	No	No	No	Overloading an already crowded area with yet more homes whilst failing to provide an infrastructure that can facilitate the arrival of more residents will further destroy an already fragile area. More people yet no extra school places, no extra medical facilities, no extra community facilities (quite the opposite as the Council continues to fail the community library, it is not sustainable).	Develop the area to provide accessible community assets.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
D Nurse				S449-Sainsbury's Hall Lane	No	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with the policy compliant levels of affordable housing. There are no parking provisions, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over-loaded, loss of privacy, loss of daylight/sunlight, additional demand for parking, additional traffic congestion and pollution. The consultation is flawed as there has been no leaflets or public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools.	Build homes and structures to the height of existing buildings. Developments should be in keeping with the area. Provide necessary parking and amenities. Provide additional services to support developments such as education, transport links, healthcare and education.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. If yes, please explain why?	Council's response
Senne Heath				S449-Sainsbury's Hall Lane	No	No	No	This is a gross over development of the site.  The consultation process conducted by the Council has been seriously flawed in my view. There appears to have been very little consultation or publicity in hand from proposals to residents and businesses for those areas affected. The "Residents News" has been provided on line and has mentioned the Local Plan occasionally but there has been little reference in the Council's quarterly "Waltham Forward News". As has been pointed out to Cllr Simon Miller, the Portfolio Holder for Regeneration, not everyone is on line and indeed a number of residents have stated that they "have no idea" about these plans which would have a far reaching and in some cases opposing reaction to those affected. Indeed two Chingford residents have had to pay out of their own pocket to distribute leaflets to residents to inform them of the plans and the deadline to respond. This is unacceptable and should have been the Council's responsibility which does appear to show a desire not to publicise effectively and ensure that responses not received are regarded as supportive of the Plan.  With Covid it is accepted that large meetings could not have been held with residents but other ways could have been found. The so called "Tuesday" in the Town Square on 4 December 2021 would have been an ideal opportunity for officers to communicate with residents. It is known that two officers in attendance did not make themselves available to residents for questions and explanation of the proposed Plan and had no identification (bad) and the event can only be viewed as cosmetic in giving out expensive freebies whilst deflecting residents from the importance of providing their views on the Local Plan. It was understood in early January 2022 that the Council were to leaflet residents within 1 mile of Chingford although not most residents have never received this. Again, this oversight is totally unacceptable.  There appears to have been very little effort made by the Council in publicising the Local Plan proposals in the past up to the 228 Chingford Avenue Road. I had some contributions from some, but not from others. My neighbours and I have not received a leaflet informing of these proposals.  Privacy will be affected to others with such high rise residential buildings. Traffic and parking problems will get even worse.  More Pollution.  Not enough school places. My daughter could not get into her local comp 1/2 miles up the road due to catchment having to reduce due to more flats being built and more families moving in.  Not enough doctors/ surgery spaces.	The development limited and the current facilities - shopping and parking retained.  The development should also take into account current residents and not rough-road over oc.			This response is noted.  The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery allocation of congestion, parking problems and improve air quality.  The consultation was carried out in accordance with the regulations in the Town and County Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
Samantha B Law				S449-Sainsbury's Hall Lane	No	No	No	Privacy will be affected to others with such high rise residential buildings. Traffic and parking problems will get even worse.  More Pollution.  Not enough school places. My daughter could not get into her local comp 1/2 miles up the road due to catchment having to reduce due to more flats being built and more families moving in.  Not enough doctors/ surgery spaces.	Make sure our children have adequate education in schools now, well equipped enough for those who reside here now before housing more families that will require spaces in our local schools.  Make sure all local residents are adequately served by our Local NHS amenities and have what they need before housing 100s of other families. Can our local hospital cope with so many more local residents? (Especially as the new hospital is reducing its bed capacity?) (Traffic/parking and pollution); will adding all of these new homes help or hinder these problems??		Because I'd like my opinion to count	This response is noted.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery allocation of congestion, parking problems and improve air quality. Additionally, Waltham Forward Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Patricia Moseley				S449-Sainsbury's Hall Lane	No	No	No	Proposed developments would be out of keeping with the area, they cannot be seen without policy compliant levels of affordable housing provision for parking this will disadvantage older people. The Plan seeks to build more homes than required in the London Plan. Existing residents will be overlooked loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools etc.	Build homes to height of existing buildings, provide parking, healthcare, education etc.	Yes		Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Robert Deering				S449-Sainsbury's Hall Lane	Yes	No	No	Local people do not want high rise development in Chingford Mount. This has been expressed by many people on Facebook groups such as 'Love Chingford' and 'Save Chingford from overdevelopment'. High rise flats overshadow and dominate the high street, cut out sunlight and the sky for pedestrians and have other buildings in shadow. They create wind tunnel effect, exacerbate heat island effect and can produce social and mental health problems for the occupants and problems for emergency services and the police.	I cannot say what is legally compliant, but I believe that flats above four storeys high are unacceptable for the reasons listed above.	Yes	I would like to participate in the decisions taken in the development of the town where I live.	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
-				S449-Sainsbury's Hall Lane	No	No	No	Building more homes will put extra pressure on the already overstretched local facilities ie doctors, schools and hospitals. It will make the parking problem in the area worse.	Upgrade the infrastructure before building new homes	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L10 planning obligation.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S449-Sainsbury's Hall Lane	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking.  Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting.  There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary. I consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kirsty				S449-Sainsbury's Hall Lane	No	No	No	Over crowded area with not enough schools and hospitals and doctors to be building so many more homes with out parking	Nothing you can do build a school instead or keep it the same	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Jackie Vincent				S449-Sainsbury's Hall Lane	No	No	No	Residents of abingford mount not consulted. New flats not in keeping with the area and will ruin chingford. Not wanted in our town.	Tidy up shops. Rebuild a shop where Poundland burnt down many years ago. No high rise flats.	-	-	This response is noted.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S449-Sainsbury's Hall Lane	No	No	No	Impacts on the local residents especially with Morlions and the superstore Sainsbury's also being redeveloped	Having transport provision that travels from Chingford to Meridian Water may reduce the congestion from Chingford Mount and Chingford road			The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Rosemary Langlands				S449-Sainsbury's Hall Lane	No Response	No	No	This land is a shop and a car park - converting it to YET MORE homes is unacceptable to local residents - I cannot see how high the proposal is but it must be high. What gives the council the right to build that high at the bottom of my short garden? Life is bad enough in Albert Ave with giant trees blocking my light and heat on the front row you want to take the rear light and freedom away! I know there are underground streams and at least one underground river in the vicinity - this is not conducive to safety.	No homes should be built overlooking homes in the vicinity thus removing their light, heat and privacy. No homes should be built where there is such a large amount of underground naturally occurring water!			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Terry Miles				S449-Sainsbury's Hall Lane	No	No	No	Out of character with the area. Removes a vital small supermarket used primarily by those with no transport and the elderly. No facilities for parking. Added strain on local amenities.	Do not keep building where it is totally out of character with the area and diminishes local facilities.		no one is listening to the residents of Chingford.!!	The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023).  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Neil Hooper				S449-Sainsbury's Hall Lane	No	No	No	The plan build 90 new homes with no parking facilities on a site that provides the majority of parking for the Chingford mount to beyond barlet. But then again anything built utter contempt for Chingford residents by Waltham Forest council would constitute suspicious behaviour.	Drastically reduce the number of homes & provide adequate parking for residents & shoppers. Much like the existing Tesco development in Huggins Park.	Yes	To ensure residents aren't ignored as usual.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Hayne				S449-Sainsbury's Hall Lane	No Response	No	No Response	It will lead to overcrowding and an increased demand for already stretched local services such as gps, dentists, policing etc.	To build housing within the existing building capacity and not expand the sites.	Yes		Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
										No		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Deborah White				S449- Sainsbury's Hall Lane	No	No	No	By demolishing the Sainsburys supermarket where are elderly residents and people who have no transport and cannot walk far going to do their shopping. There are no proper supermarkets in the Chingford Mount area only express shops which do not supply all for a weekly shop.	More thought for where people are going to shop at Chingford Mount now that all these new homes are planned		To see that what people require is met	The Council sets out it's strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Kenneth Clements				S449- Sainsbury's Hall Lane	No	No	No	The site must enable Sainsburys supermarket to continue to be viable. It will not be able to do this without the adjacent carpark and shoppers will go elsewhere where there is car parking. The local authority should stop trying to exclude the car from everywhere, people need to get about and carry their goods.	Maintain the current supermarket and parking and improve parking facilities in general.	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. As per the Local Plan policy, the sites that will or have the potential to impact on the highway network public transport services, sustainable transport, have difficult access will be required to submit a Construction Logistics Plan setting out strategies to minimise these impacts and agree suitable mitigations and monitoring prior to the commencement.
AJ				S449- Sainsbury's Hall Lane	No	No	No	Are you for rent, 90 new homes on this small area. Where will these people go for doctors, schools & nhs dentists. I do not work due to ill health & cant get a nhs dentist. Is local rely on Sainsburys for our weekly shop, where else are we suppose to go? Also some of us rely on our cars, due to disabilities, where are we suppose to park?	Leave Chingford alone	No	-	The site allocation requires that commercial floorspace is provided as part of new development.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Mary Pickering				S449- Sainsbury's Hall Lane	No	No	No	The whole plan is cumbersome, ugly, not environmentally friendly and certainly not supported by the infrastructure.	Examine first the local existing infrastructure whether it meets current needs of the population eg we have already got our suburban schools and not enough GPs. There is a sad lack of a variety of shops and the council has not been promoting and actively helping local businesses. The transport links are inadequate and there are no public toilets.	No	Essential that public is fully consulted and that information is readily and easily accessible to the whole community.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Naila				S449- Sainsbury's Hall Lane	No	No	No	Chingford does not have the capacity to increase the number of housing units. The selling point for Chingford is the amount of green, open space and minimal high rise buildings. We do not support additional housing in the area.	Chingford does not have the capacity to increase the number of housing units. The selling point for Chingford is the amount of green, open space and minimal high rise buildings. We do not support additional housing in the area.	Yes	I need to be involved in every step of the process and decision making	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Stephen Nelson				S449- Sainsbury's Hall Lane	No	Response	No	These plans will be bringing high rise buildings to the area which are not keeping with the current structures of the area.	Buildings to be no more than 3 stories tall.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S449- Sainsbury's Hall Lane	No	No	No	More homes in a heavily built-up area will only contribute to more congestion of traffic and people and the area.	I believe the council should find another location to build that flats.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Raymond Young				S449- Sainsbury's Hall Lane	No	No	No	The existing services - Schools, Doctors - Hospital can not cope with the existing population , the addition of extra housing will affect the well being and services available to existing residents.	Do NOT provide any additional housing , so the existing services can be improved for the existing residents		-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Andrew Stoddart				S449- Sainsbury's Hall Lane	No	No	No	I strongly object to the proposals. 80 homes on the sainsbury's site, 25 homes on the library site, 260 homes on the Larkwood site and 90 on the Albert Corner site (485 homes in total) is not being backed up with a corresponding improvement of public services. Clinics and waiting lists for Doctors appointments, dentists, schools, social care and hospitals are excessive even before we add the pressure caused by the new occupants of said homes.  Another reason for thinking these developments are not sound (and particularly sainsbury's site development in this case) is that any high rise will severely affect the quality of life of residents on Albert Avenue and Tuffon Road. The rear of these properties will be overlooked by the new development. Natural light will be lost and for some of these residents, their back garden is the only outdoor space they can enjoy either due to disability, age etc.  I feel the framework and local plan are very sketchy. There is very little detail. For instance, the public transport hub at Albert Crescent is to be relocated... Where? The traffic that would have used Cherrydown Avenue to access the mound? Where does that go? The traffic will undoubtedly increase on Old Church Road and Hall Lane as a result.  Another thing that is concerning is that none of these developments have parking included. Now, this may be a very expedient policy but the council can't truly believe that every tenant that potentially moves in will not own a vehicle. This leads to the problem of where are they going to park? Availability of parking spaces in the surrounding streets is already a big issue. Albert Avenue has a severe parking problem.		No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. Barbara Weinberg				S449-Sainsbury's Hall Lane	No	No	No	we have far too many houses in the borough and NO INFRASTRUCTURE stop with the blooming house building and improve what we have	don't need it simple enough	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				S449-Sainsbury's Hall Lane	No	No	No	proposed developments would be out of keeping with the area also no parking provision, and existing residents will be overlooked	build homes the same height / provide parking for all new homes / not take away existing parking for residents as a resident of Chingford / worry about over development	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Kay Anderson				S449-Sainsbury's Hall Lane	No Response	No	No	This a well used supermarket which local people can walk to. For the sake on only 90 homes, why remove such a well used supermarket? What the other plans to ruin Chingford, where will local residents be able to walk to and shop? As for cycle connections on Hall Lane, where will they go with cars parked both sides and buses?	Leave this space alone, the above proposals are unworkable, such houses will only add to the congestion of the area.	-	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Lan Ferguson				S449-Sainsbury's Hall Lane	No	No	No	I've lived in the borough for 89 years and my daughter just told me about the plans. Not right to not let people know.	Everyone that will have lives affected by this should be told. The buildings will dominate the area and harm existing residents light and life. The existing area has lots of similar housing and it is wrong to impose a high building on their doorstep. I remember Chingford Hall Estate being built and knocked down. How can it be sound to make the same mistake again, there is a duty to reassess not to waste their money on flats, no one chooses to live in especially since C-19 and the garage to space. How these proposals been updated to reflect the change in mindsets? Chingford Mount has little notice for people to go to for mental health. Where is speaking to local?	Yes	-	This response is noted.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.

				S449-Sainsbury's Hall Lane	No Response	No	No Response	My only comment is that the redevelopment site MUST provide a similar retail store as existing plus adequate carparking. The current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc, but small shops that already exist elsewhere (in a high street) but also parking to enable taking their bulky shopping home by car - this cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high warehouse-like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to significantly follow the mantra of providing high density housing at all costs on every "development site."	Address the issues raised above	-	-	The site allocation requires that commercial floorspace is provided as part of new development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
James King				S449-Sainsbury's Hall Lane	No	No	No	Where is the new school going to be built, can't see any details for an extra doctor's surgery seems like a lot of new homes without a mention where all the cars will be parked	Houses to be built to the same as existing houses in the area. No provision for schools, doctors and dentists. There has been no public consultation.	-	To keep the council accountable	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S449-Sainsbury's Hall Lane	No	No	No	Probably does comply with Local Plan but that doesn't make it conducive to the needs of residents already living in the area. I can't remember seeing a copy of the Local Plan. Was this featured in the WF Labour manifesto?		Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S449-Sainsbury's Hall Lane	No	No	No	I thought that each area was represented with a plan that had been approved locally by the residents		-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. George Styll				S449-Sainsbury's Hall Lane	No Response	No	No Response	If people can't drive to the town center, how are shops going to survive? Why so many flats? How about family houses or don't families matter to the whole Labour Council?		-	-	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Simitraj				S449-Sainsbury's Hall Lane	No	No	No	The big shops that draw people to the high road and keep people from driving to local shopping centres have been left out of the assets, these include Sainsbury's, Sainsbury's, Sainsbury's and Sainsbury's. The high road has already lost many of the banks that were located here and were strong assets as they drew people to access the facilities. Therefore these shops need to be prioritised to ensure Chingford Mount remains a local community high road that is used and of benefit to local people. These shops also draw people to the area who then access the cafe's, restaurants and coffee shops. Reducing amenities to draw people away from the high road will have a detrimental effect on the local community, the sense of belonging and community spirit.		No	-	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Vales Ejarte				S449-Sainsbury's Hall Lane	No	No	No	This proposal will totally block all natural light to my property and will completely overshadow my property and garden, resulting in a complete loss of privacy. Also this is the only car park in south chingford for shoppers	leave the site as it is! there is no type of housing development on this site that would not cause overshadowing and loss of privacy!	No	we all want to be involved... this is our life!	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/nightlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Vicki Beaver				S449-Sainsbury's Hall Lane	No	No	No	No facilities for increased police, schools, healthcare, car parking suitable retail outlets.	Healthcare facilities, Parking	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Paul Leahy				S449-Sainsbury's Hall Lane	No	No	No	Leave it alone, Chingford does not need new flats, there isn't enough room for new builds		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
-				S449-Sainsbury's Hall Lane	No	No	No	The Plan makes the area more dense (already high density), adds to lack of equality of the for those already here, discriminates against those with disabilities (in breach of the DDA 1995) owing to the Council's anti-car policy, adds to stress for residents who have problems with parking and traffic issues in local roads and adds to pollution with the imposition of high rise buildings, adding height and an even more run down feel to the area. The Consultation process has been unfairly conducted and not listened to local views. It has not been publicised effectively for those not on time and has appeared to take non responses as being in favour of the plans. The deadlines were requested to be extended but this has not been by much and only grudgingly. Any public meetings have been on Zoom (obviously because of the Pandemic) but not everyone is aware and many are without IT capability (particularly elderly people). Two residents had to publicise the consultation deadline themselves at their own expense, which is totally unacceptable and the Council's leaflet in early January 2022 was never delivered to all properties 1 mile radius of the Mount, which is regrettable and appears deliberate.	Utilisation of the vacant land by Dolly Bird shoes and at the junction of Highways Park Avenue and Chingford Mount Road and a more modified view of cars whilst accepting the need for improved cycling and walking. To remove the discriminatory imposition against those who are elderly or with mobility issues who need a car. Also an acceptance that some form of car parking is required for any new properties in future, which will help those already affected by car parking issues and standing up to the Mayor of London in this matter (he imposes his anti-car views too)	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. With regards to disabled parking bays, there will be spaces provided, the detail of which would be finalised as part of the planning application process.
Harriet Simmons				S449-Sainsbury's Hall Lane	No	No	No	The plan is too vague, so unable to comment on something which doesn't provide enough detail.	Build homes no higher than existing buildings. Ensure there is enough provision of statutory services, e.g., healthcare, education, parking etc.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.

If yes, please explain why?	Council's response
Robert Deering				S449-Sainsbury's Hall Lane	No	No	No	The Sainsbury's is at the western approach to Chisford Mount not the eastern, as you suggest. The planned shopping routes will not have room to replace the existing supermarket and will thus fail to fulfil the needs of the local population, especially with the hundreds of new homes planned. The existing transport facilities will have no room to successfully operate. The only space available for 30 homes is to build upwards. This 'tower block' will spoil the character of the area, transforming it from a pleasant suburb, to an inner city environment.	1) Reduce the amount of homes to be built to a level requiring a maximum of four stories, more in line with the local vernacular. 2) Maintain the local supermarket, especially as older residents rely on this facility. 3) Public transport facilities need to be planned with great care, as their use and area requirement will increase in the future. Cramping buses into the Sainsbury's site along with homes and shops is doomed to failure.	Yes	I would like to participate in the decisions taken in the development of the tower where I live.	The site allocation requires that commercial floorspace is provided as part of new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S449-Sainsbury's Hall Lane	No	No	No	No disability access	-	Yes		The Local Plan contains requirements for access in Policy 16 - Accessible and Adaptable Housing. This sets out that all newly built self-contained homes are to be accessible and adaptable in line with Building Regulation M4(2) and a minimum of 10% of new-build, self-contained homes are to be suitable for occupation by a wheelchair user or easily adapted for occupation by a wheelchair user in accordance with Building Regulation M4(3). This will be applied to the site allocations and ensure that they contribute to meeting housing needs.
T Darby				S449-Sainsbury's Hall Lane	No Response	No	No	This will take away the only supermarket within walking distance for thousands of local residents. Bearing in mind that the nearby Iceland is also slated for re-development. Where are all these new residents going to buy food? Local GP surgeries are already swamped, where are all these new residents going for medical care?	Keep space for two supermarkets (to enable competition) as currently exist.	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Antonio Zekic				S449-Sainsbury's Hall Lane	No	No	No	The area is going to lose this little parking facility that exists in Chingford. Given is not enough to alter the face of this community.	-	No	I wish to be rejected altogether.	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Sadak				S449-Sainsbury's Hall Lane	No	No	No	No consideration has been given for additional parking infrastructure. The area is congested already and by removing parking facilities, residents will not be able to shop freely.	-	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

If yes, please explain why?	Council's response
Karen McGill				S449-Sainsbury's Hall Lane	No	No	No	<p>Dear Sirs</p> <p>Contrary to the assurances of the Council, most people in the vicinity of Chingford Mount did not receive a leaflet about the Consultations in Sainsbury. We have a Facebook group of over 750 members where this has been confirmed.</p> <p>The Council assure me that they have ticked all the boxes in advising residents about the Consultations but they have only advised people online. We had no public meeting. We had a Zoom meeting where Sarah Parsons answered questions so quickly to a pre-emailed list of questions from our Facebook group representative, and no one could understand the answers. LBWF then refused to give us the promised meeting transcript, merely the "chat transcript. Obviously this did not answer our questions.</p> <p>The Zoom meeting capacity had to be increased but by the time it was, many residents could not get the link to join the meeting in time.</p> <p>LBWF insist they had public engagements to advise locals of their plans but Lady this was not the reality.</p> <p>Two Council representatives stood outside 228 Chingford Mount Road, subsequently moving on to Albert Crescent. They had nothing to make people aware of who they were apart from banners but one of the women had her hand under her scarf. There were no posters to advise who they were or what they were doing. A tiny advertisement on the Council website was all that advised residents but nothing for those not online. There was no guidance and the leaflets were advertising that day event. Banners were "openly available at Age Concern and 228 Chingford Mount Road but no one not online would have known. Posters have been displayed in the windows of 228 and the Community library but the plans are too small to read. <a href="https://www.sainsbury.com/online/consultations">https://www.sainsbury.com/online/consultations</a> but not all residents were aware of these plans therefore not enough effort was made to offer people the opportunity to respond. Plans are not specific enough to give a clear response. I will comment on what I feel the situation to be. Chingford Mount does not need a further 90 homes on this site, plus plans for the other two sites only built apart and where are the plans for parking on this site? This is a sub-urban area, not a town or city and already has a healthy population. Any efforts to expand that population would lead to overpopulation, which in turn leads to more crime, parking issues and more traffic congestion. Sainsbury's has long supported the local community. It is a very busy supermarket and has easy access for local elderly and disabled residents who are unable to drive or take public transport. Where are the plans for additional services, such as healthcare, including social services and schools? We do not want high-rise buildings as they would not fit in keeping with the area, would alter the skyline and devalue property. Residents do not want to be looking out at a tower block. Tower blocks only blend in with many other tower blocks.</p>	<p>No flats above height if existing existing buildings.</p> <p>Parking provision must be provided.</p> <p>No flats to overlook existing residents.</p> <p>Retail to remain same size as existing shop.</p>	No	-	This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.
Glynis Devis				S449-Sainsbury's Hall Lane	No	No	No	<p><a href="https://www.sainsbury.com/online/consultations">https://www.sainsbury.com/online/consultations</a> but not all residents were aware of these plans therefore not enough effort was made to offer people the opportunity to respond. Plans are not specific enough to give a clear response. I will comment on what I feel the situation to be. Conservative Councillors (Valley)				S449-Sainsbury's Hall Lane				Although it does not say so, this also includes the multi-story car park adjacent to the small Sainsbury's supermarket. At paragraph 3.46.1 under the heading site requirements it states that the site should accommodate town centre car parking. This must be a requirement. The Chingford Mount area has suffered as a retail centre because of the limited retail offer. This directly relates to progressively restrictive parking facilities. The Sainsbury's site is currently a three-story building bounded on its west and southern sides by predominantly two-story terraced housing and on its eastern side by two-story buildings comprising shops and upper flats. We believe that to increase the height of the Sainsbury's building would cause irreparable harm to the amenity of neighbouring dwellings. Without further detail it is impossible to estimate the height of the proposed building housing 32 new flats/maisonettes. Therefore, if this building is to be redeveloped, the numbers of proposed units should be dramatically reduced. We also note that under the heading "Development Guidelines" there are a number of automatic statements which have little meaning in the context of the site. We also note that this site has an intensification approach of "reinforcement" we do not believe that the description of the proposed development as 32 new flats can reasonably be described as reinforcement in the context of Policy 8 in the proposed local plan.		No	-	The further review and revision of Local Plan Part 2, followed by an additional Regulation 19 consultation will give the opportunity to fully review this site allocation in line with The Chingford Mount Area Framework and related consultation responses.  The two part Local Plan expects new development to be car-free in order to create safer places and improve air quality, unless it can be demonstrated through a robust Transport Assessment that additional car parking is required. Any additional car parking would have to comply with London Plan standards. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion and parking problems as well as significantly improving air quality.  The Local Plan also requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Ian McGill				S449-Sainsbury's Hall Lane	No	No	No	Please take note that in the Chingford Mount Draft Framework red structure your street maps are wrongly printed and labelled with incorrect names.  Albert Avenue is labelled as Orchard Close.  In itself this is not a big deal, however in the hands of a planning inspector not familiar with Chingford Mount they might well wonder why people living in Orchard Close have not opposed the Sainsbury's redevelopment, in fact they do not back onto it unlike Albert Avenue.  A small mistake to make but one that could have huge consequences.  Please therefore bring this wrong labelling of streets in Chingford to the attention of the planning officer. T.Gard				S40 - Former South Chingford Library	No	No	No	Throughout Waltham Forest you are building taller and taller buildings with no parking facility. You are also creating more shops. Because your rates are so high most of the shops at the moment are empty anyway. Who are going to rent these shops? Or will they sit empty too. The library building is part of the heritage in Chingford and should not be knocked down in Chingford the schools are fine, the GP's surgery, transport etc are not sufficient to take this kind of wealth of people. Also by taking more and more of the shops you are destroying what is a green, open air and village like feel to this part of the Borough. For years you have treated Chingford like an afterthought with little regard to us compared to the 'posher' parts of Waltham Forest, yet now you have run out of places to build you are keen to just build them high and just scrape it right. Everything is under too much strain already. Try building the resources first, including a hospital that we don't have to pay £12.50 a day to visit and then think of some sensible tower building rather than this.	Do not knock down the library and consider getting the shops locally based out rather than build more. Chingford and/or the shops look positively and they are all closed. Why build more? And do for the resources for more people, by getting a doctors appointment, they are always over crowded. As for the legal origin of asking people at these questions, we have to live with those decisions and ones like this not turns affect us every day, yet those who make the decisions and back the choices don't live here or have to get up with these schemes.			Through the evidence published in the Character Intension Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood concept, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow retail units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the Borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage and having residents located within the borough's centres ensuring that most people daily needs can be met within a close by to their front doors. This has knock-on benefits to health, an quality and easing congestion on the borough's road network. These policies also support our high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to other substantial harm or total loss of a designated heritage asset.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of flats. Variations are considered when they can be justified based on a number of factors including the location, area characteristics, design constraints, scheme viability and end-user affordability.
Terry Milnes				S40 - Former South Chingford Library	No	No	No	1. Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs; and is informed by agreements with other authorities, so that current need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. "No as LBWF should be seeking to preserve the 'local character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of moorish houses at the very edge of London. The gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1) 5,545 spaces 2,240 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 20% over the required target. Since the London Plan was drafted, cars to break and Covid, the number of people living in London, is estimated to have fallen by 2 million, or why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - The Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this site is a viable and well used community asset. It has an open and pleasant setting. The development of this site should not be contemplated until the facilities and public open spaces have been secured in this location, as we have been assured. We do not believe this is financially viable and therefore not deliverable.		No	no one is listening to the residents of Chingford - II	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intension Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded after London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 16,500 homes per year across London.  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of flats. Variations are considered when they can be justified based on a number of factors including the location, area characteristics, design constraints, scheme viability and end-user affordability.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Conservative Councillors (Valley)				S40 - Former South Chingford Library	No	No	No	This site is a viable and well used community asset. It has an open and pleasant setting. The development of this site should not be contemplated until the facilities and public open spaces have been secured in this location, as we have been assured. We do not believe this is financially viable and therefore not deliverable.		Yes		It is through the allocation of sites in Local Plan Part 2 that we can ensure site specific priorities like the provision of public open space and community facilities are embedded in planning policy.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.  All submitted planning applications that do not meet the London Plan 'test cases' definition on subject to viability review, which the Council has independently assessed.
Anne Parroy				S40 - Former South Chingford Library	No	No	No	Chingford Green is a conservation area. There are no high rise properties. The existing building should be updated to meet any health and safety or disability requirements. There is a need for another cafe within the library. There are already numerous cafes within metres of the library, many of which have facilities for disabled. There is no infrastructure in place for increasing the population in the North part of the Borough. Doctors, school places, hospital waiting lists, Parking, Chingford is a suburb of London not an urban setting with high rise buildings and built up area. That is part of its charm why people want to live there - visit. Additional people will bring additional cars to the Borough, causing congestion and pollution. There will not be 20 parking spaces allocated to these flats with electric charging points.				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car set up. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling Guidance for the developers sets out operational requirements and measures to enable safe, regular and efficient collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private cars/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP practices, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Conservative Councillors (various)				S40 - Former South Chingford Library	No	No	No	No	Chingford Mount We believe that there are opportunities to deliver new homes above existing retail uses in the Chingford Mount area as part of a design-led masterplan approach which individual owners can then use as a benchmark. We do not think that identifying individual sites within the S40 is helpful to this approach. This is also in a Flood Zone 2 - 3. We use no evidence that if this development and the Marmions Site (S46) development were to be implemented, that the natural environment could cope.		No	-	<p>This is noted, and the Council is committed to ongoing collaboration to identify opportunities for the future success and vitality of Chingford Mount and other local centres through the Chingford Mount Area Framework and emerging Town Centre Strategies.</p> <p>It is through the allocation of sites in Local Plan Part 2 that we can ensure site specific considerations around reduction of flood risk can be embedded in planning policy.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk can be successfully managed by following the process set out in Local Plan Part 1. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development would not increase flood risk either on or off the site</p>
Peter Loxton				S40 - Former South Chingford Library	No	No	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to sit a few buses because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider queuing more people into an already vastly overpopulated area? Barbara Gurhan				S40 - Former South Chingford Library	No	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, Chingford Mount is low rise area and proposed tall houses will be causing existing village feel and look. There is no provision for parking and I understand council aims to reduce car use but living in Chingford Mount for past 11 years would be impossible without a car. (for example) I drive my children to gymnastics classes in Loughton (public transport 30 minutes each way), I drive to stables in Sawdstone (no bus route, location is beyond 215) many birthday parties my children attended were outside of this area where I couldn't get to if didn't have access to car. One of the reasons why people move to Chingford because of its access to A406 and M25 hence why area has so many residents who are tradesman and need to do carry jobs, materials to do their job. Current plans don't include any provisions for schools or doctor surgeries, we already have long wait times for doctor appointments not to mention allopathic appointments, minimum 14 day wait.	New developments should be reduced in height to fit into the area, building houses should be considered as these are preferred by families. Make provision for parking, doctors, school and community centre for youth.	Yes	-	<p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. -				S40 - Former South Chingford Library	No	No	No	It does not appear that the local residents' opinion is considered at all.	The proposed building work is totally out of character with the area. The building is in a conservation area - a fact that is totally ignored. Also there are no car parking facilities for residents of the new flats. In addition, local doctors cannot cope with the amount of people requesting services so to add even more people is putting even more pressure on them.	No	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Leo Asthala				S40 - Former South Chingford Library	No	No	No	This letter is in strong opposition, specifically but not exclusively, to LBWF's 4 proposed development sites around Chingford Mount. Namely, 1. 1 to 50 new homes on Sainsbury and Council car park. 2. Up to 90 new homes on Albert Corner. 3. Up to 20 new homes on former South Chingford Library. 4. Up to 250 new homes on Larkwood Leisure Centre & Nursery site.  Whilst we are not totally against development, progress and more homes in the area, these should not compromise other established residents. The proposed developments would be out of keeping with the surroundings. Also this cannot be delivered with policy compliant levels of affordable housing.  If these flats are to be built they should be no more than 3 storeys. Any higher would be out of character with the area and would definitely disadvantage existing residents whose properties will be overlooked.  Parking for cars has already reached a separate level in Chingford despite many households being forced into forsaking their front gardens and going to the expense of paying for a drop kerb driveway. Any new builds in the area must therefore provide suitable parking for these new dwellings. To not provide this facility will, without doubt, cause massive parking wars with the already very limited street parking around residential Chingford Mount.  Whilst we appreciate reducing car ownership is something London is eager to achieve, many of the older residents around Chingford Mount may not be able to cycle or walk too far and rely on their cars to get around.	Build to max 3 storeys Provide ample parking Provide expanded infrastructure to cope with expanded population	-	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 52,646 new homes (1,755 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 50,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
TerezaFischer				S40 - Former South Chingford Library	No	No	No	There has been a total lack of consultation on this project, there has been no information distributed. Residents shouldn't find out that such large projects are happening from other residents. The plans for this number of homes can only mean the project will be within the end look out of place and will overlook a great many homes putting many residential properties in shade. There appears to be no provision for an extra GP practice, additional school places, parking etc.	Keep any new housing projects in line with the existing housing stock.	Yes	Residents need to be involved	<p>This document was consulted on at its draft stage between October and December 2020. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Stewart Newton	S40 - Former South Chingford Library	No	No	No	No	No	No	Proposed development would be out of keeping with the area and cannot be delivered with policy compliant level of affordable housing. No parking provision disadvantage people that rely on a car like older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, suffer loss of privacy, daylight/sunlight, additional demand for parking. Consultation was flawed as no leaflet/public meeting to advise residents, only an online zoom meeting. Shortage of doctors, hospitals, dentists, schools etc.	Build homes to height of existing buildings and provide parking, healthcare, education, etc.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, if new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Paul Willard	S40 - Former South Chingford Library	No	No	No	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.  It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No	-	Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Anthony & Thorne Up	S40 - Former South Chingford Library	No	No	No	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.  19. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 28(1).  18(1) A local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.  (2) The bodies or persons referred to in paragraph (1) are: (a) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments, it is not before the plan to be sound.  Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new large plant will be more efficient there will still be emissions. Although they suggest these towers will be removed (do have my doubts) or will there be others which could be more toxic.  A number of the proposed sites are right on the boundary of the LLEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LLEZ charge. But the rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even higher concentrations.  Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1950's tower block was removed as there were major problems with all the matters listed above.  If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In it was realised in the 1930's that people needed space and New Towns were	Yes	Because there are too many unanswered questions.	This response is noted.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, if new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-occupied and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is a identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Delrose Khan				S40 - Former South Chingford Library	No	No	No	People have not been advised by the Council of the proposal. The height of the building should be no higher than the existing building. The old library should remain as the building has local character and should not be demolished to make way for cheap flats. Local residents would lose their privacy, affecting their mental health. Your proposals are destroying the character of South Chingford. It would be better for this building to serve the local community.	The current building is in character and should be refurbished to keep its existing features. We do not want cheap flats on this site. Local residents would lose privacy and their mental health would be affected.		As it directly affects my property	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S40 - Former South Chingford Library	No	No	No	This library is a beautiful building and example of EB07's architecture and doesn't need to be bulldozed down. Why on earth should we lose a library that was put there for the benefit of people's learning? To put houses on this site is a disgrace and harms local people's way of life. - how on earth can that be legal or whatever way you wish to word these things. We dont have the infrastructure for more homes so how on earth can that be legally correct? awful idea of council to ruin this area.	This building should be preserved for Chingford and retained as a library. You should keep off of trying to change it or build more homes on it.	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. Key Voller				S40 - Former South Chingford Library	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling in doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no hallats or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents! Stop removing the few amenities that we have in Chingford!		-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
-				S40 - Former South Chingford Library	No	No	No	It's hard to get to GP services overcrowded, traffic is terrible, with no parking it will be worse.		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Mary Pickering				S40 - Former South Chingford Library	No	No	No	The proposed plan does not set out categorically exactly what community services will be there. The current site looks to address and meet large groups of service users particularly the elderly and the vulnerable. Cots to service users are affordable. This centre has gone a long way to promote health and well being and to reduce isolation. There is no mention whatsoever what happens to existing community services while the building work is going on. It does seem as if the proposed plans do not focus on building a strong and well community. I get a sense of feeling that we as a community has to fit in with the plans rather than for any proposed plans to meet the needs of the community.	is it safe and sound practice to constantly build large numbers of homes without first ensuring that the infrastructure is in place w good transport links, proper parking for residents, visitors and people with disabilities, adequate nursery, primary & secondary school provision with further education/training colleges, maternal and child health services, GP practice, dentists, youth services, services for the elderly and disabled, etc.		Essential that public is fully consulted and that information is readily and easily accessible to the whole community.	The London Plan (2021) sets a 33 year minimum housing target for Waltham Forest of 12,046 new homes (1,544 per year) based on a London wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,883 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,812 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Clifford Gray				S40 - Former South Chingford Library	No	No	No	This area is not suitable for new housing. It is too close to existing properties and will affect the lives of existing residents by being overly populated meaning loss of privacy and affecting the value of the surrounding properties. It will also increase the demand for parking.	The property should be updated to have a new library with facilities for Age Concern with a hub for Senior Citizens. Also a revamp of the existing garden and seating.	Yes	I do not agree with the proposed plans as they not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Zahraa Kabeem				S40 - Former South Chingford Library	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking. Furthermore, this consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, clinics in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
				S40 - Former South Chingford Library	No	No	No	This development will cause the local area to be overcrowded and neighbouring properties will be extensively overlooked by a new development. The area surrounding is already very congested and local services/facilities will be overly subsidised.	Better use of the library to be restored and renovated so the local community can use it.	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Defrose Khan				S40 - Former South Chingford Library	No	No	No	This proposal would cause overcrowding in an area where it is already congested and heavily populated. The development would block light and overlook neighbouring properties. Local services such as doctors, dentists, schools are already over-subscribed and increasing housing in the area would cause heavier burden on local services as proposals do not make provisions for this. Existing property value would also decrease. Level of crime would be increased by higher population in the area and social surroundings.	There is nothing that would make this proposal compliant for the reasons outlined above. It would be better for the existing building to be renovated for the local area to use again as a library or community centre.	-	As it directly affects my property	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
D Nurse				S40 - Former South Chingford Library	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with the policy compliant levels of affordable housing. There are no parking provisions, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, loss of daylight/sunlight, additional demand for parking, additional traffic congestion and pollution. The consultation is flawed as there has been no hooters or public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools.	Build homes and structures to the height of existing buildings. Developments should be in keeping with the area. Provide necessary parking and amenities. Provide additional services to support developments such education, transport links, healthcare and recreation.	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
										No

If yes, please explain why?	Council's response
				S40 - Former South Chingford Library	No	No	No	all very nice but where is the car parking for the new homes	build homes to the height of existing and provide parking not take it away	-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Dr Shabbir Khankar				S40 - Former South Chingford Library	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking.  Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting.  There is a shortage of doctors, hospitals, dentists, schools in the area and this would cheapen overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	-	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2016).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Harriet Simmons				S40 - Former South Chingford Library	No	No	No	The proposal is very vague and written in jargon. It's difficult to ascertain what is being proposed??	Build no higher than existing surrounding homes, provision for statutory services e.g., health, education and parking for new homes.	Yes	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ian Magill				S40 - Former South Chingford Library	No	No	No	I believe there is a requirement not to cause harm to the amenity of existing residents. Properties in local area will be dominated by this development being a few metres from the rear boundary with overlooking and loss of privacy.	I believe there is a requirement not to cause harm to the amenity of existing residents. Properties in the local area will be dominated by this development being a few metres from the rear boundary with overlooking and loss of privacy.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. If yes, please explain why?	Council's response
A)				S40 - Former South Chingford Library	No	No	No	How can you even think this is okay to build flats on this site. The ex library should be put back & we also need a place to get advice, a club for the elderly, clubs for kids, young & old. This site would be ideal. There is nothing in Chingford & taking this away will be taking the heart of Chingford away. The other areas of the borough have everything, Chingford has nothing!!!! When I needed to see someone from the citizens advice bureau, I had to travel to Walthamstow. This is so wrong, every area should have somewhere to go to get advice etc, some people have disabilities etc. & can't travel. I suffer with my physical & mental health & coming out of the area/my comfort zone really makes me poorly.		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Mr's Melanie Benfield				S40 - Former South Chingford Library	No	No	No	For a start where was your public consultation on this plan? I knew nothing of these plans. Why were the Chingford Mount residents not informed and given the choice to have a say by you sending the details to all the residents? If you build 25 new homes on this site where the incredibly useful Age Concern currently housed in the library building going to go? There is nothing in the local area for older folk apart from this, it is so important to provide face to face consultations. If you build 25 new homes where are these new residents going to park? Are you going to provide parking spaces for all these residents or are they going to have to park on the surrounding streets, which are already crowded? The dentists, doctors, hospitals and schools in the area can barely cope with the population as it is, it is wholly unfair to the local residents to keep providing housing without providing more healthcare providers and schools.	Parking, healthcare, schools and the impact on local residents must be taken into consideration.	No	-	This response is noted. A draft version of this document was published for consultation between September and December 2020. This consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Deben? Mattar				S40 - Former South Chingford Library	No	No	No	Leave Chingford alone!	Leave Chingford alone!	No	No one wants your flats	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Adam Erin				S40 - Former South Chingford Library	No	No	No	It is not clear what is being planned, it is not publicised widely for the local residents' pursuits and feedback.	Please provide some indication of what is being proposed, how the 25 unit will be fitted, how many floors are being planned, parking and access arrangements for the new residents, is the development mixed tenure, what is being proposed for the immediate neighbours who will be affected by construction, access issues for school children who use the footpath...	No	for openness and transparency	This response is noted. This document was published for consultation at Draft Stage between September and December 2020. This consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.
Neil Hooper				S40 - Former South Chingford Library	No	No	No	Yet again, 25 homes on a plot this size is completely ludicrous. More over crowding, more pressure on the already massively overburdened GP services	Reduce the number of homes!	Yes	To ensure residents aren't ignored as usual.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Kay Anderson				S40 - Former South Chingford Library	No Response	No	No	We do not have a library in South Chingford? Why is council taking our amenities while improving/ adding to amenities in Walthamstow?	Why is the council building housing in excess of the Mayor of London's proposals? Greed maybe?	Yes	-	There is a community library on Old Church Road, Chingford.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? David Freyne				S450 - Former South Chingford Library	No	No	No	<p>The proposal does not factor the significant light and noise pollution that will seriously impact neighbouring buildings. Particularly the grade 2 listed Carfax Cottage which is massively exposed.</p> <p>Additionally, the building threatens to damage the structure of the cottage which is a key building to the heritage of the area.</p>	<p>There should be no windows or balconies to the right of the building that will overlook the neighbouring houses, invading privacy and causing significant light and sound pollution. The physical and mental well-being of current residents needs to be central to the plans.</p> <p>The height of the building needs to be restricted to be in keeping with the heritage area. And a guarantee needs to be made that this will not change during the building process, as has happened with other builds in Waltham Forest.</p> <p>A guarantee needs to be made that the proposed high value fixtures of the exterior architectural plans are binding and will not be replaced with cheaper materials, as has happened with surrounding sites in Waltham Forest.</p> <p>A survey needs to be undertaken to make sure the surrounding buildings will not be structurally undermined, in any way, before any plan moves further.</p>		As an immediate neighbour to the site I am deeply concerned about how the proposed plans will impact me, particularly the risk of greatly increased light and noise pollution.	<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of daylight/sunlight.</p>
Marilyn Gould				S450 - Former South Chingford Library	No	No	No	The old library building now houses the Age UK Waltham Forest charity which gives valuable help to the older community in Waltham Forest which is important at any time but has been giving essential help during the Covid lockdown.		Yes	-	<p>This is needed. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Terry Milnes				S450 - Former South Chingford Library	No	No	No	Out of character with surrounding area. Destroys a beautiful building which should be listed. Worthwhile inadequate consultation with local residents.	Use existing building for community projects. Youth centre, under 5s facility, soup community services.	No	no one is listening to the residents of Chingford - !!	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p>
Paul Leahy				S450 - Former South Chingford Library	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds		Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Jennie Heath				S450 - Former South Chingford Library	No	No	No	Any development should make use of the current building and not be raised to the ground for another box building		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
-				S450 - Former South Chingford Library	No	No	No	LEWY seem to be deliberately letting perfectly good solid old buildings around the borough run down so they can claim they are not fit for purpose, or too costly to refurbish. So they can introduce dull characterless steel and glass monstrosities, as has happened in other areas of the borough. Completely changing the character of the areas involved. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Very much doubt!! Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT		-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>This response is noted.</p>

If yes, please explain why?	Council's response
John Sadlers				S450 - Former South Chingford Library	No	No	No	Local communication has been very poor this development has not had a proper consultation older residents have been excluded by virtue of its on line nature. Blue ticking comes to mind. The build is of local and historic significance and demolishing it is unnecessary when it could be used to promote the thriving of community buildings not in keeping with local area	You need to have a property consultation with local residents	Yes	The system needs local input	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers. In addition to this, the council advertised the consultation in the Local Newspaper and throughout the consultation accepted responses by email or post.
Kerry Walsland				S450 - Former South Chingford Library	No	No	No	Not taking local amenities into consideration Not enough spaces in local schools, doctors, hospitals etc to cope with the additional demand the plans to take away amenities such as libraries, gyms etc will ruin the community feel. The lack of amenities will lead to more community problems. The additional homes will also bring additional vehicles. In a time when you are asking for less local traffic, how will this be achieved with all the additional homes??	Reinstate the library as use as a library, community hall, a space that can be enjoyed by all local residents	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
David Downs				S450 - Former South Chingford Library	Yes	Yes	Yes	The outline does not depict private vehicle arrangements-how this will be made for up to 90 cars in this space. Please advise.	Identify parking please	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S450 - Former South Chingford Library	No	No	No	There has been no public meeting, they haven't publicised the consultation enough concentrating mainly on IT communication which excludes many residents, thus discriminating against them, there has been little information in Waltham Forest council news and limited leafleting	By improving the way the information has been circulated and making the responses easier to make. By making the whole process much easier to understand and respond to.	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
James King				S450 - Former South Chingford Library	No	No	No	No provision for services	-	Yes	To keep the council accountable	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S450 - Former South Chingford Library	No	No	No	Building additional homes will put more pressure on the already overstretched doctors, schools etc. Car parking is already a problem and this type of development will only make it worse.	Upgrade the infrastructure before building new homes.	Yes	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
David John Anderson				S450 - Former South Chingford Library	No	No	No	will overlook existing homes	leave alone	Yes	simply to judge	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Robert Tatum				S450 - Former South Chingford Library	No	No	No	On page 122 it is stated that, within 800 metres, there are no places of worship, community centres, shop frontages, etc. This seems to me to be the clearest example of where the statements are inaccurate, given the proximity to a town centre and two places of worship - each with community halls.		No	-	The plan will be reviewed for any statements which have been identified to be inaccurate, and updated to reflect the correct position for the submission version.
Antonio Zelek				S450 - Former South Chingford Library	No	No	No			No	I wish to be rejected altogether.	This response is noted.
				S450 - Former South Chingford Library	No	No	No			No		This response is noted.
				S450 - Former South Chingford Library	No							This response is noted.
Conservative Councillors (General)				S450 - Former South Chingford Library	No			We do not believe the designation of this site to be effective, against a requirement for the replacement of the community use and the open space, which are likely to make any development possible, without imposing a form of development on the site totally out of keeping with the character of the homes adjacent to it.				The Local Plan requires a character-led approach to intensification, in accordance with London Plan Policy D1. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. All submitted planning applications that do not meet the London Plan "test to test" definition are subject to viability review, which the Council has independently assessed.
				S450 - Former South Chingford Library	No	No	No					This response is noted.
				S450 - Former South Chingford Library	No	No	No	LBWF are deliberately letting perfectly good solid old buildings around the borough rot down, or they can claim they are not fit for purpose, or too costly to refurbish. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT			This response is noted.
Tast				S450 - Former South Chingford Library	No Response	No Response	No Response		Officer testing system			This response is noted.
Mark Shelfrake				S450 - Former South Chingford Library	Yes	No	Yes	I think the library building is of local historical interest and as such should be retained.	Convert the old library into flats; but keep this historical building.	No	To ensure views of near neighbours are fully taken into consideration	This response is noted.

If yes, please explain why?	Council's response
				S450 - Former South Chingford Library	No	No	No					This response is noted.
				S450 - Former South Chingford Library	No	No	No					This response is noted.
Robert Dearing				S450 - Former South Chingford Library	Yes	Yes	Yes	The current library building was constructed in 1995 and is a key local heritage asset with great cultural significance. The facade of the building should be retained in any development. Age Concern is a key local facility and older residents should be at the top of the priority list in this development. As a former educational establishment the community aspects of this group of buildings must also be given priority.	The housing aspect of this development should prioritise elderly residents.		I would like to participate in the decisions taken in the development of the town where I live.	This comment is noted.
Sarah Rose				S451 - Albert Corner	No Response	No	No	90 homes is too much on this site. I walk past it a lot and believe in order to build 90 new homes they will have to be pretty high, possibly too high to complement the existing area. Nothing is mentioned about parking so presumably there will be no cars. This is a very congested area so it is tight and tight, needs more infrastructure and work on traffic rather than new homes and more demand on services and more cars. This area has a lot of pollution. Building more new homes will presumably have an eight more cars will add to this. It is not clear how Albert Crescent is going to be pedestrianised. There is a small through road. There is a small through road. This development to what is meant by pedestrianisation here? It is not clear what will happen to existing provisions therefore the Supergrid and Iceland. Iceland in particular is a popular and well used store and important to this community.	Build fewer homes. Make sure any new homes have corresponding parking and top up parks for electric vehicles. Keep building in the context of current buildings and heights. Build the corresponding infrastructure. This would be a good site for a new doctor's surgery. Actually go door to door around nearby streets so that elderly people's views are taken into account. Make sure that any building works respect and honour the environment. Yes, trees are always good as long as they won't damage buildings. You talk about building play areas for children. How about dog's and dog owners' needs? They will need access to open grounds/park/field away from children and general congestion, ideally with their own area.	Yes	No but I imagine some people would.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  The Local Plan states that the loss of existing social or community infrastructure is usually not permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Terry Milnes				S451 - Albert Corner	No	No	No	1. Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. 2. No. LBWF should be seeking to preserve that local character of the area residents chose to move to Chingford & Highgate Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg S64) states 12,640 new homes over 32 years and LBWF is proposing 27,000 new homes by 2026 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build so many possible spaces? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Forensic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this need is met and considered. No parking facilities or additional Community spaces for people and well being considerations. Environmental impact of building work and increase in traffic. Roads are already congested in the area and schools over subscribed. Lack of meaningful consultation, poor zoom meetings which residents could not access, plans not displayed properly. No consideration to accessibility of residents to give feedback.	Low story housing with parking provision. Investment in community well being spaces and meeting places for groups. Further investment in schools and doctors.	Yes	So far consultation has been not evident.	The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of identification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sites. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.  In Local Plan Part 1, Policy 22 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any divergence from these clauses that would lead to other substantial harm or total loss of a designated heritage asset.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of identification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  New development will be required to contribute towards the provision of additional local and community infrastructure.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the uptake in Covid-19 cases at the time of the consultation, the Council decided to hold all engagement meetings online for the safety of our residents and officers. This document was consulted at its draft stage between October - December 2020 where the Council held in-person engagement events in the South, Central and North parts of the Borough.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Conservative Councillors (General)				S451 - Albert Corner				<p>The designation of this site has changed from "Reinforcement" to "Transition" between the R18 and R19 versions of the LP2 consultation. We oppose this. The parallel masterplanning exercise showed a building of new stores on the Old Church Road frontage and six stores on the New Road frontage. We do not believe the designation of the site should be "effective" as development in this form would be contrary to the NPPF requirement for development to be in keeping with the character and appearance of an area. It would also cause significant harm to adjoining homes, particularly those in Brook Crescent whose rear gardens would be both over-shaded and over-looked.</p>			No	<p>The identification of sites as appropriate for a Transformation, Transition or Reinforcement approach to character-led identification aligns with evidence in the Characterisation and Intensification Study (2020), and design-led area based masterplans, feasibility studies and area frameworks. Following adoption, all proposals for redevelopment will be subject to the policy tests relating to character-led identification and high quality design set out in Local Plan Part 1. Local Plan Part 2 gives the opportunity to establish additional site specific requirements and guidance to ensure that development of the highest quality and appropriate for its location.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>
Mika Chimes				S451 - Albert Corner	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plans may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LP2 element of the Western Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP1) for 2020-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees showed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing aspiration (of a) of c. 3000 homes pa. While LBWF has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the borough will meet expressed housing need. More residential development on the brownfield sites in the borough is not being delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an in zoom meeting. Shortage of doctors, hospitals, dentists, schools ect.</p>	<p>With reference to site S451 the chief driver in bullet point order is to provide 90 homes. It is unclear how that many homes can be provided on this site. One choice might be to build high but research the UCL (2017) High rise buildings energy and density has demonstrated above 6 storeys energy was increasingly difficult to reconcile with the boroughs green policies.</p> <p>While part of the site is derelict and could readily be re-developed, the corner site includes two retail units, Iceland and Sainsbury. According to the Alison Young 2013 Retail and Town centres survey 29% of visitors to the Iceland that come to shop at Iceland. Loss of this lobby might affect footfall at the Iceland.</p> <p>The same survey recognises the poor design quality of the Iceland site, but for some reason does not mention the similarly poor quality on the opposite corner of New Road. A historic view would suggest this should be considered at the same time. High quality landmark buildings would seem equally important on both corners of this junction.</p> <p>It was clear from the comments observable on Complanonline on this location, and from comments at the online consultations that many residents were concerned about the impact of housing development at this site on parking and public transport demand, as well as on local/social infrastructure. It was clear from the consultation presentation that it is assumed there will be no parking provision for new residents beyond disabled access. Objectors felt the residents will own private vehicles and therefore clog up existing shopping centre car parking; this could possibly be accommodated at the Sainsbury site but perhaps not if the proposed development takes place there.</p> <p>While a car is a big ask given that there is no rail station within easy walking distance and bus journeys to the nearest stations are subject to delays in the rush hour. Moreover residents may want to work in Essex and Hertfordshire for which a car is essential. The existing cultural facilities are also subject to a similar problem. Field homes to height of existing buildings, provide parking, healthcare, education ect.</p>	Yes	<p>do not feel the online consultations enabled attendees to participate fully in the time frame allowed.</p> <p>Positively prepared.</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified.</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>• Evidence of participation of the local community and others having a stake in the area, and</li> <li>• The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>• Sound infrastructure delivery planning.</li> <li>• Having no regulatory or national planning barriers to delivery;</li> <li>• Delivery partners who are signed up to it; and</li> <li>• Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough", in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Susan Marsh				S451 - Albert Corner	No	No	No	<p>Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an in zoom meeting. Shortage of doctors, hospitals, dentists, schools ect.</p>		Yes		<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing(s)?	If yes, please explain why?	Council's response
Ian McGill				S411 - Albert Corner	No	No	No	<p>I feel that the Site Allocation Declaration is not legally compliant, not sound and does not comply with the duty to cooperate.</p> <p>This is in strong opposition to the proposed developments around Albert Corner.</p> <p>To achieve the number of homes planned to be built on these sites, the only way of fitting them in each area would be to go up in the air with high rise!</p> <p>This form of housing is totally out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residents' Chingford Mount and would disadvantage older people.</p> <p>If the 90 homes at Albert Corner are built then residents of Brook Crescent and surrounding streets which back on to the site will be very affected. By building 90 flats on this site, obviously covered by the plan, owners, would completely destroy residents' way of life. Steing in the garden would be a thing of agony not pleasure as it is now.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Once these homes are built will there be extra doctors, hospitals, dentists and schools or just hollow promises to do so?</p>	<p>Please only build homes to the height of existing buildings and no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats so as to not get a doctor's/dentist's appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents.</p> <p>We do not want to lose our existing supermarkets and certainly do not want these to be replaced by smaller ones.</p>	No		<p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified This means that the Local Plan should be based on a robust and credible evidence base including: Market/Market Testing: the choices made in the plan are backed up by facts. Evidence of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</p> <p>Effective This means the Local Plan should be deliverable, requiring evidence of: Sound infrastructure delivery planning. Having no regulatory or national planning barriers to delivery. Delivery partners who are signed up to, and Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the Local Plan. <a href="#">Local Plan Review should be consistent with National Policy, the NPPF, and the London Plan, as set out in the following table:</a></p>
Anthony G Thorne Lip				S411 - Albert Corner	No	No	No	<p><a href="#">Consultation Evidence Document for the Local Plan 2021</a></p> <p>The question asks to provide a definition of the law to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 22 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 16, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>11.12(a) Local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are:</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>based on the personal knowledge of the location and the problems associated with the development (I do not believe the plan to be sound)</p> <p>Currently Chingford suffers from a major problem with emissions from the Emersons Wake plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have not been removed do we have doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the L2E zone and downwind of the road meaning that will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the L2E charge. But the rest of the area will also be subject to these increases and the proposed against the natural air flows possibly result in pockets with even higher increases.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases in anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problem with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with it and the matters listed above.</p> <p>If we took to the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In that it was realised in the 1920s that people needed space and open spaces were built with the aim of providing a better environment. This was the 1920s - Four high rises is supposed to stop everybody from having a sky!</p> <p>I have lived in WF all my life and Chingford over 40 years yet unless you are a surveyor or architect you don't get a 5/10. I have noticed why this is not suitable and why I don't think it is compliant, I am sure you can agree that with an alternative plan.</p>	No	<p>Because there are too many unanswered questions</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a reduction in carbon emissions, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is a identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L2E planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
T Gaud				S411 - Albert Corner	No	No	No	<p>Throughout Waltham Forest you are building taller and taller buildings with no parking facility. In Chingford the schools are full, the GPs struggling, transport links are not sufficient to take this kind of masses of people. Also by taking more and more of the skyline you are destroying what is a green, open and village like feel to this part of the Borough. For years you have treated Chingford like an afterthought with little spent on us compared to the 'nicer' parts of Waltham Forest, and now you have run out of places to build you are keen to just build them high and pack people in tight. Everything is under too much strain already. Try building the houses first, including a hospital that we don't have to go £12.50 a day to visit and then think of some sensible lower buildings rather than this.</p>	<p>build homes to height of existing buildings, provide parking, healthcare, education, etc.</p>	No		<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Gary Bagley				S451 - Albert Corner	No	No	No	Proposal is out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing. There is no parking provision and it will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, with a loss of privacy, daylight/sunlight, also there will be an additional demand for parking. The consultation is flawed, as no leaflets / public meeting to advise residents, only an online Zoom meeting. There is also a shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings only, provide parking, healthcare, education, etc.	Yes	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Mark Knowles				S451 - Albert Corner	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide adequate parking, healthcare, education etc.	No	We need to know what is planned as we may believe it to be unsuitable and need changes made.	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Stephen Stocker				S451 - Albert Corner	No	No	No	Chingford is a low skyline area without high rises. The local plan is not sound or effective, as it completely disregards this. This also means the development put forward, goes against planning regulations in the sense that they will impact light and views. Subsidising properties, but not more factories, school places, etc, is misguided. The developments put forward do not fit into the neighbourhood and could lead to poor quality design. In South Chingford, there is no tube/train station and yet the proposals in the IDP will cause harm to the area. The siting of the sites are not correct either for example the New Road site is not Transitional for the reasons stated above. No justification has been provided for the density of the buildings/ number of units.	Reduce the height. Provide family homes, as against cramming in flats. There is no evidence that these proposals are in line with the need.	Yes	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Bill Rodney				S451 - Albert Corner	No	No	No	It has negative impacts on public transport provision in Albert Crescent if it is over development. It will increase pressure on car parking spaces causing pressure on surrounding residential areas. This should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.	Allocate housing sites on land where a more human scale and green space is possible. Retain existing properties and extend with sustainable materials. Consult more widely on implications and details for Albert Crescent	No	-	<p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>In April 2020, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, the Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.</p>
Kay Anderson				S451 - Albert Corner	No Response	No	No	90 homes on that corner means tower block - ruining Chingford's high street and an Island and Superhub stores, the only ones in all of Chingford (never mind parking and lack of infrastructure planning). Council is building excessive housing, needs to be thoroughly investigated. These plans developed under Claire Clapham - see why the "reimagined" ..	Council needs to be thoroughly investigated re any planning as consent from top down - none of these plans bring any benefits to Chingford citizens.	No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>
Paul Wallard				S451 - Albert Corner	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of building and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Richard Snape				S411 - Albert Corner	No	No	No	By making such narrow restrictions on how the public can respond to a consultation this process automatically fails in its duty to consult as it renders it probably impossible for a non expert to make a compliant response. More specifically this site allocation fails to respect the character of the existing street scene. 50 homes could only be achieved on this site with a building of excessive height, so setting that as an objective is in conflict with the duty to respect the existing character of the area.	A site requirement indicating a maximum of four stories in order not to dwarf the existing predominantly three storey buildings, would place a reasonable constraint on over development.	-	-	This response is noted.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
-				S411 - Albert Corner	No	No	No	Chingford does not have provision for more people! Not enough Doctors, Schools, traffic in New Road (obscure). There is very limited parking and facilities in Chingford. I have been a resident for 60 years when Chingford belonged to Essex, it was a village 'Net' a London borough!!!		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Karen Nash				S411 - Albert Corner	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	-	-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasizes the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  This response is noted.
Conservative Councillors (Valley)				S411 - Albert Corner				Although this is not in Valley ward, we feel that it deserves comment from the Valley Ward Councillors, partly because of its proximity to Valley ward but also because it mentions: "Contribute to transforming Albert Crescent into a pedestrianised public space with green amenity and play space (enhance the public realm at the junction of Hall Lane and Old Church Road)". There has been some discussion and it has been indicated in other documents (again separate to this document) that the bus terminus at Albert Crescent will be moved, there is no information on where it will be moved to and may disappear altogether. It is well established that development, particularly intense development, should take place around transport hubs. If the transport hub at Albert Crescent is to be removed, we would argue there is no justification for this kind of development proposal.		No	-	The further review and revision of Local Plan Part 2, followed by an additional Regulation 19 consultation will give the opportunity to fully review this site allocation in line with the Chingford Mount Area Framework and related consultation responses.  The two part Local Plan expects new development to be car-free in order to create safe places and improve air quality, unless it can be demonstrated through a robust Transport Assessment that additional car parking is required. Any additional car parking would have to comply with London Plan standards. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion and parking problems as well as significantly improving air quality.  All submitted planning applications that do not meet the London Plan "Net Car" definition are subject to viability review, which the Council has independently assessed.
Stephen Tyler				S411 - Albert Corner	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Vicki Beaver				S411 - Albert Corner	No	No	No	No facilities for increased police, schools, health care, car parking suitable retail outlets, to not in keeping with the area. No car parking in a already busy road. It not needed or wanted I. Will block light to homes and gardens.	Don't build	-	-	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/nightlight.</p>
R Stoddart Esq				S411 - Albert Corner	No	No	No	This building would be a nine storey eyecore, a monstrosity in the area. It would be completely not in keeping with local buildings, is, shops with maybe two flats above or houses with gardens. Adjacent houses will be overlooked, they will lose their privacy and how neighbours from the flats peering into their gardens.  I also feel that the Council have not made their proposals widely known to local residents. Most residents do not even know what the proposals are. Where are the leaflets to let people know what is happening? There have been no meetings.  People not online have no clue what you are planning. Many residents will suffer severe anxiety about this but no one seems to even want to let them know about it.	Any new developments should be kept to the same height as existing buildings.  Local residents should be notified by post about the proposed developments. They should not find out when the demolition people arrive	No	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in the number of Covid-19 cases being recorded at the time the Council decided to hold the engagement meetings online for the safety of our residents and officers.</p>
Guy O'Neill				S411 - Albert Corner	No	No	No	How does a tower block contribute to the mount at Chisford 7 Parking?	leave it as is and improve , update shopping and more support for local business	No	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Anthony G Thorne Lip				S451 - Albert Corner	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012 (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 34(1). 18(1) A local planning authority must" (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are" (a) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed do have doubts as will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. But the rest of the area will also be subject to these increases and the proposed use of the natural air flows possibly result in pockets with even higher concentrations. Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density bring about the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hill Estate where the 1960's tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the it was realised in the 1920's that people needed space and New Towns were built with more open space and green areas. This is the 1960's a</p>	Yes	<p>Because there are too many unanswered qu</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connectors must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

Radar Quorals				S411- Albert Corner	No	No	No	The site is adjacent to residential area which will be impacted significantly. A nine storey building at the current site will be out of character of the whole surrounding area. There is insufficient parking available currently and no additional provision has been taken to accommodate parking for the additional 90 homes. Residents at Brook Crescent especially 84-108 addresses will have loss of privacy, daylight/sunlight. This scheme has not been made available to the wider community of Chingford and discriminates against the older community of Chingford which makes a greater proportion of the community in Chingford due to having these proposals made available online only. No public meetings have been held to advise the community. The current infrastructure does not support this scheme either. There is already shortage of school places. The GP clinic are overwhelmed with appointments provided with a waiting time of over 2 weeks. Public transportation has not been updated to accommodate the proposed plans.	Build homes at the height of existing buildings. Provide additional parking, additional services to education and healthcare.		-	<p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Robert Deering				S411 - Albert Corner	No	No	No	Any high rise development will contrast with the current low height aesthetic at Chingford Mount, and spoil the very enhancement you are trying to create. Putting shoppers, diners and planted areas in the shade of high buildings will create an oppressive atmosphere on the high street. Lack of sunlight and wind tunnel effect will reduce the success of planting and the experience of shoppers and diners.	Ensure that building height does not exceed four stories. The council must also assume the responsibility to maintain planted areas, and not leave it to volunteer groups. The Metropolitan Police and emergency services must be consulted to ensure that they can cope with a larger population, and successfully access the new built up areas in the case of emergencies.		I would like to participate in the decisions taken in the development of the town where I live.	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Karen McGill				S451 - Albert Corner	No	No	No	<p>Contrary to the assurances of the Council, most people in the vicinity of Chingford Mount did not receive a letter about the Consultations in January. We have a Facebook group of over 740 members where this has been confirmed.</p> <p>The Council assure me that they have ticked all the boxes in advising residents about the Consultations but they have only advised people online. We had no public meeting. We had a Zoom meeting where Sarah Parsons answered questions so quickly to a pre-emailed list of questions from our Facebook group representatives, and no one could understand the answers. LBWF then refused to give us the promised meeting transcript, merely the "chat transcript. Obviously this did not answer our questions.</p> <p>The Zoom meeting capacity had to be increased but by the time it was, many residents could not get the link to join the meeting in time.</p> <p>LBWF insist they had public engagements to advise locals of their plans but sadly this was not the reality.</p> <p>Two Council representatives stood outside #228 Chingford Mount Road, subsequently moving on to Albert Crescent. They had nothing to make people aware of who they were apart from banners, but one of the women had hers underneath her scarf. There were no posters to advise who they were or what they were doing. A tiny advertisement on the Council website was all that advised residents but nothing for those not online. There was no poster and the banners were advertising a road event. Banners were "apparently" available at Age Concern and #228 Chingford Mount Road, but no one not online would have known. Notices have been displayed in the windows of 228 and the Community Library but the plans are too small to read. How can residents comment on the plans when they don't know what they are? It's a disgrace!</p>	<p>Flats should be no higher than existing buildings.</p> <p>LBWF should not exceed government directive of number of flats to be built.</p> <p>Flats should be built on existing derelict sites, ie site at junction near Morrisons in Chingford Mount rd and the site on the corner of Templeton Ave and St John's rd but built to less storeys high.</p> <p>LBWF should provide sufficient parking for any new flats.</p> <p>More doctors, dentists, schools and hospitals should be provided with any new flats.</p> <p>Do not build high rise as it is not good for mental health of residents and causes untold social problems.</p> <p>Do not build high rise flats next to existing residents causing loss of privacy, light, sunlight.</p>	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Doreen Matier				S451 - Albert Corner	No	No	No	<p>STOP BUILDING MORE UNWATES HOMES. Over priced. No parking. Cheaply built flats. Enough You are ruining the area.</p>	<p>STOP BUILDING MORE UNWATES HOMES. Over priced. No parking. Cheaply built flats. Enough You are ruining the area.</p>	No	No one wants your flats	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 23,840 new homes (1,264 per year) based on a London wide assessment of capacity/available sites in 2021/26. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a neworwity alleviation of congestion, parking problems and improve air quality.</p>
Karen McGill				S451 - Albert Corner	No Response	No	No Response	<p>There is a general requirement not to cause "harm" to the amenity of existing residents.</p> <p>Properties in Albert Avenue will be dominated by this development a few metres from their rear boundary with over-looking and attendant loss of privacy.</p> <p>A 9 storey block would be very ugly and not in keeping with local buildings, ie, houses with gardens and low rise shops.</p>	<p>There is a general requirement not to cause "harm" to the amenity of existing residents.</p> <p>Properties in Albert Avenue will be dominated by this development a few metres from their rear boundary with over-looking and attendant loss of privacy.</p> <p>A 9 storey block would be very ugly and not in keeping with local buildings, ie, houses with gardens and low rise shops.</p>	No	-	<p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>
Glynis Devlin				S451 - Albert Corner	No	No	No	<p>Not enough residents were made aware of these plans therefore causing many to make late/missed responses and some no opportunity at all. The plans are not very specific, making them difficult to evaluate. What do I know is that we do not need another 90 homes on this site together with the 90 homes on the Simons's site. The area is quite densely populated as it is. No one wants overpopulation which brings with it many problems including more crime. There appear to be no plans for parking. It's extremely difficult to park anywhere on Chingford Mount as it is, and to further add to traffic congestion is not an option. I assume that these 90 homes would be in high-rise blocks. I don't believe the density, height and style of development is in keeping with this sub-urban area. This is not a town or city where high-rise may blend in. People come to sit in outside the many cafes and restaurants Chingford Mount offers and neither residents or shoppers want to be looking at high-rise. Again, where are the plans for additional services, ie, healthcare, including mental care and schooling.</p>	<p>I consider these modifications necessary to make the local plan legally compliant and sound: the new buildings be the same height as the current layout or no more than three storeys high, thereby reducing the number of extra residents coming into the area. To include resident's parking areas within the complex.</p>	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a neworwity alleviation of congestion, parking problems and improve air quality.</p>

If yes, please explain why?	Council's response
Jacur Alexander				S411 - Albert Corner	No	No	No	Without having to copy the wording here, I would refer you to Policy D9 of the London Plan (page 138) with regard to "Tall Buildings". I do not believe that planning for a 8 storey (or even a 4 storey) building on this particular site adheres to this Policy. Chingford Mount is a suburb - as you have stated in this consultation, it is a "Gateway to the Forest". A building of this proposed height would look ridiculous and out of proportion to the rest of its surroundings, being between predominantly 2 storey high. Not only that, but the building would be south facing towards Chingford Mount Road, which would mean that for the rest of the day, a building of this height would cast a shadow over the "newly pedestrianised" Albert Corner and Old Church Road, and for the rest of the day it would cast a shadow over homes in Brook Crescent and New Road - evidence has come forth that a lot of these residences affected in Brook Crescent/New Road have had no balconies through their doors.	In order to modify and make the plan legally compliant, I would refer you to the Policy mentioned above and ask that you read it very carefully, and then - in keeping with our Chingford suburb - redewlop that corner to the same height as its surroundings.	Yes	I would like to be kept in the loop about all aspects of this.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Aafreen Khankar				S411 - Albert Corner	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking.  Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting.  There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit.	I consider building homes to height of existing buildings to be necessary, consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Due to a spike in the number of Covid-19 cases being recorded at the time, for the safety of our residents and officers, the Council decided to hold the engagement events online. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.
Clifford Gray				S411 - Albert Corner	No	No	No	The site is the central area for shopping in South Chingford and not suitable for residential use. A nine storey building would look out of place and will affect people living in the properties nearby.	The property should remain as shops which are short in supply in this area and should be no higher than the existing building.	Yes	I do not agree with the proposed plans as they are not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Tom Wise				S411 - Albert Corner	No	No	No	This area suffers from high traffic density and pollution. These plans seem to make it worse. It is not a suitable area for what is planned.	sensitive minor improvements	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to generate us for electing the wrong MPs	This response is noted.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
C Coding				S411 - Albert Corner	No Response	No	No	There is no parking, the local community does not have the infrastructure for 80 homes, buses, GPs and schools are already over subscribed, as is the local hospital. It will make parking for the shops impossible thus impacting on local businesses.		Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
										No

Mark Manning				S451 - Albert Corner	No	No	No	No	A 3 storey building will totally change the whole perspective of the area, over powering all other buildings.	Maximum 2 storey building inline with other buildings and homes	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S411 - Albert Corner	No	No	No	No	The area surrounding this site is of art deco design and any regeneration should be sympathetic to this style. This map does not show high rise buildings as other Waltham Forest plans show and I formally request you justify this to people here clear and concise information as in the proposals. The Art Deco design which can be seen on Albert Crescent and along Old Church Road should be the style of any future development in the vicinity. Art Deco is not high rise and as such any high rise will detract from the Art Deco fine stonework already present. To enhance this Art Deco will create a stunning destination and individuality to the area.	Referring to the Art Deco buildings surrounding this site, high rise building would not be compliant nor in keeping with the area in the vicinity. Any development should be in keeping with Art Deco to enhance and complement Albert Crescent. I refer you to the block and barometer stonework and the curve of Albert Crescent - all Art Deco.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S411 - Albert Corner	No	No	No	No	Unaware of any public consultation to transform Albert Crescent into a pedestrianised public space. New housing will increase pressure on already inadequate local services eg schooling, health and retail. Provision of 90 homes on this site suggests that it will be several storeys high which is not in keeping with the local streetscape.	Reduce residential density.	-	-	This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.
Patricia Andrews				S411 - Albert Corner	No	No	No	No	Overdevelopment in high rise blocks, leading to loss of amenity (privacy, daylight, sunlight etc) No parking provision in what is already congested street parking, lack of consultation with residents, no allowance for extra services such as schooling, healthcare, exceeding housing requirement of the London Plan. Out of character with present 2 storey buildings, shops and nearby community buildings.	Do not exceed height of existing buildings; drastically reduce the proposed building blocks of flats. Provide car parking for residents. Provide facilities for healthcare, education, child friendly space. Stop on road parking on New Road to improve traffic flow especially for buses.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Tracey Wilcox				S411 - Albert Corner	No	No	No	No	The infrastructure is not in place to support mass increases in this volume of new homes being built, especially with the other 2 proposed builds on Sainbury and Island shops located at Chingford Mount. There is already a shortage of basic amenities eg doctors, schools, dentists. This build would also destroy one of the historic frontages in this area.	Identify areas for schools to be built as well as encourage new doctors/dentists in this area	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  In Local Plan Part 1, Policy 72- Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any divergence from these issues that would lead to either substantial harm or total loss of a designated heritage asset.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Mrs Malama Banfield				S411 - Albert Corner	No	No	No	Once again, you have failed to inform the residents of Chingford Mount that this is being planned. I received consultation through my door (Middleton Avenue) regarding the 20mph limit on roads in the area, yet something like this, which is far more disruptive, nothing! If you pedestrianise Albert Crescent, where are the buses going to go? The traffic that wants to go to Cherrytree Avenue and other roads will cause increased traffic on Priory Avenue, Hurst Avenue and Middleton Avenue, not to mention Washam Way all of which are already too busy. Albert Crescent a play space? It's a shopping area not a park! There are already enough people hanging around that area especially since that weird police building was built... as far as the Met Police will tell you, Albert Crescent must be highly policed and not suitable for children to play there. As for as new homes are concerned, Chingford Mount does not have the capacity in the schools and healthcare to cope with these people. Parking for these new residents is also going to be a huge problem and how tall is this building going to be. Also, where are Iceland and Sainsbury going to go? We don't have many shops there so it is, Iceland use their carpark at the back to receive large lorries delivering to the store. How would they deliver?	Forget the Albert Crescent plan for the reasons I have mentioned above and provide parking, school and healthcare for these new residents. Plus the building should be the same height it is at the moment and leave Sainsbury and Iceland alone.	No		This is needed. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.
Aj				S411 - Albert Corner	No	No	No	Qing how can you even think about building that many homes there, flooding. Leave Chingford alone, stop making it a mess like the other parts of the borough. Chingford has always been the forgotten part of the borough & now you want to build it up! how can this even be possible to build that amount of flats on that site.  we dont have enough gp Practices, schools, dentists etc. It already takes 2 weeks or more to get a doctors appointment, there are no rth dentists & schools are so full, with a lot of children that dont even live in the area. We have one hospital in the borough, which is so full most of the time, it takes months & months to get a appointment. Just think about your actions now! before you start something that will cause carnage		No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. Christine Hagg				S411 - Albert Corner	No	No	This has not been sent to residents who live in the terraces around Albert Crescent to consider. How are we supposed to access our homes without adding further congestion and pollution on surrounding already congested roads.	think it should be discussed more with locals for their input with flats being included in the plan what infra structure been provided for schools and doctors which are already over subscribed to	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Sue Cooper				S411 - Albert Corner	No	No	Again high rise. I have no objection to homes but deterioration of our terrace and skyline is not acceptable	-	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Russell Wellard				S411 - Albert Corner	No Response	No	-	New building should not be higher than the one currently there. Tower blocks are not suitable for Chingford Mount.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Jayne				S411 - Albert Corner	No Response	No Response	This will lead to overcrowding and pressure on local resources that are already over capacity. Chingford has a strong sense of community and such substantial change as proposed across these three sites will be detrimental to this.	Any change of purpose and implementation of residential dwelling should be within the existing space of the building and not involve any expansion. High buildings are not in keeping with this area which is primarily made up of two storey residential houses.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
D Nurse				S411 - Albert Corner	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with the policy compliant levels of affordable housing. There are no parking provisions, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, loss of daylight/sunlight, additional demand for parking, additional traffic congestion and pollution. The consultation is flawed as there has been no leaflets or public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools.	Build homes and structures to the height of existing buildings. Developments should be in keeping with the area. Provide necessary parking and amenities. Provide additional services to support developments such education, transport links, healthcare and education.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Key Voller				S411 - Albert Corner	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-loaded and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling in doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no hallats or public meetings to advise residents, only an online zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Andrew Stoddart				S411 - Albert Corner	No	No	No	90 new homes contributing to the 482 in total allocated for South Chingford. Public services cannot cope!		No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate housing from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 61,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Zahr Aghar				S411 - Albert Corner	No	No	No	We do not need any more flats in the area. The local amenities cannot and will not be able to cope. The council are simply building on every plot of land available with for consideration for the local community and residents.		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S411 - Albert Corner	No	No	No	out of keeping with the area also not allowing for residents parking	build homes to the height of existing and provide parking not take it away	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
John Bucknell				S411 - Albert Corner	No	No	No	proposed developments not being built to existing laws and requirements no parking provisions will disadvantage all people, services will not be upgraded to suit the amount of new homes and people intended to live in area.	build homes to height of existing buildings, provide parking, healthcare etc.	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Paul Leahy				S451- Albert Corner	No	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds		Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.
-				S451- Albert Corner	No	No	No	No	Traveling towards the cemetery, at the end of this parade of shops is a larger parcel of land, created when 3/4 shops were demolished some 8/10 years ago I believe that this would far better suit your plans. Presumably, the planned developer has gone into liquidation, and perhaps the land in question be compulsorily be purchased.	Regarding my comments above, development on this land would cause far less inconvenience and interruption to the retail businesses affected in your plan.	No	-	The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as 'Call for Sites' exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the council's decisions when deciding scope and location of development in the borough. We feel the sites that we have chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.
Terry Minas				S451- Albert Corner	No	No	No	No	There has not been a sufficient consultation with local residents	Those residents on social media are not able to access the required consultation documents	Yes	no one is listening to the residents of Chingford -11	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to the spike in Covid-19 infections around the time of the consultation, the Council decided to hold the engagement events online for the safety of our residents and officers.
Jennie Heath				S451- Albert Corner	No	No	No	No	The consultation process conducted by the Council has been seriously flawed in my view. There appears to have been very little consultation or publicity in hard copy form provided to residents and businesses for those areas affected. The "Residents News" has been provided on line and has mentioned the Local Plan occasionally but there has been little reference in the Council's quarterly "Witham Forest News". As has been pointed out to Cllr Simon Miller, the Portfolio Holder for Regeneration, not everyone is on line and indeed a number of residents have stated that they "hate reading" about these plans which would have a life-changing end in some cases upsetting reaction to those affected. Indeed two Chingford residents have had to pay out of their own pocket to distribute leaflets to residents to inform them of the plans and the deadline to respond. This is unacceptable and should have been the Council's responsibility which does appear to show a desire not to publicise effectively and areas that responses not received are regarded as supportive of the Plan. With Covid it is accepted that large meetings could not have been held with residents but other ways could have been found. The so-called "Tuesday" in the Town Square on 4 December 2021 would have been an ideal opportunity for officers to communicate with residents. It is known that two officers in attendance did not make themselves available to residents for questions and explanation of the proposed Plan and had no identification (ID) and the event can only be viewed as cosmetic as giving out expense freebies whilst deflecting residents from the importance of providing their views on the Local Plan. It was understood in early January 2022 that the Council were to liaise with residents within 5 miles of Chingford Mound but most residents have never received this. Again, this oversight is totally unacceptable. There appears to have been very little effort made by the Council in publicising the local Plan proposals in the pop up shop 228 Chingford Mound Road E4 and some cardboard display have only been shown lately. The Council's view in not having public meetings to explain their	Development should be in keeping. Infrastructure must be in place ahead of any development. To over populate the area will divide a community and build resentment		-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council took the decision to hold the engagement events online as a response to the spike in the Covid-19 cases being experienced and to protect our residents and officers.

Tim Hancock				S451 - Albert Corner	No Response	No Response	No Response	<p>Strongly Object to this exaltation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to the existing degradation to the surrounding environment negatively affecting the current residents"</p> <p>This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and timely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions concerning not failure to control congestion, and defend the sanctity of the family by previous and current politicians, enthralled by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore not affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and in virtue of following on the strengthening of English culture has been nurtured over many hundreds of years in this town and country. By its blood, spit and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are evident in the history of this town and country.</p>	Reject based on continued degradation to local community and strain on local services, as pointed out above.	Yes	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing private and public spend, with a consent for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural debt one cannot see at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response

-				S452 - Albert Corner	Yes	Yes	Yes	I am not objecting to this, anything that makes the area look better is good. However, the disruption is going to be considerable. How is the sound going to alleviate the inconvenience to the residents and commuters?	am not objecting to this, anything that makes the area look better is good. However, the disruption is going to be considerable. How is the sound going to alleviate the inconvenience to the residents and commuters?	-	-	Response noted.
Sam				S451 - Albert Corner	Yes	Yes	Yes	Yes	Chicken shop	No	-	*
Rafiq Fisher				S452 - Moorpoint, Sewardstone Road	No Response	No	No	<p>Waltham Forest Local Plan (LFP) 2020 - 2035 Policy 11 A, iv, states: "400 homes in the Sewardstone Road strategic location". Between S452, S453 and S454 there is a 'indicative development capacity' of 477, an increase of 130% above the plan. So LFP 2 is not in alignment with LFP 1. This is also the numbers before developers claim they need to further increase density to fund affordable units and S106 agreements.</p> <p>Policy 11 C states: "Strengthen, support and encourage existing and new employment opportunities". S452 and S453 are commercial land, so designating area for residential development does not align.</p> <p>Policy 12 J ii states: "Contributes to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to provide for improvement of active travel facilities along Lea Valley should be included in the Development guidance."</p> <p>Waltham Forest Local Plan (LFP) 2020 - 2035 states that: "Lease will benefit from having improved transport access via links to Crossrail 2 stations in Enfield to the west. This will enable the expansion of the Sewardstone Road neighbourhood centre".</p> <p>As Crossrail 2 has been suspended it is very unlikely that it will be built within plan timeframes, therefore it should be removed from consideration and only current facilities and projects with confirmed funding should be included.</p> <p>The S452 plot provides commercial land with limited adjacent boundaries with residential properties, a rare feature in Waltham Forest. Development as a primarily residential plot would limit the options for commercial use.</p> <p>Waltham Forest Local Plan (LFP) 2020 - 2035 states that: "Transition" locations should have tall limits of 19 to 27 stories. This level of identification is inappropriate for the Sewardstone area, as it is not in line with the local character, and available public facilities. No mention of the Sewardstone area in the Development guidance.</p>	What is the duty to cooperate and what makes a plan sound or not sound, is this consultation for the public or planning officers?	-	-	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including urban requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>• Evidence of participation of the local community and others having a stake in the area, and</li> <li>• The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>• Sound infrastructure delivery planning;</li> <li>• Having no regulatory or national planning barriers to delivery;</li> <li>• Delivery partners who are signed up to it; and</li> <li>• Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p> <p>The Duty to Cooperate which underpins the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to resolve the effectiveness of the Local Plan Document, has not been met.</p>

The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barrier to delivery. - Delivery partners who are signed up to it and - Coherence with the strategic or neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the OPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
				SA52 - Moorpoint, Seawardstone Road	No		The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.	The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.	-	-	This Duty to Cooperate which is demonstrated through the Council's cooperation and commitment to work towards the achievement of the objectives of the Local Plan Document, before and during the examination process. Through the evidence published in the Characterisation and Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP and health care facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Donna Vaughan				SA52 - Moorpoint, Seawardstone Road	Yes	No Response	Highroad properties will not match existing area, and will not be in keeping with the area. Such properties are historically known to encourage social problems such as higher crime. Large number of units but very little parking allocated which will have a big knock on effect to existing residential areas, especially as there are only a couple of bus routes in the area. Density of the number of homes. Existing services (healthcare, schools) will not be able to cope with the increased population in the area once project is completed. Expected congestion in the area during construction at a busy junction and afterwards due to increased population.	With nearly 400 units the issue of additional services needs to be addressed, new GP services, schools and parking with the prospect of at least 800 new residents. The area will need additional services. Car parking issues for both the development and the surrounding areas is due to the limited public transport links in the direct area I believe many will have cars. The community feel of the area will be lost as development will create a highly populated town like feel. Could the number of units be reduced using a lower road development instead.	-	-	Through the evidence published in the Characterisation and Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Gleke Coups				SA52 - Moorpoint, Severstone Road	No Response	No	No Response	This plan for so many large and high buildings is entirely out of keeping for this area as a gently meandering forest. I think anyone who approves this now will seem to have planted a bomb on the entry to the forest and started the degradation and destruction of this highly important environment and amazing local resource. That's before I ask how this development will be managed for transport on a road that already backs up in all directions and not just at busy times of day. Where are the local childrens and health resources coming from with all the noise and gas already overabundant? The over-riding focus seems to be how many homes can be packed in to this small area. I cannot see any benefits for the area or the potential residents packed in to this space between closed roads and flood zones as water levels are expected to rise.	Limiting to three storey development and reduce overall increase in resident numbers and the impact visually and on the local environment. I cannot see how increased density will be managed or why this development would be awarded exemption for building on flood prone land. I cannot see how it can be managed or why this development would be awarded exemption for building on flood prone land. I cannot see how it can be managed or why this development would be awarded exemption for building on flood prone land.	No	-	<p>The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p>
Mike Chimes				SA52 - Moorpoint, Severstone Road	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation IDP element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan IDP for 2020-2026. This has obscured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been followed by political point scoring, with officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had difficulty low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from IDP and what has been stated at consultation meetings a major driver for the reclassification of development across the borough has been a housing target of c. 3000 homes per year. While EWRF has a large need for 100000, and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More consultation is needed to ensure that the plan is not legally compliant.	It is suggested that until master plans are developed, through consultation, for the main centres identified in IDP a ring road consultation on individual sites is possible with reference to site SA52 the chief driver of a bullet point order is to provide 385 homes. It is unclear how that many homes can be provided on this site with the other proposed uses. One choice might be to build high but research eg LUL (2017) High rise building energy and density has demonstrated about 6 storeys energy use increases difficult to reconcile with the Borough's green policies. This site is one of a number of "garage sites considered for development. The Borough's strategic objectives refer to the provision of a variety of employment opportunities, individually this might not represent a great loss of a facility or vehicle related employment, but there needs to be holistic view of the demand for garages across the area, which is far more motor vehicle dependent than southern Waltham Forest. The site is noted as "More vulnerable yet it is not clear whether this has been considered in terms of the intensity of development, and how realistic the target of 385 homes would be. Proximity to the reservoirs may mean the geotechnical challenges of the new industrial tall buildings may be unrealistic. While reference to Epping Forest SAC is welcome, it is unclear why this site is considered particularly intrusive unless buildings are of such a height as to interrupt views of the forest from some distance away. Most discussion in the supporting documentation seems to be related to potential air pollution impact on the forest. It would seem likely more traffic related pollution would result. It is suggested that cycle and pedestrian connectivity to be improved with this development but it is difficult to see how it can improve connectivity along the Lea Valley Road which is constrained by the narrow pavement and road lanes between the reservoirs, or to Station Road.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: - Research/Fact finding: the choices made in the plan are based on facts. - Evidence of participation of the local community and others having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Housing infrastructure delivery planning; - Housing or regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for police are flexible, the OPD should make clear that major changes require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
David Moore				SA52 - Moorpoint, Severstone Road	No Response	No	No Response	This plan should be abandoned due to the ridiculous high number of stories and large number of new dwellings. The lack of restricting parking together with existing traffic problems in this area and continued flooding of local roads would cause huge congestion and make local roads dangerous. The local road is not suitable for being congested and there are no alternative roads close by to cross from Chingford to Enfield. There is also not sufficient health provisions, schooling and public transport to support a large increase of homes in this area.	This plan should be abandoned. The site should be kept as it, with the possibility that in the future the existing road infrastructure may need to be improved to alleviate both congestion, parking and flooding problems that already exist in this area, notably on sewerstone road, the main road to cross from Chingford to Enfield. There is also not sufficient health provisions, schooling and public transport to support a large increase of homes in this area.	Yes	In order to express the strong feelings I have on this matter	<p>Through the evidence published in the Characterisation Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Sylvia Agass				SA52 - Moorport, Sewardstone Road	Yes	No	Yes	<p>Whilst I feel it is important for more housing to be developed in the area to ensure younger people are not forced to leave the area and their support networks, I feel it is important that factors such as education, schooling, medical services, adequate parking and affordable housing for newly qualified teachers, doctors and nurses are considered when new developments are planned. It is also important that new housing developments are not built too high with the possibility of lifts becoming out of order and disabled people becoming house bound. At the moment the plans do not appear to take into consideration these factors. There is only one primary school near by (Swarston) and the nearest GP surgery in Kings Head Hill is a single doctor practice. Also the traffic around the junction of Kings Head Hill, Swarston Road and Lea Valley Road is already extremely congested (the MacDonalds outlet does not help)</p>	<p>The new housing developments should be no higher than 6 storeys with large balconies. There should be at least one parking space for each property. There should be play areas for children. There should be affordable provisions for key staff such as teachers, doctors, nurses and car staff. There should be additional nursery and primary school facilities included in the plan. There should be an additional medical centre offering GP, Practice nurses and para medical staff, physiotherapy and podiatry. There should be a whole new traffic scheme around the junction to reduce congestion and in doing so, reduce pollution.</p>	No	<p>Because there are too many unanswered questions</p>	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Through the evidence published in the Character Identification Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newborough alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newborough alleviation of congestion, parking problems and improve air quality.</p> <p>In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-repelled. Additionally, the policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p>
Anthony G Thorne Lip				SA52 - Moorport, Sewardstone Road	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 10 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 16, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>11(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(3) The bodies or persons referred to in paragraph (2) are"</p> <p>(4) Each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Road flyover which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these can be removed I do have my doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LE27 road and downwind of the road and would be expected to be able to pick up the extra CO2 and NO2 from vehicles avoiding the LE27 change. The rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is far too high and as such we have seen significant increases in anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being planned the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problem with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In fact it was realised in the 1920's that people needed space and New Towns were built with a low population density and green space. This was the only way to ensure a high quality of life and to ensure the local plan to ensure community engagement.</p> <p>Reducing the proposed development to a maximum of 130 new homes and a maximum of 6 storeys (sensitively designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in advance by:</p> <ul style="list-style-type: none"> <li>improving the areas APM rating significantly with improved bus routes, separated cycle lanes and safe even walking/mobility vehicle routes to meet the stations.</li> <li>expanding development until once Cross Rail 2 and suitable connections are in place.</li> <li>including provision of shared access vehicles such as car clubs.</li> <li>investing in local healthcare and education services and facilities, new schools or the extension of existing schools to cope with the increased student numbers. Ensuring that any levy will be invested in the immediate areas.</li> <li>Ensuring safe and inclusive access to SANGS - such as the reservoirs, underways and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Egging Farm SAC.</li> <li>improving the junction and road layout at Sewardstone Road and Kings Head Hill/Lea Valley Road.</li> </ul>	Yes	<p>I am part of a local residents association and with our residents concerns to be included.</p>	<p>This response is noted.</p> <p>Through the evidence published in the Character Identification Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,646 new homes (1264 new homes per year) based on a London-wide assessment of capacity/available sites in 2021/78. The original draft London Plan figure was equivalent to around 1,400 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply/available sites in 2021/78. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newborough alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI). Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permissions without appropriate mitigation measures in place prior to development.</p>
Sarah Sanders				SA52 - Moorport, Sewardstone Road	No	No	No	<p>I do not believe the Local Plan is Legally Compliant as the process has not been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Sewardstone Road area are of older age, with generally more limited access to the online documents shared and less experience with providing comments and feedback on such complex documents online. The LPS and LP feedback phases have also been so complicated that they have deterred or prevented most from providing feedback at a time when public meetings have been prevented by the pandemic. This combination has prevented many from knowing the full details of, or providing their full feedback on the Local Plans which questions the validity of the community engagement.</p> <p>I believe the Local Plan is unsound, with the plans for this site and the other two at Sewardstone Road in contradiction to many strategies and plans for the purposes of these comments I have assumed that the proposed 385 new homes will align with the WFT average occupancy of 2.6 (ONS 2011) bringing over 1000 new residents).</p> <p>Development beyond the capacity of local transport or personal transport - Contradicting Local Plan Policy DP C22 and Local Plan Policy S 4 and the LP's Strategic Policies - Six Golden Threads (2.4.4)</p> <p>This area has a PTAL rating of 1b - with public transport already stretched this cannot support over 1000 new residents. While the transport hubs at Chingford, Station Road and Ponders End are accessible on foot or bike by the closest residents, they are not easily accessible or inclusive to the needs of all residents with the oldest, youngest and those with additional mobility needs being excluded (heavy doors, uneven and narrow paths, hilly topography). The proposal of car free developments is impractical with limited public transport to the local large supermarkets, and public transport services being prevented the carriage of large items (DIY items/Christmas trees etc).</p>	<p>Reducing the proposed development to a maximum of 130 new homes and a maximum of 6 storeys (sensitively designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in advance by:</p> <ul style="list-style-type: none"> <li>improving the areas APM rating significantly with improved bus routes, separated cycle lanes and safe even walking/mobility vehicle routes to meet the stations.</li> <li>expanding development until once Cross Rail 2 and suitable connections are in place.</li> <li>including provision of shared access vehicles such as car clubs.</li> <li>investing in local healthcare and education services and facilities, new schools or the extension of existing schools to cope with the increased student numbers. Glyvis Davis				SA52 - Moorport, Sewardstone Road	No	No	No	<p>The local plan for this area proposes huge change and development which would completely destroy the look of this urban area, not only for current residents but for visitors coming into the area. We border on 60 shops and we appreciate the sub-urban skyline which this area affords. It is neither a town or city and Tower Works and High Rise buildings do not belong in such an area. Lea Valley Road borders onto the reservoirs where sheep graze on the banks every year.</p> <p>There is also concern regarding the lack of parking facilities, we already have enough problems. Whilst between Sewardstone Road, Lea Valley Road and Kings Head Hill are all these new residents going to park their cars and vans. We have limited public transport services. Road traffic and congestion has always been a big problem here with traffic either coming to a complete standstill. Sewardstone Road, coming from Waltham Abbey is often at a snail's pace. Kings Head Hill is often congested and going towards Effield from Lea Valley Road can be a complete nightmare at certain times of the day.</p> <p>Also of concern is the lack of plans for healthcare and schooling. Getting hold of your GP is already a problem. Social Care and Schools are also overcrowded. Where are all these people from these Tower Blocks going to access these services in an already overstrained community?</p>	<p>The modifications I would suggest to make the plan legally compliant and sound would be to build a complex of houses and maisonettes which would be suitable for the area, not just in terms of size but also to be restricted to no more than three storeys, with enough shops to be included in such an area to allow for a genuine already congested roads.</p>	No	<p>Through the evidence published in the Character Identification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with Local Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newborough alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Sharon Legg				SA52 - Moorpoint, Sewardstone Road	Yes	No	No	I feel that the development is unsound because it will be to the detriment of local residents. The traffic in the area is bad enough as it is. I live along Sewardstone Rd and the traffic up to the traffic lights at the junction with Lea Valley Rd/Sewardstone Rd is slow moving at the best of days. Any incident on the A25, junction 25 & 26 causes traffic to divert along Sewardstone Rd, up Lea Valley Rd to re-join the motorway at Enfield. The right turn filter light is not in sync with the levels of traffic on these occasions. The area is very poorly served by public transport, with one main route to Walthamstow Central. When there is an incident on the route, the bus journey is often curtailed and bus users sit on the bus for 15-20 minutes until the next bus is due. Public transport links to neighbouring Waltham Abbey are almost non-existent with a bus only running on Saturdays now. As I understand, there are no additional services i.e. schools and doctors surgeries and like many places today, the services we have are already over subscribed. Whilst not opposed to some form of development, I think that high rises would be completely out of place here. Enfield Council has been more progressive and the tower blocks that can be seen across the reservoir at Alma Estate are being demolished.	Scale the development to suit the site and surrounding area, scrap the proposed high rises, improve public transport links now. I'd suggest a stopper bus between Waltham Abbey and Chingford Mount, where other routes could be picked up for onward travel. A doctors surgery should be included in the development, and make arrangements for school places for the additional needs.			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Peter Labou				SA52 - Moorpoint, Sewardstone Road	No	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to wait a few minutes because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? Care Raffae				SA52 - Moorpoint, Sewardstone Road	No	No	No	The sheer volume of increased residential properties will bring numerous planning and lower management concerns, and would go against the Councils own (past planning strategy). Believe the the main reasons this plan should be objected include- considerable over development- Sewardstone Road and Lea Valley Road are already very busy roads with T-junction issues. Increased traffic will cause environmental damage which will negatively impact the Councils environmental targets. Building 385 new residences in such a confined area will put considerable pressure on local resources which are already under a large amount of pressure. (e.g. Schools and healthcare). During development, the significant building works required prove hazardous to local residents, due to it being next to a petrol garage, with underground fuel pumps. Furthermore, would the council be able to safely assure itself that the residents of such a tall building would be safe in the event of an explosion in the site next to it. Also, with a building on this size, all local surrounding properties will be overlooked.				The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	Development not in keeping with surroundings. This is a suburban area with mainly low rise housing. Drain on local services (School, healthcare clinics, public transport, etc) insufficient off street parking proposed.	Development needs to include services, such as health clinic/doctors surgery, school/pre-school nursery, etc. There also needs to be sufficient parking spaces included. This could be in the form of an underground car park. There are other developments in the borough, such as Fulbourn road, where there has been a runny and gym included in the build. This bringing extra services to the area.		-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
John Hught				S452 - Motorpoint, Sewardstone Road	No	No	No Response	I have unfortunately added my comments to the other side of the road comments for 15 hours. This one much more serious 360 homes in an area swash with traffic problems - how are people going to access the road through the reservoir already a severe headache for anyone who want to get to Enfield etc in bus, car or cycle. It is totally inappropriate for this area more schools, health needs, infra structure gas water charging points, sewage etc. etc. How many parking spaces are you allocating for drivers and disability drivers? All this impacts on the quality of life for people who live in North Cleghard. A major or think is required if more housing is needed why add to an area that is already over-crowded. What about the jobs lost Motorpoint?	If a development is needed something more akin to that on the other side of the road - which is a far better development than this one.		To see what your intentions are and to argue against development	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations respond to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	It is not in keeping with the surrounding area - There are many reasons: There are no parking facilities and new residents would be parking in all the side roads, this is not safe. In your road you know who's car belongs to who, should an ambulance need to get through or a fire engine, you can ask the neighbour to move. Congestion the crossroads at the Sewardstone junction is a bottle neck and would be made even worse with the additional cars from the new residents. Air pollution caused by the additional cars and many children would be affected due to the 2 close by schools, Yardley Lane & Nevin Drive Doctors - They are stretched to their limit at the moment and could not cope with additional people in the area and would make the correct service even worse. Schools - They are full to capacity and how can they possible take any more pupils without affecting the over-stretched facilities and teachers at the current schools. Shops there are no appropriate shops for the additional population	It is not in keeping with the surrounding area - There are many reasons: There are no parking facilities and new residents would be parking in all the side roads, this is not safe. Jayne				S452 - Motorpoint, Sewardstone Road	No	No	No	The proposed number of residential dwellings is too high, this will have a detrimental impact on the local area and residents. The damage to local properties of high horses driving through during the building phase is a risk. Increase in pollution due to more people. Noise pollution while the site is being built car after when there are probably 2000 cars people living here. Traffic on this road isn't great, this will make it worse. Access between Chingford and Enfield is limited due to the reservoir so causing further challenges that will increase traffic will increase pollution due to idling cars	Development in line with the flats on the site adjacent, the height and facade of these should be mirrored. Or do not build and use the site for something of benefit to the local community.	No	-	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/28. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Neil Phillips				S452 - Motorpoint, Sewardstone Road	No Response	No	No	Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether I consider the local plan legally compliant.  I do not believe that the proposed local plan is sound as there seems little consideration of the current Community, Infrastructure, Environment, or existing residents of the area. The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of housing locally. Aside from two or three exceptions, the local housing is predominantly provided within 2 story family homes with outdoor space, the proposed development of high density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area just over 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high density housing, I fear that this may change. Policy 23 from LPI identifies a requirement to analyse the local character of the area or improve the quality of the local environment. I believe that the proposed schemes do not meet this requirement set out within LPIPI own proposals as they neither reflect the current character or, in my opinion, improve quality. There also seems to be a lack of consideration regarding access to public transport, the area has a PTAL rating of 3b, the proposals seem to hold hope of Crossrail 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. The wider proposal of 400 dwellings, without an increase to local work, will result in the majority of working adults having to commute. Considering that Chigwell rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how access to public transport will improve and yet all the developments are proposed car free, in reality, the households will not be car free, instead there will be a lot of cars on the roads, increasing the noise, air pollution and congestion.  This development will increase the traffic density of the local area and pollution.	Firstly improvements to local transport need to be implemented, or at very least considered and planned for. Only low rise housing should be considered for these sites, which would be more keeping with the nature of the suburban area the current housing stock.	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
Mr Ball				S452 - Motorpoint, Sewardstone Road	No Response	No	No	There will be a lot of cars on the roads, increasing the noise, air pollution and congestion.  This development will increase the traffic density of the local area and pollution.	The height should be, at least, no taller than the surrounding housing. Plus the density should be reduced significantly and enough off street parking for at least 1 space per house hold.	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>

Elisabeth Pisci				S452 - Motorpoint, Sewardstone Road	No	No	No	No	I do not feel there has been sufficient consultation with the local community. Over the past 2 years consultations have been through email, reaching only a limited number of people. The local authority newspaper is not delivered in the area immediately surrounding the development site. There are many people who are unaware of the plans as they have not been informed of developments. The plans do not take into account the local architectural style, the high-rise buildings would stand out as different and less cohesive beside other local buildings. The area is on the edge of Epping Forest and bounded by the reservoirs. There is a strong architectural cohesion of two storey houses built in the middle of the 20th century. There are spectacular views over the area from Epping Forest, which are enjoyed by many from within and outside the borough, which would be harmed by the erection of monogamous high-rise apartments. The infrastructure of the area is insufficient to cope with so many new dwellings in such a small area. The bus routes are already inadequate during peak times. While the council encourages bicycle transport, the area lies at the bottom of a steep hill which leads to the station giving access to inner London and few cyclists use it as a commuter route. As the area is on the edge of London, many people work outside London and need cars to get to work, particularly if they have to commute a school run first. The large number of planned residences, without any parking facilities, would put pressure on the adjoining roads for parking, which even an unreserved CPC would not address. Pressure on the roads in the immediate vicinity is already evident as it is a crosswalk for people coming from Lifford, off the A405 and off the A406 to access Heath Chingford, anymore from a development of 400+ dwellings on that crossroads would be intolerable for the existing community. The area has one primary school which is fully subscribed, with little scope to extend. Due to the proximity of the forest, there are no provisions for extra healthcare or school places, necessary if the local population isn't reduced.	It would be lovely to see the area developed with up to 3 storey housing and retail opportunities, in keeping with the existing architecture, creating a cohesive architectural landscape. Provision would still need to be made for improvements to the infrastructure, however, they would be more manageable and realistic.	No	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. 				S452 - Motorpoint, Sewardstone Road	No Response	No	No	The design is in a know flood area so close to the reservoirs. The traffic and congestion is bad enough now yet more housing will bring. There are no plans how to deal with the increased pressure on healthcare, schooling and social care all of which are already over stretched.	I dont think its a sound development			Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
John Smith				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	This plan is unsound for the following reasons- 1. Local services such as doctors and dentists and schools will not have the capacity to cope with this number of new residents 2. Public transport is inadequate to meet the demands of this number of new residents. For people who wish to go to Chingford station there is only one bus service and cycling is not an option due to the steepness of Kings Head Hill. 3. There are too few shops in the immediate area to meet the likely increase in demand. 4. The proposed development is at a busy road junction which already has long traffic queues during rush hour. Adding this number of new homes is likely to increase the possibility of road traffic accidents 4. The limited number of new parking spaces will put intolerable pressure on local parking	1. Local services such as doctors and dentists and schools will not have the capacity to cope with this number of new residents 2. Public transport is inadequate to meet the demands of this number of new residents. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Aydin Hassan				S452 - Motorpoint, Sewardstone Road	Yes	No	No Response	I am shocked at the density of homes proposed for this site. I am equally shocked at the idea of developing completely new tower blocks of this scale in this day and age. Low valley road during peak times is already unable to cope with traffic levels. Prior to Christmas, when traffic levels were lower, the area was brought to a halt with a small section of road works. This development is totally out of keeping with the area and is not feasible to existing road infrastructure that cannot be improved. These homes will no doubt bring 3000+ people, it is naive to consider anything less than an additional 500 cars to the area. Parking where? The impact of this development on the existing community is completely unfair and damned right disgusting. Schools do not have the provision for the additional children, no doubt this would lower the quality of the already suffering schools in this area, specifically secondary. Lets try to improve the area, not change it further.	New homes should 2/3 4 bedroom houses and 4 storey blocks of flats, with adequate parking and access. This would still put a load on the area, but seems a reasonable compromise.	Yes		The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards address the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.
David Matson				S452 - Motorpoint, Sewardstone Road	No Response	No	No	The proposals are unsound on two grounds: [1]The housing targets in LPI remain unproven beyond assertion and emerge from the targets within the London Plan. As such, they do not provide a sound basis for housing allocations on individual sites, such as S452. On the same grounds, LPI fails to comply with the Duty to Cooperate with the Mayor housing targets. Accordingly the major housing allocation on S452 is unsoundly based. [2]The admissible policy to enable a 0.55 minute city has been strengthened in LPI. S452 is the key site to make this happen in the Sewardstone Road area. However, S452 has not formed part of any strategic planning of the area that might enable a 0.55 minute city. Instead, each site has remained one of many in a scatter gun approach that evaluates each site as an individual opportunity site. There is no mention of community uses and the potential of the site as part of a 0.25 minute city, with all attendant benefits. The proposal is therefore unsound as it does not address a major policy objective of LPI or prevent the sites potential in the round.	1. The housing targets in LPI should be revisited, justified or revised to the way set out in the London Plan. Development expectations on individual sites should then be revised. 2. The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 0.25 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road, at which many similar issues will arise.	No	I have already sent written comments on LPI, and have been invited to take part in the Examination this February.	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the site allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Smith Mandi				S452 - Motorpoint, Sewardstone Road	Yes	No	No	The plan is unsound as there are no plans to increase the number of schools or school places available to the local area which has over-subscribed schools. It would also put a strain on the available health services where it is already difficult to obtain an appointment with a GP or dentist. Transport links in this area are very minimal so not only would existing transport services be strained it would put demand on additional parking for which I believe there is no capacity and would put pressure on local existing parking with the potential to result in a CPZ zone much to the dissatisfaction of existing residents. The proposed new homes would change the view of the city and create an expense I believe but my main concern is the lack of school places available for children being housed in the new homes or moving in to the area.	To make the plan sound I would suggest that there is a new school built close to the proposed new home, in walking distance or that the existing local schools are given funding to allow more children to attend and increase the number of teaching staff for the additional number of children expected to move in to the area. New or additional bus routes to to and out of North Chingford would be required, or more frequent buses on existing routes to cope with the number of people moving in to the homes as well as existing residents.	Yes		The Local Plan Infrastructure Policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that utilities infrastructure and connections must be designed into the proposal from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is a identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the development and secured through an s106 planning obligation.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Lloyd Parkinson				S452 - Motorpoint, Sewardstone Road	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no health/cycle meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc. Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.		Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Lary Goulding				S452 - Motorpoint, Sewardstone Road	No Response	No	No	There is already too much traffic, too much pressure on the doctors surgeries and too much pressure on schools to reasonably accommodate even more residents. The buildings proposed are not in keeping with the area and it will become more like an inner city area rather than a suburban area on the edge of Epping Forest.	If new homes are to be built, there need to be fewer and much lower rise blocks of 4 floors maximum.	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Pam And Cliff Moore				S452 - Motorpoint, Sewardstone Road	No	No	No	We feel as we live in a countryside environment this will spoil the area by making more congestion at the bottom of King head hill and Lee valley road and there are already not enough food shops plus no room in schools why build high rise. We need more open space	-	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

If yes, please explain why?	Council's response
				S452 - Motorpoint, Sewardstone Road	No	No	No	Quite frankly I've no idea if the plan is compliant or unsound but I would assume at this point the process should be that these highly more qualified than we have reviewed all the documentation to check this. From a local resident point of view the majority of the plans put forward don't seem to take into account the semi rural location, preserving and highlighting the wonderful forest on our doorstep. - All seem to need 1/2 acre blocks of flats here, there and everywhere. Just the impact the infrastructure alone is huge and traffic in and around Chingford always was a knock on impact from the M25 and A106. How will the schools, doctors, etc cope - already it's challenging trying to get an agent. It's not supposed to be redevelopment but just keep things in keeping, similar style houses etc.	Go back to the drawing board and think again. Put in a plan that is relevant and sensitive to the area. We are on the edge of Epping Forest and are lucky to have such a wonderful natural environment on our doorstep. Let us enhance that with buildings more appropriate to the urban environment.	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	Putting another 300+ homes at this site together with further homes adjacent is totally out of place for this area bearing in mind of the already over crowded schools and buses the local roads are already to busy and where is the parking for all these new families? Assuming most have a car. This area just cannot cope with the amount of new residents that anyone from the council actually been to have a look at how busy that junction gets already or looked at classroom sizes. Without the added pressure of another 300+ residents?	before planning be granted for the above the council should provide a new primary and secondary school in the local area provide parking spaces one per home under the roads to allow traffic to flow through sun congested upgrade local transport provide three own children play areas all these modifications suggested would enhance the area but are needed if a large scale development be put on a site that is already at its limits with the resources available	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
				S452 - Motorpoint, Sewardstone Road	No	No	No	This proposed redevelopment is in no way keeping with the feel of the local area. We have the beautiful Epping Forest on our doorstep, which is surrounded by 2-3 storey houses. This gives the area a suburban feel.  Flooding high rises in sight lines to the reservoir, on an already busy junction with little to no provisions in place for parking doesn't seem to make any sense.	Any new developments should be in keeping with existing dwellings and character of the area, so you should be looking at 2-3 storey houses/apartments with onsite parking.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Brian Cakaly				S452 - Motorpoint, Sewardstone Road	No	No	No	Such a proposed development on this site is out of character with the surrounding neighbourhood. The Sewardstone Road junction area experiences very busy traffic and is poorly served with public transport. Options such as walking and cycling are not attractive given the location at bottom of Kings Head Hill. It would be highly likely therefore that residents of the new blocks would have cars which would need parking spaces. If provision is not made this would put significant pressure on local residential streets.	A much lower density development would seem to make sense on this site, and one which includes new amenities which could be accessed by people in the wider area, eg a supermarket. At very least more car parking space for new residents needs to be included in the development, this taking full account of the relative location of the location, and the likelihood that many new residents would likely wish to have their own cars.	-	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Wendy Shubs				S452 - Motorpoint, Sewardstone Road	No	No	No	I feel that this is a dangerous undertaking as a couple of issues one being making the roads more congested than it is now, being that we are an off shoot from the A62 this is already heavily congested and our house more constantly through lorries every day and night and with regard to parking we don't have enough as it is now the beauty of Chigfold is due to the sea valley river and the reservoir and to put up an enormous building is ridiculous and would interfere with the wildlife we currently have, and to propose a single structure on a busy junction is deadly and no consideration has been taken for the elderly who have lived here for many years and it is unjust we strongly oppose this site and where will A62 park!!!!		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Daniel Ashton				1916 S452 - Motorpoint, Sewardstone Road	No Response	No	No	The type of buildings being proposed a totally out of keeping with existing buildings. The number of proposed residences would be unacceptable stress on local infrastructure. The local road network is already very busy when doctors surgeries and schools would be put under unacceptable strain.	Lower rise buildings would be more in keeping with nature of the area. Therefore containing fewer residents, putting less strain on the school, social care and health system.	No	-	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.106 planning obligation.
Michael Dram				S452 - Motorpoint, Sewardstone Road	No	No	No	For 10 many dwellings, the area is already highly congested, amenities like doctors and schools are already under severe pressure more congestion to local parking and local roads will cause considerable noise and pollution, scale down the development.	Consult local area and get feedback and do a vehicle census and see just how busy the roads are in this area. Kings head Hill is a congested and polluting area, take pollution readings and consider the consequences of more traffic.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.  As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Frank Pace				S452 - Motorpoint, Sewardstone Road	No Response	No	No	No	The proposed planning application makes a mockery of a lovely, mostly green built area. The plans destroy the flat lines of Chingford, and the huge development will introduce nothing but increase crime and very noisy local traffic, adding to an already struggling Sewardstone Road and Lea Valley and Kings Head Hill. We strongly object to the developments.	The proposed development should be scaled down by at least 75%, a flat-roofed building, no more than 3 stories. Additional travel and health services are necessary.		I am concerned, as to developments in and around my area.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.
Roger Obiano				S452 - Motorpoint, Sewardstone Road	No Response	No	No	No	The plan does not appear to take the local environment, its aesthetic or resource issues into account. The area already lacks sufficient shopping, parking, GP services, schooling/nursery and transport links. The traffic in that area already represents a daily bottleneck without adequate alternative road options to leave/enter the area. Where are the plans to resolve these existing issues?	I believe a project which is not high rise would be logical. Although a high rise would not be in keeping with the look and resource constraints of the area, that is only a secondary issue. A plan with this volume of homes has to come with plans and resources to resolve the existing issues and shortages in the area. The area has weak transport and lacks adequate shopping, health and schooling which will be exacerbated by a project of this size	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Aaron Noel				S452 - Motorpoint, Sewardstone Road	No Response	No	No	No	It doesn't seem that impact on current residents, local services and amenities have been considered. Traffic, pollution and safety ought to be revised. Transport links for the additional multitude is missing from these plans. I'm in favour of additional housing but means must be increased for them.	Extra transport, shopping district, parking, revision of the pedestrian crossing, increase to staff of services such as the local GP surgery, education facilities and entertainment venues should be reviewed. The council recently surveyed opinions around 15 minute neighbourhoods. Regarding the sheer increase in population size of this area, in what way will this area's 15 minute neighbourhood be fulfilled with current plans?	No	Collaboration is necessary to reduce noise and enhance cohesion in shared living spaces.	The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Frederick Sambidge				S452 - Motorpoint, Sewardstone Road	No Response	No	No	No	The area is already very busy in this area and this would bring more traffic than present already. No extra local services planned.	The area is already short on decent services. Doctors will be swamped. Public transport is thin on the ground. Schools are already over-subscribed.	Yes	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Elizabeth Connolly				S452 - Motorpoint, Sewardstone Road	No Response	No	No	No	The roads are already very busy in this area and this would bring more traffic than present already. No extra local services planned.	Need to consider extra local services eg schools and reduce the number of homes being built on the site.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

If yes, please explain why?	Council's response
Fagen Mills				S452 - Motorpoint, Sewardstone Road	No	No	No	I believe that the density and height of the development makes it unsound as it will adversely affect the area. The junction at Sewardstone Road is already very busy and this plan will only make the situation worse as 300 homes will probably have at least one car, whatever the council believes. There will also be enormous pressure on local schools and healthcare facilities which are already under great pressure.	Reduce the amount of blocks and height of the buildings and more importantly add plenty of parking , at least one for each flat.	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes towards encouraging walking, cycling and public transport use, planning applications for all new development must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
John Pennicard				S452 - Motorpoint, Sewardstone Road	No Response	No	No	Lack of local infrastructure such as not enough parking, school places, doctors surgery places etc	-	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Natalie Oware				S452 - Motorpoint, Sewardstone Road	No	No	Yes	The demolition of the existing shops and flats were against planning permission. Surely therefore illegal.  The plans are NOT in keeping with the area and will make this area worse. Buildings are too tall. Services already stretched yet none being added. Insufficient car parking. Not too far from M25 - people WILL have a car. Road junction already at capacity, almost constantly congested.	Limit the height of the buildings to something similar to pre-existing buildings at tallest. Provide sufficient parking. Enlarge the junction and work on better traffic light sequencing. Increase services in area (a new school, new doctors etc or at minimum enlargements to the above.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 3 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Sam Edwards				SA52 - Moorport, Sewardstone Road	No	No	No	No	<p>Planning is being prepared to be submitted but the IZ proposal hasn't been finalised. This proposal is based on 27,000 planned for the borough over a 15-year plan. However, the Housing target was based on a 30 year plan. Therefore, there is no evidence to show that this will be extended to include the same allocation over another 5 years. Therefore over 10 years only 18,000 homes are needed to meet the target. Things can change over such a long time-scale. Waltham Forest doesn't have the space to keep building, which is why all the proposals are for flats, no houses. This is why I also feel this target is flawed as it only takes 'homes and none of the properties planning to be built in Chingford are Houses. Covid has shown the importance of outside space for mental health so converting families into flats feels like a step backwards. The tower blocks were pulled down at Chingford Hall estate for this reason.</p> <p>The Flats at 49 Sewardstone Road - Wingrove House is a Housing Association retirement block (WRA) which consists of 25 student's bed flats. (Therefore a max. of 50 people over the 6 floors). This block has its own road access with parking.</p> <p>The Flats on the corner of Kings Head Hill - Showmill Court are accessible from the end of Meadow Gardens. These Flats consist of 3 bed properties so is more of a reasonable comparable. However, there are 33 flats, with limited resources (showing 20 people) it is worse like there are 4 one bed, 22 two bed and only 5 three bed properties. These Flats have easier access, and the grounds consists of parking spaces and allocated garages. Therefore, there is more parking for less properties and therefore less people.</p> <p>An additional 185 homes in a small area would have an impact on schools and doctors which are already overcrowded. There is no breakdown to the site.</p> <p>The flats on the corner of Kings Head Hill - Showmill Court are accessible from the end of Meadow Gardens. These Flats consist of 3 bed properties so is more of a reasonable comparable. These Flats have easier access, and the grounds consists of parking spaces and allocated garages. Therefore, there is more parking for less properties and therefore less people.</p>	No high rise blocks Houses rather than flats	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>
Cassandra King				SA52 - Moorport, Sewardstone Road	No	No	No	No	<p>I live close to the area and have not had any information put through my door or made known to me about the proposals for the implementation of new housing around Moorport, Sewardstone Road and Lea Valley. Additionally, air pollution is the biggest environmental threat to humans and has direct effects on habitats and biodiversity. Already Kings Head Hill going north west towards the bottom of the hill has a high volume of traffic and creates a moderate to high volume of pollution. Even on a quiet Sunday the measurement of pollution reads "moderate to bad" and 1.2 (highly). Naturally, in rush hours, when traffic backs up to College Gardens, with cars idling, the levels of pollution per cubic square metre increase. Kings Head Hill and Sewardstone Road are a focus area according to the report: 2020 Air Quality Annual Status Report, where the air quality should be monitored and an improvement program initiated in this area. The proposals contradict the initiatives to improve air quality in that area. With the proposals for the quantity of new homes and the construction developments involved (size, volume of construction vehicles, noise created by developments), the levels of fine particulate matter (PM2.5), ammonia (NH3), nitrogen oxides (NOx), sulphur dioxide (SO2) non-methane volatile organic compounds (NMVOCs) will be increased not just in the construction phase, but when construction is complete and ongoing due to volume of families. The level of proposals, in an area already on the verge of a pollution overload, are not synonymous with the UK, National emissions reduction commitments and oppose the council's climate emergency plans of net zero targets by 2030.</p>	<p>A thorough investigation into the air quality and traffic survey of the regions surrounding Moorport, Sewardstone Road, and Lea Valley and an experimental prediction of average of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then steps can be taken to review the proposals, ensuring that they are proposals will be much more healthier for the local residents and that environment and aesthetically keeping with the area of North Chingford.</p>	No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>In April 2020, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-parked. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage to a passive measure.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon an equally neutral standard over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p>
Ian Connor				SA52 - Moorport, Sewardstone Road	No	No	No	No	<p>I do not believe that the Local Plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the areas objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area. It does not meet the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable as the Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 30 years and 12607 in proposing 27,000 new homes by 2035 - a very significant excess of 27% over the required target. This huge development of 185 homes will alter the area detrimentally for local residents with regard to visually high tower blocks, increase in traffic, loss what is already a busy junction with Kings Head Hill and the concomitant pollution, local parking, loss of provision for increased local services such as schools, GP access.</p>	<p>As above - parking, traffic (pollution and congestion), unsightly urbanisation of the area with ugly tower blocks; strain on local health services; educational provision.</p>	No	-	<p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. Paul Willard				SA52 - Moorport, Sewardstone Road	No	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on drivers. They have no parking provision and will cause a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>	No	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of the submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. John Hugg				SA2 - Moorpoint, Sewardstone Road	No Response	No	No Response	legally compliant how do I know duty to cooperate –what does that mean?	The number of proposed proposal on this site is totally disproportionate to the area. It is already an area suffering from very heavy traffic suffering large delays and excess pollution at the junction with Sewardstone Road. I understand that there will be no or limited parking – you can't invest cars. I am sure that there will be a number of people who may like to occupy this area with working vehicles this will be impossible to control and place a huge load on people suffering from parking restrictions in the area. No absence of the road link to be widened or it will be a traffic disaster for the area. An already overdeveloped infrastructure to the area will require great expansion for all services- water, gas, electricity Doctors school etc. etc. And if allowed charging points for battery cars. Also the number of jobs lost at Moorpoint etc. cannot just be ignored. My review is that that area should be left alone		Yes	To see what your intentions are and to argue against over-development	<p>The Council is committed to playing its part in tackling the housing crisis. -				SA2 - Moorpoint, Sewardstone Road	No	No	No	There is nothing like this height of building in Chingford. It cannot be right just to build great big tower blocks suddenly in such a nice area. Also who are the area schools, the GP and dental practices? Where are the green spaces for people and also there are hardly any parking spaces! This will cause huge problems for local residents as people start fighting for parking spaces on the roads, and your council will probably impose charges etc. You should build sufficient underground parking before proposing any high rise. But when I look around other parts of London they're not building tower blocks like Grenfell, they build FOUR storey builds which seems to be a much better way of accommodating people. No one, unless they're from a war country, no one wants to live in high rises anymore. This is an outdated concept and shouldn't be imposed on Chingford, or anywhere else.	As above, I think your concept is ill judged and sounds like Grenfell. A 4 story build is enough in this area, anything more just makes the whole area of Chingford totally overdeveloped. Where are the schools on the edge of a renowned world heritage style forest, sporting forest, you can't have tower blocks on the edge of such a historic place.		-	-	<p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Ms Ball				S452 - Motorpoint, Sewardstone Road	No Response	No	No	Additional vehicles in the area will add to the already congested traffic and pollution. It will also put additional pressure on the local infrastructure.	Development should be the same height and density, at most, as the housing in the local area. With parking spaces, at least 1 space per household.		-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Lisa Bagley				S452 - Motorpoint, Sewardstone Road	No	No	No	Have highways considered impact on already busy junction, including being used as an alternative route when the m25 is impacted by closures? Too many homes in a small area, urbanisation of a suburban area makes no sense. That is not the reason people move to Chingford for. Where is the provision of education/health & social services along with an uplift in transport options to serve the massive increase of people in a very concentrated area. Would like to see a good argument for building residential homes in a flood area - why put at risk when an increase in climate change. Bottom of Kings head hill area always affected by heavy rain.	Build low rise developments and houses, not tower blocks, with gardens to provide an improvement to wellbeing, as the pandemic showed people need an outdoor space of their own. Review with the Corporation of London and "Lea Valley Park to understand impact to S136 - should not impact detrimentally. Highways to visit and monitor as part of review of local infrastructure. Plan should include provision of education/health/social etc services. Housing is needed but the right housing for the area should be considered, this is not Waltham Forest Central or Tottenham Hale.	No	We are directly impacted detrimentally by the proposed development	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Patricia Nye				S452 - Motorpoint, Sewardstone Road	No	No	No	Planned buildings are totally out of keeping with the area. Totally inefficient transport links and parking provided. The area is already severely congested during the day. No planned increase in health provision planned near extra schools.	Buildings shouldn't be more than 3 stories. Unapproved local plans are being used as the precedent rather than the existing buildings. Extra transport links should be provided before completion. Crossrail 2 will not be completed in time if ever.	Yes	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	There appears to be no consideration for the provision of schools. The schools in the local area are all VEM oversubscribed already. Where do you expect the children to go to school? There is only one Dr in the local area. There seems to be no provision for parking. The local area is already very busy on the roads and public transport is very limited. This is an area of low rise housing, houses and bungalows. This development is completely out of character for the area and will change the area completely.			-	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Marilyn Gould				SA2 - Motorpoint, Sewardstone Road	No	No	No	The proposal is out of character - the infrastructure is not able to cope with the extra traffic. No matter how much you try to get people cycling, walking etc they will still have one car if not more - where would the parking be? During rush hour particularly as well as other times, the traffic is causing along Lee Valley Road between Enfield and Clingford. Where are the extra school places, medical facilities etc that have been promised for other developments that never materialised!		No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Linda Hainsby				SA2 - Motorpoint, Sewardstone Road	No	No	No	I believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road. Multiple stories is out of keeping with the existing environment - Clingford is a suburb at the entrance to Epping Forest. It is mainly 2 story houses or bungalows. Changing the form and feel of the suburb by building these flats and the other additional proposal to build flats opposite will adversely change the uniqueness of Clingford. Transport - the existing public transport links are inadequate for this development and the further ones planned in the area. There are 2 bus routes that only run 3-4 times an hour. Traffic at the Sewardstone road junction with Kings Head Hill is already regularly congested with traffic jams daily. Inadequate parking in the development will add pressure onto the surrounding residents.	Reduce the height of the proposed block to align with the rest of the properties in the surrounding areas. Address the inadequate public transport and infrastructure	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.
Carole Ladmaker				SA2 - Motorpoint, Sewardstone Road	No Response	No	No	I am not qualified to state whether this plan is either legally compliant or whether it complies with the duty to cooperate. I do know that it is proposed and clearly out of keeping with the part of Clingford where you plan to build. We are always being told that the council is interested in maintaining the borough for all residents but it seems that whenever a chance comes in this part of Clingford you manage to do your worst. In this respect I would mention Alan Wrights, Kings Head Hill, the redevelopment of the land at the top of Madis Avenue where three houses have been built on the site of one bungalow in a dark grey brick which does not in any way match or blend with the existing residences, as well as the two other sites on the Town Plan for Lee Valley Road and Sewardstone Road. My objections are: 1. Tower blocks are out of place in this area and are not ideal for families either. 2. Total lack of imagination in design. It looks like a child's plan for a Lego city. 3. Lack of available housing for those in need is not solved by putting people in boxes. It creates bad feeling for those who use their living areas designed and creates more problems for families who have to live in tower blocks. 4. The facilities for such an increase to the local population are not there now and with the level of aid maintained by government for the foreseeable future are not likely to be. 5. With all the threats we receive on global warming, it is beyond belief that such a collection of high rises would be erected on an area subject to flooding in heavy rainfall, more of which is what we are told we must expect in the future. There seems to be nothing in the plans for this development to appeal to residents either now or in the future. Surely the Council could come up with something better than Lego City.	Go back to the drawing board and think again. Put in a plan that is relevant and sensitive to the area. We are on the edge of Epping Forest and are lucky to have such a wonderful natural environment on our doorstep. Let us enhance that with buildings more appropriate to the urban environment.	Yes	I do not know what examination hearing sessions are but if I means having input to any meetings or a local rethink then yes, of course.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Jan Prior				SA52 - Moorpoint, Sewardstone Road	No Response	No	No	"Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.	Far more local consultation, including borough-wide questionnaires, with no work to be approved that does not have at least a 50% approval rating.	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Robert Wills				SA52 - Moorpoint, Sewardstone Road	No Response	No	No	A 17 story block is completely out of character for a semi rural area such as this. The amount of occupancy is too much for the local infrastructure. Use valley field is a bottle neck for traffic for most of the day, and seemed to be improved on. Such a development would only exacerbate this. Lessons learnt from the folly of the 1960's building of high rise dwellings seem to be forgotten. Most of these were pulled down in Waltham Forest. Why start again? The idea of getting everybody onto bicycles is just a pipe dream that will never happen, so why concentrate over everything? Yes, people do need places to live but, the idea need places to play. Over development takes this away.	Halt development.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Lucy				SA52 - Moorpoint, Sewardstone Road	No	No	No	I can't tell how high the buildings are to be. And how much parking, is being allowed.	Height of building not shown.	No	This affects our home, we could be over looked if flats are too tall. And lose sunlight from our gardens.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
E. Dos Santos				SA52 - Moorpoint, Sewardstone Road	No	No	No	The proposed plans will put a stretch on local resources including health services, local school which some are already oversubscribed, local transport services and parking. I live local and already struggle to find parking with majority of houses having dropped curbs. There will be an increase in traffic and noise with children being put at risk with drivers using local roads for short cuts increasing. What is the benefit to us? More more high rise flats being requested in wherever possible to make more money with no consideration for residents.	Don't build homes, build services and facilities to benefit residents.	Yes	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Linda Ball				SA52 - Moorpoint, Sewardstone Road	No Response	No	No	This is a far too large development and will have detrimental impact on local people through overloading of local doctors, schools, parking etc. Also this is near an already busy junction and will create havoc during construction turning local roads into rat runs	How can the average resident say if any of this is legal Typical leader questionnaire from Lew	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Brian Moon				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	I personally do not wish to live in an area with Tower blocks all around me, I cannot see on the plan where it states the height of the properties. But I understand that they could be up to 17 stories high. I used to live in Harringey next to Broadwater Farm (what an awesom on the landscape). That was about 50 years ago now, then moved to Waltham Forest and then onto Chingford because it was nice and rural. Now you are about to change all that, I may as well move back to Harringey	do not think it matters what the public say because you will go ahead and let the properties be built anyway. You should listen to what the public want because at the end of the day it is the public that pay your wages. I would prefer 2 to 3 story properties with a few shops and a restaurant perhaps.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Characterisation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.
Diana Czekel				S452 - Motorpoint, Sewardstone Road	No	No	No	Our school are over subscribed also our gp, traffic is already catastrophic.		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Jon Ashley				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	This location does not have good transport connections. Public transport is minimal. Roads are congested especially at the junction. Therefore large numbers of residential properties cannot be supported.	Reduce numbers of proposed residential units to fewer than 50	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

If yes, please explain why?	Council's response
Gain Taylor				S452 - Motorpoint, Sewardstone Road	No	Response	No		I think you are putting too many new homes and flats in one plot, the schools and doctors and services as well as the public transport wouldn't be able to cope with all the cars. I think it will be a problem as the traffic around these areas are bad at the best of times. I think it will be a problem if the times worse. Sewardstone Road and the road between the reservoir normally at a stand still at certain parts of the day as it is.		-	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Ellie				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>The sheer volume of increased residential properties will bring numerous planning and town management concerns, and would go against the Council's own Core Planning Strategy. I believe the main reason the plan should be objected include:</p> <ul style="list-style-type: none"> <li>- considerable over-development</li> <li>- Sewardstone Road and Lea Valley Road are already very busy roads with traffic issues</li> <li>- increased traffic will cause environmental damage which will negatively impact the council's environmental targets.</li> <li>- Building 385 new residences, in such a confined area will put unmanageable pressure on local resources which are already under a large amount of pressure (e.g. schools and healthcare)</li> <li>- During development, the significant building works required could prove hazardous to local residents due to it being next to a filling reserve. Furthermore, would the Council be able to safely assure that the residents of such a tall building would be safe in the event of an explosion on the site next to it.</li> </ul>	<p>apartments or dwellings in character of the local area - other adjacent and opposite properties are two story residences.</p> <p>Increasing the amount of primary and secondary schools in the area.</p> <p>Increasing healthcare providers in the area.</p>	No	-	<p>Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Laura				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>The roads are already a nightmare along this section of roads with huge traffic build up due to roads leading to A402, A10 and A103, so adding extra cars will make this even worse, and where are all the people who move into these places meant to park their cars? There is already no space around the local area. The building will look completely out of sorts in this area due to the nature of the forest so will look like a complete eyesore and out of place! There is already no school place or appointments for doctors between the residence in the area already so adding to that will be an added pressure in the area. Also where they are planning to build may affect the area of the reservoir and there is already local flooding in the area and also it will affect the wildlife around there.</p>	<p>I dont think anything should be build in that area.</p>		-	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
-				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>Such large blocks of flats in a semi-rural area are completely out of keeping and are on the edge of Royal Eggins forest and grassed hills of the reservoirs. Has anyone considered that at large blocks of flats which are being proposed bring with them crime and that it was not very long ago that such blocks were demolished due to problems. It's unhealthy to have so many people living in close proximity with little area in which to site, exercise, dry washing except on balconies, terraces etc, what action is being taken to ensure that the number of residents in the proposed developments will be able to access health facilities, schooling, public transport and that there will be adequate parking? I believe that the effects of introduction of such large number of additional residents has not been thought through.</p>	<p>If it is necessary to demolish the existing buildings to provide more housing, the new housing should be similar to the new buildings on the opposite side of Lea Valley Road which is in keeping with the area and not not destroy the current feel of semi-rural Chingford.</p>	No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Mrs V Goldsain				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>The local area is all ready under pressure. You can't get a doctors appointment, you cannot get routine treatment at any of the hospitals. The schools are over crowded. The corner of Lea valley road is always congested row without further traffic being added. There have been a number of accidents near there. These new buildings are too high and too many. I know we need more homes but we also need more schools, doctors, hospitals and shops and parking for all these people to use.</p>	<p>Lower the height of the building. Put in the infrastructure to support all the people moving here as the local schools, hospitals and doctors will not be able to cope.</p>		-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

Linda Ball				S452 - Motorpoint, Sewardstone Road	No	No	No	I understand that there should be adequate infrastructure in place, parking availability etc. There is not.	Less dwellings, family homes with gardens and parking, the sort of property people like to live in.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Peter Heatherley				S452 - Motorpoint, Sewardstone Road	No	No	No	This site allocation is unsound as it is not deliverable. With a PTAL rated at 1b, this site does not comply with London Plan Policy DDC2(d) on transport capacity. Crossrail 2 will no longer become operational within the lifetime of this plan. There are no plans to establish the north-south gateway on the east bank of River Lee.	Reduce the site residence capacity to less than 282 and postpone site development until after completion of a north-south gateway.	No	-	The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Mrs Bernice Burton MBE				S452 - Motorpoint, Sewardstone Road	No Response	No	No	It is not clear to me how the duty to cooperate would be complied with, since it's clear who the other party is. These sites are the River Flood Plain, at a time of increasing heavy rain fall caused by climate change, and the likelihood of changes in weather patterns causing more frequent and heavier rainfall. I believe such high volume building on this site should be illegal.  What alternate sites is being proposed for those businesses? What will happen to their employees? Job losses, and economic decline will likely result. Building on such a massive scale so close to the Giffing Reservoir water supply.	Building on these sites should not be permitted, because of the long term possibility of flooding.  The Plan talked about utilising Green Spaces there are no green spaces in that area. All use on the plans are a low trees.  There should be proper recreational outdoor spaces for adults and children in the plans.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities.  The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ruby Walrab				S452 - Motorpoint, Sewardstone Road	No	No	No	I am not convinced that flooding will not be an issue on this site. There appears to be insufficient parking and school, healthcare and transport in this area is already overstrained. I feel there will be major traffic issues and a strain on all local services especially if the petrol/ service station is removed.	More parking spaces within the development. Service station to remain, less building generally to this site. New Doctors surgery and additional schools.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing flood risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Jaine				S452 - Motorpoint, Sewardstone Road	No			Lack of infrastructure in local area. Proposed plans not in keeping with existing properties in area. These type of developments will cause an extreme amount of pressure on the local area. It is already an area that lacks transportation links and is already extremely congested on the roads.	Development should be in keeping with previous building which was demolished	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Marika Ahmet				S452 - Motorpoint, Sewardstone Road	No Response	No	No	The proposed high rise properties will not match existing area, and will not be in keeping with the area - They will be a blot on the landscape and not wanted in Chingford - a gateway to Epping Forest. How are existing services (healthcare, schools etc) expected to cope with the increased population in the area if the project is completed.	The community feel of the area will be lost as development will create a highly populated town like feel. Could the number of units be reduced using a lower rise development instead - no more than 3/4 storeys high	No	I feel I should have a say in the development of the area I live in	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Pennicard				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	There is not enough infrastructure in the local area to support all the extra people in these flats. Not enough parking, school places, doctors surgery places plus it will be a blot on the landscape.		Yes	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S452 - Motorpoint, Sewardstone Road	No	No	No		More parking. More schools are needed and more doctors are needed	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Oliver Vandrom				S452 - Motorpoint, Sewardstone Road	No Response	No	No	How can you build that many flats and have no plan in place for parking the extra burden on local schools, doctors surgery and the detrimental effect it will have on the local community		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Smith				S452 - Motorpoint, Sewardstone Road	No	No	No	I think it is illegal, it definitely does not keep in with the area, it will not be able to accommodate people into schools doctors or hospitals, I work at a Drs surgery that is at over-stretched at present. Car parking in the area and congestion is going to be horrendous. I cannot believe the council is even considering this proposal and if this goes through I will lose my faith in the council you will be raising Chelmsford for good.	This should not go through for all the reasons above.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Li				S452 - Motorpoint, Sewardstone Road	No	No	No	Utter failure to consult in any meaningful way over the plans	Proper open consultation with the local population	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
James Lackmeyer				S452 - Motorpoint, Sewardstone Road	No	No	No	It is not the responsibility of the residents to have to consider if a planning application is legally compliant or not. This is the role of the Council and Planning departments. It either is or isn't. If it is not legally compliant, it should be rejected" and so. It is not viable to expect the residents to have access to the documentation or time required to build a legal argument detailing the legality of a major development of this type.  The residents, who are stakeholders in the area in which they live, have a right to have a view on how the proposed development will impact the lives of both them and their families. The discussion does not only centre around the legal argument. Impact to those living in an area and those moving in are key factors and should carry equal weight in the discussion.  High rise properties may be more suited to city living, but suburban design should reflect the type of long people move to the suburbs for: that being space, amenities, improved quality of living to name but a few.  The grounds that was in place before being demolished" the legality of which should be reviewed, contained a range of shops that covered the needs of residents in the area. They helped establish a community, something which town planners like to talk about but through poor design and little thought of the existing area often fail to achieve.  The properties that existed were in keeping with the area with red brick construction and pitched roofs.  The proposed redevelopment of the site with up to 9 stories of accommodation is grossly out of character with other properties in the locality.  The property will dominate the landscape and affect the views of existing residents.  Natural light will be reduced, greatly affecting the living conditions for those opposite and on adjacent roads that surround the proposed development.  The traffic capacity of the Kings Head Hill, Sewardstone Road junction is now at the point whereby there are daily traffic jams leading to increased pollution, congestion and noise.	These developments are not simply places to live, they are changing the shape of the area in which we live. They should be rejected until such time as full public consultation has been allowed to take place that reflects the needs and wants of those living in the area affected by the proposed works.	Yes	All residents should be involved in the process.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
John Huggill				S452 - Motorpoint, Sewardstone Road	No Response	No	No	How do I know	Do not think that document UP3 is sound Duty to cooperate what is that you need to explain	Yes	To see what your intentions are and to argue against over-development	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Fiona Coombs				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>I think this has to be the hardest consultation I have ever been asked to participate in, I do not understand how you think it is appropriate to expect residents to understand what you are asking. Therefore I consider this consultation to be ridiculous and flawed, you would appear to be pushing this through regardless of the local residents concerns or needs.</p> <p>I totally agree with the following comments. This level of intensification prior to housing above all, to the significant detriment of the environment, local business, and the conservation area. It does not fulfil the Councils duty to be sustainable, in the following ways: 1) it is not economically sustainable. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.7) S46 states 22,540 new homes over 10 years and LBWF is proposing 27,000 new homes by 2025 - a very significant excess of 42% over the required target. This huge development of 383 homes will alter the area detrimentally for local residents with regard to visually ugly tower blocks), increase in traffic (on what is already a busy junction with Kings Head Hill) and the concomitant pollution; local parking; lack of provision for increased local service such as schools, GP access.</p> <p>believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road - multiple stories is out of keeping with the existing environment. Chigford is a suburb at the entrance to Egging Forest. It is mainly 2 story houses or bungalows. Transport - the existing public transport links are inadequate for this development and the further ones planned in the area. There are 2 bus routes that only run 3x times an hour - Traffic at the Sewardstone Road junction with Kings Head Hill is already regularly congested with traffic jams daily - inadequate parking in the development will add pressure onto the surrounding residents.</p> <p>am not qualified to state whether this plan is either legally compliant or whether it complies with the duty to cooperate. I do know that it is not and neither is it in compliance with the spirit of Chigford's urban form.</p> <p>This is excessive in not going to repeat the very good comments and issues that other residents have made.</p>	<p>Pay attention to car parking, don't build on flood areas, what about our health services, there are limited numbers of GPs in the area. What about school places.</p> <p>Also make a better consultation, this one is flawed</p>	Yes	<p>I don't really know what you mean? This consultation is too complicated, who is it aimed at, if residents, you should try again.</p>	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Cara				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>I am not qualified to state whether this plan is either legally compliant or whether it complies with the duty to cooperate. I do know that it is not and neither is it in compliance with the spirit of Chigford's urban form.</p> <p>This is excessive in not going to repeat the very good comments and issues that other residents have made.</p>	<p>Go back to the drawing board come back with something more realistic</p>	Yes	-	<p>The Local Plan will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>
Abigail Woodman				S452 - Motorpoint, Sewardstone Road	Yes	No	Yes	<p>Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. And in the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to 'maintain access to Egging Forest and 'mitigate for urban effects to ensure no adverse effect on the Egging Forest SAC. Protecting Egging Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Egging Forest SAC is given by legislation, there is no reason why the same approach cannot be taken towards the marshes.</p>	<p>The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed.</p>	Yes	<p>It is essential that green spaces have a voice at the table during the examination hearing sessions.</p>	<p>The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
-				S452 - Motorpoint, Sewardstone Road	No	No	No	<p>Two many high rise dwellings will completely spoil our area and the vital thing is that there will be no extra resources to meet the needs of new residents</p>	-	Yes	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
Linda Hunt				S452 - Motorpoint, Sewardstone Road	No Response	No	No Response	-	<p>The Kings head Hill junction cannot accommodate any my cars.</p>	-	-	<p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>

				SA52 - Motorpoint, Sewardstone Road	No	No	No					This response is noted.
Michael Perry				SA52 - Motorpoint, Sewardstone Road	No	No	No	I consider the plan unsound because its right on one of the busiest junctions in Chingford needed for access to all the surrounding areas and the extra traffic it will cause no one will be able to get to work and then not be able to get back to the m25 on a regular basis. If Chingford people wanted to live a high rise we would need to look at withstanding or Haulage and just to make a worthless comment the extremely corrupt Waltham Forest Council does whatever it wants regardless of any protests so there's my stance worth.	Do I look like an architect? Plans to address existing shortage of doctors appointments, dentists, school places, proposal will exacerbate yet not considered.	-	-	This response is noted.
Len Ferguson				SA52 - Motorpoint, Sewardstone Road	No	No	No	I live 200m away and haven't got any information through the door so haven't been consulted. There are policies about green space, and sustainability and this would not follow them and is out of character with the existing buildings.	Much lower block in keeping with existing area. Plans to address existing shortage of doctors appointments, dentists, school places, proposal will exacerbate yet not considered.	No	-	This response is noted.
Brian Moon				SA52 - Motorpoint, Sewardstone Road	No Response	No Response	No Response			No	-	This response is noted.
				SA52 - Motorpoint, Sewardstone Road	Yes	Yes	Yes			No	-	This response is noted.
Cat				SA52 - Motorpoint, Sewardstone Road	No	No	No			No	-	This response is noted.
Tim Hancock				SA52 - Motorpoint, Sewardstone Road	No Response	No Response	No Response	Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, demigrations to the surrounding environment, negatively affecting the current residents?) This is an inconsiderate and arbitrary decision to simply drop a development in to the community in a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centring on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.  Fundamentally the building of this nature is an amoral and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.  The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is a virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a liberal foundation for its existence.  The current proposed developments are a reversion of the failures that are	Reject based on continued denigration to local community and strain on local services, as pointed out above.	No	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Sainsbury's tactics to displace current communities. This approach also seeks to erode the destruction of local communities by reporting anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Reto Fisher				S453 - Lea Valley Motor Company	No	No	No	<p>Waltham Forest Local Plan (LFP1) 2020 - 2035 Policy 11 A. v. states: "400 homes in the Sewardstone Road strategic location". Between S452, S453 and S454 there is a "indicative development capacity" of 477, an increase of 10% above the plan. So LFP1 is not sound in alignment with LPI. This is also the number of homes developers claim they need to further increase density to fund affordable units and S05 agreements.</p> <p>Policy 11 C states: "strengthen, support and encourage existing and new employment opportunities". S452 and S453 are commercial land, so designating area for residential development does not align.</p> <p>Policy 11 is states "contribute to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to Ponders End". Improvement of active travel facilities along Lea Valley should be included in the Development guidelines.</p> <p>Waltham Forest Local Plan (LFP1) 2020 - 2035 states that "areas will benefit from having improved transport access via links to Crossrail 2 stations in Enfield to the west. This will enable the expansion of the Sewardstone Road neighbourhood centre".</p> <p>As Crossrail 2 has been suspended it is very unlikely that it will be built within plans timeframe, therefore it should be removed from consideration and any current facilities and projects with confirmed funding should be included.</p>	<p>What is the Duty to co-operate and what makes a plan sound or not sound. Is this consultation for the public or planning officers?</p>	-	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unit requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding, the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Having no regulatory or national planning barriers to delivery. -Delivery partners who are signed up to it; and -Coherence with the strategic of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough', in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
-				S453 - Lea Valley Motor Company	No	No	No	<p>The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.</p>	<p>The proposal of the buildings and height of the buildings do not fit in with the keeping of the suburban area. There will be more pressure on services that are already overly stretched i.e. transport, schools, GP practices, social care etc. There will be more congestion and traffic fumes on the roads. Initial plans were unapproved but went ahead anyway. Insufficient parking.</p>	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that undermines cycling, walking and public transport use. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. In April 2020, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan Car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>	
Susan Marsh				S453 - Lea Valley Motor Company	No	No	No	<p>Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, overnight, additional demand for parking. Consultation flawed as no haffens/public meeting to advise residents, only one live zoom meeting. Shortage of doctors, hospitals, dentists, schools etc.</p>	<p>Build homes to height of existing buildings, provide parking, healthcare, education etc.</p>	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The consultation was carried out in accordance with the regulations in the Town and Country Planning (Development) 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>	
Mike Chimes				S453 - Lea Valley Motor Company	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, but that reason it difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation (LFP1) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2020-2035. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while efforts have been subject to abuse making orderly meetings difficult. It is difficult to determine whether consultation with the public has been legally compliant, given the involvement of business and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 3400 homes an. While BWF has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet upgraded housing need. More</p>	<p>It is suggested that until master plans are developed, through consultation, for the main ones identified in eg LPI map consultation on individual sites, it is unclear whether this is justified alongside the loss of local employment opportunities by job development. This site is one of a number of garage sites considered for development. The borough's strategic objectives over to the provision of a variety of employment opportunities, individually this might not represent a great loss of a facility or vehicle related employment, but there needs to be holistic view of the demand for garages across the area, which is far more motor vehicle dependent than southern Waltham Forest. This site is not noted as more vulnerable despite its proximity to the floor use and resources. It is unclear why the reference is made to Epping Forest SAC, when it is for the neighbouring site. The mention of cycle and pedestrian connectivity is made yet any gain in width for cycle lanes along Lea Valley would be beneficial, particularly approaching a busy junction. More generally the Borough support for the 15 minute city challenge at this site. Pedestrian and cycles access to the nearest primary school is difficult, the North Chingford retail and cultural centre is also a push. Potential residents might be attracted by ease of access to Essex and Hertfordshire and the M25 to Sewardstone Road, but there is currently no public transport option to facilitate this. An active frontage is suggested along Lea Valley Road although parking would be difficult and pedestrian access along such a busy road an unattractive option.</p>	Yes	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unit requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding, the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Having no regulatory or national planning barriers to delivery. -Delivery partners who are signed up to it; and -Coherence with the strategic of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough', in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>

Anthony G Thorne Lip				S433 - Lea Valley Motor Company	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 55, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 54(1).</p> <p>11(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the fact that a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are:</p> <p>(a) each of the specific consultation bodies as in the local planning authority consider may have an interest in the subject of the proposed local plan,</p> <p>(b) any other person whom the local planning authority consider may have an interest in the subject of the proposed local plan.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emerson Woods Park which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have will be removed do have doubts as well there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning those will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. The rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even higher concentrations.</p> <p>Walham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now label as anti-social behaviour, and mental health problems. In this it was realised in the 1920's that people needed space and New Towns were built with wide open spaces and green areas. This is the 1960's - 70's that people needed space and green areas. This is the 1960's - 70's that people needed space and green areas. This is the 1960's - 70's that people needed space and green areas.</p>	Yes	<p>Because there are too many unwise</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing school or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Joel Phillips				S433 - Lea Valley Motor Company	No	No	No	<p>Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether I consider the local plan legally compliant.</p> <p>I do not believe that the proposed local plan is sound as there seems little consideration of the current Community, Infrastructure, Environment, or existing residents of the area.</p> <p>The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of the locality. Aside from two or three exceptions, the local housing is predominantly provided within 2 story family homes with outdoor space, the proposed development of high density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area about 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high density housing, I fear that this may change. Policy 12 from LPS identifies a requirement to strengthen the local character of the area or improve the quality of the local environment. I believe that the proposed schemes do not meet this requirement and not within LPS's own proposals as they neither reflect the current character or, in my opinion, improve quality. There also seems to be a lack of consideration regarding access to public transport, the area has a PTAL rating of 3b, the proposals seem to hold hope of Central 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. The wider proposal of 400 dwellings, without an increase to local work, will result in the majority of working people having to commute. Considering that Chingford rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how access to public transport will improve and yet all the developments are proposed car free. In reality, the households will not be car free, instead they will rely on the bus and the motorway to get to work. This is not keeping with the character of the area. There will be substantial increase in traffic and crime, my safety subject and not with in keeping of the area.</p>	<p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now label as anti-social behaviour, and mental health problems. In this it was realised in the 1920's that people needed space and New Towns were built with wide open spaces and green areas. This is the 1960's - 70's that people needed space and green areas. This is the 1960's - 70's that people needed space and green areas.</p>	Yes		<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Due to a spike in the number of Covid-19 cases at the time of the consultation on this document, engagement events were held online for the safety of our residents and officers.
Mr Ball				S433 - Lea Valley Motor Company	No Response	No	No	Additional housing in the area will add to the already busy traffic and pollution!	A lower density housing and that is, at most, the same height as surrounding housing.	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private or motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S433 - Lea Valley Motor Company	No Response	No	No Response	Development not in keeping with surroundings. This is a suburban area with mainly low rise housing. There are also no sufficient parking spaces included. This could be in the form of an underground car park. There are other developments in the borough, such as Fulbourne road, where there has been a runny and gym included in the build. Thus bringing extra services to the area.	Development needs to include services, such as health clinic/doctors surgery, school/pre-school nursery, etc. There also needs to be sufficient parking spaces included. This could be in the form of an underground car park. There are other developments in the borough, such as Fulbourne road, where there has been a runny and gym included in the build. Thus bringing extra services to the area.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (CIS).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Sarah Sanders				S433 - Lea Valley Motor Company	No	No	No Response	I do not believe the Local Plan is Legally Compliant as the process has not been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Sewardstone Road sites are of older age, with generally more limited access to the online documents shared and less experience with providing comments and feedback on such complex documents online. The LPA and LPA feedback channels have also been so complicated that they have deterred or prevented most from providing feedback at a time when public meetings have been prevented by the pandemic. This contribution has prevented many from knowing the full detail of, or providing their full feedback on the Local Plans which questions the validity of the community engagement.  I believe the Local Plan is unsound, with the plans for this site and the other two at Sewardstone Road in contradiction to many strategies and plans for the purposes of these comments I have assumed that the proposed 15+ homes will align with the W1 average occupancy of 2.5 (ONS 2011) bringing over 39 new residents.  I development beyond the capacity of local transport or personal transport. Contradicting Local Plan Policy D9 C23 and Local Plan 1 Policy 5 G and the LPA Strategic Policies - Six Golden Threads (2 & 4) This area has a PTAL rating of 1b - with public transport already stretched there would be a struggle to support 39 new residents. While the transport hubs at Chingford, Station Road and Princes End are accessible on foot or bike by the first residents, they are not easily accessible or inclusive to the needs of all residents with the oldest, youngest and those with additional mobility needs being excluded (busy roads, crossings and narrow paths, hilly topography). The proposal of car free development is impractical with limited public transport to the local large supermarkets, and public transport operators terms preventing the carriage of large items (DIY items etc).  There is also the question of resident safety, as it is from the perspective of LPA.	More accessible and in person presentation of the Local Plan to ensure community engagement.  Reducing the proposed development to a maximum of 6 new homes and a maximum of 4 stores (sensitively designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported in order to:- - improving the areas PTAL rating significantly with improved bus routes, expanded cycle lanes and safe walking/hoobly vehicle routes to main the stations.  Rehousing development until once Cross Rail 2 and suitable connections are in place.  Including provision of shared spaces which such as car clubs.  Investing in local healthcare and education services and facilities - new schools or the extension of existing schools to cope with the increased resident numbers. Ensuring that any levels will be needed in the immediate areas.  Ensuring safe and inclusive access to SANGS - such as the reservoir, waterways and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Epping Forest SAC.  Improving the junction and road layout at Sewardstone Road and King Road Hill to Lea Valley Road.	Yes	I am part of a local residents association and we are not residents concerns to be included.	This response is noted.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is also provision to search Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value in any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to a spike in the number of Covid-19 cases at the time of the consultation on this document, engagement events were held online for the safety of our residents and officers.

If yes, please explain why?	Council's response
Paul Wallard				S433 - Lea Valley Motor Company	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise (suburban/semi rural) in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially increased) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>		-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Mr Ball				S433 - Lea Valley Motor Company	No Response	No	No	<p>The development will add to the already very busy traffic and pollution in the area.</p>	<p>Development should be the same height and density, at most, as the housing in the local area. With parking spaces, at least 1, space per household.</p>		-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality through the construction or operating stages of development.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Janine				S433 - Lea Valley Motor Company	No Response	No	No Response	<p>This proposed development is not in keeping with existing buildings in the local area. The area is already highly congested.</p> <p>There is a lack of regular transportation and due to its location it is extremely difficult to walk and cycle locally. Government services such as doctor surgeries and schools are already overpopulated and these plans do not seem to take this into account and do not include any new facilities for the public. Any new developments should be in keeping with the local area and the provision of new amenities for the public should be considered not just housing. This area is already highly congested and adding new homes at an already busy junction will cause major disruptions for local residents</p>	<p>More public services, better transportation links.</p>		-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).</p>
Katherine Waldrab				SAS3 - Lea Valley Motor Company	No	No	No	<p>Losing a promising business that brings money into the area and replacing with 15 homes is detrimental to the local area and its current occupants. 15 new homes could mean anything upto and beyond GP services. Without the space in school, hospitals and local doctor surgeries.</p>	<p>Houses, with gardens over flats, would be more suitable. More green space is needed. If you are replacing a local sustainable business it should be with an amenity that is needed such as more GP surgeries ect</p>	No	<p>its only fair for those who already live here to have a say in how our area will be affected</p>	<p>The site allocation requires that commercial floorspace is provided, ensuring that the site still provides economic opportunities.</p>
Wendy Mapp				SAS3 - Lea Valley Motor Company	No	No	No	This is going to be a complete eyesore and not in keeping with the local environment.	Maximum 2 story houses	Yes	-	<p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on certain sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Peter Heatherley				SAS3 - Lea Valley Motor Company	No	No	No	This location is contrary to LP1 para 4.18 as amended which reads as 'most new development to those places that offer the best access to services, facilities and public transport (both now and for the foreseeable future). SAS3 does not fall into this category and the Infrastructure Development Strategy does not envisage significant changes within the scope of this plan. Therefore this level of development is not achievable and would not provide livable accommodation.	Sites SAS2, SAS3, SAS4 and SAS5 developments must be reduced to total no more than 130 residences - a number that will still create the facilities available.		-	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/28. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
										No

DECREASE OF EXISTING PROPERTY VALUES 20. CHANGE FROM QUIET RESIDENTIAL TO URBAN AND COMMERCIAL DEVELOPMENT	Buildings should be more than 3 stories. Unapproved local plans are being used as the precedent rather than the existing building. Extra transport links should be provided before completion. Crossrail 2 will not be completed in time if ever.	Yes	essential for residents participation	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of benefit for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  Any new areas of green space must be accompanied by a maintenance plan to ensure their long term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S433 - Lea Valley Motor Company	No Response	No	No	Planned buildings are totally out of keeping with the area. Totally inefficient transport links and parking provided. The area is already severely congested during the day. No planned increase in health provision planned nor extra schools.	Buildings should be more than 3 stories. Unapproved local plans are being used as the precedent rather than the existing building. Extra transport links should be provided before completion. Crossrail 2 will not be completed in time if ever.		-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. A)				S433 - Lea Valley Motor Company	No	No	No	Too many flats yet again! Why does Tfwd council feel they need to build up Chingford & take away its character. Chingford is already over populated, schools, gps, vhs dentist. I've lived in Chingford nearly 12 years & I can't get a site dentist & it always takes 2 weeks if your lucky to get a doctors appointment.		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Mr G G Underwood				S433 - Lea Valley Motor Company	No Response	No	No Response	A RUGED DEVELOPMENT WHICH WILL SPOIL THE AREA AND CAUSE MORE TRAFFIC AND CAUSE MORE TRAFFIC WITHIN THE AREA	BUILD BUILDINGS TO A MINIMUM HEIGHT OF FOUR FLOORS HIGH SO IT BLEND IN WITH THE LOCAL AREA AND NOT A BLIGHT WITHIN THE AREA.	No	I WISH TO KNOW WHAT IS PROPOSED TO BE BUILT WITHIN THE AREA WHICH AFFECT ME	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Cassandra King				S433 - Lea Valley Motor Company	No	No	No	I live close to the area and have not had any information put through my door or made known to me about the proposals for the implementation of new housing around Motor point, Sewardstone Road and Lea Valley. Therefore, there has been a lack of consultation for the residents of the local area.  Additionally, air pollution is the biggest environmental threat to humans and has direct effects on habitats and biodiversity. Already Kings Head Hill going north west towards the bottom of this hill has a high volume of traffic and creates a moderate to high volume of pollution. Even on a quiet Sunday the measurement of pollution reads "moderate: 80 pm10 20 (Stagley's. Naturally, in rush hours, when traffic backs up to College Gardens, with cars idling, the levels of pollution per cubic square metre increases. Kings Head Hill and Sewardstone Road are a busy area according to the report: 2020 Air Quality Annual Status Report, where the air quality should be monitored and air improvement projects initiated in this area. The over-development proposals contradict Waltham Forest Councils initiatives to improve air quality in this area. With the proposals for the quantity of new homes and the construction developments involved (dust, volume of construction vehicles, noise, created by developments), the levels of fine particulate matter (PM2.5), ammonia (NH3), nitrogen oxides (NOx), sulphur dioxide (SO2) non-methane volatile organic compounds (NMVOCs) will be increased not just in the construction phase, but when construction is complete and ongoing due to volume of families. The level of proposals, in an area already on the verge of a pollution overload, are not synonymous with the LAs national emissions reduction commitments and opposes the councils climate emergency plans of net zero targets by 2030.	A thorough investigation into the air quality and traffic survey of the region surrounding Motor point, Sewardstone Road, and Lea Valley and an experimental prediction of source of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then steps can be taken to review the proposals, ensuring that they are proposals will be much more healthier for the local residents and their environment and aesthetically in keeping with the area of North Chingford.	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.

Paul Leahy				S433 - Lea Valley Motor Company	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds		-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.
John Cole				S433 - Lea Valley Motor Company	No Response	No	No	I do not believe this development is being planned to improve the interests of the existing local community.	Planning permission should not be approved. Leave the existing business in place	No	I believe that the development is being carried out without consideration of the best interests of the existing local community. LBHF is putting money and politics before the residents which they are supposed to serve.	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Carole Ladmaker				S433 - Lea Valley Motor Company	No Response	No	No Response	As previously stated I am not qualified to answer whether this is legally compliant or fails to comply with the duty to cooperate but yet another proposed plan. Another legal building block out of keeping with the area. dont need to explain why it is unsuitable, just go to the site and look at the development of flats which were built on Leggett's old site. This has improved the area greatly and looks very attractive to anyone approaching Chingford from Ponders End. That is what new plans should do. That is what we want our Council to do for us.	Set out to improve the area by building a better place for all, both present and future residents. Dont just aim to get as many people as possible in whatever price of land you have available, it just does not work	Yes	I do not know what examination hearing sessions are but if it means having input to any redesign or a final rethink then yes, of course.	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Due to a spike in the number of Covid-19 cases at the time of the consultation on this document, engagement events were held online for the safety of our residents and officers.
Cassandra King				S433 - Lea Valley Motor Company	No Response	No	No Response			Yes	-	This response is noted.

DECREASE OF EXISTING PRIORITY VALUES 17. CHANGE FROM QUIET RESIDENTIAL TO URBAN AND COMMERCIAL DEVELOPMENT TO THE AREA What is the Duty to co-operate and what makes a plan sound or not sound. Is this consultation for the public or planning officers?		essential for residents participation	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Police in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  Any new areas of green space must be accompanied by a maintenance plan to ensure their long term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.  The Local Plan requires that developments must retain and protect significant existing trees and retain where possible.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development associated with this Plan is car-free and employment development is car capped. Additionally, the Police in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
				S454 - 66.74 Sewardstone Road	No	No	Waltham Forest Local Plan (EPI) 2020 - 2035 Policy 11.4, states: "400 homes in the Sewardstone Road strategic location". Between S452, S453 and S454 there is a "indicative development capacity of 477, an increase of 19% above the plan. So LP2 is not sound in alignment with LP1. This is also the number before developers claim they need to further increase density to fund affordable units and S106 agreements. Policy 11.4 states "strengthen, supports and encourages existing and new employment opportunities". S452 and S453 are commercial land, so designating area for residential development does not align. Policy 11.1 states "Contribute to the improvement of... walking and cycling accessibility, connectivity, permeability and legibility to pedestrians and improvement of active travel facilities along the valley should be included in the Development guidelines. Waltham Forest Local Plan (EPI) 2020 - 2035 states that "areas will benefit from having improved transport access via links to Crossrail 2 stations in Ealing to the west. This will enable the expansion of the Sewardstone Road 'neighbourhood centre'. As Crossrail 2 has been suspended it is very unlikely that it will be built within plans timeframe, therefore it should be removed from consideration and only current facilities and projects with confirmed funding should be included. Reinforcement" areas should have maximum height of 5 stories according to Plan LP1.		Yes	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: Research/ fact finding: the choices made in the plan are backed up by facts. Evidence of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: Housing infrastructure delivery planning; Housing or regulatory or national planning barriers to delivery; Delivery partners who are signed up to it; and Consensus with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the OPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough", in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.	
				S454 - 66.74 Sewardstone Road	No	No	considered unsound due to the high number of stories and large number of new dwellings. The lack of existing parking together with existing traffic problems in this area and continued flooding of local roads would cause huge congestion and make local roads dangerous. There is also not sufficient health provisions, schooling and public transport to support a large increase of homes in this area.	A more sound plan would be a row of shops with only one storey of dwelling above this, together with parking for residents and shoppers. Also careful consideration should be made when constructing these buildings on such a busy main junction. new school, gp service hospital services and bus routes would also be needed, however there is little room to accommodate this.	No	In order to express the strong feelings I have on this matter	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the population of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collection and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to intensification and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the population of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S454 - 66.74 Sewardstone Road	No	No	The proposed building S454 is not in keeping with the original planned buildings. The proposed 8 storey building is totally out of character of the area as are S452 & S453. The original plan for site S454 was a 2 storey and had a supermarket which would be much more in keeping with the local area. Quality of life for residents with these high rise buildings will be poor additional traffic, already very heavy, more pollution loss of daylight and the loss of greenery being overlooked. Sites S452 & S453 are being planned on an area with a high risk of flooding, which is worrying. The additional impact on traffic and parking, schools, doctors and nurseries. The site is too overbearing in scale for such a small area.	No higher than 3 storeys, supermarket, additional schooling, doctors transport and parking, keeping the character of the area.	Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020). Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. David Matson				S454 - 66.74 Sewardstone Road	No	Response	No	<p>The proposals are unsound on two grounds:</p> <p>[1]The housing targets in LPI remain unproven beyond assertion and emerge from the targets within London Plan. As such, they do not provide a sound basis for housing allocations on individual sites, such as S454. On the same grounds, LPI fails to comply with the Duty to Cooperate with the Mayor's housing targets.</p> <p>[2]The admirable policy to enable a 25 minute city has been strengthened in LPI. S454 is an early site that might make this happen in the Sewardstone Road area. However, S454 has not formed part of any master planning of the area. Instead, each site has remains one of many, a scattergun approach that evaluates each site as an individual opportunity site. There is no mention of community uses and the potential of the site to help create a 25 minute city, with all the attendant benefits. The proposal is therefore unsound as it does not address a major policy objective of LPI or present the site potential in the round.</p>	<p>1. The housing targets in LPI should be revised, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised.</p> <p>2. The Sewardstone Road area should be subject to a master planning exercise to create the basis for a local 25 minute city. It is not too early to start with the upcoming development of 60-74 Sewardstone Road in terms of community benefits and role within the wider community.</p>	Yes	<p>I have already sent written comments on LPI, and have been invited to take part in the Examination this February.</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base including:</p> <ul style="list-style-type: none"> <li>• Research/Fact Finding, the choices made in the plan are based up by facts.</li> <li>• Evidence of participation of the local community and others having a stake in the area, and</li> <li>• The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Mike Chrimes				S454 - 66.74 Sewardstone Road	No	Response	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public is regarded as a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation LPI's element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LPI for 2026-2030. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate what the main plan from site specific suggestions. At times, it has been difficult to determine the status of meetings which have been very coloured by political point-scoring, while others have been subject to those making earlier meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, reduced by the number of attendees who were, or have been, difficult to get online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the reclassification of developments across the borough has been a housing target of c. 3300 homes per year (LPI9 has a long waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites allocated for housing development in the Borough will meet expected housing need. More</p>	<p>The site is already being developed and the consultation is futile however plans should have been developed alongside other proposals for the Sewardstone Road area.</p>	Yes	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed for preparation.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> <li>• Justified</li> <li>• Effective</li> <li>• Consistent with National Policy and in general conformity with the London Plan.</li> <li>• Legally Compliant</li> </ul> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Cassandra King				S454 - 66.74 Sewardstone Road	No	Response	No	<p>As a result of the consultation, the Council has been able to identify a number of issues that need to be addressed in the Local Plan Document.</p> <p>As a result of the consultation, the Council has been able to identify a number of issues that need to be addressed in the Local Plan Document.</p>	<p>A thorough investigation into the air quality and traffic survey of the region surrounding Motor point, Sewardstone Road, and Lee Valley and an experimental prediction of exposure of pollution in the area based on the development proposals. Once data has been collected, predicted and analysed, then steps can be taken to reverse the proposals, ensuring that they are proposals will be the most health for the local residents and the environment and aesthetically keeping with the area of North Chingford.</p>	Yes	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2023).</p> <p>In April 2023, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car supported. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage of a passive measure.</p> <p>The new Local Plan sets stronger environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stage of development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council continues to a long-term objective of reducing levels of private car ownership and vehicle journey in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car supported. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>	
Donna Vaughan				S454 - 66.74 Sewardstone Road	No	Response	No	<p>Initial planning permission was given for this site by the Authority 3 years ago. At this point the existing building was going to be redeveloped adding an extra storey and increasing the residential units to 27. As has happened in other London Boroughs the planning process has been taken advantage of by demolishing the building and then submitting alternative plans to DOUBLE the residential units. I believe that there will be a knock on consequence of the demolition and reconstruction and the existing residential units. Initially during the build there will be increased congestion at what is already a very busy junction in King Head Hill &amp; Sewardstone Road. The only bus route that goes to Walthamstow from the area can already be problematic during busy periods and has in the past had to route out short get back on timetable. For many elderly residents this is their only link to the shops at Chingford Mount and believe this is set up being disrupted for many months. As an estimate you are looking at the area coping with an additional 100-120 adults and children residents, how do parking spaces expected to be sufficient. Many local residents have dropped kerbs for drives but I think parking will become so difficult, respect for driveway and general parking will become a big issue for new and existing residents. Education - I expect many of these properties will be rented for families, how will existing schools be able to cope with additional pupils. Many have already written me letters due to other developments. Whilst this is smaller than the Motspur Park site once all have been developed I cannot see how the area will cope without additional LOCAL schools being built. The same will apply with health care as that how can even 40 families come to the area without additional services being provided for them. The original application involved adding an extra storey to the building but the proposed 8 storey building will tower the junction and ruin the existing residential area. Much of the area is made up of 2 storey houses, many residents of which have often lived in the area for 30+ years they will suddenly have tall buildings shadowing their homes and gardens. Living on the edge of the borough</p>	<p>Revert back to the originally agreed plans for just a 3/4 story building and an 8 storey high rise. This will be more in keeping with other residential properties in the area.</p> <p>Reconsider the shops area - proposed 5 small shops what is really needed is a larger market focus area or Co-op food store that will benefit all residents and maybe just a couple of small shops, not 5 small shops that may end up staying empty or become even more coffee shops.</p> <p>The proposed development only allows for limited parking what will be done to protect existing residents from the knock on effect of this.</p> <p>With only a couple of bus routes in the area residents are more likely to need a car.</p> <p>What will be done to prevent congestion at the busy junction during construction. Could the area in Sewardstone Road directly outside the site be widened by one lane there is quite a wide paved area at the moment to try and improve traffic flow.</p> <p>If all 3 sites ahead as planned what additional resources will be implemented in the area, healthcare, education, parking etc. All these would need to be addressed.</p>	No	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. James Lickmuker	S454 - 66/74 Sewardstone Road	No	No	No	No	No	No	It is not the responsibility of the residents to have to consider if a planning application is legally compliant or not. This is the role of the Council and Planning Officers. It is not a legal requirement that a planning application should be rejected "en bloc". It is not viable to expect the residents to have to consider if a planning application is legally compliant or not. The Local Plan requires that a legal argument detailing the legitimacy of a major development of this type. The residents, who are stakeholders in the area in which they live, have a right to be consulted on how the proposed development will impact the lives of both them and their families. The discussion does not only centre around the legal argument, impact to those living in the area and those moving in are key factors and should carry equal weight in the discussion. High rise properties may be more suited to city living, but suburban design should reflect the type of living people move to the suburbs for, that being space, amenity, improved quality of living for name but a few. The grants that was in place before being demolished" the quality of which should be reviewed, contained a range of shops that covered the needs of residents in the area. They helped establish a community, something which town planners like to talk about but through poor design and the thought of the existing area often fails to achieve. C) The properties that existed were in keeping with the area with red brick construction and pitched roofs. C) The proposed redevelopment of the site with up to 8 stories of accommodation is grossly out of character with other properties in the vicinity. C) The property will dominate the landscape and affect the views of existing residents. C) Natural light will be reduced, greatly affecting the living conditions for those opposite and on adjacent roads that surround the proposed development. C) The traffic capacity of the King Head Rd, Sewardstone Road junction is now at the point whereby there are daily traffic jams leading to increased pollution, congestion and accident risk. I am not qualified to state whether the plan is legally compliant or fails to comply with the duty to cooperate.	These developments are not simply places to live, they are changing the shape of the area in which we live. They should be rejected until such time as a full suburban housing has been provided. The Local Plan reflects the needs and wants of those living in the area affected by the proposed works.	All residents should be involved in the process.	The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area. Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development of these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs, by identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan requires that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification, or for height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019). Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that include tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of character and environmental assets. The highest level of protection is accorded to former sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), former sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.	
Carole Lickmuker	S454 - 66/74 Sewardstone Road	No	No	No	No	No	No	1. The proposals for S454 are totally out of keeping with existing residential development, the majority of which are 2 storey detached houses or bungalows. There are 2 sets of 3 floor buildings, which, in their own way, have blended in. The Wingrove block flats has always been a part of the village with the area, which, because it is already there, does not justify the erection of more of its kind. Mistakes should always be learnt from and never repeated. 2. The proposal of the building into a proposed site as shown at the end of the plan, dominates the surrounding area, towering high above existing properties and 'closing in' the area. This is totally unacceptable to all those affected. 3. This has gone from a 3 storey plan to develop the pre existing flats and shops (getting a 1 understand it, the previous front facade as per the remaining shops beyond) to an 8 storey plan. It's a rectangular box shape, flat roofed and devoid of character and makes absolutely no attempt to blend or add to the area. 4. There were 6 or 7 flats in the previous building and 41 flats are now proposed with 25 parking spaces. We have already seen what a difference too few parking places on site make when Altona Heights is considered and the King Head Rd extra parking is observed. 5. Services in this area are already very stretched and expanding the population in the rate proposed for this area (440 new homes in this small locality) will be a bad deal for existing residents as well as for newcomers. 6. With regard to the shops which will be on the ground floor level if they are not of the plan to attract reasonable sized businesses they will not have well. Rents are high and there is limited turnover from locals as those who use the shops are mainly the elderly, those without transport and occasional shoppers. Insufficient to maintain a thriving community. 7. Traffic congestion, noise, air pollution, and the loss of amenity should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.	Based on the personal knowledge of the local area and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Emmons Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LEZ charge. But the rest of the area will also be subject to these increases and the proposed using the natural air flows possibly result in pockets with even higher concentrations. Watford Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent COVID pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the motters road above. If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It was not realised in the 1930's that people needed space and New Towns were built with green spaces, development and open areas. This is the reason	Yes	I do not know what examination hearing sessions are but if it means being input to any regardless or a total rethink then, yes, of course.	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019). Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that include tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposals within the Plan are car free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low traffic neighbourhoods (LTN) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a more vibrant alternative of congestion, parking problems and improve air quality. The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced. The Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Anthony G Thorne Lip	S454 - 66/74 Sewardstone Road	No	No	No	No	No	No	1. Traffic congestion, noise, air pollution, and the loss of amenity should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 2. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 14(1) a Local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are" (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan; (b) each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (c) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are" (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the local area and the problems associated with recent developments I do not believe the plan to be sound. There has been an example of the problems with the Chingford Hall Estate where the 1967 tower block was removed as there were major problems with all the motters road above. If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It was not realised in the 1930's that people needed space and New Towns were built with green spaces, development and open areas. This is the reason	Yes	Because there are too many unanswered q	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the best chances of taking the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP practices, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a more vibrant alternative of congestion, parking problems and improve air quality. Additionally, Watford Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Anthony G Thorne Lip	S454 - 66/74 Sewardstone Road	No	No	No	No	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 2. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1). 14(1) a Local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. They should take account of existing trees and retain where possible.</p>
Glynis Davlin				S454 - 60.74 Sewardstone Road	No	Response	No	<p>I do not see how these changes will benefit this area and the people living here. These changes will not better the community we already have.</p> <p>1. The plans are not in keeping with the area and in my opinion will look ridiculous not only to current residents but to visitors coming into the area. This is a sub-urban area, not a town or city and is the gateway to rural areas. The density, height and style of the building of Tower Blocks and High Rise are not suitable to such an area. They are unsightly and will not blend with the current landscape.</p> <p>2. I am concerned by the pressure this will impose on local Services.</p> <p>(a) We have low public transport access. Sewardstone Road, King's Head Hill and Lee Valley Road are always busy and at times so congested, traffic comes to a standstill. Cutting in time is very challenging.</p> <p>(b) Parking is also a concern with inadequate parking spaces allocated. Where are all these people going to park? Who has parking spaces already.</p> <p>(c) Where are the plans for the development of Healthcare Services? It is difficult enough already getting hold of your GP. Social Care services are already overstretched. Where are the plans for development there?</p> <p>(d) Where are the plans for the development of extra schooling? Schools are overstretched already.</p> <p>3. I am concerned that unapproved plans are being used as a precedent rather than pre-existing buildings at this site (60.74 Sewardstone Road). Also site restrictions, imposed by the council on the retail units prevent the use of a supermarket as was originally proposed.</p>	<p>The modifications I consider necessary to make the plan legally compliant and sound would be the buildings to be no more than FOUR STOREYS HIGH with the necessary PARKING SPACES to facilitate the number of residents anticipated to be living there. Also for a local supermarket which would also require adequate parking facilities.</p>	-	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of identification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2020).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. 				S454 - 60.74 Sewardstone Road	No	No	No	<p>In S454, this area is at the end of my garden in Laurel Gardens. The proposed plans are grossly out of keeping with the area. There is one small block of flats on the opposite side of Sewardstone Road next door to what was a public house and is a nice terrace. The flats do not overlook any immediate area to the back and do not cross in normal sized residences immediately aside or behind. The proposed development is too high and the original proposed development should be adopted which was only one more floor to be added to what was originally at 60.74 Sewardstone Road before they were demolished. As I understand it, none of the residents in Laurel Gardens objected to the additional floor and we were at least forward to having a Co-Op.</p> <p>It is unacceptable that laurel gardens will be used as the access to the new construction and for the bins to be placed there for emptying. If this does occur the governments will be full of bins and there will be no where for the residents of the road to work which is dangerous and completely unsightly and surely cannot be legal? There is a very large pavement on Sewardstone Road which can accommodate all of the bins and it does not matter to the council or developers what Laurel Gardens looks like, why should it matter that for a few hours every week. I say this because during the presentation it was apparent that the developers were only concerned with what the view looked like from Sewardstone Road.</p> <p>I do not believe that it is acceptable for such large block (8 floors + the 5 storeys) to be so close to Royal Sping forest. Please check this.</p> <p>The proposed development is completely out of character for the area and Chislegford as a sub-burb will resemble and be inner city.</p> <p>It is apparent that no action is being taken to ensure adequate health services, schooling and public transport will be in place by the time such a response.</p>	<p>Lower the height of both the proposed 8 floor block and the remainder to be reduced to retail on the ground and two additional levels. This will not crowd in the residents adjacent to the new building.</p> <p>There should also be an access road in the centre of the new 60.74 Sewardstone road so that those residents can use the access road as well as the driveway to the retail premises and the removal and collection of rubbish.</p>	-	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Duty to Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
Sarah Sanders				S454 - 60.74 Sewardstone Road	No	No	No	<p>I do not believe the Local Plan is legally compliant as the process has not been easily accessible and inclusive of the needs of many of our local residents. Many residents in close proximity to the Sewardstone Road sites are of older age, with generally more limited access to the online consultation channels and less experience with providing comments and feedback on such complex documents online. The LPA did not have a feedback form also been completed that they have deterred or prevented most from providing feedback at a time when public meetings have been prevented by the pandemic. This combination has prevented many from knowing the full detail of, or providing their full feedback on the Local Plan which overstates the viability of the community engagement.</p> <p>The demolition of the existing buildings against the previously agreed planning permission, with no reconstruction also raises concerns in the trust of the process.</p> <p>Further to this from the consultation sessions organised by the developers and architects it has been made clear that agreements have been made with the council behind closed doors and that the LPA is being used as a precedent for building height and density despite not yet having been approved.</p> <p>I believe the Local Plan is unsound, with the plans for this site and the other two at Sewardstone Road in contradiction to many strategies and plans for the purposes of these comments I have assumed that the proposed 40+ homes will align with the W7 average occupancy of 2.6 (ONS 2011) bringing over 100 new residents.</p> <p>I Development beyond the capacity of local transport or personal transport Contradicting Local Plan Policy D8 (C2) and Local Plan Policy 5.G and the LPA Strategic Policies - 'No Golden Threads' (2 &amp; 4)</p>	<p>More accessible and in person presentation of the Local Plan to ensure community engagement.</p> <p>Reducing the proposed development to a maximum of 10m to ensure and a maximum of 4 storeys (including designed) to maintain more appropriate density of housing in keeping with the area. But this must be supported by evidence by:</p> <ul style="list-style-type: none"> <li>improving the areas PAU rating significantly with improved bus routes, expanded cycle lanes and safe even walking/mobility vehicle routes to maintain the stations.</li> <li>Reopening development until once Cross Rail 2 and sustainable connections are in place.</li> <li>Including provision of shared access vehicles such as car clubs.</li> <li>Investing in local healthcare and education services and facilities - new schools or the extension of existing schools to cope with the increased resident numbers. Ensuring that any land will be needed in the immediate areas.</li> <li>Ensuring safe and inclusive access to SANGS - such as the reservoir, walkways and pathways to Gunpowder Park as well as new green space as part of the development to limit the impact on Epping Forest SAC.</li> <li>Improving the junction and road layout at Sewardstone Road and King's Head Hill/Lee Valley Road.</li> </ul>	Yes	<p>I am part of a local residents association and with our residents concerns to be included.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. The Local Plan Active Travel and Transport chapters sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine walking, walking and public transport use. Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Through the evidence published in the Character Identification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Neil Phillips				S454 - 66/74 Sewardstone Road	No Response	No	No	<p>Without being legally trained or having the time to research the requirements that make the plan compliant, I am unable to comment as to whether I consider the local plan to be compliant.</p> <p>I do not believe that the proposed local plan is sound as it does not take into consideration of the current Community, Infrastructure, Environment, or Existing residents of the area.</p> <p>The proposed development of over 40 dwellings within this site boundary suggests little consideration has been given to the current density of housing locally. Aside from two or three exceptions, the local housing is predominantly provided within 2 storey family homes with outdoor space, the proposed development of high-density housing in high rise residential blocks is not keeping with the character of the local area. I moved to the area just over 7 years ago due to the character, the suburban environment, but most importantly the nice community feel, with such high-density housing, I fear that this may change. Policy 15 from LP1 identifies a requirement to safeguard the local character of the area or improve the quality of the local environment. I believe that the proposed schemes do not meet this requirement set out within LBWF own proposals as they neither reflect the current character or, in my opinion, improve quality.</p> <p>There also seems to be a lack of consideration regarding access to public transport, the area has a PTAL rating of 3b, the proposals seem to hold hope of Crossrail 2 being within a 20-minute walk away, unfortunately we now know that this is not going ahead. The wider proposal of 400 dwellings, without an increase to local work, will result in the majority of working adults having to commute. Considering that Chingford rail station is a 20-minute walk up a steep hill, which will be a challenge to those with ability issues, and cycling up the hill is only for the most dedicated, access to public transport needs to improve. The proposals do not seem to address how access to public transport will improve for residents of the development on site of development, 4 stores does not align with the local of the area. All properties in this area are houses or small development blocks. This proposed block is out of character for the area.</p> <p>In addition, large blocks of flats is out of character for Chingford and a village that is known for wide open spaces and a gateway to the forest.</p> <p>Previous high rise development at Chingford Hill estate was demolished due to a number of issues including anti-social behaviour and replaced with houses and low blocks. This should be replicated across the borough and not move the problems Chingford Hill experienced at another part of the borough.</p> <p>Impact on Laurel Gardens, this is a small narrow cul-de-sac for 18 houses and bungalows. The proposed development will overlook these homes. In addition as the entrance to the development will be via the narrow entrance Laurel Gardens I will cause under congestion and noise to the existing residents as well as impacting their access to the property.</p> <p>Parking, Laurel Gardens and the surrounding roads have minimal parking. As this development will only have 10 parking spaces for 42 properties this will put undue pressure on the residents of Laurel Gardens due to it being the entrance to the property. The proposal to make Laurel Gardens residents parking adds additional costs to the residents and is unlikely to address the issue.</p> <p>Lack of public transport - public transport to the area is poor with only 2 buses every 15-20 minutes. Chingford station is a 25-minute walk a steep hill which is not feasible for many people and especially young families or the elderly. This means that realistically residents will need a car. Why have only 10 parking spaces been provided, with only 5 for development and 5 for surrounding area?</p> <p>This is a suburban area with mainly low rise housing. Transport services (School, healthcare clinics, public transport, etc) insufficient off street parking proposed.</p>	<p>Firstly improvements to local transport need to be implemented, or at very least considered and planned for:</p> <p>Only low rise housing should be considered for these sites, which would be more keeping with the nature of the suburban area the current housing stock.</p>	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Marilyn Rundle				S454 - 66/74 Sewardstone Road	No Response	No	No Response	<p>The proposed building of S454 is not in keeping with the original planned building. The 8 storey building is totally out of character of the area, including site S452B &amp; S452. The original planned buildings were 3 storey and small shops and a supermarket would be much more beneficial to the local area community. Quality of life for residents with these high buildings will incur more noise traffic pressure on local amenities traffic and parking, also they will impact on day light, views and privacy of existing residents. Plot S452 &amp; S453 are planned to be built in an area at high risk of flooding, which is worrying.</p> <p>The impact on the waste disposal, traffic at the crossroads is already very heavy and noisy. This is an overbearing scale for such a small area and not in keeping with the character of the local area.</p>	<p>Building no more than 3 storey, additional amenities, schooling doctors parking and play area. Supermarket and petrol station to remain. Traffic system to be updated to help with the extra traffic.</p>	No	-	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all sites allocates passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that flood risk can be successfully managed against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Identification Study (2025).</p> <p>The site allocation requires that commercial floorspace is provided as part of new development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Identification Study, the Local Plan policies have been prepared to ensure that sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. San Edwards				S454 - 66.74 Sewardstone Road	No	No	No	<p>Planning is being prepared to be submitted for the I2 proposal next month. This proposal is based on 27,000 planned for the borough over a 15-year plan. However, the Housing target was based on a 10 year plan. Therefore, there is no evidence to show that this will be extended to include the same allocation over another 5 years. Therefore over 10 years only 18,000 homes are needed to meet the target. Things can change over such a long time-scale, Waltham Forest doesn't have the space to keep building, which is why all the proposals are for flats, no houses. This is why I also feel this target is based on 8 or 9 years. None and none of the properties planning to be built in Chingford are houses. Covid has shown the importance of outside space for mental health so converting families into flats feels like a step backwards. The tower blocks were pulled down at Chingford Hall estate for this reason.</p> <p>Original planning for 37 flats which now seems to have nearly tripled, when the previous block was not meant to be pulled down. Please note that whilst this was happening cracks appeared both inside and outside of our newly renovated and rendered home, with brick dust caking our vehicles, windows and gardens. A larger development would need deeper foundations, which would again be likely to cause movement.</p> <p>Vehicle access will be to Local gardens. However, no provision to increase the width of the road which is currently wide enough for 2 vehicles. So the additional traffic due to deliveries for residents i.e shopping including food deliveries which will cause problems.</p> <p>The preferred plan is for 41 flats consisting of 10 x 2bed = 20 people + 20 10 x 2bed = 14 people = approx. 67 10 x 2bed = 50 people = approx. 66</p>	<p>low rise max of 3 stories in line with previous building More parking facilities including for shops Change to access for deliveries Wix cycle provision as 32 for 5 shops unnecessary</p>	No	-	<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/instigated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Ian Redwell				S454 - 66.74 Sewardstone Road	No	No	No	<p>The demolition of the shops and flats was illegal as it was against planning permission. The area is a suburban area of small residential houses and low rise flats. This 17 storey development is too tall and not in keeping with the suburban area. There is no infrastructure, schools, district parking to support this. People cannot park on Sewardstone rd by day and it is highly congested already so will force the new proposed residents to park on residential adjoining streets. This will impact on local residents such as us. 385 plus new homes will equate to hundreds of new residents. Also the high rise building is too close to the water front of the reservoir and will greatly affect the path of migratory birds and wildlife including endangered species and amphibians. This plan is detrimental to the area and must be stopped.</p>	<p>A much smaller development of shops with single storey flats above with allocated parking spaces will be acceptable and in keeping with the area.</p>	No	-	<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the designated Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
Mike Freeman				S454 - 66.74 Sewardstone Road	No	No	No	<p>Insufficient consultation with residents. Therefore there is no co-operation</p>	<p>Consult with all residents in the area. We at use roads around the area and will continue to do so, even against the advice of the WRMF Traffic Department. Some high proposals are in the pipeline if this small, but high, building is acceptable. WE cannot support such a massive upgrowth to our current lifestyle.</p>	No	<p>Details must have a say. Council need tends to favour the developer in all these cases</p>	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of homes to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Peter Dawport				S454 - 66/74 Sewardstone Road	No	No	No	<p>1)The new development is totally out of character with its surroundings and should be limited in height as it is more than twice the height of the adjacent building a little further down the road.</p> <p>2)The original re-development of the site prior to its illegal demolition included a proposed car-pool along the ground floor formed by housing together a number of the garages/shops. This would have been a very welcome addition to the area as apart from the new Watrous local in the Street Garage there are no other, what would be called substantial supermarkets, serving this area. It is necessary to go to either North/South Chingford and Edfield, only accessible by either car or bus - or Waltham Abbey - only accessible by car as there is no bus service - to shop.</p> <p>3)There is totally inadequate parking facilities proposed for the new development both for the new home owners and those visiting the area. By limiting the size of the shops to single units their trade will be severely restricted to mainly people on foot.</p> <p>4)The Sewardstone Road/Kinghead Hill/Laa Valley junction is an extremely busy junction, which can be observed on a daily basis and even at weekends, and any increase in traffic activity will cause grid lock at all times taking into account the other highly unsuitable proposed developments on this junction. Additionally pollution levels for people around this area will be even higher than they are now.</p> <p>5)Childcare facilities have not been taken into consideration and unless there are plans for new schools in addition to the current ones any future children will need to travel some distance by either bus or car.</p> <p>6)No consideration has been given to health and GP facilities which even now are not adequate. Currently there is a doctor's practice in Kinghead Hill, one near the Ridgeway at the junction of Mansfield Hill and one at Littlehall Road/Kings Road of which one is not taking new patients for at this time providing face to face consultations. People in need of medical assistance will need to go to a considerable distance to get attention and I fear this will increase.</p> <p>7)It is a contributory factor to the amount of traffic on the road, and the fact that it is not signed as there is no plan for any additional services, the schools and health care. The existing services are overstretched and don't feel that they can handle the extra volume. The existing transport links are inadequate to support housing which is being proposed without parking and as a result this would negatively impact parking for existing homes. A high rise building of 40 flats is not in keeping with the local area. In addition, it doesn't seem right that unapproved local plans are being used as precedents. This is every busy junction and don't feel that such a large building is appropriate for this area.</p>	<p>Do not proceed with the development as it will do untold damage to the surrounding area</p>	No	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The site allocation requires that commercial floorspace is provided as part of new development.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The definition of tall buildings across the borough is sound and is conforming with the London Plan, as agreed in the Statement of Common Ground at IPE27. The Local Plan is careful to identify the differing characters across the borough and sets clear policy expectations relating to them. Particular attention in relation to this is drawn to Policy 8 - Character Led Intensification and the new 'Building Heights' policy proposed through Main Modifications.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p>
Elisabeth Flist				S454 - 66/74 Sewardstone Road	No Response	No	No	<p>There was little consultation before plans were pretty much finalised. The buildings are out of keeping with the local architectural style. They overtake the area and being a semi rural area with a more city urban design. They lack cohesion. The number of new homes would put pressure on the local infrastructure - roads, healthcare, schools etc. The roads in the vicinity would suffer from pressure on parking as no parking is provided for on site. It is unrealistic that the residents will take the bus as the development is at the bottom of a steep hill. It is a development that will not complement the area - simply bringing angst and conflict</p>	<p>A 3 storey development, in the style of existing buildings, with commercial space would be more cohesive and sound.</p>	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Abigail Woodman				S454 - 66/74 Sewardstone Road	Yes	No	Yes	<p>Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. And in the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to "maximise access to Epping Forest and" mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is given by legislation, there is no reason why the same approach cannot be taken towards the marshes.</p>	<p>The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.</p>	No	<p>It is essential that green spaces have a voice at the table during the examination hearing sessions.</p>	<p>The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it use improvements as development comes forward.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consider Natural England in cases where development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on land or areas within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>These robust measures proposed to both avoid and mitigate any recreational harm to the Epping Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy, have been developed in consultation and collaboration with Natural England, the City of London Corporation (conservators of Epping Forest) and the Valley Regional Park, all of whom have expressed support for the work Waltham Forest have undertaken (see joint letters at IPE42, IPE43 and IPE42). Natural England are clear that they agree with the conclusions of the IMA and consider the Plan sound on the basis of the well-considered and detailed evidence and strategic produced and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at IPE44 and Natural England's response to the inspectors' further MIOs, dated 23rd January 2023.</p>

For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Alicia Goulcher				S434-60-74 Sewardstone Road	No Response	No	No Response	The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. A development of around 40 homes on such a small site inevitably means the intention of building high rise flats. Any development of over 4 storeys high would be totally out of keeping with the predominantly 2 storey buildings in the area. The London Plan states that tall buildings should only be developed in locations that are identified as suitable.	The maximum height of any development on the site should be no more than 4 storeys this should be stated on the local plan rather than around 40 new homes'. The number of new homes should be reduced.	Yes	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>

-				S434 - 60.74 Sewardstone Road	No	No	No	The proposed constructions are not in keeping with the area and will be out of place in a suburban area and in view of the overall height and content of all of the proposed developments in the area. I believe that if they were legally compliant there would be sufficient amenities to accommodate such a large number of residences. I do not believe that a comparison town character would agree to such high building aside normal houses and bungalows that are in Laurel Gardens and other roads in the immediate area.	It was originally proposed to replace the demolished properties with a large retail outlet and residential accommodation with one additional floor. I believe that most, if not all local residents had no objection to. I suggest that the original proposal is reinstated.	-	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2023/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,930 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>
David Tapping				S434 - 60.74 Sewardstone Road	No Response	No	No	Not in keeping with the area and would put a huge strain on the area with regards to schools, healthcare, parking etc.	-	-	-	<p>Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Smita Mandi				S434 - 60.74 Sewardstone Road	Yes	No	No	<p>The plan is unsound as there has been no consideration given to the following:</p> <ul style="list-style-type: none"> <li>school places available, primarily nursery and primary schools; there are few existing and those nearby are oversubscribed.</li> <li>health services available and access to GPs.</li> <li>Public transport links and frequency of buses, capacity and effects on services due to additional residents.</li> <li>Parking spaces for existing residents, potentially leading to a CPZ and dissatisfaction of local residents already in the area.</li> </ul> <p>The Local Plan is unsound as there are no plans to increase the number of schools or school places available in the local area which has oversubscribed schools.</p> <p>It would also put a strain on the available health services where it is already difficult to obtain an appointment with a GP or dentist. Transport links in this area are very minimal so not only would existing transport services be strained it would put pressure on additional parking for which believe there is no capacity and would put pressure on local existing parking with the potential to result in a CPZ zone much to the dissatisfaction of existing residents.</p> <p>The proposed new homes would change the view of the city and create an impression believe, but my main concern is the lack of school places available for children being housed in the new homes or moving in to the area. I believe this is of critical importance and there is no mention of how the plan satisfies the need for additional school places.</p>	<p>To make the plan sound I would suggest that there is a new school built close to the proposed new homes, within walking distance or that the existing local schools are given funding to allow more children to attend and increase the number of teaching staff for the additional number of children expected to move in to the area.</p> <p>New or additional bus routes in and out of North Chisford would be required, or more frequent buses on existing routes to cope with the number of people moving in to the homes as well as existing residents. We need to understand the effect on local health services and how any strain due to new residents moving in to the area will be mitigated.</p>	No	-	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that undermines cycling, walking and public transport use.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>

Mrs V Coates				S434 - 66.74 Sewardstone Road	No	No	No	In combination with the other proposals in this area I am concerned about added pressure on schooling, GP surgeries, traffic pollution, transport, shopping and parking facilities. Investment must be made in these areas before any of the three proposals are considered. Is S432/S3/S4.	Investment must be made into provision for further schools, shops, transport, GP surgeries and to investigate air pollution.		-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Amanda Morley				S434 - 66.74 Sewardstone Road	No	No	No	Shops and facilities are badly needed in this area not more high rises. The area does not support such dense population. Public transport, education and health is not sufficient to support such an increase in population (shops etc) in this area are deficient and badly needed		No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but savings were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate capacity from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,820 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, social, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that undermines walking and public transport use.</p>
Aylin Hassan				S434 - 66.74 Sewardstone Road	Yes	No	Yes	8 storey high tower block is not in keeping with the area. Again no provision for parking therefore greater load on surrounding streets. With other local developments this could be too much burden for the area.	Max of 3 storey on top of commercial buildings, parking for commercial buildings, parking for residents, increase number of homes to amenities.		-	<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p> <p>All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p>
Mike Freeman				S454 - 66.74 Sewardstone Road	No	No	No	You refer to the unsound development area as the gateway to Chiswick. It will be an eyesore. The local roads are already very congested with the M25 and A40 using Sewardstone junction when problems there. There is no provision for additional public transport/schools/doctor. Being an elderly resident of the area for over 25 years I do need a car. As I'm sure some of the new residents would. There is already pollution from the Edmonton Waste Plant so there would be more traffic emissions at that junction. This development will be completely out of keeping with the rest of the neighbourhood, that's what we are a neighbourhood which you want to destroy. A face to face consultation is required to talk to the local people	The plans need to be considered more in keeping with the original plan 3 story's with 1 large and a couple of small shops. More in keeping with the surrounding area	No	Details must have a say. Council need trends to favour the developer in all these cases	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
P.K.Neville				S454 - 60.74 Sewardstone Road	No	No	No	This area is already highly congested, adding new homes at this already very busy junction will cause even more disruption for existing local residents. This location is extremely difficult to walk & cycle especially up Kings Head Hill. Planning should include @ least 1 parking space per household.	All 3 developments in the area need to consider extra schools, medical services, parking and transportation/pollution. All these amenities already over populated, and proposing making the area a CPZ is not helping the situation. Buildings should be no higher than 4 storeys.	Yes	We should have a say on how any plans affects its area	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council commits to a long term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of park infrastructure. The forms part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours.</p>
Mhn Smith				S454 - 60.74 Sewardstone Road	No Response	No	No Response	This proposal is unsound if the development of over 300 new homes at this SA52 Motorpoint is also to get ahead. Local doctor and dental services are already overstretched and will be unable to cope with the increased demand of such a high number of new residents. The bus service to Chingford station is inadequate to cope with the increased demand likely to be generated by this development and SAS2 and exiting is not an option because of the steepness of Kings Head Hill. The height of the building is also not in keeping with the character of the area.	The height of the building and the number of new homes in this development and SAS2 should be greatly reduced and the number of new parking spaces should be increased. The frequency of the two local bus services which serve the Sewardstone Road/Kings Head Hill road junction should be increased to meet the additional demand. There should be an increase in doctor and dental services.	Yes	I live in the area	<p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				S44- 66.74 Sewardstone Road	No	No	No	1) feel the build is not in keeping with the surrounding area. The building used as a comparison is sheltered accommodation which has little impact on local amenities. There are no plans for additional healthcare and schooling which are both over subscribed already. Parking is limited in the area and prevent and add no parking allocated for most of the build where people going to park.	2) Reduce height to match that on other side of Laurel Gardens and on the opposite corner of Kings Head Hill - 4 storeys maximum 3) Move the pedestrian entrance to the flats to Sewardstone Road as per original plan 3) Create vehicular access to the development from Sewardstone road on Kings Head Hill to reduce the barriers/pollution/disturbance on Laurel Gardens x10 homes & their residents 4) Remove rubbish collection from Laurel Gardens for all proposed 41 homes 5) Provision of additional services required 6) Provision of adequate parking is required - restate the vertical parking at the front of the development, the reduction to only 3 spaces makes no sense - where do the shop keepers and their staff park (public transport and cycling are not good options at this site) 7) Be realistic about cycling in this area - there is no lighting going towards Waltham Abbey - 2 mins away from the site - very dangerous, and steep hill going towards North Chingford/Woodford etc. The road going towards Effield is also dangerous with high speed vehicles and no cycle path	-	-	The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2025).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Lisa Bagley				S44- 66.74 Sewardstone Road	No	No	No	1) Not in keeping with the area - height being compared to a disjunctive use block, ie. not privately owned, residential home for elderly/infirm without cars. 2) Original community demolished - development illegally demolished, ruined the local area. 3) Proposed design overlooks gardens and homes in Laurel Gardens and Kings Head Hill - they will need to be compensated for loss of privacy, loss of equity in their homes, difficulty selling their properties. 4) Laurel Gardens residents will be impacted by increase of parked vehicles blocking the narrow street and increase of waiting delivery drivers/increased residents & their visitors. 5) Proposed plan references this unapproved plan and even if the 10 year plan will sign off 60 homes, as if this area can realistically support it (the answer is NO) 6) No extra provision of transport, medical services, school places etc in relation to this development, motorport, sea valley - unfeasible burden on local services. 7) Chingford is not an urban environment like Walthamstow/Tottenham Hale - does not have a tube station or buses flying past every minute - it is semi-rural and has very steep hills therefore people will use cars - sufficient parking has not been provisioned. 8) Proposing more housing but reducing the existing parking - makes no sense - will seriously impact residents in surrounding roads/the surrounding area, this does not improve their lives in any way. 9) Has the impact to the viewing points from Epping Forest been taken into consideration - eg. views from Pole Hill and Vales Meadow - high rises will be a blot on the beautiful landscape - a crying shame, this should be investigated.	2) Reduce height to match that on other side of Laurel Gardens and on the opposite corner of Kings Head Hill - 4 storeys maximum 3) Move the pedestrian entrance to the flats to Sewardstone Road as per original plan 3) Create vehicular access to the development from Sewardstone road on Kings Head Hill to reduce the barriers/pollution/disturbance on Laurel Gardens x10 homes & their residents 4) Remove rubbish collection from Laurel Gardens for all proposed 41 homes 5) Provision of additional services required 6) Provision of adequate parking is required - restate the vertical parking at the front of the development, the reduction to only 3 spaces makes no sense - where do the shop keepers and their staff park (public transport and cycling are not good options at this site) 7) Be realistic about cycling in this area - there is no lighting going towards Waltham Abbey - 2 mins away from the site - very dangerous, and steep hill going towards North Chingford/Woodford etc. The road going towards Effield is also dangerous with high speed vehicles and no cycle path	Yes	We are directly impacted detrimentally by the proposed development	Through the evidence published in the Characterisation Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S44- 66.74 Sewardstone Road	Yes	Yes	Yes	-	-	Yes	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)
Christine Shepherd				S44- 66.74 Sewardstone Road	No	No	No	Floor access to public transport, lack of or inadequate access to health services and schools. High levels of traffic pollution and pollution from the incinerator at Edmonton make the development of high rise flats unsafe from a health perspective.	Houses with gardens and parking would help mitigate the above issues	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and need not contribute to a decrease in air quality during the construction or operating stages of development.  The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorized vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Joy Heatherley				S44- 66.74 Sewardstone Road	No	No	No	The plan does not fulfil the legal duty to assess the development needs of their area; plan growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects. (National Planning Policy Framework, page 6). I don't believe that the plan meets the definition of "Sound from the National Planning Framework, paragraph 30. The local plan does not meet the areas objectively assessed needs. The prioritisation of housing is to the significant detriment of the environment, local business, and the construction area.  It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable  The Council is seeking to build more than the London Plan requires. It does not "positively and proactively promote economic growth. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive robust and economic prosperity, rather than homogenising the area through boxy tower blocks.  2) It is not socially sustainable  The Council has not entered into joint working with good faith. Resident views have been disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would substantially change the character of the area, urbanising the gateway to the Forest.  It does not fulfil a social objective to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can	Please see the suggestions above.  in particular: the height of the proposed building must be greatly reduced the plan for a Coop supermarket or similar must be reinstated - this is the one thing in the plan which would serve the existing and future local residents, and will support smaller existing and new businesses. Small units will not survive here on their own - will be run bare and the like of no practical usefulness to the community public transport links and vital facilities as doctors schools and dentists must be improved	-	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC) (The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets, such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any divergence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,620 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.  In order for the Local Plan to be found "sound" at examination stage, it is required to be accompanied by a Full Sustainability Appraisal and Habitats Regulations Assessment as part of the evidence base.

				S44- 66.74 Sewardstone Road	No	No	No	Over development in an already congested location.	Limit storey height to be consistent with existing streetscape	-	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Paul Wellard				S44- 66.74 Sewardstone Road	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>	-	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S454 - 66-74 Sewardstone Road	No	No	No	The current roads a very busy. It will impact on the quality of life of everyone here. More buses and car will create more pollution and noise. It seems that no one cares about the well-being and health of the neighbourhood.	It need to provide parking area for the new residents. It demands a better infrastructure (more nurseries, hospitals, GP, schools, parks and leisure centres). On top of that, it essential to improve road access to highways. The traficking is already a nightmare.	Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Robert Andrews-Large				S454 - 66-74 Sewardstone Road	No Response	No	No	N/A  These proposed flats are an intrusion of privacy to myself, neighbours and King Head Hill. In addition to this they will block the sun from my garden.  Also, I do not believe there are insufficient number of schools & health care in the area to cope with all the flats that you are proposing. Also, there isn't enough parking for these flats, there should be one parking space for each flat that you are proposing because the proposed homeowners will have one car (possibly more), where are they going to park because if as you probably hope, they will not use the buses and if they did are there enough and do they run often enough, even getting to Chingford Station, it is a long walk and London Transport often cancel the bus.  I have problems getting out of my road now with the rubbish being collected and deliveries, it is going to be worse because there will be so more bins for LBWF to empty, more of the homeowners in Laurel Gardens should have this inconvenience.			Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.	
John Poppy				S454 - 66-74 Sewardstone Road				I cant believe the council are even considering such an immense development on these sites. With in excess of 1,000 new residents how will amenities including parking and public transport cope. There is no provision for extra schooling and health and social care which are already overran. All I can see is that this proposal is a try on just to see what numbers the council can be pushed to as there is no way this proposal should be considered.  Under this system it should be possible for me to knock down my house and build a tower block. !!!		No		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.
Michael Alan Freeman				S454 - 66-74 Sewardstone Road	No	No	No	Not compliant until local voices are heard. Unsound as there has been no co-operation with LBWF	Talk to the locals. Ask what they want and are willing to accept. Don't just plan with very limited knowledge of space, transport links and other infrastructure works. This is a prelude to some massive plans to flood the area with high rise buildings with no character. With no parking provided the local streets will become blockaded. Agent talk to the locals.  This will mean be the proposed Community Hub LBWF keep talking about. Everything will be restricted. Nobody will be able simply access the area.	No	It'll destroy the area if this and future planned high-rise are accepted by LBWF	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Local Plan Part 2 has been consulted on twice - The first consultation was at the draft stage where the Council held several in-person meetings from October - December 2020. For this pre-submission stage, there was a spike in Covid-19 cases - the council decided to hold these engagement events online for the safety of our residents and officers.  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Maree Scully				SAS4 - 60.74 Sewardstone Road	No Response	No	No Response	I believe this development is not sound because it makes no allowance for the impact of 40 households upon the local infrastructure i.e. Doctors and social care capacity, school places, car parking and congestion. This 8 storey high rise is not in keeping with this suburban setting of small houses, bungalows and low level apartment blocks. I strongly oppose this and would ask WF Planners to re-consider: have we learnt nothing from the pandemic about the negative impact on physical and mental health of placing people (especially children) in high rise flats, without gardens.	Waltham Forest is one of the most densely populated boroughs in London - build houses or maisonettes (with small gardens) to give residents quality of life and better health. This urban sprawl would impact the local area - no more high rise lower blocks.	No	The voice of local residents should be heard to improve transparency in the planning process	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Frank Pace				SAS4 - 60.74 Sewardstone Road	No Response	No	No Response	I am totally disgusted by the plans. I've lived in Chingford for over 20 years in a green belt area and flat lies with forests. This development will destroy the lovely views and increase crime and the roads will be ridiculous busy. The area is struggling already and no plans highlighted for improvements to transport. We totally object to the plans.	Scale down by 75% and no more than 3 stories high.	Yes	I am concerned, as to developments in and around my area.	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. Jane Davoport				S454 - 66.74 Sewardstone Road	No	No	Yes		Whilst I am in favour of providing much needed housing, I do not feel that the proposals for the Sewardstone Road area are sound. I live at *** King Head Hill and I am in very close proximity to the proposed new housing. High rise buildings would be completely out of keeping with the local area. We are right on the edge of the forest, which is a haven for wildlife and would be detrimental to their natural habitat. High rise buildings would take a lot of natural light away from residents towards the bottom of King Head Hill. There would be insufficient parking provision for all the proposed new homes in this area, insufficient school places, insufficient GP provision. All in all it would be a complete nightmare. This is the suburbs of London, not the city. Our relatively green areas should not be taken over by high rise housing.		-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Marie Scully				S454 - 66.74 Sewardstone Road	No Response	No	No Response	I believe this is unsound because agent we have no mention on child's or surgeries catering for an influx of people to this area. parking is also an issue in the surrounding roads. As for traffic, this area suffers badly when an issue occurs on the M21, M25, A20 and North Circular causing frequent grid locks.	We have family homes in this area and for decades these work. We do not need hideous tower blocks, they do not work.	No	The views of local residents should be heard to improve transparency in the planning process.	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections, and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
John Cole				S454 - 66.74 Sewardstone Road	No	No	No	Site was illegally demolished. Does not fit in with surrounding area which is primarily low rise dwellings. Limited parking for the proposed development. Proposed parking restrictions will negatively impact existing residents in surrounding properties. Development will negatively impact surrounding infrastructure.	Return the site back to it's original size. No more than 3 or 4 storeys tall	Yes	I believe that the development is being carried out without consideration of the best interests of the existing local community. LBWF is putting money and policies before the residents, which they are supposed to serve.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Sally Tapping				S454 - 66.74 Sewardstone Road	No Response	No	No	Not in keeping with the surrounding area and lack of infrastructure for the increased population		Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Sue Cooper				S454 - 66.74 Sewardstone Road	No	No	No	High Rise!!!!		No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Sally Topping				S454 - 60.74 Sewardstone Road	No Response	No	No	Height of building not in keeping with the area		No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Ruby Waldral				S454 - 60.74 Sewardstone Road	No Response	No	No	This development alongside others within the same area will put to much strain on existing infrastructure and services. Not enough parking, medical services, schools. Increased congestion, pollution and this build is too high in comparison with rest of area blotting out light and views for existing residents.	If you read my above comments, the modifications should be self evident	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.	
-				S454 - 60.74 Sewardstone Road	No	No	No	The original proposal was to modernise the existing dwellings. The developer ignored the remit and demolished the building in its entirety. We are now faced with an eight story monstrosity. Parking is also limited and transport links to town are poor. The proposed development will turn this corner of North Chingford from a semi rural neighbourhood into a faceless concrete jungle.	A return to the promised plan an improved low level development with retail outlets below. The existing expanse of pavement should be utilised to facilitate parking	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.	
Len Ferguson				S454 - 60.74 Sewardstone Road	No	No	No	I dont know what SAC is. This should be in full.		No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development.	
Mrs Kiprye Oxtas				S454 - 60.74 Sewardstone Road	Yes	Yes	Yes	I am Mrs Kiprye Oxtas living in 1 Laurel Gardens, Chingford HA7. First of all I will have a lot less privacy in my garden and living room as it will be visible to everyone in the apartments. Therefore I won't be able to sunbathe in my garden as it will not be private and block the sun. Also there is not many car parks being created which will leave to people overusing and parking in our closed road. This is already an issue that all neighbours agree on and will get much worse. Noise will also be an issue and will affect me when I'm in my garden and excessive noise at later times will affect my sleep.		No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.	
Stephen Doyle				S454 - 60.74 Sewardstone Road	No Response	No	No	N/A	There is an INTRUSION OF PRIVACY to the homes on Kings Head Hill and Laurel Gardens due the height of building. ALSO there is only 20 parking spaces allocated so there should be a maximum of 50 flats, if 41 flats are built with 5 businesses there should be parking for a minimum of 50 cars. Also - garbage collection, this should be picked up from within the boundary, it is unacceptable for garbage to be collected from Laurel Gardens which is where the only entrance is showing to the land within the boundary, the road is not wide enough, sometimes will not be able to access or leave their homes when garbage is being collected from Laurel Gardens.		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The site is identified as a priority area for new waste management facilities within the adopted North London Waste Plan. This is consistent with the London Plan approach to the siting of waste facilities within designated industrial estates, where their impact can be best mitigated. The Council supports measures to mitigate the impact of such facilities through appropriate design measures.

Marika Ahmet				S434 - 60.74 Sewardstone Road	No Response	No	No	The proposed high rise properties will not match existing area, and will not be in keeping with the area - They will be a blot on the landscape and not wanted in Chingford - a gateway to Epping Forest, how are existing services (healthcare, schools, etc) expected to cope with the increased population in the area if the project is completed.	The community feel of the area will be lost as development will create a highly populated town like feel. Could the number of units be reduced using a lower rise development instead - no more than 3/4 stories high		I feel I should have a say in the development of the area I live in	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Roy Warren				S434 - 60.74 Sewardstone Road	No Response	No	No	the site proposed is totally unsuitable for the proposed development there are no parking facilities no extra healthcare schooling ect and will completely change the character of the area	address all the things I have mentioned	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. Susan Doyle				S454 - 60.74 Sewardstone Road	No Response	No	No	No Response so I don't need to comment	There is an INTRUSION OF PRIVACY to the homes on Kings Head Hill and Laurel Gardens due to the height of building. ALSO there is only 10 parking spaces allocated to them should be a maximum of 20 flats, if 4 flats are built with 5 businesses there should be parking for a minimum of 50 parking spaces. Also - garbage collection, this should be picked up from within the boundary. It is unacceptable for garbage to be collected from Laurel Gardens which is where the only entrance is showing to the land within the boundary, the road is not wide enough, homeowners will not be able to access or leave their homes if garbage is being collected from Laurel Gardens.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, if new residential development within the borough is required to be free from. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newness of delivery, parking problems and improve air quality.
Linda Hainsby				S454 - 60.74 Sewardstone Road	No	No	No	I believe that no regard has been given to the existing residents that surround the proposed development on Sewardstone road - eight stories is out of keeping with the existing environment - Chingford is a suburb at the entrance to Epping Forest. It is mainly 2 story houses or bungalows. Changing the form and feel of this suburb by building these flats and the other additional proposal to build flats opposite will adversely change the uniqueness of Chingford - Transport - the existing public transport links are inadequate for this development and the further ones planned in the area. There are 2 bus routes that only run 3-4 times an hour. - Traffic at the Sewardstone road junction with Kings Head Hill is already regularly congested with traffic jams daily - inadequate parking in the 41 property development will add pressure onto the existing residents of Laurel Gardens, where there is already inadequate parking options. 10 parking spaces for 41 properties are inadequate, especially when 3 will be disabled spaces and 2 for electric charging meaning that there will only be 5 normal spaces putting pressure on Laurel Gardens and surrounding streets  the surrounding area has 2 very steep hills which makes cycling virtually impossible. Why put so many cycle parking spaces in a development where they clearly will not be used. Have you done any assessment on how many people cycle in this area? - infrastructure and shopping. There are no supermarkets in the local area. How are the residents supposed to shop where residents in walkable and public transport inadequate? This will cause greater reliance on shopping deliveries causing greater congestion to Laurel Gardens. - Laurel Gardens is narrow and additional deliveries, vans etc will adversely impact the existing residents. The existing plans put the burden of additional traffic onto Laurel Gardens, which is a small 10 property out-dated. This will have a significant detrimental impact on the residents of Laurel Gardens.	Reduce the 8 story development back to the original proposal of an additional floor to reduce the burden on Laurel Gardens and surrounding streets Ensure the development has adequate parking to reduce the burden on surrounding residents to align with the parking facilities in neighbouring blocks. This may be against L2W existing preferred plans but is needed due to the inadequate public transport and the uniqueness of the built area making walking or cycling to the station unrealistic Change the plans that puts the burden onto Laurel Gardens for deliveries, access and bin collection to the wider Sewardstone road	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Liz				S454 - 60.74 Sewardstone Road	No	No	No	Total absence of sufficient publicity to enable any meaningful consultation or input	A consultation that is open and available to all where local people can engage and have meaningful input	Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Tim Hancock				S454-66-74 Sewardstone Road	No Response	No Response	No Response	<p>I Strongly Object, to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, denigration to the surrounding environment, negatively affecting the current residents?) This is considered an arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions concerning our future to current generations, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppets by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a liberal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are characterised by the current developments in the surrounding areas.</p>	Reject based on continued denigration to local community and strain on local services, as pointed out above.	No	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert for the future. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short term financial terms, will undertake the future wellbeing of the indigenous community?	Offensive Response
Katherine Waldrab				S454-66-74 Sewardstone Road	No	No	No	<p>40 homes I can imagine would be to high for that area. It would be out of character to the area. I agree that new shop premises should be put in place for the benefit of the local residents. Some levels of town health should be built above shops but only upto and not extending three levels including shops on ground floor. The area is already over populated with rubbish to find spaces in schools, hospitals and GP surgeries. Not to mention that there has not been any allocation for parking for all these provisional homes. This again in the long run will only affect the residents already living in this area.</p>	No more than 3 levels including shops on ground floor. Parking spaces should be allocated within the plan. Lots be homes. The prop seen this who country facts, is that we as a nation are allowing too many people into the country its far to easy nowadays to claim asylum lets not ruin our beautiful country. Lets start dealing with the real issue!!!!	Yes	its only fair for those who already live here to have a say in how our area will be affected	Offensive Response
										Yes

There should be a good mix of houses to meet the needs of all sections of the population. When will the maximum height of any development on the site should be no more than 3 storeys this should be stated on the local plan rather than exceed 15 new homes". The number of new homes should be reduced.</p>	No	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permissions without appropriate mitigation measures in place prior to development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>• Research/fact finding, the choices made in the plan are based on by facts.</li> <li>• Evidence of participation of the local community and others having a stake in the area, and</li> <li>• The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>• Affordable infrastructure delivery planning.</li> <li>• Having no regulatory or national planning barriers to delivery.</li> <li>• Delivery partners who are signed up to it, and</li> <li>• Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Alicia Goulter				SASS - LUON, Budgeon and Gresham Works	No	Response	No	<p>The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. This site is immediately adjacent to a road of 2 story houses and one of the access points is very narrow and shown as being directly across a busy pedestrian path making it extremely dangerous. Any development over 3 storeys high would be totally inappropriate.</p> <p>SWRF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Fig 3.7 Pg 364). Housing targets should not be met by only providing minimum standards such that the development overruns existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since SWRF is intending to build many more homes than the London Plan requires - see paragraph above.</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenure to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permissions without appropriate mitigation measures in place prior to development.</p>	No	-	
Jane Kestevenbaum				SASS - LUON, Budgeon and Gresham Works	No	Response	No	<p>This is not in keeping with the local character. It changes a largely low rise area and impacts views and skyline. Parking needs have been ignored and it includes those needing their own transport for work or day to day or other circumstances. Not positively prepared.</p> <p>Not Effective. No additional infrastructure planned to cope with the totality of developments SASS - 18</p> <p>Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and form the settings of surrounding listed buildings. Any proposal of more than 3 storeys would not meet policy D1 of the London Plan</p>	<p>Developments should be of the same height and as close to character as possible of their surroundings. Facilities on site should be suitable for a diverse demographic and not result in not change the character of the neighbourhood</p>	No	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>• Research/fact finding, the choices made in the plan are based on by facts.</li> <li>• Evidence of participation of the local community and others having a stake in the area, and</li> <li>• The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>• Affordable infrastructure delivery planning.</li> <li>• Having no regulatory or national planning barriers to delivery.</li> <li>• Delivery partners who are signed up to it, and</li> <li>• Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Anthony G Thorne Lip				SASS - LUON, Budgeon and Gresham Works	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section 22 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 34(1).</p> <p>14(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments it is not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LUZ2 zone and given most of the road remaining there will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the LUZ2 charge. The rest of the area will also be subject to these increases and the proposed upset the natural air flow possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases in social behaviour, crime and in particular violent crime and mental health issues. Also the recent COVID pandemic showed that areas of high density being allowed the areas to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been examples of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It is this that was realised in the 1930's that people need space New Towns were built with green spaces, low density and more open space. This is the way to</p>	No	Because there are too many unanswered	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenure to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the local environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would not contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce traffic in the borough.</p> <p>The Local Plan states that the use of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make such that necessary infrastructure will be provided at a cost of the proposal and secured through an s136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

Terry Milnes				SASS - UKPN, Budgens and Gresham Works	No	No	No	Worfully inadequate consultation with residents. Not in keeping with the area. Adjacent to a conservation centre and will cause disruption to this. No parking facilities.	Houses built with gardens copying the style of existing housing - parking provided.	Yes	No one is listening to the residents of Chingford -1!	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p>
Christine Shephard				SASS - UKPN, Budgens and Gresham Works	No	No	No	This development again without any parking for residents will result in lower density of the area. Lack of provision of extra infrastructure, health facilities, school place etc. will put extra burden on existing services.	Lower rise , less dense buildings, greater provision of outside space, allocated parking Greater provision for local residents who want to comment on these plans, who do not have access to computer or who are not computer literate. This last comment is equally relevant to all of the plans in the Local Plan for WF.	Yes	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Stuart Kestelbaum				SASS - UKPN, Budgens and Gresham Works	No Response	No	No Response	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively excluding those who need their own transport for work or due to age or social circumstances. Not positively prepared.  Not Effective. No additional infrastructure planned to cope with the totality of developments SASS - SB & G2  Not consistent with regional/national policy. Borough's plans greatly exceed targets. This development adversely affects local views and harm the settings of surrounding listed buildings. Any proposal of more than 3 stories would not meet policy D9 of the London Plan.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographics and their needs rather than a wasteful device of low people should be made to live.	Yes	Not necessarily me but certainly representatives of the affected local community who seen under represented in these planning sessions	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>
Lloyd Parkinson				SASS - UKPN, Budgens and Gresham Works	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan lacks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no feedback, public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Mike Chimes				SASS - LUON, Budgens and Gresham Works	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan may be rejected for failing to comply with rules that are not transparent to consultees.</p> <p>Consultation on the site allocation LPD element of the Waltham Forest Plan has been taken for ward more or less in parallel with consultation with the main plan LPD for 2020-2025. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the basis of meetings which have been very coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, expressed by the number of attendees allowed, or have been difficult to get online.</p> <p>In general however it has been apparent both from LPD and what has been stated at consultation meetings that major driver for the intensification of development across the borough has been a housing target of c. 3800 homes per year. While WLF has a large waiting list (2000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More specifically, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More specifically, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More specifically, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need.</p>	<p>It is suggested that until master plans are developed, through consultation, for the main centres identified in LPD eg map consultation (so individual sites is assessed)</p> <p>Development of this site offers the potential to align with a number of the Council's strategic objectives by aligning with the distinctive role of town centres, enhancing the historic and industrial environment, and offering a range of employment opportunities.</p> <p>The potential for workshop or similar use at this site seems to have been overlooked in the development guidelines, although such uses are lacking in Station Road, and such use existed historically here.</p> <p>In contrast to many other development sites in the Borough the target for new homes seems very unambitious for a site of this size in a successful retail area.</p> <p>It is unclear why the site has not been extended further to the north east at the rear.</p> <p>The site access suggested from the north west looks difficult.</p> <p>The improved cycling and walking access suggested is not part of this site.</p> <p>The existing site use and its history are mixed, with potential contaminated land issues not mentioned on the Gresham Works site.</p> <p>Part of the site is a conservation area, with the former IEB building having some merit in the local built environment, while the former Budgens, now Amazon site make no positive contribution to the streetscape. Making all this part of a single development site will require a careful approach to conservation. Consultation would be a key part of this process.</p>	Yes	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>Research/fact finding, the choices made in the plan are backed up by facts.</li> <li>Evidence of participation of the local community and others having a stake in the area; and</li> <li>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>Sound infrastructure delivery planning.</li> <li>Having no regulatory or national planning barrier to delivery.</li> <li>Delivery partners who are signed up to it; and</li> <li>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the LPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p>	
Tom Freer				SASS - LUON, Budgens and Gresham Works	Yes	Yes	No	<p>The plan for the supermarket redevelopment is already outlined as a new shop but just opened - am not opposed to the development of the area behind the retail area into housing as long as there is sufficient parking space available, we are not in an urban but semi rural area and people need cars to get to work and shops further out of the area.</p>	<p>re-address the shop issue and ensure adequate parking.</p>	Yes	<p>This plan is a conservation area, with the former IEB building having some merit in the local built environment, while the former Budgens, now Amazon site make no positive contribution to the streetscape. Making all this part of a single development site will require a careful approach to conservation. Consultation would be a key part of this process.</p>	<p>This plan is a conservation area, with the former IEB building having some merit in the local built environment, while the former Budgens, now Amazon site make no positive contribution to the streetscape. 				SAS5 - UKPN, Budegens and Gresham Works	No	No	No	Unsound in all ways. Apart from anything else not enough facilities to support such an increase in population. Totally inappropriate for area			-	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barrier to delivery. - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPB should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination through the planning application process.
Paul Wellard				SAS5 - UKPN, Budegens and Gresham Works	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and treescape. In addition these tall buildings will worsen existing properties and have a serious detrimental effect on drivers. There are no parking provisions, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries. This is already a problem with the existing development and will be substantially worsened and should provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.		-	This is the Council's own decision on the Council's examination and assessment of applications made in accordance with the provisions of the Local Plan. Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (CIS). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				SAS5 - UKPN, Budegens and Gresham Works	No	No	No	I thought that the old Budegens building had already been turned into an Amazon shop?	NO COMMENT		-	This response is noted.
Cat				SAS5 - UKPN, Budegens and Gresham Works	No	No	No				-	This response is noted.
Yvonne Sanders				SAS5 - UKPN, Budegens and Gresham Works	No Response	No	No	Is the Plan "sound"? There are 4 sites at para 15 of the NPPF:  Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. The area is BSWF should be seeking to preserve the 'local character' of the area - residents choose to move to Chingford & Highams Park as they are low rise suburbs of nice houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were not being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3) 3,546 stores 32,640 new homes over 15 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing and not all new developments should be flats.	Ensure that any development is no more than 3 storeys in height and of a complementary style (see new developments a few doors along that has been greeted very favourably by local residents), so that it is in keeping with adjacent properties.	No	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the site capacity using an approach which is aligned to that set out in the London Plan. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that an undermined cycling, walking and public transport use.
Susan Doyle				SAS5 - UKPN, Budegens and Gresham Works	No Response	No	No	No response or no comments are required	There isn't enough parking NOW so there should not be anymore flats built along Station Rd. More flats will make the area too densely populated. It is good to have retail on Station Rd but more parking is required for shoppers and homeowners, perhaps easily designed two floors of free parking for 30 minutes for shoppers or permit parking for homeowners would be best for this area but not so it looks like a car park, it should be in keeping with the view of Station Rd	Yes	-	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

David Shephard				SASS - UKPN, Budgets and Graham Works	Yes	No Response	No Response				I live close to the proposed development and experience the demand for parking spaces locally. I am lucky enough to have a garage.	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. A character-led approach is supported by evidence from the Characterisation and Identification Study (2018). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Susan Doyle				SASS - UKPN, Budgets and Graham Works	No Response	No	No	No response so no comments required	There isn't enough parking NOW so there should not be anymore flats built along Station Rd. More flats will make the area too densely populated.	No	-	The London Plan (2021) sets a 32 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Jane Sias				SASS - UKPN, Budgets and Graham Works	No Response	No Response	No Response	There isn't enough parking currently so there should not be additional housing here. We should also keep Station Road as a retail space to improve job opportunities in the borough. If you kill the high street the area becomes run down and abandoned.		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The site allocation requires that replacement commercial floorspace is reproduced, ensuring that the site still provides economic opportunities.
Martin Beard				SASS - UKPN, Budgets and Graham Works	No Response	No	No	I have no idea if the plan is legally compliant. I do know that any plan that fails to provide car parking will cause a problem for local residents		No	-	Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Raymond Moffat				SAS5 - UKPN, Budgeons and Gresham Works	No Response	No	No	This is yet another proposal that seeks to alter the character of Station Road by over development for housing at the expense of the size of the property. This and the proposal for the Chingford library and Assembly Hall are linked.	Listen to the views of the local residents, who are against these oversized developments. They are too high and out of character for the area	Yes	There is no point putting the proposal out for public consultation if you don't than listen and act on their views, participation is part of that process.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. John Smith				SASS - LKPN, Budgets and Growth Works	No	No			No	-	This response is noted.
Kathryn Utman				SASS - LKPN, Budgets and Growth Works	No	No	New business has just spent a lot of money on this site and will be opening soon so how can it be redeveloped.	Maybe make the rear of the store into a carpark as there is a shortage of parking space for the store.	No	No one takes any notice of emails.	This response is noted.
				SASS - LKPN, Budgets and Growth Works	No	No			No	-	This response is noted.
Brian O'Leary				SAS6 - Chingford Library and Assembly Hall	No	No	No Response  The IP is unsound because: 1. Reinforcement was not 'well accommodate only a modest increase in FAR, typically around 1.4 FAR, otherwise, p.12. This is said to be 'typically 1.4-1.6 times, 10% Character & Intensification Study 2019. However the Council's proposal, is in obvious contradiction to the above, as it plans for 3 stores next to Cubbs Cottage rising to 3 stores, after objections to this intended 6, on the opposite side (The Draft Typing Study).  According to the intensification study a 'typically 2.4-6 stores' is 2.0 FAR (p.14). Besides the inappropriateness of over 3 stores next to a grade II listed cottage, the overall height scale and therefore intensification is in conflict with LPS Policy 8 and Policy 57 A. E.  Policy 8 links reinforcement to a 'desirable character, therefore only allowing for a modest increase in intensification. It is a very tall building should not be subject to their impact on local character and context. The Draft Typing Study 03.2 itself recognises that so much of the surrounding context has a strong historical character (p.6). Residents and visitors refer to the Conservation Area and accompanying buildings as having a village feel, which we are anxious to retain. Regarding neighbouring properties, no Shadowfall Analysis, with diagrams, has been provided. Contrary to the claim in 03.2.2 it is believed it is impossible that the proposal will not negatively affect the amenity of surrounding properties. 03.2.1 For the categorisation of Reinforcement, Transition and Transformation re shoulder heights etc seems quite arbitrary. At the very least it hasn't been sufficiently justified. 03.2 claims to recognise that taller buildings are "...not appropriate other than in exceptional circumstances where the site context and proposed land uses would be enhanced by taller buildings". Conversely (1) 03.2 provides the justification when "...a wide location of civic, cultural, ...importance". Lower rise buildings, with conventional scale, the number of stories, etc. are not relevant, as without it.	To make the IP sound around the consultation: First, explain the meaning and significance of local 'character' to the Area. Second, commission architects to provide alternatives for regeneration of Station Rd as a whole, while the maintenance and enhancement of 'Character' is part of the brief. Third, commission architects to reconsider the development of the Assembly Hall and Library, involving all options.... new build, refurbishment, low rise, different potential civic, cultural and community uses etc. The Council's Assembly could be used in conjunction with the normal consultation and planning process. Its structure and workings would need prior democratic consultation.		To ensure my representations obtain a full consideration	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified with strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council sets out a 4.1 strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality on its distinctive high streets and town centres.  This response is noted.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or out-of-plan planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or out-of-plan planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.  The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure projects. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that the plan will be delivered should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the Local Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) for London Boroughs, in "general conformity" with the Local Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Jamie Newbery				SAS6 - Chingford Library and Assembly Hall	No	No	No  Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. "No an LBPP should be seeking to preserve the 'Local Character' of the area residents chose to move to Chingford & Highgate Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Paul & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were not being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 p.564) states 12,440 new homes over 20 years and LBPP is proposing 27,000 new homes to 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats, the Forebirds has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time you saw a family house in the area?  This is far too officious and risks alienating residents from being heard. I am not a highly qualified person, I am just a resident of Chingford Green Ward who considers the Local Plan for sites in North Chingford to be unsound and in particular, the proposed plans for Chingford Assembly Hall and Library, which will have a huge detrimental impact on the unique and special character of the Chingford Green Conservation Area with the proposed hub development facing into a protected green space, whilst, at the other end of Station Road, other proposed over-land and over-void sites will urbanise the gateway to Epping Forest. There is no way this can ever be considered 'sensitive'.  Chingford, a suburban, white, North Chingford, in particular, has a semi-rural feel, which is much loved by its residents, who believe that the Council's proposals will overwhelm and entirely change the character of Chingford Green/ North Chingford forever. Chingford Green is one part of Essex, and Chingford Green today is still a remnant of Epping Forest. I believe there has been no input from the LBPP Conservation Officer (if there is one in post) or if there has I have written to ask, it has not been made public.  My family and I chose to live in North Chingford because of its low rise, open, village feel (semi-rural) setting. The Hall decayed over the years and our local community special and unique - and the Council refuse to change our local community special and unique - and the Council refuse to listen. I am staggered that LBPP is ignoring the intrinsic importance of the Chingford Green Conservation Area and its boundaries with Epping Forest (an SSSI, despite large scale local opposition. The listed cottages next to the site will be hopelessly overcrowded by a much larger and taller building.  The IP seeks to build far more homes than is required by the London Plan, and fails to take into account Brown and fall in London population: the	As above  I am simply a local resident - I am not equipped to lay my suggestions, would make the IP legally compliant and sound. LBPP needs to listen to residential community and acknowledge there are other ways of doing things instead of ignoring and gongling with the proposal as they have done. Respect the Chingford Green Conservation Area and its importance as the centre of the semi-rural village community of North Chingford. Any development should be limited to 2 storeys, aesthetically pleasing, high quality design, respecting character & history, harmonising with local architecture, respecting the history of the area. Low rise, well defined homes and structures to the height of existing buildings - max 3 storeys only in the North Chingford area/gateway to Epping Forest. Site specific high quality architectural design for each area, especially Chingford Green and any developments adjacent to forest boundaries. Unlike the ugly concrete and glass box buildings with balconies which are springing up around the borough! Bring back empty domestic properties around the borough into use through a programme of refurbishment. Provide mixed housing - providing a choice "houses, maisonettes and bungalows, with gardens - not just endless, soulless flats. Provide parking for each home and suitable amenities such as schools and leisure amenities, better public transport, healthcare. Safe cycle routes in the proposed Chingford Green development, or a health centre at the rear. It is far too much to cram into one building which will be detrimental to local residents and residential sites in the area.  Propose LBPP think again - and come up with a proposal to upgrade the existing buildings to make them more energy efficient, provide disabled access etc. and make them more economically accessible to live, so they can once again, become the hub of the local community.	Yes	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new diversity of congestion, parking problems and improve air quality.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. John Hugg				S46 - Chingford Library and Assembly Hall	No	No	No Response	This is a conservation area any building you are proposing 10 new dwellings? will have severe impact on the area and is totally out of character with the area. The adjacent cottage will have two east-facing lights and will have a detrimental effect on the value of that property and others in the block. There are already severe parking problems and what provision is there for charging points etc., disabled access and other infrastructure. What you are proposing will have a real effect on North Chingford changing its character for ever		To see what your intentions are and to argue against over-development	<p>The approach to appointing growth has been to weight the allocation of the target of 27,000 new homes according to identified capacity. This has been updated in light of the most recently submitted evidence as part of stage 2 of the Examination. Evidence has been provided through the Examination process in respect of the soundness, and in particular the deliverability and robustness of the land supply which can be identified to support the housing requirement.</p> <p>The capacities which are indicated are based on the Character-led approach to identification and are consistent with the rest of the policies of the Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>
John Hugg				S46 - Chingford Library and Assembly Hall	No	No	No Response	I do not believe that the plan is sound BWP should be preserving local character and on top of a conservation area. The proposal for a 5 storey block in a village green is a really effective one and there are over 6,000 signatures objecting to the plan. No LBWT should be seeking to preserve the local character of the area - residents close to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Spigg Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were not being consulted. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3) 360 states 12,400 new homes over 20 years and BWP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build as many possible spaces? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and protected post Brexit.	Yes	To see what your intentions are and to argue against over-development	<p>The approach to appointing growth has been to weight the allocation of the target of 27,000 new homes according to identified capacity. Steve Mackin				S46 - Chingford Library and Assembly Hall	No	No	No, it is not sound - it is not even necessary. To justify planning a large development of new apartments in the middle of a conservation area requires a high burden of proof that the project is not merely desirable, but that it is an essential priority for the community. However this plan is wholly unnecessary. 1. An additional cafe in Station Road is not required as there are already many such establishments in evidence. Whilst there all appear to be reasonably busy, none are packed or overflowing which would indicate further cafe space is required. 2. New community rooms are not required. The existing main hall is perfectly adequate for the local community, not least because of its size (not too big, not too small) and its location in a fully functional stage with changing facilities. There is, in a smaller hall/room for more intimate events. To destroy all of this, or even ration away it would be an expensive act of wanton vandalism. 3. The existing library is fine. There is a good range of books. Local information is readily available and there are computing facilities for public use. What more is required of a library? Why does it need to be rebuilt? 4. The existing hall used to be the hub of the local community (and could quite easily be again). It was regularly used for Antiques Fairs, Christmas Fairs, live shows by local drama groups and choirs, film shows, community meetings, wedding receptions, dances and discos. However, all of this was brought to a shuddering halt some years ago by BWP's decision to increase hall fees to levels to early workaholic levels, thereby pricing all local groups out of the market.		Yes		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and advocates a sensitive approach.</p> <p>The Council sets out its strategy for managing change to the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-metric neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is to optimise the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which would allow Small Units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage and having residents located within the borough's centres, ensuring that most people daily needs can be met within a close by to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.</p> <p>This is noted. However, it through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the Developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and used to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Mika Chimes				S46 - Chingford Library and Assembly Hall	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, but that reason it difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees. Consultation on the site allocation (LPS) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPS) for 2020-2025. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while others have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the plan has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the respect of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had sufficient low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LPS and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 3400 homes in. While BWP has a large waiting list (60,000), and centre government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites suitable for housing can be provided in the conservation area to pay for the renewal of community	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>It is suggested that until master plans are developed, through consultation, for the main centres identified in LPS, consultation on individual sites is not appropriate.</p> <p>Development of this site has aroused considerable controversy among local residents, because of potential loss of amenities, impact on the local conservation area, an extensive scheme, and impact on local parking.</p> <p>The 2015 Town Centre study recognised the strong environmental quality of the centre particularly in the southern end, making this site particularly important in securing the future of the character of Station Road.</p> <p>The leisure offering in the recent retail study seems to be confined to existing Chingford Golf Club, no account is taken of activities in the Assembly Hall/ Library, Mornington Hall and elsewhere, or indeed access to Epping Forest.</p> <p>The recent culture study for the Borough does not look to North Chingford despite it having a long established Amateur Dramatic Society and indoor theatre, and one of the largest venues on this site in the Borough. The proposed development takes no account of the site acting as a hub to such activities, and there seems to be no recognition of the scale of the assembly hall as an asset to the community, despite it being recognised as such in background studies.</p> <p>Public meetings on the site have suggested the provision of a new library and assembly space as preconditions upon the provision of new homes and (presumably) commercial space. None of the meetings have satisfactorily shown how such facilities for housing can be provided in the conservation area to pay for the renewal of community</p>

Velen Ejaru				S456 - Chingford Library and Assembly Hall	No	No	<p>The plan is seeking to build more homes than required by the London Plan. To achieve that higher number, the form of development is significantly not of keeping with the existing character of the area and will cause "them" (the planning terms) to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people.</p> <p>The Consultation is flawed as non office residents have not had a chance to comment as they received no leaflets, notices of the plans. There has been no public meeting.</p>	<p>DONT WANT THIS SITE DEVELOPED AT ALL, should our wishes be ignored, than any building would have to be...no high rise, no overlooking/over-shading existing homes, mixing with the local area, keep facade etc of the iconic existing building, provide parking for ALL new residents, plus provide additional doctors, hospitals, dentists and schools etc, for all new residents.</p>	No	<p>we all want to be involved...this is our life!</p>	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a roadway alleviation of congestion, parking problems and improve air quality.</p> <p>This response is noted.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Ian Connor				S456 - Chingford Library and Assembly Hall	No	No	<p>I do not believe that the plan fulfils the legal duty to assess the development needs of their area, sign growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6). We do not believe that the plan fulfils the legal duty to assess the development needs of that area, sign growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6). I don't believe that the plan meets the definition of "Sound from the National Policy Planning Framework, paragraph 35."</p>	<p>This is because I don't believe that the plan meets the definition of "Sound from the National Policy Planning Framework, paragraph 35."</p>	No	<p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Stephen Pick				S456 - Chingford Library and Assembly Hall	No	No	<p>The terminology of your questions are so confusing so as to stop anyone trying to answer them or to put any points about this proposal. The proposal is so unrealistic and not thought out. It is not taking into account the local area or how it is used. Any tall building there will be out of place with the surrounding buildings and architecture. It will also cut the existing offer of the area. The area already is over stretched with traffic and parking so to increase the pressure on that is unrealistic and will make an already busy area unmanageable. It will over stretch the existing infrastructure of doctors, schools, refuse collection, public transport and other local facilities. It will increase the air pollution in the area. The need for more housing in that particular area does not exist. With increased congestion it will make it even more difficult to access areas that are needed.</p>	The whole plan should be scrapped and not embarked on.	Yes	<p>Through the evidence published in the Characterisation and Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned roads to previously developed sites that are currently under-utilised and used to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>	
									No

If yes, please explain why?	Council's response
Mrs Val Lea				S46 - Chingford Library and Assembly Hall	No	No	<p>No. The Plan has not been 'sufficiently prepared' as LBWF should be complying with the Council's Chingford Green Conservation Area Appraisal and Management Plan. This is to preserve the 'local character' of the area, specifically a mix of buildings no more than three storeys high with the gable of St Peter &amp; St Paul's Church. The Council's Local Plan has not been 'sufficiently prepared' as it does not meet the requirements of the Local Plan. The Council's Local Plan is not 'sufficiently prepared' as it does not meet the requirements of the Local Plan. The Council's Local Plan is not 'sufficiently prepared' as it does not meet the requirements of the Local Plan.</p>	<p>In addition to the comments in my earlier submission, the Council should publish the following so that they can be taken into account by the Council's Planning Officers and the full Council:</p> <ol style="list-style-type: none"> <li>The Council's feasibility study on the infrastructure needed by the additional residents intended to occupy the newly built homes in North Chingford.</li> <li>The Council should consult the Greater London Archaeology Advisory Service on the new development of the North Chingford hub (and any other areas which fall within the definition before development).</li> <li>The Council should review its target number of new homes to better relate to current and projected demand.</li> <li>To avoid discrimination, the Council should build into its plans a parking allowance for each property.</li> <li>The Council should, as part of the Local Plan for each area of Watlington Forest publish the number of uncoupled homes, brownfield sites and spaces sought by developers. This should be reviewed annually.</li> <li>The Plan should be adjusted to ensure the Community Hub is 'fit for purpose' i.e. provide similar facilities as available currently.</li> </ol>	-	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough.</p> <p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development. The Local Plan infrastructure policy requires that development would need to provide adequate contributions towards physical, community green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 3 year minimum housing target for Watlington Forest of 12,246 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/8. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were increased to meet the Planning Inspector's examination of the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target fall short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newness of required, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
David Pleadon				S46 - Chingford Library and Assembly Hall	No	No	<p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.19) sets 2,246 new homes over 30 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so WPP IS LBWF BUILDING ON EVERY SPACE WHETHER SUITABLE OR NOT?</p> <p>the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time a consultation took place on this? How can the Council ensure that the plan is not over-ambitious? How can the Council ensure that the plan is not over-ambitious? How can the Council ensure that the plan is not over-ambitious?</p>	<p>1/ Make the development smaller, maximum 4 stories, in keeping with the local area and preserving existing views of the Church.</p> <p>2/ Stop pretending that the development will add connections that it simply won't.</p> <p>3/ Publish the traffic impact assessment and properly explain how the heavy goods vehicles in this residential and family area will be safely managed. Also explain how new residents cars will be prevented from parking in nearby streets. While it is laudable that the Council is recognising the climate emergency and planning car-free developments, new cars are not put on any particular road.</p> <p>4/ Provide further details of community facilities available in the building. Can it include an NHS dentist as this is very much lacking in the area.</p> <p>5/ Provide details of management of the service charge and ground rent to ensure that any affordable housing remains affordable and is not simply sold off privately for a quick profit.</p>	No	<p>To ensure transparency, and am concerned by the lack of communication from the Council, lack of published updates to plan or responses to comments that have previously been raised by the community.</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newness of required, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newness of required, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council officers. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Mrs Margaret Hill				S46 - Chingford Library and Assembly Hall	Yes	Yes	No Response	<p>use local paper to print exactly what the phrases mean. "Compliant" and "Sound"</p>	Yes	-	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> <li>Positively prepared</li> <li>Justified</li> <li>Research-led</li> <li>Effective</li> </ul> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough', in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through a planning application process.</p> <p>The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>
Mai Tranham				S46 - Chingford Library and Assembly Hall	No	No	<p>The plan is unsound and fails to comply with the duty to co-operate because the Council has decided NOT to co-operate or even listen to the residents living in the area. We feel we can no longer petition against this huge development, but they are ignored.</p>	<p>The council need to preserve the local character of the area. A building of 5/6 storeys in height in amongst a conservation area is inappropriate. The draft analysis study does not address the fact that Station Road slopes upwards from the library towards Barclays Bank on the corner of Wilton Street and downwards to the Green Field. This height differential means that the planned 5/6 storey building will totally overshadow the conservation area. Presumably the council intend that the occupiers of the proposed (low) 30 flats will be encouraged to utilise the Green Field area outside their sites and in turn will lead to overuse, which I am sure that the City of London will not be happy with even with increased potential unknown income from SMM's. I feel like these proposed 30 flats, with their potential of 30 cars and numerous children trying to find a place at a local school, and not forgetting all the extra space at doctor's surgeries and the like, are just being squeezed into an area that the council owns and wants to develop via their own in-house contractor Sany Bricks.</p>	No	<p>I would like the opportunity to know what is going on and whether further input from residents will be listened to.</p>	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. 				S46 - Chingford Library and Assembly Hall	No	No	No	<p>I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area's objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Council's duty to be sustainable, in the following ways:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.17) 164 states 12,640 new homes over 20 years and LBDF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through heavy tower blocks.</p> <p>2) It is not socially sustainable</p> <p>We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the consultant's assessments submitted to the Local Plan, which proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, lost of privacy, safety/night, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc'</p>	Please see the suggestions above.		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of returns to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any divergence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>

The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the addition of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
				S46 - Chingford Library and Assembly Hall	No	No	No	<p>How is this going to improve the area? It will cause more parking and pollution issues. Aesthetically it will ruin the look of station road, we do not want high rises in the area.</p>		Yes		<p>The Local Plan requires a character-led approach to intensification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
				S46 - Chingford Library and Assembly Hall	No	No	No	<p>Development Guidelines Key Considerations show 'Development proposals should make a positive contribution to the Chingford Green Conservation area and be sensitive to the surrounding heritage assets and protected trees'. A habitat produced by Waltham Forest Planning and Economic Development shows. The Area around Chingford Green was designated a Conservation Area by Waltham Forest Council in June 1995. Conservation trees are areas chosen because of their special historic and architectural interest, and have been given special protection under planning laws. The Council will use its planning powers whenever necessary to control and avoid harmful changes and will take the guidelines contained in this habitat into account when considering planning applications. SUCCESSFUL CONSERVATION HOWEVER EXPENSES IN PRACTICE LIST AS BASH ON THE SUPPORT AND CO-OPERATION OF LOCAL PEOPLE WITHOUT THAT CO-OPERATION, THE SPECIAL CHARACTER AND ATTRACTIVENESS OF YOUR LOCAL AREA WILL DIMINISH BUT SURVIVE etc. This proposed plan for Chingford Green Conservation area will not enhance the area and is out of character with the surrounding buildings. The proposed building of six storeys would block out light from houses and gardens. No privacy in their gardens. No adequate parking for cars.</p>				<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan requires a character-led approach to intensification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any divergence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>

If yes, please explain why?	Council's response
Mrs. Val Lea				S46 - Chingford Library and Assembly Hall	No	No	No	<p>Is the Plan "sound"? There are 4 facts at para 35 of the NPPF:</p> <p>The Plan has not been "positively prepared." - The character of a Conservation Area is created by the cumulative effect of its buildings, streets, public realm, trees and landscaping and consequently can be harmed by insensitive extensions to any of these elements. LSWF has failed to preserve or enhance the areas unique and individual qualities in the Plan. The Council should retain any development plans against its Chingford Green Conservation Area (CGCA) Appraisal and Management Plan which sets out in detail the areas special qualities.</p> <p>Conservation areas are areas of special interest, designated as Designated Heritage Assets within the Governments National Planning Policy Framework 2019 (NPPF). The CGCA Appraisal gives much detail about the buildings within the locality particularly that none, except the tower of St. Peter and St. Pauls Church, is taller than three storeys. In fact, most of Chingford and Highgate Park comprises low-rise buildings. Therefore, to replace the existing Assembly Hall and Library with a complex of Community Hub and 20 new homes, rising to five storeys is contrary to the areas uniqueness. The Community Hub should provide the facilities possible within the current building space. Limit the Council raised the fees (a minimum of £1,100) to a level beyond most local groups resources the Assembly Hall was well-used for antique and craft fairs, evening socials and theatre production. The Plan refers to "traders to make the space flexible. This is hardly conducive to large-scale use and audience participation. The Plan overall is totally unacceptable from a heritage point of view. The Councils Plan does not preserve those elements of the setting that make a positive contribution to the asset."</p> <p>The Conservation Area is a known site of 12th/13th century settlement and is entirely within an Archaeological Priority Area (APA), categorised as Tier 2. As such the Council should consult the Greater London Archaeology Advisory Service on <a href="mailto:advisory@glarchaeology.org.uk">advisory@glarchaeology.org.uk</a></p>	<p>The Council should respect the heritage nature of the CGCA in its Plan. Reduce the height of any development to no more than 3 storeys. Provide a feasibility study of the infrastructure needed for additional homes.</p> <p>Consider car parking spaces in each development of one car per home. Provide figures on the current number of empty Council homes.</p> <p>Consult the relevant official organisations listed above regarding the impact of new buildings in each area.</p>			<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). This study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 45,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Catherine Branch				S46 - Chingford Library and Assembly Hall	No Response	No	No Response	<p>The council should be trying to preserve the areas character not decreasing it.</p> <p>From your own documents</p> <p>to LPT 7.3 it is a character of the north is generally suburban. As such the area is lower in density compared to the Central and South areas of the borough.</p> <p>LPT 7.3 It is a mixed area of relatively low-density residential housing, employment land, retail. The Epping Forest and the boroughs fringe of Green Belt are major green assets which give this part of the borough an exceptional character.</p> <p>Policy 11 in North Chingford II: Protects and enhances the Chingford Green Conservation Area in accordance with the requirements of Policy 74 Conservation Areas;</p> <p>Vision - North of the Borough. The North forms the gateway to Epping Forest and its richly diverse ecology and contrasting natural landscapes. Therefore, it is NOT sound. We live here because it is low rise and close to the forest and open land. How can building 30 flats on top of the library on that small footprint, provide decent local quality housing? If the pandemic has taught us anything, it is we need outside spaces and there are none with those flats.</p> <p>The library as is, is in the centre of a conservation area overshadowing a 17th century grade 2 listed cottage. There is the village green and spired church alongside. Any building above the site that is three will make a mockery of that - we need a new library, what we dont need is an ugly high rise on top raising the eye line, spoiling the character of the village and putting flats in a totally inappropriate place.</p> <p>There have been many objections to this development. A petition of over 6000 signatures was drawn up - we have had NO response from the council. Before the pandemic Waltham Forest council held a meeting in St Peter and Pauls church, hundreds of locals went to object and question councillors. <a href="https://www.facebook.com/walthamforestcouncil">https://www.facebook.com/walthamforestcouncil</a></p> <p>The council should be trying to preserve the areas character not decreasing it.</p>		No	We need to be heard by the council, not ignored.	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. If yes, please explain why?	Council's response
Mr S P Kuller				S456 - Chingford Library and Assembly Hall	Yes	No	No	Given the listed historical buildings which surround the proposed site and the fact it is in a conservation area a building which proposes "around 30" new homes is inappropriate and not keeping with the unique character of the area. Any new building threatens to dominate the landscape and overwhelm existing buildings of historical importance.	Development proposals should not overwhelm adjoining listed buildings of historical significance.		-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The needs established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p>
Alexandra Macfarlane				S456 - Chingford Library and Assembly Hall	No	No	No	<p>I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, meets the areas objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Councils duty to be sustainable, in the following ways:</p> <p>1) It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3) 19,544 states 12,640 new homes over 30 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through large tower blocks.</p> <p>2) It is not socially sustainable</p> <p>We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the council has been uncooperative in providing information for many properties in a short space. Traffic suffers already there and there is no provisions for this extra strain on traffic, as well as parking, doctors, dentists, nurses and local schools.</p>	See above comment.	No	<p>I would like to keep up to date with the meetings and outcomes if that is what this question means.</p>	<p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. All new development will be subject to the full planning application process.</p>
Lambros Poulas				S456 - Chingford Library and Assembly Hall	No	No	No	<p>Too many properties in a short space. Traffic suffers already there and there is no provisions for this extra strain on traffic, as well as parking, doctors, dentists, nurses and local schools.</p>	<p>See above comment.</p>	Yes	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites, in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p>
Gillian Moran				S456 - Chingford Library and Assembly Hall	No	No	No	<p>Is the Local Plan Sound? There are 4 tests at para 35 of the NPPF:</p> <p>1) Has the Plan been properly prepared?</p> <p>No as LBWF should be seeking to preserve the 'Local Character' of the area. Residents do not move to Chingford &amp; Highams Park as they are low rise suburbs of mostly homes at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats to enhance the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic woaden cottages and St Peter &amp; St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.3) 19,544 states 12,640 new homes over 30 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, or why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a house was built in Waltham Forest? Bunglows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is not suitable for them.</p>	<p>North Chingford as the gateway to Epping Forest should not have high rise properties, especially adjacent to a conservation area.</p> <p>Also see previous comments</p>	No	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough.</p> <p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 45,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.</p>

				S456 - Chingford Library and Assembly Hall	No	No	No	This isn't Walthamstow. Chingford is a nice and lovely place with a village feeling. Having huge buildings would completely destroy the place.	Do not destroy Chingford Green! It is a conservation area.			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Paul Willard				S456 - Chingford Library and Assembly Hall	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban (semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>			<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
P.K.Neville				S456 - Chingford Library and Assembly Hall	No	No	No	<p>The proposal is to build in a conservation area the 5 storey building which is not in keeping with the surrounding Church's, houses and green spaces in front. Each flat should have provision for a parking space, otherwise it will impact on the surrounding roads. What about the other amenities needed in schools, medical services - it will impact on the new hospital at Whiggs X which is not increasing its bed rate from existing number.</p>	<p>Ensure that the very strongly expressed wishes of the local residents be heard and incorporated into the design. Any new development in NB Chingford are no more than 3/4 stories in height to as to not spoil the historic portered and views to make a beautiful suburban setting.</p>	Yes	We should have a say on how any plans affect its area	<p>Whiggs Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 Billion Health Infrastructure Plan, announced in 2020, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whiggs Cross hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character lead, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to search Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p>
				S456 - Chingford Library and Assembly Hall	No	No	No	I feel the language used in this consultation is not intended to be understood by the general public, therefore feel this is just a formality, which is appalling. My key concerns with all North Chingford plans are parking - which is already a problem in station road and nearby streets. Your plans create a far busier area with more residents needing doctors, schools, transport, etc, also damaging the local environment. Where are these services coming from when we already have a crisis with employment?				<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.</p>
Alison Goulter				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	<p>The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Epping Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. The proposal for the Chingford Library and Assembly Hall site is part of a Conservation Area, adjacent to a northwards bordered listed building and Epping Forest SAC. Any development over 3 storeys high would be totally inappropriate.</p> <p>LBWF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Fig 4.1 Pg 544). Housing targets should not be met by only providing minimum standards such that the development overflows existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.</p> <p>The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes than the London Plan requires - see paragraph above.</p> <p>The London Plan states that tall buildings should only be developed in locations that are identified as suitable, a conservation area is clearly not suitable for even a moderately tall building as it would totally dominate the landscape. The plan states that proposals should take account of and avoid harm to, the significance of London's heritage assets, this proposal does the opposite.</p>	The maximum height of any development on the site should be no more than 3 storeys this should be stated on the local plan rather than around 30 new homes'. The number of new homes should be reduced. Commercial and retail spaces are unnecessary since there are plenty of such along Station Road. This would maximise the amount of space available for library and assembly space and also provide more space for new homes.	No	-	<p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S456 - Chingford Library and Assembly Hall	No Response	No	No	No alternative to the tower block proposal. Completely out of character with that part of Station Road. Loss of community facility. No increase in school places and health provision.			-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>
				S456 - Chingford Library and Assembly Hall	No	No	No	These plans are to build more homes than required by the London Plan. The development is totally out of keeping with the existing character of the area and will be detrimental to existing residents who will be over looked. They will also lose daylight and sunlight. As this plan is for a block to be car free, there will be additional demands for street parking. These additional demands cannot be delivered with policy compliant levels of affordable housing.	Chingford Green should not have a mid or high rise development. Any new development should provide parking spaces additional to what is already available. Chingford Green Assembly Hall / Library should not be allowed to have car free on site - this is detrimental to the many such businesses that already exist in the area.		-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Amanda Raynor				S456 - Chingford Library and Assembly Hall	No	No	No	Our council should be looking to preserve the character of the area. I chose to move and live in Chingford to live on the edge of the City and enjoy the use of forest and green belt land. We should not be changing the character of the area by proposing to build tall blocks of flats and introduce an area that is gateway to our forest. The views of residents and local people are being ignored and this consultation process has been difficult to navigate to ensure it is inclusive to all members of the community, as elderly people or those without IT skills. A proposal for a 5 storey building in a conservation area is not acceptable. Why is the council proposing 37,000 new homes to 2035 an excess of 42% over the required target of 22,640 new homes over 15 years? The majority of the new proposals are flats, surely families want and need houses with gardens, there is not a mix of housing to meet the needs or wants of the population. The aesthetic, historic context and value of the existing buildings should be taken in account. Proposals should take into account the significance of London's Heritage assets.			-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. Steven Phillips				S456 - Chingford Library and Assembly Hall	No Response	No	No	I do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals to be able to cope with additional people living in the areas. We as existing residents are already struggling to see a doctor or visit Whipp's Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Provide more schools, GP surgeries, hospitals as a start before building more homes in this part of the borough.	No	-	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,509 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Whipp's Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barns Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2019, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whipp's Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging as age building. The new hospital will be built to a design optimum to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site, due to its location is character led, which allows a new state-of-the-art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>

Cherie Cowan-Smith				S46 - Chingford Library and Assembly Hall	No	No	No	<p>I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the areas objectively assessed needs.</p> <p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>The area does not have the resources to provide resources to additional people to the area.</p> <p>It does not fulfil the Council's duty to be sustainable, in the following ways:</p> <ol style="list-style-type: none"> <li>It is not economically sustainable</li> </ol> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.9) 546 spaces 2,240 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan, and specifically the library development, does not "positively and proactively promote economic growth". Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as a damaging competition. Local cafes are recovering from the effects of COVID and building their business against more competition is required.</p> <p>Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks.</p>		No	-	<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Patricia Slade				S46 - Chingford Library and Assembly Hall	No	No	No	<p>This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Council's duty to be sustainable because it is not economically sustainable. It does not take into account local businesses who could be affected by a cafe in the library. It does not take into account parking for new dwellings causing congestion in nearby roads. It does not take into account local services like schools, doctors, dentists, etc. who are already overstretched. It is inflexible not keeping with the local area and it does not take into account that the green and surrounding area is protected land. This development is neither acceptable or wanted in this form. Any development of new 3 stories in North Chingford, and specifically in the Conservation Area, would not meet the criteria of Policy D9 of the London Plan. The local plan is not consistent with regional and national planning policy.</p>	<p>Proposals should take account of and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area.</p>	No	-	<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p> <p>The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The evidence published in the Characterisation and Intensification Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Kathryn Ulsin				S46 - Chingford Library and Assembly Hall	No	No	No	<p>New but too small, cafe not needed as there are already more than 15 nearby. This is supposed to be a conservation area as there are old buildings next to the hall. There will be no parking for new residents. Will prospective buyers be told that the consent have a car? That sure if the boundary shown is correct, is it on Epping Forest land?</p>	<p>Renovate existing hall, think of the environment for a change.</p>	No	No one takes any notice of email	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p>
David Matson				S46 - Chingford Library and Assembly Hall	No	No	No	<p>The proposals are unsound on three grounds:</p> <ol style="list-style-type: none"> <li>The housing targets in LP1 remain unapproved beyond assertion and emerge from the targets within the London Plan. As such they do not provide a sound basis for housing allocations on individual sites, such as S46. On the same grounds, LP1 fails to comply with the Duty to Cooperate with the Mayor's housing targets.</li> <li>The admissible policy to enable a 6 or 7 storey city has been strengthened in LP1. S46 is a key site to make this happen in Sutton Road and North Chingford. However, S46 has not formed part of any master planning of the Sutton Road area that might enable a 6 or 7 storey city. Indeed, each site has remained one of many, in a scatter-gun approach that weakens each site as an individual opportunity site. The community that has been able to shape S46 within its context, to suggest uses as part of a wider whole. The proposal is therefore unsound as it does not address a major policy objective of LP1 or present the sites potential in the round.</li> <li>The proposals make no reference to height. Although the Council has made use of skyline Studies that here consider proposals up to 6 storeys, LP1 is the key document, so that the public should be able to understand the implications of development here. The site allocation is therefore unsound because the public is not fully informed of the nature of the possible development.</li> </ol>	<p>(1)The housing targets in LP1 should be revisited, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised.</p> <p>(2)Sutton Road/North Chingford should be subject to a master planning exercise to create the basis for a local 6 or 7 storey city. A first step might be to list the potential community uses within S46.</p> <p>(3) understand that the proposals for the height of S46 have been revised below 6 storeys. This should be explicit in LP2 to provide the public with fuller information.</p>	No	I have already sent written comments on LP1, and have been invited to take part in the Examination this February.	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,300 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London. Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Christine Croson				S456 - Chingford Library and Assembly Hall	No Response	No	No	Where are the details of height and visual impact on the site? It is inappropriate to put a concrete box here.	Maximum 4 storeys to 3 storeys for housing and not a square box or staggered architecture in its traditional style in keeping with period character.		The community is extremely concerned about the environment and impact on wildlife in the area with the building process.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Richard Iles				S456 - Chingford Library and Assembly Hall	No	No	No	Unnecessary and bulky development close to a Conservation Area. It will also have an adverse effect on residential properties to the north of the current library building.  I understand the Current Development document proposes to built for in excess of the required provision and is already out of date as the Government proposals are to lower the requirement for the London area.	I think the library should be left as it especially since the Local Plan now includes a new adjacent site further from the C.A. S456 where a low rise development could take place with less disruption.	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Sask Chingford Library And Assembly Hall				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	It is not in keeping with this area to build a high rise block in place of a single storey building. Whilst everyone accepts new homes are required across London, it is critical that this sort done at the expense of current residents. Chingford Green is a lovely area of Chingford. Families congregate on the green during the summer alongside the very old and beautiful church surrounded largely by single and at most double storey buildings. A high rise block of flats would materially change the feel of Chingford and detract it for current residents.  Even aside devaluing and degrading the experience of current residents, there should be no further large scale residential projects until the issue of schools, doctors and parking are addressed.	Single or double storey buildings in chingford only please.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Alicia				S456 - Chingford Library and Assembly Hall	No Response	No	No	The NPPF states that plans are to be positively prepared in order to comply. LBWFF should be seeking to preserve the Local Character of North Chingford through 'conservation and enhancement of the natural, built and historic environment including landscapes and green infrastructure'. Chingford's character is that of a suburb with low rise building and green open spaces, the gate way to Epping Forest, with a village feel. The proposal for a 5 storey building which sits directly next to one of Chingford's oldest cottages within a conservation area has quite frankly ignored these aspects. There has been a petition of over 6,000 signatures objecting to such a proposal and a vast majority of the general public would feel there are other means to achieve a new civic space through different funding and retrofitting, instead of an excessive volume of small low quality units to supposedly pay for a new library.  The council is aiming to build more than the London plan requires, as stated in chapter 4 page 163. Heatham Forest target is stated as 2,400 but LBWFF is aiming to achieve 27,000 new homes by 2035, an excess of just over 40%.  If the pandemic has shown us anything it is that less people are wanting to live in London and prefer to be somewhere with more outdoor space but most proposals across the borough are to be flats. There appears to be no diversity in housing types, where are the bungalows, or family homes? The proposals assume that no one will use a car and will always be within a easy walk to essential amenities and medical care, even when it's a car ride away and with no easy direct route via public transport for someone who may need more support or who is unable to cycle for instance.  The whole engagement process so far is not very accessible to the community especially those who may be older and may not be as tech savvy. Also it is very difficult for people who have not got an understanding or background in planning and infrastructure to articulate how to have their feelings and opinions listened to.			-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).  The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,640 new homes (1,132 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a neworwity alleviation of congestion, parking problems and improve air quality.

If yes, please explain why?	Council's response
Glynis Devlin				S456 - Chingford Library and Assembly Hall	No	No	No	The plans shown here are not very specific making it difficult to respond but I will give my opinion as far as I can evaluate. This development proposes a huge change to this area which I consider to be in the best interests of the area itself or it's residents. The proposal to demolish the Assembly Hall and Library for the main purpose of building 30 new homes on top would not be in keeping with the local landscape. These buildings proposed to be demolished stand opposite the village green. They stand between ancient houses and the church. North Chingford is a village, not a town or city and is the gateway to Epping Forest. I assume that to accommodate these 30 homes, there would be a high-rise (several stories) above the new Assembly Hall and Library. The area is full of interesting houses, most of them quite old. Any high-rise or new build here would be to the detriment, and completely out of character, for the area and possibly devalue property. Turning into Station Road from the church is also the area visitors use first. They don't want to see an ugly high-rise or a densely packed area. They want to see open spaces, sky and the village green, on their way to the forest. People use the village green regularly when the weather permits and is a pretty area. Overpopulation is also a concern. These plans do not show any proposals for parking facilities, not to mention further congestion on the roads. It's difficult for residents to park as it is, especially in Woodland Road and adjacent streets and for visitors it can be a nightmare. Where are the proposals for additional local services such as healthcare, including social services, and schooling.	This area should not be re-developed or built upon in any way. People admire it as it is and people like being here the way it is. The interior of the Assembly Hall should be updated and with affordable rental charges making it more accessible for future events. Inside the library could be given a bit of a facelift.		-	The site allocation requirement ensures the provision of the library in the new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs.  By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Marcello Ruffini				S456 - Chingford Library and Assembly Hall	No	No	No	A civic precious & publicly owned asset is being stripped from the legacy of public ownership and is being put into private hands. It is wrong on all levels. The Roofline is being eroded in a Conservation Area of historical importance. The Roofline should not be elevated at all in this sensitive area.	Do not elevate the Roofline. Do not sell property to private ownership. Work & engage with residents who, have made viable alternative proposals that are inclusive, make important social & community contribution to the use of the building	No	Transparency will be served	This response is noted.  In Local Plan Part 1, Policy 22, Designated Heritage Assets, There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The study also recognises the impact that development can have in conservation areas and advocates a sensitive approach.  The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Clare Stroud				S456 - Chingford Library and Assembly Hall	No	No	No	The development is too much of a mish-mash of ideas, as set out at the last public meeting. The development is not sensitive and takes away the last venue large enough for public meetings or entertainment. North Chingford is crying out for cultural enrichment, we need somewhere suitable to hold plays, displays, art exhibitions, etc. Whilst a revamped library would be great, it does not need a cafe.  I couldn't believe my ears when I heard a councillor say that people shouldn't use the library without one. There are at least 4 decent local businesses providing cafe services within a few hundred yards of the premises. Space is at a premium, it should not be wasted.  Also feel that the mooted doctor's surgery is a red herring. A modern fit for purpose surgery would require patient parking and cannot be squeezed into such a small space.	The overall height of the building should not be above 4 storeys in order to fit with the local area and ensure no impairment to light for local properties and the village green.  The plans should be of a large enough size to house families with children. Ideally the flats would be available for rent not just sale and some parking available to the residents.	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The site allocation requirement ensures the provision of the library in the new development. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality.
Gillian Poulter				S456 - Chingford Library and Assembly Hall		No		There are places identified for redevelopment that could help with the pressure on local schools and this site in particular would make a perfect spot for a new school, or a clinic big enough to serve the growing community.	Within the overbuilding plans of the whole borough, new schools and clinics should be incorporated.			The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

If yes, please explain why?	Council's response
Stephen Pick				S456 - Chingford Library and Assembly Hall	No	No	No	The terminology of your questions are so confusing so as to stop anyone trying to answer them or to put any points about the proposal. The proposal is unrealistic and not thought out. It is not taking into account the local area or how it is used. Any tall building there will be so out of place with the surrounding buildings and architecture. It will alter and ruin the existing feel of the area. The area already is over stretched with traffic and parking so to increase the pressure on that is unrealistic and will make an already busy area unmanageable. It will over stretch the existing infrastructure of doctors, schools, refuse collection, public transport and other local facilities. It will increase the air pollution in the area. The need for more housing in that particular area does not exist. With increased congestion it will make it even more difficult to access services that are needed.		No	-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Through the evidence published in the Characterisation Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel or to meet their everyday needs. Redefinition of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Wattham Forest Waste and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and used to generate high numbers of private car/motorist vehicle trips. Redefinition of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Stephen Pinner				S456 - Chingford Library and Assembly Hall	No	No	No	1. No car parking facilities. 2. Reduction in public services within proposals. 3. Local residents ignored. 4. Development would put too much pressure on local services, such as doctors, dentists schools etc.	None. The development is an unnecessary waste of taxpayers cash.	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Council 311 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Christopher Branch				S456 - Chingford Library and Assembly Hall	No Response	No	No	1. It is sound? No. The council should be trying to preserve the areas character and not destroy it. From your own documents for IPR 7.3 the character of the north is generally suburban. As such the area is lower in density compared to the Central and South areas of the borough. IPR 7.3 is a mixed area of relatively low-density residential housing, employment land, retail, the Epping Forest and the borough's fringe of Green Belt are major green assets which give this part of the borough an exceptional character. 2. Policy 11 in North Chingford in: Protects and enhances the Chingford Green Conservation Area in accordance with the requirements of Policy 74: Conservation Areas; Vision: North of the Borough. The North forms the gateway to Epping Forest and its richly diverse ecology and contrasting natural landscapes. Therefore, it is NOT sound. We live here because it is low rise and close to the forest and open land. How can building 30 flats on top of the library on that small footprint, provide decent sized quality housing? If the pandemic has taught us anything, it is we need outside spaces and there are none with these flats. The library as it is, is in the centre of a conservation area overlooking a 17th century grade 2 listed cottage. There is the village green and open church alongside. Any building above the site that is there will make a mockery of that - we may need a new library, what we don't need is an ugly high rise on top ruining the eye line, spoiling the character of the village and setting flat in a totally inappropriate place. There have been many objections to this development. A petition of over 6000 signatures was drawn up - we have had NO response from the council. Before the gardeners Wattham Forest council held a meeting in St Peter and Pauls church, hundreds of locals went to object and question councillors. Here there, councillors have been heard from, but not addressed their concerns.		No	Without involving the local residents how on the council demonstrate that it takes their opinions seriously?	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others.</p> <p>This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Areas of Conservation (SACs), Special Areas of Special Scientific Interest (SSSIs) in the borough.</p> <p>There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSIs), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SACs), Ramsar sites, or Special Protection Areas (SPAs) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 20-year minimum housing target for Wattham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p>
Stuart Kestevenbaum				S456 - Chingford Library and Assembly Hall	No Response	No	No	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively includes those who need their own transport for work or due to age or social circumstances. Not positively planned. Not Effective: No additional infrastructure planned to cope with the totality of developments S455 - S48 Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding listed buildings. Any proposal of more than 3 stories would not meet policy D9 of the London Plan.	Deep developments of the same height and as close to character as possible with turnovers. Make facilities on site suitable for a diverse demographic and their needs rather than a wishful desire of how people should be made to live.	Yes	Not necessarily me but certainly representatives of the affected local community who seem under represented in these planning decisions	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their historical form, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless justification is provided in the planning process for any divergence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspector's need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barriers to delivery. - Delivery partners who are signed up to it and - Consensus with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to changing circumstances.</p>

John Pennicard				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	There is not enough infrastructure in the local area to support all the extra people in these flats. Not enough parking, school places, doctors surgery please plus it will be a blot on the landscape.		-	-	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S456 - Chingford Library and Assembly Hall	No	No	No			No	-	This response is noted.
Kevin Greenhill				S456 - Chingford Library and Assembly Hall	No	No	No			-	-	This response is noted.
Taina Antoniou				S456 - Chingford Library and Assembly Hall	No	No	No	There is no thought to the people who already live there. There is no provision for more gp appointments, parking, traffic, school places. Chingford is already stretched and you are spoiling South Chingford. I don't agree with it at all.	There is no thought to the people who already live there. There is no provision for more gp appointments, parking, traffic, school places. Chingford is already stretched and you are spoiling South Chingford. I don't agree with it at all.	-	-	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Fails to comply with the duty to cooperate. Fails in it's duty to notify the local population. Fails to meet the changed London Plan with reduced housing numbers. Fails to meet this point: "Encouraging strong, resilient, accessible and inclusive hubs with a diverse range of uses that meet the needs of Londoners, including main town centre uses, nighttime economy, civic, community, social and residential uses" by demolishing something that the large space with its potential for diverse use will not be lost to the local community. Do not build a high rise block in a conservation area with so many homes and no thought to infrastructure of already over-stretched schools, doctors, and insufficient parking. No cafe's needed.	Leaflet local residents with the plans, give them the opportunity to respond in writing and not just online which is not inclusive. Hold a public meeting and listen to residents views and comply with their wishes. Reevaluate the current Assembly Hall site as it has been thoroughly used as a test centre during the pandemic, and ensure that the large space with its potential for diverse use will not be lost to the local community. Do not build a high rise block in a conservation area with so many homes and no thought to infrastructure of already over-stretched schools, doctors, and insufficient parking. No cafe's needed.	No	-	The site allocation requirement ensures the reposition of the library in the new development.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/fact finding: the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning; • Having no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.  Local Plans should also be consistent with the London Plan's policies on the environment, including the London Plan's policies on the environment, including the London Plan's policies on the environment.
Alan Crown				S456 - Chingford Library and Assembly Hall	No	No	No	Breaking of covenants and the local preservation area guidelines	Leave as it is and make the Assembly hall a community asset accessible by local community.	No	-	The Local Plan requires a character-led approach to intensification, including full buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.

M Fernley				S456 - Chingford Library and Assembly Hall	No	No	No	This goes against the character of the local area. If we wanted to live in an area with many tall flats we'd choose to go there. North Chingford is a green open spaces area and a key reason why people choose to live here	Does not fit the local area			Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Christine Harvey				S456 - Chingford Library and Assembly Hall	No	No	No	It is unusual because it would overtake a protected ancient house. It would ruin the character of the area - an eyesore!	Low risk, interesting design	No	Planning in the area needs to be influenced by people who have lived in the area for a good time, and who love the area!	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
				S456 - Chingford Library and Assembly Hall	No	No	No	The area is already so built up. Please listen to us Waltham Forest. I am a resident of more than 25 years in North Chingford its already proving extremely difficult to see a GP, dentist, schools are at capacity and its virtually gridlocked along Station Road street.	No residential housing with a focus on refurbishing the library instead.	Yes		The site allocation requirement ensures the reposition of the library in the new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Annabel				S456 - Chingford Library and Assembly Hall	No	No	No	Not compliant with North Chingford feet at all.			I dont want the area being ruined	The site allocation requirement ensures the reposition of the library in the new development.
				S456 - Chingford Library and Assembly Hall	Yes	Yes	Yes			Yes		This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Debra James				S456 - Chingford Library and Assembly Hall	Yes	No	Yes	If everyone in Chingford were given a chance to vote on the huge amount of apartment building it wouldnt think anyone would agree. Instead of asking people about compliance ask them whether they want these buildings raising what is a perfect North Chingford.	With all the building, that will generate a load of people who in turn will need parking, schools, doctor, using an already full transport system. North Chingford will be completely spilt, ruined and will lose its village feel.		-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Nicky				S456 - Chingford Library and Assembly Hall	No	No	No	Stop building more apartments. We don't have the infrastructure e.g. parking, schools etc.			-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Gerardine Cleveland				S456 - Chingford Library and Assembly Hall	No	No	No	There has been no negotiation with surrounding neighbours who will be impacted most by this enormous building nor by the increase in parking requirements in the area	Limited height of building to whats there now, which already towers above adjoining buildings, retain parking there is there now.		The plans impact the people living next to the proposed site most yet no one has contacted us directly about the impact to our area this building will have. I feel this is rude at the least and totally dismissive of our views and opinions and shows a lack of willingness to compromise. This is a conservation area and we have had to jump through many hoops to maintain our building in accordance with the rules. However, this building will be double glazed? I now feel that the conservation rules are being torn up for yourselves so why should we abide by them anymore? Why do we have to get planning permission for double glazing when 3 doors away your proposing to put it in? Why should we have to get planning permission for a dormer window when your building 6 storeys 3 doors away, and why can't we have solar panels on the front roof of our houses in a...	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Jack Baskin				S456 - Chingford Library and Assembly Hall	Yes	Yes	Yes			Yes		This response is noted.
Mike Georgio				S456 - Chingford Library and Assembly Hall	No	No	No	The library is in a conservation area, proposed plans do not blend in any ways with the character of the area. No provision for parking makes it not suitable for people with disabilities and will create additional clutter on the parking in the surrounding area eventually leading to additional taxation to the local people in the form of paid residential parking provision. To name the few of the reasons.	Leave the library alone, there are findings available plus extra funding can be found via National Lottery heritage grants etc. There is no need for additional housing to be built on this site, let the people enjoy their way of life.	No	People who live in the should have a say on the area there	The site allocation requirement ensures the provision of the library in the new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.

Parakevoo Markou				S456 - Chingford Library and Assembly Hall	No Response	No	No			No	-	This response is noted.
Jennifer Johns				S456 - Chingford Library and Assembly Hall	No	No	No	This is in a conservation area where, for example, the other properties cannot even put in double glazing windows, and these plans include a five or six storey block of flats which will over look it and absolutely destroy the whole ambience of the area. The local people have overwhelmingly rejected the plans.	Do not build the block of flats. Modify the assembly hall and reduce the fees for hiring it so that local people and clubs etc can afford to use it as they did extensively in the past.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
