Kilian Strong				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	This modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Elisabete Pasulic				S405 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S402 - New Spitalfields Market. The tall towers proposed (and the huge population increase this will bring to the area) will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The open green space of the Marshes has been a saviour for so many of us local residents. Many people attribute their mental health and wellbeing to being able to access the open space of the Marshes, not just during covid but for the last 20 years and longer. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks and houses will completely destroy that. Furthermore, these plans are harmful as they will undoubtedly lead to a line of towers all along the west side of the Marshes. Therefore to bring forward these tower blocks that are going to devastate the open space and biodiversity of the area is completely unsound and I object to these proposals.	The modifications I suggest are that the site be returned to marshland, in light of the clear benefits open space has on our mental, physical and social health. The benefits that marshland has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between higher levels of lower socio-economic status and reduced healthcare outcomes. Failing to return the site to rural/marshland, is going to harm the site as it is, a light industrial site that has minimal impact on the openness of the surrounding green space and biodiversity. Waltham Forest needs employment sites - this is a likely a low rise employment site (locally significant industrial plot) with good road (A12) connections with the potential to create good quality railway link to the site, with no residential neighbours. This would be a suitable modification.			Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRa for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and 'corridors', 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Louise Stern				S406 - Lea Bridge Station Sites	No			I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lee Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound. 				S405 - Lea Bridge Station Sites	No	No	No	I object to the plans at S405 - Lea Bridge Station. I recognise the need for more homes to address housing crisis in the area and London in general, although I do not agree with the figure quoted which are pre-levied and pre-gamended. The pandemic has changed the way we work and many people are working remotely and commuting occasionally and this has led to a shift of the population distribution which is too early to conclude if this is a permanent change or not. Nevertheless, I can clearly see that the capacity of the constructions you are proposing will exponentially increase the area's population and irreversibly destroy the sense of open green space and biodiversity that the Marshes have. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, for which there is a plethora of evidence. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a lifeline for so many of us local residents and provides the connection to nature we and our children need. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to irreversibly destroy the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
				S405 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S405 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique to London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a lifeline for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that cannot absorb it. The figure quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while understandable are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	Because we need advocated for nature and mental health in the surrounding areas	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.</p>	<p>The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-travel statistics, which while understood are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.</p>	No		<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The allocation of this site requires the creation of high quality green space.</p> <p>The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
-				S406 - Lea Bridge Station Sites	Yes	No	No	<p>I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is completely unsound and I object to these proposals.	The modifications I suggest are that the site be returned to marshland, in light of the clear benefits open space has on our mental, physical and social health. The benefits that open marshland has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between higher levels of lower socio-economic status and reduced healthcare outcomes. Failing the return of the site to natural marshland, I suggest bringing the site as it is, or so many of us local residents. Many people have said that the marshland and the surrounding green space and biodiversity, Waltham Forest needs employment sites. This is already a low employment site (Locally Significant Industrial Site), with good road (A12) connections with the potential to create good railway links to the site, no residential neighbours. This would be a suitable modification.	Yes		<p>Through the evidence published in the Character Intentionality Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Kel Hawkins				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Jo Windsor				S405 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S405 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	This modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. 				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	-		<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensity Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. 				S406 - Lea Bridge Station Sites	No Response	No	Yes	Unsound for the following reasons: (1) involves the construction of two tall buildings of up to 26 stories, when the site is indicated for tall buildings. There will not enhance the local area and will be damaging in terms of light, shade and wind on open spaces and wildlife nearby. They will be visible from a wide area as can be demonstrated by the much smaller Motion Buildings nearby. (2) The dwellings will not be aimed at the waiting lists of Waltham Forest and not be an affordable price. (3) The development will not meet Waltham Forest's climate change objectives, e.g. in construction or by taking away an existing pocket park with mature trees. Replacement trees will take time to mature and be effective. (4) The site is on a flood plain. (5) Additional criteria including "the right development at the right scale creating attractive sustainable development" and "to protect and enhance the natural environment" and take into account a post covid world, is exactly what this development doesn't achieve. Furthermore, the plans to not open to take into account the cumulative effects of larger concentration of tall buildings in a particular area. From looking at all the maps a simple count reveals that more developments are being planned in the south of the borough than in the north and a large number concentrated along green space corridors of the marshes on either side of the Lea Bridge Road. If one of the Council objectives is the 15 minute neighbourhood, they will fail on the open space criteria as the amount of truly open space will be greatly diminished. There is also the matter of population density, clean air and traffic flow along the Lea Bridge Road - the road is already heavily congested and adding more homes in the area is likely to cause more pollution as well as increased footfall on reduced open spaces that offset that pollution.	There should be no buildings on the pocket park and certainly not the heights planned. The areas within Flood Zone 3A should be removed from the site allocation. It would be unsafe for the people who would live there and also imbalance the natural drainage of the area for others.	-	-	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HR for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The allocation of this site requires the creation of high quality green space.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Anna Povey				S406 - Lea Bridge Station Sites	No Response	No	No	Tall buildings up to 26 stories  Further population pressure  Construction of Pocket Park  Flood risk  No mention of impacts on the Marshes  Chesnut planning application: not compliant on affordable housing.  The height of the two towers on Sites 1 and 3 are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and removal from the surrounding urban area.  The development, given its size and location, will generate a regular and sustained increase in footfall to the Park. Whilst the Authority welcomes visitors to its open spaces it needs to be able to manage access to, around and through sites to maintain, protect and enhance the open space and key biodiversity features for which they are valued.	-Reduce height of towers  -Reduce number of units to reduce population pressure  -Retain Orient West Pocket Park	-	-	Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The HR for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.
Margaret Clarke				S406 - Lea Bridge Station Sites	Yes	No	Yes	I think - in short - that proposing to build on a known floodplain, especially when set against the climate crisis is unsound and present a very real danger of exacerbating floods.	Ensure that the pocket park is maintained and extended to ensure that whatever floods come, there are enough trees and green space to minimise damage	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/ fact finding: the choices made in the plan are based on by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning; -Having no regulatory or national planning barriers to delivery; -Delivery partners who are signed up to it; and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.
Margaret Clarke				S406 - Lea Bridge Station Sites	Yes	No	Yes	I think - in short - that proposing to build on a known floodplain, especially when set against the climate crisis is unsound and present a very real danger of exacerbating floods.	Ensure that the pocket park is maintained and extended to ensure that whatever floods come, there are enough trees and green space to minimise damage	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/ fact finding: the choices made in the plan are based on by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning; -Having no regulatory or national planning barriers to delivery; -Delivery partners who are signed up to it; and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. -The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.

If yes, please explain why?	Council's response
				5405- Lea Bridge Station Site	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These sites are harmful as they will undoubtedly lead to a loss of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-travel statistics, which while understandable are the official figures, it's clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	-		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by or to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Edward C Glover				5405- Lea Bridge Station Site	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Gian Singhwar-Warren				5405- Lea Bridge Station Site	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and local health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding residential area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-travel statistics, which while understandable are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. 				S406 - Lea Bridge Station Site	Yes	No	Yes	<p>I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green spaces and biodiversity for our mental and physical health, which is well backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are a concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which it is clear this vulnerable marshland area cannot absorb.</p> <p>The open green space of the Marshes has been a savour for so many of us local residents. Many people attribute their mental health and wellbeing to being able to access the open spaces of the Marshes, not just during covid for the last 24 years and longer. The UK's largest mental health charity, Mind, shows how crucial nature and outside spaces are for mental health (<a href="https://www.mind.org.uk/information-support/tips-for-everyday-living/nature-and-mental-health/how-nature-benefits-mental-health/">https://www.mind.org.uk/information-support/tips-for-everyday-living/nature-and-mental-health/how-nature-benefits-mental-health/</a>).</p> <p>Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy this area and bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.</p>	<p>The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is obvious. It is particularly true in the south of the borough that is more deprived. There is a two-way relationship between poverty and mental health. People with mental health problems are more likely to end up in poverty. And people who live in poverty are more likely to have mental health problems.</p> <p>People living in poverty may find hard to justify spending money on things that supported their mental health when there are numerous other financial issues to support needs to be free or affordable in order to access it.</p> <p>When support for mental health is affordable, it removes a key barrier for many people living in poverty. It provides them an opportunity to take control of their mental health and gives them more agency over it. Being able to walk or exercise in outdoor spaces is ideally proportional to one people's wealth and improve their mental health in a way that is affordable.</p> <p>A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-pandemic statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.</p>	No		<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Borough's Local Plan sites policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Identification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. George Morgan				S406 - Lea Bridge Station Site	Yes	No	Yes	<p>I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and massive population increase this will bring to the area will completely destroy the sense of open green space and biodiversity of the Marshes, which is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces and acknowledge the importance of open green space and biodiversity for our mental and physical health, and this is backed up solidly by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are a concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which it is clear this vulnerable marshland area cannot absorb. The open spaces of the Marshes has been an absolute potter for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy this area that has such a positive effect on people's wellbeing. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound. That is why I object to these proposals.</p>	<p>The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. Rebecca Flint				S406 - Lea Bridge Station Site	Yes	No	No Response  This may be a duplicate - my computer crashed.  subject to the plans at S406 - Lea Bridge Station. The tall towers proposed and the high population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green spaces and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.  I lived and loved Hornorton for 20 years, moving to Walthamstow in 2019 (prior to that otherwise we would have stayed). I used to go to the marshes all the time. For the purpose of enjoying that huge horizon and sense of space. It is unique to London. It reminds me of Lincolnshire where I am from originally. There is no where else like it. There is scientific evidence which states that being the horizon improves mental health and I really believe that it does. Indeed I notice that being in Walthamstow and not having such close access to the marshes really is a detriment to my mental health. I would also like to see the marshes really do have some effect on flooding but consider the plan to be unsound due to the development being on a site at risk of flooding, and the negative anticipated impact on green space and congestion in the area.  It is known that the site is at risk of flooding, especially with climate change effects becoming more severe going forward. It is common knowledge that drainage and sewage systems in the country are extremely vulnerable to severe rainfall events and the impact this has on river pollution. It is also common knowledge that green spaces help absorb rainfall reducing the risk of flooding. This development is proposed on a site with existing green space and the natural drainage that it provides. Furthermore, it would introduce housing that will add extra pressure on a sewage system whose capacity is already stretched. Therefore, the development is unsound as it would contribute to the risk of flooding in the area, and the river pollution that will come with it.  Further to the impact on river pollution, additional housing in the vicinity of the marshes will add additional pressure on wildlife in the area. With new residents we would anticipate higher footfall to the marshes, including more dog walkers and higher pollution. This will have an adverse effect on biodiversity of the marshes. The marshes are a treasured green space by many in the local area as well as wider London. The high-rise towers will reduce the openness of the space, which will have a negative effect on the birds thereabouts. The proposed development is unsound due to the range of negative effects it will have on a very significant site of natural capital of London.  Finally, the additional housing in the proposed site will contribute to congestion on roads, street space and public transport in the area. The street space in the immediate vicinity is already congested. The pavement and cycling lanes on the south side of Lea Bridge are extremely narrow.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary car services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-travel statistics, which while I understand are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	-		Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough, ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
Vytautas Kedys				S406 - Lea Bridge Station Site	No	No	It is known that the site is at risk of flooding, especially with climate change effects becoming more severe going forward. It is common knowledge that drainage and sewage systems in the country are extremely vulnerable to severe rainfall events and the impact this has on river pollution. It is also common knowledge that green spaces help absorb rainfall reducing the risk of flooding. This development is proposed on a site with existing green space and the natural drainage that it provides. Furthermore, it would introduce housing that will add extra pressure on a sewage system whose capacity is already stretched. Therefore, the development is unsound as it would contribute to the risk of flooding in the area, and the river pollution that will come with it.  Further to the impact on river pollution, additional housing in the vicinity of the marshes will add additional pressure on wildlife in the area. With new residents we would anticipate higher footfall to the marshes, including more dog walkers and higher pollution. This will have an adverse effect on biodiversity of the marshes. The marshes are a treasured green space by many in the local area as well as wider London. The high-rise towers will reduce the openness of the space, which will have a negative effect on the birds thereabouts. The proposed development is unsound due to the range of negative effects it will have on a very significant site of natural capital of London.  Finally, the additional housing in the proposed site will contribute to congestion on roads, street space and public transport in the area. The street space in the immediate vicinity is already congested. The pavement and cycling lanes on the south side of Lea Bridge are extremely narrow.	The modification I suggest is to retain Orient Way Pocket Park and the two green spaces on the western side of the junction with additional trees being planted there. Evidence shows that a single tree absorbs 11,000 gallons of water a year so, should flooding take place in this area, retaining the trees in Pocket Park will reduce property damage and prevent environmental pollution by overflowing sewage system.	No		Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can demonstrate through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Claire Weiss				S406 - Lea Bridge Station Site	No	No	No Response  These proposals are environmentally unsound in relation to building on the floodplain, destroying green spaces and 322 trees, three tower blocks that are up to 100m tall and concrete green above level would be needed to provide housing in shorter buildings, the replacement of filled trees with new ones cannot be done in the same area and would not provide the same canopy or other environmental benefits for many years, the hub of the site is a massive heavily-trafficked roundabout which is totally unsuitable for residences.	Build Council housing on Site 1 only, leave sites 2 and 3 as green open space and Pocket Park.	No		The plans for the south of the borough are unprecedented and mark a significant change from the existing Local Plan. Elements of the specifics are already being committed to by developers and the Council.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can demonstrate through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Jack Gooding				S406 - Lea Bridge Station Site	Yes	No	Yes  Iltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, development must be designed to 'minimise access to Epping Forest and mitigate the urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that are developed in this construction. To have contradictory approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park holds over 100 trees and its destruction will increase the likelihood of flooding in the area should there be sea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.  I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the high population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green spaces and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.  I lived and loved Hornorton for 20 years, moving to Walthamstow in 2019 (prior to that otherwise we would have stayed). I used to go to the marshes all the time. For the purpose of enjoying that huge horizon and sense of space. It is unique to London. It reminds me of Lincolnshire where I am from originally. There is no where else like it. There is scientific evidence which states that being the horizon improves mental health and I really believe that it does. Indeed I notice that being in Walthamstow and not having such close access to the marshes really is a detriment to my mental health. I would also like to see the marshes really do have some effect on flooding but consider the plan to be unsound due to the development being on a site at risk of flooding, and the negative anticipated impact on green space and congestion in the area.  It is known that the site is at risk of flooding, especially with climate change effects becoming more severe going forward. It is common knowledge that drainage and sewage systems in the country are extremely vulnerable to severe rainfall events and the impact this has on river pollution. It is also common knowledge that green spaces help absorb rainfall reducing the risk of flooding. This development is proposed on a site with existing green space and the natural drainage that it provides. Furthermore, it would introduce housing that will add extra pressure on a sewage system whose capacity is already stretched. Therefore, the development is unsound as it would contribute to the risk of flooding in the area, and the river pollution that will come with it.  Further to the impact on river pollution, additional housing in the vicinity of the marshes will add additional pressure on wildlife in the area. With new residents we would anticipate higher footfall to the marshes, including more dog walkers and higher pollution. This will have an adverse effect on biodiversity of the marshes. The marshes are a treasured green space by many in the local area as well as wider London. The high-rise towers will reduce the openness of the space, which will have a negative effect on the birds thereabouts. The proposed development is unsound due to the range of negative effects it will have on a very significant site of natural capital of London.  Finally, the additional housing in the proposed site will contribute to congestion on roads, street space and public transport in the area. The street space in the immediate vicinity is already congested. The pavement and cycling lanes on the south side of Lea Bridge are extremely narrow.	The relationship between people and green spaces should be consistent across the Borough. Green spaces should be protected from developments which will cause damage by increasing the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the west side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-travel statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.  In addition, evidence shows that a single tree absorbs 11,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential area. The height of the towers should also be lower so that the risk of us 10-story high towers built on a floodplain is reduced.	Yes		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFASAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Jack Barnett				S405 - Lea Bridge Station Site	Yes	No	Yes	These towers are an intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. The Marshes are so important for us local residents. It's a deprived area and this area is a lifeline for us. Times are hard, especially for people in this area, and we need what people we can get, especially the kids.	I suggest the site remains as it is, for the clear benefits open green space has to the local residents' health and wellbeing.	No	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensification Study, sites are appropriate for development that have the potential for delivering tall and taller buildings. It has been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan set out to only support proposals here they promote the creation of healthy and sustainable places and communities by supporting the delivery of high-quality environments that enable healthier, active and sustainable life styles so that are no negative effects on residents local areas.</p>

Sarah Tulaj				S405 - Lea Bridge Station Site	Yes	No	Yes	The proposed development at S405 - Lea Bridge Station will put huge population pressure on the surrounding marshland. In the planning proposal, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits besides. The Hackney area of the Old River Lea being a site of importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Topping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will lose yet another green space they can spend time and walk dogs in. Due to unsustainable population pressures, these plans are unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes and Pocket Park won't if it's destroyed, then the development should be refused. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	-	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ms Victoria J M Low				S406 - Lea Bridge Station Sites	No	Response	No	No	It is unsound because there are already three high rise buildings at this location and more would high rise buildings would be inappropriate and a detriment to the local landscape which is valued. Furthermore the area is vulnerable to flooding and there has already been devastating floods in the area and there is already too much traffic on existing roads and Orient Way with daily traffic jams. More development, housing and retail / industrial space will only increase the traffic and the associated noise and air quality which will affect people living and working in the area and plant and animal species on the marshes, which is really important to protect.	Development should be avoided, prioritising a reduction in traffic, a reduction in height, which will overwhelm and restrict light in the area, a reduction in volume generally. To avoid the negative impact of development on the bird sanctuary.	-	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevlopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p>
Elisa Sillett				S406 - Lea Bridge Station Sites	Yes	No	Yes	Yes	The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it built on, this site will be there for many years to come. With more extreme weather, river and tidal rises are predicted with climate change, there is a risk of flooding on this site. Should the London barrier river fail, it is also at risk from tidal flooding. Therefore object to the proposed plans for site S406 - Lea Bridge Station as constructing tall buildings up to 26 storey near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 1,100 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential area. The number of trees should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.	No	-	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that the development does not increase flood risk either on or off the site.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Niffery Jackson				S406 - Lea Bridge Station Sites	Yes	No	Yes	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "maximise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound, whilst protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes cannot sustainably, then the development should be refused. Furthermore, these plans are harmful as it will undoubtedly lead to a loss of towers all along the east side of the borough. The number of units and the size of the towers should be kept as it is, as a light industrial site. Waltham Forest needs employment sites - this is already a low employment site (Locally Significant Industrial Site) with good road (A23) connections with the potential to create good railway links to the site, with no residential neighbours. This is compatible with open green space, affording the same level of protection to the Marshes as Epping Forest, and would be a suitable modification.	No	-	<p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)</p> <p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Francoise Cook				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-lock statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	-	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Interim Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having site allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Emanuela Cooper				S406 - Lea Bridge Station Sites	No	No	No	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. I suggest that Orient Way Pocket Park is retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-lock statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Interim Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having site allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Julio Bernucci-Amador				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-lock statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	-	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Interim Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refrained. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-pandemic statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	-		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development by infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having site allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Lynsey Banks				S406 - Lea Bridge Station Sites	Yes	No	Yes	Yes	Waltham Forest Council acknowledges that access to green spaces is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Natalie Mady				S406 - Lea Bridge Station Sites	Yes	No	Yes	<p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound while protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.</p> <p>The Lea Valley Regional Park Authority (LVRPA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the park, which it is clear this vulnerable marshland area cannot absorb.</p> <p>Given the current climate crisis it is unsound to suggest destroying the mature trees of the pocket park given the benefits they provide in urban areas such as urban cooling, releasing oxygen, habitats for bats, providing shade and cover and also creating a green space that supports the mental health and wellbeing of the local community.</p>	<p>Retain the pocket park. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off on emergency services is evident. The benefits that trees and green space has for the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced health outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.</p> <p>A second modification suggested is to reduce the height of the proposed towers and reduce the number of residential units. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics and are no longer relevant to the current context. Housing is needed but we need affordable housing built in a way that isn't detrimental to the existing landscape and green spaces. The number of units should be significantly decreased as the corresponding increase in population would put serious pressure on local green spaces along the Lea like the Marshes and Wetlands. This would be detrimental to the wildlife and biodiversity of the area.</p> <p>which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.</p>	No		<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Interference Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.</p>
	LiJ Brouse			S406 - Lea Bridge Station Sites	No				<p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.</p>	<p>The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park cant, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that cant absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-recession statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.</p>			<p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA)</p> <p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as towns and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. 	Felicity Jones			S406 - Lea Bridge Station Sites	Yes	No	Yes		<p>The pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes. The plan also strips the area with mental wellbeing, increased biodiversity and protection from pollution, this area should not be developed. I do not think the current plan as sound as they will negatively affect the area and it's inhabitants in a number of ways. Damage to precious wildlife, ecosystems and local biodiversity. This will happen as the area is built on and then further impact will come from the increased population increase in the area. Increased noise, light, traffic, vehicles and pollution will have a hugely negative affect. Decreased mental wellbeing of local residents. Local have relied on the sanctuary of the marshes for decades and opportunity to over look them. Such open green spaces boost mental wellbeing, help reduce crime and help people recover from illness. Creating a multi-use eye law will completely change the place and take something very precious away from locals. A less effective flood plane. The area is a flood plane for the local area. This needs to be kept in tact for greatest effectiveness. The ULS weather is only getting more extreme. Building over a flood plane is unsound.</p>	<p>Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, the impact of tall buildings, the loss of local trees and the loss of flood plain. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket park cant, then the development should be refused. I suggest that Orient Way Pocket Park be retained, a second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that cant absorb it.</p>			<p>The allocation of this site requires the creation of high quality green space.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/urrounding efficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. The plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as towns and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Nakko Takahashi				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effects on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intermediate development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller pocket parks such as Pocket Park that will be destroyed in this construction. Divergent approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be reformed. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while understandable are not realistic, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.		-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC) and the HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Caroline Day				S406 - Lea Bridge Station Sites	No Response	No	Yes	The inappropriate proposed construction of tall buildings up to 26 storeys when the site is not indicated for tall buildings. The destruction of Orient Way Pocket Park, including 72 mature trees which cannot be replaced with saplings. There is no mention of the impact upon the openness of the marshes which will be major and significant. The positive framing of these structures as "landmark" buildings is essentially a meaningless term and offers no benefit, but indeed detriment, to nearby communities and green spaces.  This area is Flood Plan. 60% of the site is within Flood Zone 2, 22% in Flood Zone 1, 23% in Flood Zone 3 and benefits from flood defences over 0% of the site. There are already a record for flooding close proximity within 100m of the site, and numerous records of sewer flooding in the local area. S402 is within an area with "significant risk. More vulnerable development is only permitted in Flood Zone 3a where it can be demonstrated that the Exception Test is satisfied (i.e. 1) that the proposed development will provide wider sustainability benefits to the community that outweigh flood risk, and (2) that it will be safe for its lifetime, without increasing flood risk elsewhere and where possible reduce flood risk overall.  The Exception Test is not satisfied on other criteria; the development does not provide "wider sustainability since it includes the destruction of a green community space, destruction of mature trees including individuals with TPOs; the introduction of sustained population pressure to adjacent green spaces including the marshes and the elimination of possible carbon sinks/ flood resistance sites. It is unlikely that it can be guaranteed that the site will be safe within its lifetime; previous flood events in close proximity occurred when the threats from climate change were lesser and there were fewer extreme weather events. The risk will only increase and therefore an approach of caution and prevention of possible harm to future residents should be adopted.	Areas within Flood Zone 3a should be eliminated from the site allocation to safeguard future residents from harm. The site area under consideration requires serious adjustment and reduction. The height of the towers should be significantly reduced, and below sea substituted, therefore eliminating no adverse impact on the openness of the marshes. The number of units should be substantially reduced to lessen the impact from population pressure on the biodiversity of the nearby S50 of Waltham Forest Marshes and other green spaces. Orient Way Pocket Park should be retained, since mature trees offer real biodiversity gains than saplings, saplings that may not successfully establish and are not a site for the replacement in any credible and evidence based understanding of biodiversity.	No	More detail may be required, with emerging evidence and new documents being considered.	Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Martin Hadley				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effects on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intermediate development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller pocket parks such as Pocket Park that will be destroyed in this construction. Divergent approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be reformed. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while understandable are not realistic, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	Yes	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC) and the HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Colin Dear				S406 - Lea Bridge Station Sites	Yes	No	Yes	The Lea Valley Regional Park Authority considers the proposed development will intrude upon the open landscape character of the Regional Park and the unique sense of removal from the surrounding urban areas. The increased population would cause damage to the natural habitat and biodiversity of the marshes. The proposals are unsound as they make no mention of this impact.  The current proposals will destroy the pocket park area of green space. Notwithstanding the damage to the area the proposals will cause. The area is a Flood risk, as proven in summer 2021, and not suitable for such development. Finally the proposals are not compliant as they do not meet the requirements for affordable housing. At all, this is not a sound proposal.	Reduce height of towers so that they are lower than the recently built towers behind them and do not damage the view from the marshes. Reduce number of housing units to reduce population pressure. Abandon plans to build over the Orient Way Pocket Park.	No	To put forward my case	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

If yes, please explain why?	Council's response
Ben Tompkin				S406 - Lea Bridge Station Sites	Yes	No	Yes	I recognise the need for new homes but this proposal talks about optimising the volume of homes, which will put too much pressure on the surrounding green space, and building in height, which will harm the value of the marshes as open green spaces uninterrupted by unnatural structures. There is no mention of a proper sustainability strategy with regard to protecting the surrounding green space and the development itself being carbon neutral and sustainable. Many people attribute their mental health and wellbeing to being able to access the open space of the Marshes. The open green space of the Marshes has been a saviour for so many local residents. The benefits of open, unobstructed green space is backed up by over 1000 clinical studies in the last 5 years alone.	A development at this scale should have the environmental impact and sustainable building practices at its heart. This means low rise buildings that complement their surroundings and not obstruct views of green space for local residents. Buildings that use sustainable resources. A building strategy that ensures the development is self sufficient through sustainable energy technologies like solar and wind. This approach needs to be outlined from the start, before any high level permissions are granted.		-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Liz Floyd				S406 - Lea Bridge Station Sites	No Response	No	No	It is inappropriate to build tower blocks next to parkland, and this will introduce further population pressure. Destruction of the pocket park will have a negative impact on the local amenity and presents a flood risk. This loss of particular concern given that Waltham Forest Council rightly acknowledges that access to green space is essential for physical and mental wellbeing. The Lea Valley Regional Park Authority has raised concerns about these and other issues.	Modifications would include reducing the height of the towers and retaining Orient Way pocket park.	No	Because I am an interested resident	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 11 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits. In the community that undergo 'Flood risk and that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The allocation of this site requires the creation of high quality green space.
Lj Lovelys-Jerovic				S406 - Lea Bridge Station Sites	Yes	No	Yes	I do not consider this Local Plan to be legally compliant and object to the plans at S406 at Lea Bridge Station. The huge population increase and tall towers will destroy the sense of openness of the green space, it will also destroy the biodiversity of the Marshes. It is so rare to find such a open large and biodiverse space in London. (biodiversity makes it even more important to protect it). The council have said that they want to protect and enhance green spaces, but this planned project seems to be doing the opposite of this. They understand and know of the importance of green spaces to people mental wellbeing and physical health - backed up by 100s of clinical studies over the last few years. The Lea Valley Regional Park Authority (LVRPA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this considerable marland area cannot absorb it. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure in the surrounding marland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-pandemic statistics, which whilst understood are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.
Monica Presh				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller nature parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket Park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise. Therefore the park's and Marshes' lack of protection, compared to Epping Forest, is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, the number of pets, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impact of the development, which the Marshes and Pocket Park can't, then the development should be refused. These sites are harmful as they will undoubtedly lead to a loss of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept in it's that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-pandemic statistics which, whilst official figures, are outdated. It is now unlikely that population increase at this scale will happen in the next 10 years, therefore the modifications suggested are sound.	No	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Victor Smith				S406 - Lea Bridge Station Sites	Yes	No	Yes	The Local Plan for this site proposes cutting down mature trees and building over a Pocket Park. This is unsound because London is already facing a reduction in green spaces and mature trees are underdevelopment. The loss of open green space is a concern because, as Waltham Forest has rightly pointed out, it is essential for mental and physical health. Overdevelopment encroaching on Hackney Marshes threatens a valuable community resource with innovative tall buildings, biodiversity loss, and overcrowding. Furthermore, this site is a flood plain, and the current environmental crisis will cause greater risk of flooding in London over the coming years. A single mature tree can absorb 12000 litres of water in a year, so planting immature trees 'off site' will not mitigate the flooding that will affect homes and workplaces in this area.	suggest retaining the Pocket Park for the health and safety of local residents. This will preserve vital green space, and retaining mature trees will mitigate the risk of flooding. However, recognizing that affordable housing in London is much needed, it would also be acceptable to modify the Local Plan by reducing the number of new buildings, prioritising housing over commercial space, a new station and community hub (local green space already provides residents and other Londoners with a place to meet and socialise). This will still result in some increased flood risk, but less than extensive overdevelopment would.	-	-	The allocation of this site requires the creation of high quality green space. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus on improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar) Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
Ray Crawford				S406 - Lea Bridge Station Sites	No Response	No	No Response	object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which is well backed up by over 2000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRPA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb. The open green spaces of the Marshes has been a haven for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 12,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential areas. The height of the towers should also be lower so that the risk level of 25 storey high towers built on a floodplain is reduced.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Delivery Plan (ODP) can be secured. The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements. The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus on improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar) The allocation of this site requires the creation of high quality green space.
Abigail Woodman				S406 - Lea Bridge Station Sites	Yes	No	Yes	I welcome Waltham Forest Council's commitment to protecting Metropolitan Open Land (MOL) in the Borough. Open green spaces are essential for physical and mental health and wellbeing, and it is very heartening to see that there are no proposals for developments on MOL. It must be said, however, that numerous tall developments in Leyton and Lea Bridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected. Furthermore, the habitats of the marshes "Waltham Forest Marsh (as SSSI), Leyton Marsh and Hackney Marshes " must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Epping Forest SAC is deemed worth of protection from development in this site allocations document, it should be equally important green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. Cognitively argued objections from local people to this development have been ignored, which is at odds with Waltham Forest Councils claim to want to "promote the right development in the right place at the right scale, creating attractive sustainable neighbourhoods. There is something deeply unappealing about a policy that purports to create attractive and sustainable neighbourhoods but will, in practice, destroy what those already living in those neighbourhoods consider attractive and damage nearby habitats.	The local plan for Waltham Forest must acknowledge that limiting development particularly limiting the height of buildings "is essential if the character of the borough is to be preserved, if the openness of MOL is to be preserved, and if existing communities are to be respected and not destroyed.	No	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented.	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (ODP) can be secured. The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Amy Bertles				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed development at S406 - Lea Bridge Station will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding area. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area in SLS details. The Hackney side of the Old River Lea being a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will have yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes and Pocket Park won't if it's destroyed, then the development should be refused. I suggest that Crown Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.		Absolutely, so the voices of the local community can be heard.	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar) and the evidence published in the Character Interflection Study. The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development any infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  In April 2023, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC)
Bairstice Colby				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. There is a proposal to get rid of the pocket park which has around 100 trees which are vital to the oxygen levels and biodiversity of the area. The marshes, which are deemed with life are under threat because of additional footfall and there are no new proposed additional amenities to support the area. In addition to this, in 2021, we saw intense flooding in the area - I actually saw manholes pushed into the air with flood water and a drainage system that simply could not cope. Cutting down the pocket park and impacting on the marshes means loss of drainage which puts at danger existing property and livelihoods.	Don't cut down the pocket park - there will be a significant reduction in quality of life in terms of mental and physical health if the park goes. Reduce the number of units and the size of the towers.	Yes	-	The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I Listed Buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any development from these classes that would lead to either substantial harm or total loss of a designated heritage asset.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.
Catherine				S406 - Lea Bridge Station Sites	No	No	No	taking away green space - much needed for wildlife and human mental and physical well being	In my think this - low rise green /eco buildings are the only solution	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the Borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas for Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Charlotte Lathane				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to 'maximise access to Epping Forest and 'integrate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development any infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.

Rebecca Flint				S405 - Lea Bridge Station Sites	Yes	No	Yes	<p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing, in the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effects on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller cycle parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.</p>	<p>The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-brexit statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.</p> <p>I also must add that I loved in Hornetown for 20 years, I would go to the marshes regularly. Having that sense of space is absolutely wonderful and an incredibly rare thing in London - in fact I don't know of anywhere else that you can experience that. For me having a decent full of high fives will absolutely destroy the experience of space. Seeing the horizon of trees and of course seeing sunsets is so important, and it has been proven that seeing horizons is really beneficial for mental health. I am from Lincolnshire originally and the marshes replicate this sense of space - I must also add that moving to Walthamstow (after getting priced out of Hackney) was a tough choice, and I have missed the marshes more than anything else. It is a wonderful and unique space. It must be protected for generations to come. A story that the locals say about the marshes "which I think is true, is that the marshes have the largest and most beautiful trees in the borough." <a href="https://www.waltham-forest.gov.uk/infrastructure-delivery-plan-2023-2035">https://www.waltham-forest.gov.uk/infrastructure-delivery-plan-2023-2035</a></p>	No	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Intermittency Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. They should take account of existing trees and retain where possible.</p>
Lea Welton				S405 - Lea Bridge Station Sites	Yes	No	Yes	<p>The proposal to develop the Pocket Park will mean the destruction of a much needed and area of green public open space and the felling of 92 mature trees. The proposal will increase the risk of flooding of the adjoining residential properties, which the Pocket Park plays a vital in preventing and has done for over 20 years. The proposed development will also further increase the level of congestion and pollution in the Lea Bridge area and place pressure on existing facilities.</p> <p>The proposed development is also likely to have a detrimental effect on how the adjoining Walthamstow and Leyton Marshes, by increasing the number of visitors.</p>	<p>Leave Pocket Park as public open space and reduce the height of the tower blocks on sites 1 &amp; 3. The proposal for a tower of 26 stories is completely mad.</p>	No	Because I live in this part of the borough and want my voice heard.	<p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>Having sites allocated for development ensures that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private or motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Susan Bailey				S405 - Lea Bridge Station Sites	No	No	No	<p>The buildings are too tall. It takes out over a hundred mature trees some which have conservation orders on. It is out of keeping with the surrounding area. Local people don't want it. It blocks local residents right to light as it is too tall. It is really ugly and will block the sunlight in Jubilee park.</p>	<p>Not so tall over the station site. Also I reclaim the sewers and local facilities can't accommodate the extra influx of people</p> <p>Not build on the land which has over 100 mature trees</p>	Yes	-	<p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>Through the evidence published in the Character Intermittency Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.</p>
Katja B				S405 - Lea Bridge Station Sites	No Response	No	No	<p>I object to these plans massively. I cannot actually believe that this is being proposed. We are in a Climate Emergency, we should be ceasing to build, enhance biodiversity and not destroy the few green spaces we still have. The council did actually declare a Climate Emergency in June 2020. How do these plans go together? The developments, having gone through many painful iterations, we realised how much green spaces are needed for our mental health - our health in general. I for one, did walk around the marshes on a daily basis to keep sane. Once again, we urgently need to protect the spaces we still have and create new ones. The marshes should be legally protected like Epping Forest is.</p>	<p>Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. Jan Norris				S406 - Lea Bridge Station Sites	No Response	No Response	No Response	Building on a flood plain Destroying mature trees. Newly planted trees often die and in any case take too long to reach maturity.	Reduce plan to only refurbishment of station. Do not remove any trees. Do not build on flood plain	-	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without an adopted Local Plan, unplanned development could come forward, development of this type usually does not secure the adequate levels of infrastructure and other benefits that are needed and can be obtained through planned development.
Francesco Babolin				S406 - Lea Bridge Station Sites	No Response	No Response	No Response			-	-	This response is noted.
Madda Neeson				S406 - Lea Bridge Station Sites	No Response	No Response	No Response	Destruction and removal of mature trees and green space. Environmental impact on local area.	Do not destroy Pocket Park	No	-	The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	subject to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which is well backed up by over 3000 clinical studies in the last 5 years alone. The Lee Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current outdoor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear this vulnerable marshland area cannot absorb it. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and subject to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-covid statistics, which whilst understandable are the official figures, yet it's clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	This plan is unsound as it would destroy the current pocket park and take down a high number of trees. It would also add further pressure to the area in terms of transport and additional services needed.	I would propose the site is kept as it is or the height of the towers decreased.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Emma Howard				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest from tower block developments is one reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refrained. These plans are harmful as they will undoubtedly lead to a line of towers along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that the Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-trend statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	It is important for communities to be involved with the future of their area and representatives with expertise in many areas is vital for decisions not just being made around profit, just  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and content of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.	
Samantha Grayson				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRPA) has said these towers are a concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in football to the park, which it is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-trend statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	Complies with the Reg 19 process  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The HRa for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and content of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green "buffers" and "corridors," wild public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.	
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRPA) has said these towers are a concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in football to the park, which it is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	This modification I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-trend statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRa for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and content of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Jennifer Seay Barnes				S406 - Lea Bridge Station Sites	Yes	No	Yes	In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The Hackney side of the Old River Lea being a Site of Importance for Nature Conservation (SINIC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINIC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will lose yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes can and Pocket park won't if it's destroyed, then the development should be reframed. I suggest that Orient Way Pocket Park be retained.			The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The allocation of this site requires the creation of high quality green space.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a reduction of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to allocate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Sarahannah Whalley				S406 - Lea Bridge Station Sites	Yes	No	Yes	The S406 - Lea Bridge Station proposed development will increase the population and put huge pressure on the marshland. Due to unsustainable population pressure, these plans are unsound. The Hackney side of the Old River Lea is a Site of Importance for Nature Conservation (SINIC) although this is not properly mentioned in the planning proposals, unlike the conservation status of Epping Forest. The proposed development will increase air, light, noise, and traffic pollution on the marshland which is a vulnerable natural site. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINIC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will lose yet another green space they can spend time and walk dogs in.	Waltham Forest Council understands the need for the protection of green space in the north of the borough, yet they are planning developments that will harm the green spaces in the south of it. The relationship between people and green space should be consistent across the whole borough. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes can and Pocket park won't if it's destroyed, then the development should be reframed. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while understandable are the official figures, it's clear that population increase at this scale will not happen in the next 30 years, therefore these modifications suggested are sound.	No		The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The allocation of this site requires the creation of high quality green space.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:  Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving research/reflecting the choices made in the plan are backed up by facts. Evidence of participation of the local community and others having a stake in the area, and The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: Sound infrastructure delivery planning; Having no regulatory or national planning barriers to delivery; Deliverable infrastructure delivery planning.
Alex Brittes				S406 - Lea Bridge Station Sites	Yes	No	Yes	I fundamentally disagree with the assertion that the 'Proposed Development' would bring an attractive skyline feature and improve the visual amenity of the view with high quality architecture. It would give rise to a modest but beneficial effect. This is the only effect it's significant. On what basis does building high tower blocks improve the view. As shown from the plans, it obliterates the view. Additional footfall in the area would require additional open green space not less.	To make the plan sound the height of the tower blocks should be practically reduced and new open green spaces created to cater for the additional footfall. High buildings do not per se offer any benefits to local residents in respect of views. They obliterate views.	No	I am responding as I lived locally in Greenwich from 1979-1990. I also used to teach in Tower Hamlets. I have known the Hackney Marshes for many years and feel strongly about protecting them.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Camilla Wilson				S406 - Lea Bridge Station Sites		No				No		This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Janet Rudge				S406 - Lea Bridge Station Site	No	No	No	Building extremely high tower blocks at this site will have significant adverse effects on the green open space of the Lea Marshes, which at the same time incorporates existing open space and most of the trees of the Orient Pocket Park within the site. In view of the Council's stated Climate Emergency, and recognition of the benefits of residential open space to mental wellbeing, these proposals are unsound. Furthermore, the increased traffic that will be generated will increase air pollution in an already congested area.	The buildings should be limited to lower / medium rise to minimise the impact on valuable green open space available to this part of the borough. The proposed development cannot sustainably absorb the impact of the beneficial resources to local residents. The number of additional residences should be reduced to limit increases in population from these proposals, which is likely to be generated.	Yes	I feel it is necessary to be able to emphasise the potential permanent loss to the environmental amenity for the local area.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough, ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  In April 2019, the Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, the Council sets out a strategic objective to build the Borough's climate change resilience by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GVA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.  As set out in the Local Plan, all new residential development within the borough is required to be car free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
Penelope Jane Ross				S406 - Lea Bridge Station Site	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green space, is essential for physical and mental health and wellbeing, in the north of the borough. Developments must be designed to 'minimise access to Epping Forest and mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park holds over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise. Therefore its lack of protection with the marshes, compared to Epping Forest is unsound.  I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which is well backed up by over 2000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which is clear the vulnerable marshland area cannot absorb. The open green space of the Marshes has been a serenity for so many of us local residents. Increased road access, health and wellbeing to a dense urban area, the destruction of the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park holds over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise. Therefore its lack of protection with the marshes, compared to Epping Forest is unsound.  The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier never fail, it is also at risk from tidal flooding, therefore object to the proposed plans for the S406 - Lea Bridge Station as constructing tall buildings of up to 36 storeys near a floodplain is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as the Marshes and Pocket Park can't, then the development should be abandoned. Pressure on a vulnerable natural area that cannot absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-trend statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	Yes	The HRAs for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).  The HRAs for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Rambar).  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Through the evidence published in the Character Identification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.	
Jacqui Lewis				S406 - Lea Bridge Station Site	No	No	No	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green space, is essential for physical and mental health and wellbeing, in the north of the borough. Developments must be designed to 'minimise access to Epping Forest and mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park holds over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise. Therefore its lack of protection with the marshes, compared to Epping Forest is unsound.  The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.	
Marc Spicer				S406 - Lea Bridge Station Site	Yes	No	Yes	The highway side of the Old River Lea is a file of importance for Nature Conservation (SNCA), a fact not considered in the proposal for the development at S406 - from which the increase in light, noise and air pollution and the huge increase in local population will threaten the carefully preserved biodiversity and protected status of the area. Consider this impact due to unsustainable population pressure on the marshland area.	Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as Hackney Marshes can't and Pocket Park won't if it is destroyed, then the development should be abandoned. I expect the size of the development be significantly reduced to lessen the impact of population pressure on the fragile marshland.	No	The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.

Michael Dheerth				S406 - Lea Bridge Station Sites	Yes	No	Yes	<p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effects on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller local parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise. Therefore its lack of protection with the marshes, compared to Epping Forest is unsound.</p>	<p>The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These sites are harmful as they will undoubtedly lead to a loss of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is and that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-recession statistics, which while understood are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.</p>	-	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFAC)</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. They should take account of existing trees and retain where possible.</p>
Hope Lewin				S406 - Lea Bridge Station Sites	No	No	No	<p>I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which is well backed up by over 1000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the park, which is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a source for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the rest of life and pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.</p>	<p>The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-recession statistics, which while understood are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.</p>	-	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The allocation of this site requires the creation of high quality green space.</p> <p>The local plan policy Biodiversity and Geodiversity will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and 'corridors', wild public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Luke Teomey				S406 - Lea Bridge Station Sites	Yes	No	Yes	<p>The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rise that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier ever fail, it is also at risk from tidal flooding. Therefore object to the proposed plans for site S406 - Lea Bridge Station. A construction tall building of up to 26 storey near a floodplain is unsound.</p>	<p>The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 1,000 gallons of water a year so, should flooding take place on this site, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential areas. The height of the towers should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.</p>	-	-	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Alex Blundell				S406 - Lea Bridge Station Sites	No Response	No	No Response	While provision of more affordable homes is welcome in principle, the figures used to justify this scheme have been based on those prepared prior to the events of both of leaving the European Union and the pandemic, both have depressed the need for additional homes in the London area. With this in mind the need for the Covent Way Pocket Park for Luch housing is a very poor choice in view of the damage this development would do to the flood resilience of the immediate surrounding and the negative impact on the setting of Epping Marsh, Walthamstow Marsh, The Fibler beds. All three are a welcome break from the tallness and closeness of London, once surrounded, the damage to their setting cannot ever be repaired. More tall buildings in the vicinity would be tragic. The development preferably should take place at a location that it should be downgraded in ambition and drastically shortened. Simply being close to a transport route, should not be used to justify development above all other grounds. This is over-development and should be resisted.	Build elsewhere or lower the height of the proposals significantly.		I would be interested to show my support to any objections to this development	The allocation of this site requires the creation of high quality green space.
Vytautas Kodyte				S406 - Lea Bridge Station Sites	Yes	No	Yes	I consider the plan to be unsound due to the development being on a site at risk of flooding, and the negative anticipated impact on green space and congestion in the area.  It is known that the site is at risk of flooding, especially with climate change effects becoming more severe going forward. It is common knowledge that drainage and sewage systems in the country are extremely vulnerable to severe rainfall events and the impact this has on river pollution. It is also common knowledge that green spaces help absorb rainfall reducing the risk of flooding. This development is proposing destroying parcels of green space and the natural drainage that it provides. Furthermore, it would introduce housing that will add extra pressure on a sewage system whose capacity is already stretched. Therefore, the development is unsound as it would contribute to the risk of flooding in the area, and the river pollution that will come with it.  Further to the impact on river pollution, additional housing in the vicinity of the marshes will add additional pressure on wildlife in the area. With new residents we would anticipate higher footfall in the marshes, including more dog walkers and higher pollution. This will have an adverse effect on biodiversity of the marshes. The marshes are a treasured green space by many in the local area as well as wider London. The high rise towers will reduce the openness of the space which will have a negative effect on the visitors themselves. The proposed development is unsound due to the range of negative effects it will have on a very significant site of natural capital of London.  Finally, the additional housing in the proposed site will contribute to congestion on roads, street space and public transport in the area. The street space in the immediate vicinity is already congested. The pavement and cycling lanes on the south side of Lea Bridge road are extremely	Based on the arguments outlined above, I consider the best course of action to not develop this site at all, and instead plant a few more trees in the available space.	Yes	-	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unit requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: - Research and fact finding, the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Planning or regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Leanne Davis				S406 - Lea Bridge Station Sites	No Response	No	No Response	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to 'minimise access to Epping Forest and 'mitigate' for urban effects to ensure no adverse effect on the Epping Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be developed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they undoubtedly lead to a loss of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Covent Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while I understand are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.

Lucia				S405 - Lea Bridge Station Sites	No	No	No	No	The proposed site S405 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather events and tidal rises as are predicted with climate change, there is a risk of flooding on this site. Should the London barrier ever fail, it's also at risk from tidal flooding, therefore subject to the proposed plans for site S405 - Lea Bridge Station as constructing tall buildings of up to 26 storeys near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 1,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential area. The height of the towers should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.	-	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensification Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	-	Lee Valley Park Authority has expressed concern that the significantly increased population will affect the marshes negatively. Also the loss of green spaces like Pocket Park, is detrimental to the existing population's mental, physical, and social health.	Leave the green space as they are.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Alex Turner				S405 - Lea Bridge Station Sites	Yes	No	Yes	-			No	-	This response is noted.
Leah Laprade				S405 - Lea Bridge Station Sites	Yes	No	Yes	-	I object to the plans at S405 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the natural of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of open green space and biodiversity for our mental and physical health, which will be backed up by over 1000 clinical studies in the last 5 years alone. The Lee Valley Regional Park Authority (LVRPA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. If the site and these towers will generate a regular and sustained increase in footfall to the Park, which it is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the constant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with projections and previous statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar).  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The allocation of this site requires the creation of high quality green space.  The local plan policy Biodiversity and Goodwelfare will seek to protect and enhance biodiversity and goodwelfare resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

The local plan policy Biodiversity and Goodwillity will seek to protect and enhance biodiversity and goodwillity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green 'buffers' and corridors, 'wild' public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Charlotte Macken				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed development at S406 - Lea Bridge Station will put high population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. The population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area in its besides. The Hackney side of the Old River Lea being a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting high population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will have yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	This relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, or Marshes Marshes and Pocket park won't if it destroyed, then the development should be refused. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-event statistics, which whilst understandable are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes		Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as towns and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRPA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  The allocation of this site requires the creation of high quality green space.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Having no regulatory or national planning barriers to delivery; - Achieving the Government's net zero goals.
				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed development at S406 - Lea Bridge Station will put high population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. Paul Robert Treacy				S406 - Lea Bridge Station Sites	No	No	No	no consideration of traffic, public transport, GP access, pollution	Do not destroy the pocket park, so many developments in the area going on at the same time, to the detriment of local residents. Affordable social housing is needed - not more private unaffordable developments.	-	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new diversity of development, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, legal and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GP's and health facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas.</p> <p>The Local Plan transport policies require measures to ensure connectivity and integration of the public transport network with other transport modes including walking and cycling within and outside the borough. The Local Plan aims to ensure that new development is guided towards sites that are well connected to public transport infrastructure.</p>
Andrea Sinclair				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of green space and biodiversity for our mental and physical health, which is well backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which it is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	The modifications I suggest are that the Orient Way Pocket Park site be retained, in light of the clear benefits green space has on our mental, physical and social health. The benefits that trees and green space has for the local and wider community and the resultant pressure this takes off primary care services is evident. This is particularly true in the south of the borough that is more deprived, with a clear link between lower levels of socio-economic status and reduced healthcare outcomes. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figure quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which whilst understandable, the figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No	Important to be able to ask questions and hear answers	<p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. This policy will apply to all new development sites in the Borough.</p>
Raema Ellis				S406 - Lea Bridge Station Sites	Yes	No	Yes	I think these proposals are unsound on the basis that - the borough, despite noting the importance of open green space for multiple reasons, is treating the marshes differently to other green spaces other parts of the borough (notably Epping Forest) with no explanation as to why they are applying their approach differently in different parts of the borough. - on the basis that the tall towers proposed will have an impact on the openness and biodiversity of the marshes (which makes them unique in London) and that this in turn will have an impact on the mental and physical wellbeing of the residents of and already densely populated and deprived part of London. The Lea Valley Regional Park Authority has said these towers will intrude the open character of the regional park and the current visitor perception of openness and getting away from the urban surroundings. The increase in population brought by these towers, will increase footfall in the park and presents a risk to the marshland, additional traffic, will also affect the surrounding roads and air quality and noise, all disrupting the tranquility the marshes provide for animals and humans. - The proposal is to build on a floodplain and, as weather becomes more extreme, it will be at increased risk of flooding. We need to be creating ways for water to drain into the ground, not more making more hard surfaces.	This borough should take a consistent approach to the relationship between green spaces and people across the borough: people from across the borough deserve to be treated equally in terms of the rights and protections afforded to their nearby green spaces and, in turn, to their physical and mental well-being.  If a development cannot sustainably absorb the impacts it brings, which the marshes and the pocket park can't, then the development should be rethought.  I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained and that the number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it and also maintain the sense of openness and disconnection from the urban that the marshes afford and which supports the physical and mental wellbeing of people living in a densely populated and deprived part of the borough.  The local plan must also consider the long-term effects - and costs - on nature and humans of building on the floodplain.	Yes	-	<p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).</p> <p>The HRFA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. Robyn Cooper				S406 - Lea Bridge Station Sites	Yes	No	Yes	I object to the plans at S406 - Lea Bridge Station. The tall towers proposed and the huge population increase this will bring to the area will completely destroy the sense of open green space and biodiversity that the Marshes have, that is so unique in London. Waltham Forest has said it wants to protect and enhance green spaces. It acknowledges the importance of green space and biodiversity for our mental and physical health, which is well backed up by over 3000 clinical studies in the last 5 years alone. The Lea Valley Regional Park Authority (LVRA) has said these towers are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and disconnection from the surrounding urban area. It has also said these towers will generate a regular and sustained increase in footfall to the Park, which it is clear this vulnerable marshland area cannot absorb. The open green space of the Marshes has been a saviour for so many of us local residents. Continued good mental health and wellbeing has a direct impact on the NHS as it puts less pressure on our vital resources. Yet these proposed tower blocks will completely destroy that. Therefore to bring forward these tower blocks and the destruction of Pocket Park, that are going to devastate the open space and biodiversity of the area is unsound and I object to these proposals.	object to the plans at S406 - Lea Bridge Station. If yes, please explain why?	Council's response
Alexis Cason				S406 - Lea Bridge Station Sites	Yes	No	Yes		Clause 3 & 5.10 of The London Plan 2021 states "The list of impacts of tall buildings in Policy OD Tall buildings is not exhaustive and other impacts may need to be taken into consideration. For example, the impact of new tall buildings in proximity to waterbodies supporting notable bird species upon the birds' flight lines may need to be considered". The Leas Water Works, Water Works, the Walthamstow Marshes, the Hackney Marshes and the River Lea are known for supporting notable bird species which may be affected by the new tall buildings. There are some of the notable bird species present in the local conservation areas which are also included in the BTO "Birds of Conservation Concern 5 publication: Common Sandpiper, Green Sandpiper, Wood Sandpiper, Pochard, Gadwall, Shoveler, Willow Warbler, Linnet, Song Thrush, Reed Bunting (source: https://londonbirds.fandom.com/wiki/Waterworks_NR and https://wt.wwt.org.uk/member-lee-valley-regional-park). I therefore find the Lea Bridge Station Sites plan (S406) unsound.	Alternative sites should be sought for building residential towers, away from areas and water bodies known for supporting notable bird species.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar)
Jennifer Russell				S406 - Lea Bridge Station Sites	Yes	No	Yes		Walthamstow Wetlands are an important area for biodiversity as well as physical & mental wellbeing of local residents. If Epping Forest is protected, then why not the same for Walthamstow Wetlands? Having access to open spaces is highly important, particularly in recent times with the pandemic. Building tower blocks will create noise, pollution, reduce air quality and hinder these open spaces, having a negative impact on physical & mental wellbeing of residents. I also have concerns about the impact of building on floodplains - we've seen an increase in flooding in recent years as the impact of climate change begins to take hold, so I can't see how it's safe to build homes on such an area.	The protection of green spaces should be protected across the borough. I believe this area should be considered against the development, particularly vertical development that will encroach on these precious open spaces.	No	-	The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
Hannah				S406 - Lea Bridge Station Sites	No	No	No		Firstly, it is on a flood plain, so building here is a stupid idea. It is highly unethical to build and sell houses on a flood plain. It is exploitative towards those affected by the housing crisis and looking for affordable housing.  Flooded Park is necessary as a green space in the area for mental health, dog walking, children to play in. Removing one of the only small spaces in this impoverished area, where Waltham Forest is protected, is highly unethical and risks of social cleansing.	The modification would be to not destroy the park.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes		As a resident who uses the marshes every day, this has been valuable for the mental health of people living in the area. The open spaces give a great sense of well being and escaping the city. Building high rise tower blocks will ruin this sense for 1000's of people who use the marshes to escape	there was other sites that could be considered. I suggest re think	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
Charlie				S406 - Lea Bridge Station Sites	Yes	No	Yes		We need a stronger approach to protecting the marshes (Hackney and Walthamstow) and it seems as though there is an inconsistency in the council's approach towards the protection of two nature conservation sites in the borough - Epping Forest and the Marshes, which is slowly having creeping development appear from different sides, local care no longer in the marshes without seeing tower blocks appearing on the edges in every direction and the recent development in Lea Bridge is a prime example of this. Green spaces are vital resources for the community to have a respite from urban life and have an enormous impact on the wellbeing and mental health of whole communities (and future generations), most notably during the pandemic. The impact of this continued permitted development upon nature wildlife is irreversible and we should be prioritising protecting our remaining natural spaces in London.	I strongly object to future development in the Lea Bridge Station area with high-rise developments. The existing towers have already caused considerable damage to the London skyline from the marshland and the idea that the council would pursue future high-rise developments is out of step with local people's wishes. I would suggest modifications primarily to the height and scale of the development so that they are not visible from the marshes and don't affect the skyline noticeably. More attention needs to be paid to local people's wishes in relation to their own communities, around protection of biodiversity and wildlife, sensitivity to avoiding built environment skylines, and community wellbeing and mental health through the protection of these areas from development causing massive increases in population size and impact of local infrastructure and public services.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Sarah Venugopal				S405 - Lea Bridge Station Sites	No Response	No	No	No Response	The proposed site S405 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier never fail, it is also at risk from tidal flooding. Therefore subject to the proposed plans for site S405 - Lea Bridge Station as constructing tall buildings of up to 26 storeys near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 11,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential areas. The height of the towers should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
John Law				S406 - Lea Bridge Station Sites	No	No	No	The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier never fail, it is also at risk from tidal flooding. Therefore object to the proposed plans for site S406 - Lea Bridge Station as constructing tall buildings of up to 26 storeys near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 11,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential areas. The height of the towers should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.	No	lot of corruption (Clare Coghlin) got to keep an eye on your dirty deeds ;)	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Aimee Phillips				S406 - Lea Bridge Station Sites	Yes	No	No Response	The proposed site S402 - New Spitalfields Market is located on a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a severe risk of flooding on this site. Should the London barrier never fail, it is also at risk from tidal flooding. Therefore object to the proposed plans for site S402, as building over 2,750 homes, with a predicted population increase of 5000-6000 people, on a known floodplain is unsound.	I would suggest that the site be returned to marshland in light of the flood risk this area is under, especially with the predicted changes that will occur in the coming years with climate change. The site as marshland has the potential to absorb rising levels of water (its estimated that 1 tree absorbs 11,000 gallons of water a year) and protect other areas of the borough from flooding, while also thriving as a site of biodiversity that marshland brings. Failing this, I suggest the site is left as it is, as a light industrial site where the risk of large loss of homes life and property in the event of flooding is reduced.	Yes	The peoples voices should be heard!	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed development at S406 - Lea Bridge Station will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The Hackney side of the Old River Lea being a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of the conservation status in the proposal as there is around the Epping Forest area. This use of this site is house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore subject to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will lose another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings. If green spaces near to a proposed development cannot sustainably absorb the impacts of the development, or nearby Marshes Cent and Pocket park won't if it is destroyed, then the development should be reformed. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that sits beside it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which whilst I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intermittency Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
S.Pendar-Hughes				S406 - Lea Bridge Station Sites	No	Response	No	<p>object to the plans at S406 as unsound because:</p> <p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development.</p> <p>Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as the Pocket Park that will be destroyed in this construction.</p> <p>While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. To have two different approaches to the protection of green spaces in the borough is unsound.</p> <p>In addition, the proposed development will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The Hackney side of the Old River Lea is a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area.</p> <p>The sudden increase in population that would result from this development would bring about unacceptable increased pressure on a vulnerable SINC.</p>	<p>Hackney Marsh should be protected from developments that negatively impact its unique natural environment. It would be unable to sustainably absorb the impacts of the proposed development in terms of population and pollution increases, therefore proposals must be reconsidered.</p> <p>I suggest the modification that the Orient Way Pocket Park is retained to take pressure off the Marshes and continue to provide vital green space to residents.</p> <p>In addition, on the remaining two sites, the number of units " and their heights " should be significantly reduced in order to retain the character of the Marshes and reduce population influx and the resulting pressure this increase would bring to a vulnerable natural area.</p>	No	-	<p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>The allocation of this site requires the creation of high quality green space.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p>
S.Pendar-Hughes				S406 - Lea Bridge Station Sites	No	Response	No	<p>object to the plans at S406 as unsound because:</p> <p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development.</p> <p>Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as the Pocket Park that will be destroyed in this construction.</p> <p>While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. To have two different approaches to the protection of green spaces in the borough is unsound.</p> <p>In addition, the proposed development will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The Hackney side of the Old River Lea is a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area.</p> <p>The sudden increase in population that would result from this development would bring about unacceptable increased pressure on a vulnerable SINC.</p>	<p>Hackney Marsh should be protected from developments that negatively impact its unique natural environment. It would be unable to sustainably absorb the impacts of the proposed development in terms of population and pollution increases, therefore proposals must be reconsidered.</p> <p>I suggest the modification that the Orient Way Pocket Park is retained to take pressure off the Marshes and continue to provide vital green space to residents.</p> <p>In addition, on the remaining two sites, the number of units " and their heights " should be significantly reduced in order to retain the character of the Marshes and reduce population influx and the resulting pressure this increase would bring to a vulnerable natural area.</p>	No	-	<p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>The allocation of this site requires the creation of high quality green space.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p>
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	<p>Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound.</p> <p>While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park holds over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its lack of protection with the marshes, compared to Epping Forest is unsound.</p>	<p>The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parks, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-lock statistics, which while understandable are the official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.</p>	No	-	<p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC)</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. Isidre Godfrey				S406 - Lea Bridge Station Sites	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing in the north of the borough. Developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have been different approaches to protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting and the impact of tall buildings, if the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes certainly can't, then the development should be refused. Furthermore, these plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes. I suggest the modification that this site be kept as it is as a light industrial site. Waltham Forest needs employment sites - this is already a low rise employment site (Locally Significant Industrial Site with good road (A12) connections with the potential to create goods railway link to the site, with no residential neighbours. This is compatible with open green space, affording the same level of protection to the Marshes as Epping Forest, and would be a suitable modification.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC) The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
				S406 - Lea Bridge Station Sites	Yes	No	Yes	The development could vary easily overwhelm the green space (marshes) that it surrounds and have a detrimental impact on wildlife, waterways, birds etc. Construction on a flood plain is a very dangerous idea and may create as many problems as it solves. Green spaces are essential for mental health and this development will take away the open, peace and beauty of these wild areas.	Modifications would be to out the housing development by two-thirds and have low rise only. It also should be considered not developing at all. The joy of living in the area is likely to be ruined by the development itself. Would suggest as well that population growth in London is likely going to drop since the pandemic and absent of some working and so it may be a wasted investment.	No	-	The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
Marcia Vidal				S406 - Lea Bridge Station Sites	Yes	No	Yes	The plans to build here will totally destroy the openness of the natural area which has been so beneficial to thousands of peoples mental health, especially over the past two years. Waltham Forest claims to want to protect green spaces and has put measures in place to do so with Epping Forest so to approach development over the marshes with a completely contradicting attitude is incredibly unsound. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea level rise, therefore its loss of protection with the marshes, compared to Epping Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of parts, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes and Pocket Park can't, then the development should be refused. These plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that isn't about 8. The figures quoted for population increases are in line with pre pandemic and pre-Brexit statistics, which while I understand are the official figures, it is clear that population increases at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	-	The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  The allocation of this site requires the creation of high quality green space.
Tessa Crichton-Miller				S406 - Lea Bridge Station Sites	No Response	No	No Response	I believe this development to be unsound as it is located nearby a known flood plain and I think it's unwise to build at this time on such sites with the increase risk of flooding due to climate change.	The modification I suggest is to retain Orient Way Pocket park. Evidence shows that a single tree absorbs 11,000 gallons of water a year so, should flooding take place in this area, retaining the trees of pocket park will reduce properly damage to the surrounding area. The height of the towers should also be lower so that the risk level of 26 highly high towers built on a floodplain is reduced.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In April 2020, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	Access to greenery in the marshes has been one of the few consistent pleasant escapes possible to me in the last 2 years. This kind of access to nature is very rare in London and one of the reasons that made me want to live on this side of the borough. I believe that further grand scale constructions will further deplete the space, sometimes need more green space and less speculative high-rises.	Respect the importance of the marshes as a key nature site in the life of East London residents. Keeping the marshes wild is the best option. Alternatively minimise as much as possible the impact of the constructions on the identity of the marshes, one of the rare easily accessible open spaces in a busy city, leaving it as a low rise and existing nature to flourish.	No	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the SMI Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

Rebecca Moran				S406 - Lea Bridge Station Sites	No	No	The height of the two towers on Sites 1 and 3 are of concern in terms of their intrusion upon the open landscape character of the Regional Park and the current visitor perception of openness and removal from the surrounding urban area.  The development, given its size and location, will generate a regular and sustained increase in footfall to the Park. Whilst the Authority welcomes visitors to the open spaces it needs to be able to manage access to, around and through sites to maintain, protect and enhance the open space and key biodiversity features for which they are valued.	Don't do it at all - Reduce height of towers Reduce number of unit to reduce population pressure Retain Orient Way Pocket Park	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.	
C.Martin				S406 - Lea Bridge Station Sites	Yes	No	Yes	I think the size of the proposed development would be incredibly detrimental to a huge population who use the space for mental health and wellbeing. I work as a counsellor and regularly have clients who describe the positive and life changing effects of visiting open green spaces - often with particular reference to 'openness', 'wildness' and 'freedom'. Tower blocks like this would not only totally ruin this sense of space, a real rarity for Londoners, but also bring a huge influx of population who the demographic (due to the proposed high prices) are not necessarily those who would use the space, or most vulnerable. Additionally it seems impossible that the wildlife and biodiversity will be unaffected by these changes. I believe these plans are unsound and unethical, motivated only by money - complete object.	I believe the only justifiable plan would be to leave the site as it is. I do not see how any buildings at all, even bungalows, would leave the natural life to flourish as it currently, and the huge mental benefits of the space in fact. The only reasonable reason to build here would be for more social council housing - no profitable properties at all. At this is not the intention at all, there is no moral grounds for the development.	No	-	The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
Asha				S406 - Lea Bridge Station Sites	Yes	No	Yes	I have been a WF resident my whole life, have lived next to and gone to school next to the Marshes. Lea Marshes is a special site for plants and wildlife. It is a haven for the local community who use it for education, recreation and for their mental and physical health. The proposed plans are unsound as they would significantly adversely affect the Marshes and the wildlife and landscape and in turn impacting the local community who use it daily. This I believe would go against the wishes of Waltham Forest Council who recognise the importance of green spaces. In other areas of the borough plans next to Epping Forest are showing consideration for green spaces, I believe this should be the case for the Marshes too.	Due to the nature of the plans above, I believe the only modification in this case would be to leave the site as is, with light industrial use. This is the only way to ensure no disturbance is made to the natural environment.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar).  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar)
Marion O'Brien				S406 - Lea Bridge Station Sites	Yes	No	No	The proposed site S406 - Lea Bridge Station is located near a known flood plain. Waltham Forest Council rightly acknowledges that access to green and blue spaces, particularly open green spaces, is essential for physical and mental health and wellbeing but there is an inconsistency in the council's approach towards the protection of two nature conservation sites in the borough - Esping Forest and the Marshes. South of the borough, access to the marshes is being used to support intensive development.	More attention needs to be paid to local people's wishes in relation to their own communities, around protection of biodiversity and wildlife, sensitivity to existing built environment skylines, I would suggest modifications to height and scale of the development (not exceeding 5 floors) to avoid excessive increase in population size which will impact on infrastructure and public services. Provision should be made for social housing. Also retain Orient Way Pocket Park.	-	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Aleccio Casolin				S406 - Lea Bridge Station Sites	Yes	No	Yes	Policy D9 (C.1.3.4) of the London Plan 2021 states: "Where the edges of the site are adjacent to buildings of significant tower height or parks and other open spaces there should be an appropriate transition in scale between the tall building and its surrounding context to protect amenity or privacy." In the planning there is no transition in height towards the marshes or in the direction of Orient Way and Jubilee Park. Therefore, the plan is unsound.	The height of the proposed buildings should be reduced significantly and should be lower than the Motion/Beck Square towers.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Isac Vieira				S406 - Lea Bridge Station Sites	No Response	No	No Response	These tall towers will obstruct the open green space that is vital to many peoples mental health	Keep the Orient Way Pocket Park	No	-	The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. If yes, please explain why?	Council's response
Gosia Inghese				S406 - Lea Bridge Station Sites	Yes	No	Yes	he proposed development at S406 - Lea Bridge Station will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents, will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland areas in SUs besides. The Highway side of the Old River Lea being a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will have yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	he relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings, if the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, so Hackney Marshes car and Pocket park won't if its destroyed, then the development should be refused. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that cant absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which while I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	-	-	Through the evidence published in the Character Identification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Susan Kay				S406 - Lea Bridge Station Sites	No	No	No	The high rise aspect is detrimental to nature & rescue should an emergency arise on 50 storey blocks Grenfell nightmare in the making.	Housing is needed but why not convert old factories instead of causing this variation of already facility to Hackney residents?	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Hannah Pope				S406 - Lea Bridge Station Sites	No Response	No	No	It's the same points that the proposed housing is really being created to generate huge profits not affordable housing for local people and the destruction of the environment.	Insist every single apartment/home is offered to locals at 25% under the valuation price of other owned homes in the area.	No	Local people and the respective professionals like ecologists need to be heard.	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.
Eleanor Bill				S406 - Lea Bridge Station Sites	Yes	No	Yes	I believe building large, multi-storey buildings some close to a floodplain is unsound in terms of risk level. Building on/ near to the Marshes reduces its habitat as a marshland, which also contributes to stopping flooding and reduces biodiversity and if this building work occurs it will increase the risk of flooding to nearby residents.	Retain Orient Way Pocket Park. Reduce height of towers, especially as they are built on assumptions made pre-Brexit and pre-COVID which assumes more migration into London than is now projected.	Yes	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.
David Boote				S406 - Lea Bridge Station Sites	No	No	No	The target for new homes is too high given the relatively small areas of land involved.	The target for new homes should either be omitted or reduced to that possible with a maximum height of 3 floors.	No	-	The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2023/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,930 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Asha				S406 - Lea Bridge Station Sites	No Response	No	No	As someone who works in community mental health, I have seen firsthand the importance of these wide green public spaces for local people. The completed marshes are one of the best things about London. It will completely destroy this unique part of London, not to mention the biodiversity of the marshes themselves if they are built on in this way.	Please do not do this, build the flats elsewhere not on green land that can never be recovered once this is done.		this is very important	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)
Amy Story				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier ever fail, it is also at risk from tidal flooding. Therefore object to the proposed plans for site S406 - Lea Bridge Station as constructing tall buildings of up to 26 storeys near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 21,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce property damage and potential loss of life to the surrounding residential areas. The height of the towers should also be lower so that the risk level of 26 storey high towers built on a floodplain is reduced.	Yes	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
Alex Miller				S406 - Lea Bridge Station Sites	Yes	No	Yes	The proposed site S406 - Lea Bridge Station is located nearby a known flood plain. If it is built on, this site will be there for many years to come. More extreme weather, river and tidal rises are predicted due to the climate crisis, creating a serious risk of flooding on this site. Should the London barrier ever fail, it is also at risk from tidal flooding. Thus, I strongly object to the proposed plans for site S406 - Lea Bridge Station as constructing tall buildings of up to 26 storeys near a floodplain is unsound.	The modification I suggest is to retain Orient Way Pocket Park. Evidence shows that a single tree absorbs 21,000 gallons of water a year so, should flooding take place in this area, retaining the trees of Pocket Park will reduce both property damage and the potential loss of life to the surrounding residential areas. The height of the towers should also be lower to reduce the risk level of 26 storey high towers built on a floodplain.	No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
Peter Mudge				S406 - Lea Bridge Station Sites	No Response	No	No	This site is occupied by a pocket park. The pocket park was created as compensation for the loss of open space when Orient Way was created. Orient Way still exists, therefore there is no justification for removing the pocket park. This site is very close to the Waterworks Centre with its adjacent nature reserve and to the Lea Valley Riding Centre which occupies part of Leyton Marsh. If the development goes ahead it will lead to a huge increase in visitors to both areas, since they will be far more easily reached from the site than any other open spaces. Both of these areas would be ruined, not just by increased footfall (of both human beings and dogs) but also by increased littering, noise and lighting. Tall buildings on this site will seriously detract from the sense of openness of this park of the Lea Valley Regional Park. These problems have been acknowledged by the Lea Valley Regional Park Authority. The plans are based upon out-of-date assumptions about population growth. Current estimates of population growth are much lower. The need to protect Epping Forest from the adverse effects of development have been acknowledged by Waltham Forest Council. The need to protect the Lea Valley is even greater, because it is closer to central London.	Keep the site as a pocket park (or remove Orient Way). Reduce the use of the development. This will be most easily achieved by reducing the height of the towers.	-	-	Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
-				S406 - Lea Bridge Station Sites	Yes	No	Yes	This damages the quality of local public green space	Restricting building heights	Yes	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Jack Barnett				S406- Lea Bridge Station Sites	Yes	No	Yes	Protecting Epping Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound	I suggest the modification that this site be kept as it is, that Orient Way Pocket Park is retained. The number of units and the size of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can't absorb it. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting, pollution and the impact of tall buildings	-	-	The allocation of this site requires the creation of high quality green space. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Tanbir Rahman				S406- Lea Bridge Station Sites	Yes	Yes	Yes	-	-	No	I would like to modify the site allocation specifically to flag Approach where all the area should be area of change of employment.	As per Local Plan Part 1 - Policy 26, The site allocation requires that commercial floorspace is provided as part of new development that is aligned with the "acceptable uses" set out in Clause A. Class B (ii) will ensure that new development on this site will provide either the full replacement or the intensification of existing industrial capacity and that landowners should, where appropriate, work with landowners of adjacent sites in order to make the most efficient use of land.
Rebecca Stewart				S406- Lea Bridge Station Sites	Yes	No	Yes	The proposed development at S406- Lea Bridge Station will put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits besides. The Hackney side of the Old River Lea being a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. In addition to this, the destruction of Pocket Park will put further population pressure on the marshes as local residents will have yet another green space they can spend time and walk dogs in. Due to unsustainable population pressure, these plans are unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, so Hackney Marshes and Pocket Park won't if its destroyed, then the development should be refused. I suggest that Orient Way Pocket Park be retained. A second modification suggested is the number of units and the size of the towers should be significantly decreased, to reduce population pressure on the surrounding marshland area that can't absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 10 years, therefore these modifications suggested are sound.	Yes	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Diego Fernandez Fernandez				S406- Lea Bridge Station Sites	No Response	No	No Response	It is unsound because it will affect Hackney Marshes in general and will result in the destruction of pocket park and over 100 trees	These plans should be reframed to be sound. The relationship between people and green space is fundamental (even more so in times of a pandemic). Developments like this that harm the Marshes and Pocket Park cannot be accepted.	No	-	The allocation of this site requires the creation of high quality green space. The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Jane Third				S406- Lea Bridge Station Sites	No	No	No	The marshes are an essential place for people in the surrounding built up areas to connect with nature, and filling the gullys with apartment blocks would devastate this resource.	-	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)
Suzanne Welch				S406- Lea Bridge Station Sites	No	No	No	Planting 5 new trees is not equal to cutting down 1 mature tree which is already a habitat.	Do not cut down the trees.	No	-	The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
										No

				S407 - Former Leyton F.C. Football Ground	No	No	No			-	-	This response is noted.
				S407 - Former Leyton F.C. Football Ground	No	No	No			-	-	This Response is Noted.
David Cato				S407 - Former Leyton F.C. Football Ground	No Response	No	No	This is not residential land	Do not build residential properties on the land	-	-	The Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of sports playing pitches.
So				S407 - Former Leyton F.C. Football Ground	No Response	No	No Response	Removal of current trees and green areas is not acceptable. This part of the Borough and Leyton in particular does not have the infrastructure in place to support your proposal. Modal road closures proposed are ridiculous. It's a matter of squeezing as many people as possible in and making money. Even most of our local councillors can't bear to live here.	Keep existing trees up and wooded areas intact. Proposed modal traffic controls in Windsor Rd is just so ridiculous. What bright spark thought of that. It just blocks people in and will cause more parked / traffic, jams / less footfall to local businesses.	-	-	The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Susan Penfold				S407 - Former Leyton F.C. Football Ground	No	No	No	This land is earmarked in the local plan as a Asset of Community value to be retained for the community in this deprived area as a football ground where football should be played, since aging young people to develop a love of exercise and team sports. To be housing is not what this land is to be used for this land is also a flood plain and flats built here will take away valuable open off land and cause flooding in the area.	The land should be kept as a football ground for community use in a deprived area with very little open space.	-	I feel there is too much emphasis on building on open space without considering the long term impact on communities of over development.	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No Response		Save the Via bridge road football ground. It is historic and can provide football for the local community	Yes		This response is noted.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

Rhys Martin				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No Response		Save Lea Bridge Road football ground (Hare and Hounds) it should be a place of community asset. It is one of London's oldest football grounds and can provide the local community with football opportunities. A 4g hired pitch here would make continual money	No	-	This response is noted. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No Response	Because you are destroying the history of a local team: Professional football club. Instead of destroying it, why not support it and try to rebuild it? Local surrounding boroughs would like to hire and use a football stadium that generates income and football provisions for all. ***We've removed personal information such as name, phone, email to protect user identity***		No	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Billy Reid				S407 - Former Leyton F.C. Football Ground	No	No	No	The site is an asset of community value and should be renovated as a football ground where possible, perhaps for Leyton Orient youth & women's teams. That would add great value to the local area.	Work with local team Leyton Orient to renovate the ground to a non league standard for their women's & youth teams and put flats in each corner similar to their ground in Brisbane road.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. The Local Plan requires the protection of MCL in the Borough, unless very special circumstances can be justified. The impact of development on sites near to MCL will be assessed as part of this process.
				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No Response	I wish for the Hare and Hounds ground (Leyton Stadium) and spiritual home of Leyton Football Club to remain a football ground for the benefit of the local community. #SaveTheHareandHoundsGround	I wish for the Hare and Hounds ground (Leyton Stadium) and spiritual home of Leyton Football Club to remain a football ground for the benefit of the local community. #SaveTheHareandHoundsGround	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. This response is noted.
Save Meurs				S407 - Former Leyton F.C. Football Ground	No Response	No	No	I think that it's imperative that the site remains a football ground for the benefit of the community.		No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No Response	There is a real shortage of football grounds for teams that play in this part of London - many have to share at other clubs at the moment but need a home of their own (eg Sporting Machine, Broomfield Town, West Essex). This space has a proud history of being a football club and it should be in the future - rather than knocking down our cultural history, it should be allowed to continue and thrive. The benefits of a community football club to local population are well documented (Clapton CFC is a great example, engaging local youths and collecting for good causes eg Maggie Trust, food banks etc)	Keep the space as a football ground for local teams to renovate (at their own cost) and use.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Nigel Kenneth Lovell				S407 - Former Leyton F.C. Football Ground	No Response	No	No	There has not been enough consultation nor the opportunity for this historic ground to remain as a football ground. This is an historic ground with a proud history and it is appalling that the council want to build flats for the rich on it.	The ground should be retained as a football ground and tenants found for it. This council have been steadily selling off all the recreational ground in the borough - The Score Centre for example, and as a resident this is not acceptable.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
-				S407 - Former Leyton F.C. Football Ground	No Response	No	No	Ground is of huge amount of local and historical significance.  Ground could be developed for local use with local non league clubs occupying it.  Take a look at the old Baldock Town ground to see what can be achieved for the community!!	Use the land for its purpose - which is as a football ground!  Leyton does not need more flats!	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Matthew Baker				S407 - Former Leyton F.C. Football Ground	No Response	No Response	No	The area should remain a football ground for a local team, preserving a long history and heritage of local football on this site. 				S408 - Church Road / Estate Way L55	Yes	No	Yes	<p>The proposed Site Allocation S408 refers to the redevelopment of the site for an "industrial-led mixed use neighbourhood." This would require more industrial floorspace than the "Employment L55 compliant industrial" floorspace capacity, as set out under the "Site Requirements". As such in terms of "soundness" the Site Allocation is not "effective" in terms of delivering the site requirements which are the replacement of industrial floorspace. In addition, whilst the Site Allocation refers to "industrial" use, other commercial uses should also be considered acceptable.</p> <p>In addition, the Planning Status of the site refers to "Planning application submitted for part of site - ref. 312121". There is no record of this planning application having been submitted to the Council for the redevelopment of part of the site. Furthermore, if a planning application has been submitted for part and not all of the land within the site allocation, this does not preclude individual sites coming forward with their own development proposals for individual land holdings within the Site Allocation. As such, whilst it is recognised that there is an overarching Allocation underpinning the Site Allocation, this does not stop individual sites being the subject of planning applications.</p>	<p>The Site Allocation reference to "Comprehensive"/"Industrial-led" and "industrial" should be removed. The Site Allocation should state "redevelopment of existing industrial location to provide a mixed use neighbourhood, subject to the two stage 'masterplan process'."</p>		-	<p>Waltham Forest has an identified need to provide additional industrial floorspace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorspace, and the intensification of industrial provision is encouraged.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The Inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> <li>•Positively Prepared</li> <li>•This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</li> <li>•Justified</li> <li>•This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> <li>•Research/Fact Finding: the choices made in the plan are backed up by facts.</li> <li>•Evidence of participation of the local community and others having a stake in the area, and</li> <li>•The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> </li> <li>•Effective</li> <li>•This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> <li>•Sound infrastructure delivery planning;</li> <li>•Having no regulatory or national planning barriers to delivery;</li> <li>•Delivery partners who are signed up to it; and</li> <li>•Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> </li> <li>•The Local Plan should be flexible and able to be monitored.</li> </ul> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan, Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.</p> <p><a href="https://www.london.gov.uk/infrastructure/transport/infrastructure-delivery-plan">Local Plan Infrastructure Delivery Plan</a></p>
				S408 - Church Road / Estate Way L55	No	No	No	<p>There should not be potential for heights which would affect the local area. Further, additional traffic on Marsh Lane and Church Road would affect safety of local school children and park goers. Indeed, speed limits are not respected on Church Road with many accidents each year. The site should be considered for community use.</p>	<p>There should not be potential for heights which would affect the local area. Further, additional traffic on Marsh Lane and Church Road would affect safety of local school children and park goers. Indeed, speed limits are not respected on Church Road with many accidents each year. The site should be considered for community use.</p>		-	<p><a href="https://www.london.gov.uk/infrastructure/transport/infrastructure-delivery-plan">Local Plan Infrastructure Delivery Plan</a></p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling Guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

				S408 - Church Road / Estate Way US	No	No	No						This Response is Noted.
Francesco Babolin				S409 - Low Hall Depot	No Response	No Response	No Response						This response is noted.
Mi Victoria J Love				S409 - Low Hall Depot	No Response	No Response	No Response		The project is unsound because it is on a flood plain. There are already problems with drainage along South Access road which have worsened since the building of properties further up the road by the pump museum. Furthermore there was extensive flooding in this area earlier this year which was damaging and is likely to continue to be a problem as the consequences of global warming continue to impact. It is frightening and irresponsible to propose such developments. Furthermore, access to Leabridge Road only, which will increase traffic in one of the busiest roads in the borough.	Relocate the depot if you have to but locate new dwellings in a place other than a flood plain.	No		Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In April 2019, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shifts to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developer's development will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Julian Cheyne				S409 - Low Hall Depot	No Response	No Response	No Response		The Low Hall neighbourhood will be damaged by the inappropriate over development of the area. The increase in population and the construction of a tall building of up to 16 stories. Low Hall fields is a vital local open space well used by local residents and, in particular, for children sports. A tall building next to this sports field will damage the sense of openness of the green open space and the extra population will add to the pressure on that space.  South Waltham Forest and this area are already densely populated and deprived areas. Other parts of Waltham Forest should be expected to carry an equal load. These areas do not need more housing, which should be built elsewhere, but they do need green open spaces. This development inflicts harm by increasing the density and by adding to the pressure on an already well used vital local open space.  Waltham Forest has already shown a lack of appreciation of the importance of this space by agreeing to hand over the green space to an entertainment company for most of the summer of 2022. It showed no appreciation of the importance of this space for the health and well being of local residents and children. It was only prevented from doing so, after giving permission, by the intervention of Sport England. Local authorities like Waltham Forest are lazier on making money out of these spaces than in protecting them for local residents and those who actually pay for their upkeep. Strong protection of these spaces has to be built in to local plans by independent inspectors at Local Authorities like Waltham Forest may write policies but they do regularly ignore those policies when decisions are made.  The Draft Skyline study includes yet another reference to landmark buildings, apparently needed to enable residents to find their way around.	Over development should be avoided. The number of units should be reduced to lower the density of the development to take account of the fact that the area is already densely populated and deprived by comparison with other parts of the Borough. This should also be done to reduce the population pressure on the neighbouring open space and the Marshes. The site should be designated for low rise development so that it does not affect the sense of openness and the visual amenity of the local green open space and the Marshes. Green open spaces are vital to the health and wellbeing of residents, as is acknowledged in Waltham Forest policies. Housing sites should be built in other less densely populated and deprived areas of Waltham Forest.	No	I am a member of Save Lea Marshes and am concerned for the future of open spaces in this part of London	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lea Valley Regional Park (Special Protection Area (SPA) and Ramsar)  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 15 year minimum housing target for Waltham Forest of 1,246 new homes (1,246 per year) based on a London-wide assessment of capacity/available sites in 2021/28. The original draft London Plan figure was equivalent to approx. 1,880 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,812 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Abigail Woodman				S409 - Low Hall Depot	Yes	No	Yes		I welcome Waltham Forest Council's commitment to protecting Metropolitan Open Land (MOL) in the Borough. Open green spaces are essential for physical and mental health and wellbeing, and it is very heartening to see that there are no proposals for developments on MOL. It must be said, however, that numerous tall developments in Upton and Leabridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected.  Furthermore, the habitats of the marshes "Walthamstow Marsh (as SSSI), Layton Marsh and Hackney Marshes" must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Epping Forest SAC is deemed worth of protection from development in this site allocations document, to should our equally important green spaces flanking the rest of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be constant across the Borough, and developments should seek to protect habitats from damage caused by intensification. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The Local Plan requires the protection of MOL in the Borough, unless very special circumstances can be justified. The impact of development on sites near to MOL will be assessed as part of this process.
											Yes		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Larissa Lockwood				S409 - Low Hall Depot	Yes	No	Yes	<p>Hi risk housing at Low Hall Depot will put huge population pressure on the local area: flood risk, air pollution, noise pollution, pressure on services that don't even exist (try getting a GP appointment in the Low Hall area – impossible) and surrounding marshland, allotments and biodiversity. The allotments in particular are a precious local resource – benefiting people's health and wellbeing as a quiet respite. To have these overworked and built upon will lead to a loss in wellbeing, a loss in biodiversity and a much higher likelihood of flooding on a site that already floods. Who builds a Floodplain when you look at the projections of flood risk in Waltham Forest? It doesn't make sense.</p> <p>In the planning proposals, there is absolutely no mention of the impact thousands of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. The backing side of the Old River is a Site of Importance for Nature Conservation (SINC), yet there is no adequate mention of this conservation status in the proposal as there is around the Epping Forest area. This use of this site to house thousands of people is putting huge population pressure on a vulnerable SINC that will not be able to withstand the weight of increased pollution, congestion and population density, therefore I object to this proposal as it is unsound. Due to unsustainable population pressure, these plans are unsound.</p>	<p>Protect the marshes and Cheyne Fields allotments! Building right up to the boundary puts them at risk.</p> <p>The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of cars, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, as the Marshes and Cheyne Fields allotments can't pocket, then the development should be outweighed – no high housing.</p> <p>I suggest that Low Hall site not be used for multi-storey housing and should instead be saved as a carbon and biodiversity sink and flood relief.</p> <p>The figures quoted for population increase are in line with pre-pandemic and pre-Brexit statistics, which whilst I understand are the official figures, yet it is clear that population increase at this scale will not happen in the next 20 years, therefore these modifications suggested are sound. People will also leave the borough – as many are already doing so – because of all these unnecessary developments ruining people's quality of life and putting their homes and livelihoods at risk of flooding, the beginnings of which we started to see this summer.</p>	Yes	Most people don't even know about these planned developments and they are going to undermine their health and wellbeing and possibly flood their homes and livelihoods.	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 – Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that the development does not increase flood risk either on or off the site.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Lee Valley Regional Park (Special Protection Area (SPA) and Ramsar)</p>
Jane Burnett				S409 - Low Hall Depot	Yes	No	Yes	<p>The proposed site S409 - Low Hall Depot is located nearby a known flood plain. If it is built on, this site will be there for many years to come. With more extreme weather, river and tidal rises that are predicted with climate change, there is a risk of flooding on this site. Should the London barrier ever fail, it is also at risk from tidal flooding. We experienced significant flooding in the area in July this year. The proposed development will also put huge population pressure on the surrounding marshland. In the planning proposals, there is absolutely no mention of the impact hundreds of new residents will have on the Marshes and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area it sits beside. I therefore object to the proposed plans for site S409 - Low Hall Depot as constructing tall buildings near a Floodplain as well as unsustainable population pressure is unsound.</p>	<p>I suggest that the number of units and the height of the buildings should be significantly decreased, to reduce flooding risk and population pressure on the surrounding area that can absorb it.</p>	No	-	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 – Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that the development does not increase flood risk either on or off the site.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p>
-				S409 - Low Hall Depot	Yes	No	No Response	<p>This is a large number of homes, potentially 700, on what is the flood plain. This is a vulnerable area, there was local flooding around Dagenham Brook only last year.</p> <p>In addition, there is also the potential poor air quality along housing right next to a light industrial area, with recycling/waste disposal</p>		No	-	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 – Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that the development does not increase flood risk either on or off the site.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. Bella Donnelly				S410 - Leyton Leisure Lagoon	No Response	No	No Response	LBWF knocked down Leyton Baths against strong opposition to replace it with the Leisure Lagoon - so just how sound is your next exploit of rigging the current Leisure Lagoon, especially when with a Climate Emergency the continual knocking down and rebuilding uses up mega amounts of polluting cement & other building materials	We just leave it alone (apart from the ridiculous putting out stop onto the pavement that gets so battered it has to be repaired regularly), not to mention the damage that painted stop does to people's smitex and pushchairs etc	-	-	In April 2019, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is inline with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Camilla Cox				S410 - Leyton Leisure Lagoon	Yes	No	Yes	Failing to assure that new plans will retain existing leisure provision and access	Retain parking Ensure the unique borough offer of the extensive swimming facilities are retained	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.

So				S411- Tesco Bakers Arms	No Response	No	No Response	Why not just remove the roads in Waltham Forest and make it all walk. Where will there be parking for the updated retail unit. Where will there be parking for the new housing. Public Transport cannot cope. Layton / Walthamstow Central cant cope now with current numbers.		-	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised while trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Infrastructure Delivery Plan (IDP) identifies infrastructure requirements across the borough over. It includes projects to ensure adequate infrastructure provision that is relevant to waste, transport, education, utilities, health, culture, sports, the emergency services, and green infrastructure comes forward alongside development in the Local Plan.</p>
Charles Thaine				S411- Tesco Bakers Arms	No Response	No	No Response	My only comment is that the redeveloped site MUST provide a similar store as existing plus adequate carparking, the current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc. (not small shops that already exist elsewhere in a high street) but also parking to enable taking their bulky shopping home by car- this cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide fast above large high warehouse like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every "development site."	Address the issues raised above	-	-	<p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensity Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2020, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whips Cross hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character lead, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>
Sabit Rattan				S416 - Whips Cross University Hospital	No Response	No	No Response	I don't believe the plans for this site are sound. The outline planning has already given permission to build a new hospital and details buildings of height including one of 18 storeys very close to the boundary of the proposed hospital site. This plan shows the buildings of height located some distance from the hospital and misrepresents the space available to the hospital development. Given that the modelling for the capacity of the hospital in terms of services and bed numbers is still being decided. The land area given for housing and development should not be fixed at this point in time, otherwise the hospital will be defined by the land available rather than the hospital service need of the population for the borough and other boroughs adjoining.	The plans for housing and commercial development on the site should be reduced and more land retained for current and future health needs.	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Because of the problems, both structural and social that they caused, I don't think you should identify areas as "potential for height" as then you will have only weak grounds to object to any monolithic developer would wish to build. I would want all those yellow stars removed.				Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Whipsps Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2020, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whipsps Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character led, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.
David Boote				S416 - Whipsps Cross University Hospital	No	No		The target of 1,500 homes is excessive and will be detrimental to the chances of preserving the magnificent original building (West Ham Poor Law Union Infirmary) and the area of open space on the other side of Whipsps Cross Road, which is already the most intensively used part of Epping Forest.	Either deletion of the new homes target or a reduction to a much lower level that independent advisors can confirm is appropriate for the amenity value of the original hospital building and of the area of open space on the other side of Whipsps Cross Road.	No		In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Anthony Madrys				S416 - Whipsps Cross University Hospital	No	No	No	The current plans do not accommodate all required needs. There should be more beds available, not less. Day care centre not addressed along with it.	More beds available. Day care and eat centre.	No		Whipsps Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2020, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. Margaret Walks				S437 - Joseph Ray Road	No	No	No	It is unclear how people in the local area have been consulted about this development. No one else I spoke to on my street seems to know about this, I am therefore unsure to what extent this major proposal is an inclusive consultation. How all communities been informed? The maps/plans provided are not clear enough for people to understand. Need to have more detail and 3D diagrams of this site and within Leytonstone including other proposed buildings so can see full impact.	Too noisy for homes. Try being beside a railway line. High rise flats will block views and light. Previous tower blocks in area have been removed because they did not work. What a waste of money if you rebuild these. Areas close to railways should be used for commercial use only.		I would like to strongly oppose high rise buildings in the area.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Chris Morris				S437 - Joseph Ray Road	No	No	No	Does not address the need of more family homes within the area	Less high and medium rise and more houses	Yes	-	The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of uses. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.
Sabil Rattan				S437 - Joseph Ray Road	No Response	No	No Response	It is not sound because it is not justified for the following reason. This area provides some employment and has a good occupation rate as detailed in The report of land use study commissioned by the borough. See below <a href="https://www.walthamforest.gov.uk/sites/default/files/2021-10/LMU%20Employment%20and%20Study%20update_%202019.pdf">https://www.walthamforest.gov.uk/sites/default/files/2021-10/LMU%20Employment%20and%20Study%20update_%202019.pdf</a> 44 from 3.7	If a change of use is allowed it should have a much reduced housing target and the type should be of a low work typology.	No	-	Waltham Forest has an identified need to provide additional industrial floorspace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorspace, and the intensification of industrial provision is encouraged.

Catherine Bowman				S418 - Church Lane Car Park, Leytonstone	No	No	No	I have great concerns about buildings of 'height being developed on this site. Why is there not clear or imagery to really show what the plans are? This should be a simple drawing to show this. It is far too close to the primary school and could cause safety issues for children playing outside being overlooked. The housing will be so close to both tube and A12 that it will surely not provide quality housing for residents more like noise and air pollution issues. The area is already densely built and populated and needs more open spaces to counter pollution. The building works would also add to air pollution surrounding the primary school which is local area of concern. Particular for children suffering with respiratory conditions. The existing cycle and pedestrian crossings over the A12 is perfectly sufficient and does not require upgrading. Any development rendering this unusable during the building works would cause major issues for the large number of families that use it daily to access the school/tube/town centre. The town centre needs more open spaces/community areas to better service the large number of families already living in the area. What about investing in the infrastructure and services in the area instead.	Maybe word this in layman terms so the wider community can actually understand the proposals in full.	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p> <p>As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p>	
Suzanne Voth				S418 - Church Lane Car Park, Leytonstone	No	No	No	It is not legal compliant as you have given no skyline drawings to show the effect on the light and sightlines into George Tomlinson Primary school. You should draw a skyline drawing to show this. It is not sound because it is not justified or effective for the following points: 1. The height of the two towers maximum 10 and 12 storeys. Dominate the local area of low rise buildings. The skyline studies do not include more distant views in particular the local open green areas of Bushwood and wansford flats part of Epping Forest which are lower. Nor is there any recognition that that area of Leytonstone is 10 metres above sea level while the wansford flats part of Epping Forest is at 20 metres. This will be enhancing the natural environment. The height of the buildings should be limited to the height of a maximum of 2 storeys higher than the neighbouring building. 2. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provisions (0.41ha/1000 people) of open green space already and such developments will further dilute the provision widely acknowledged as important for the health and wellbeing of people. The amount of open space should be recorded as a requirement rather than a guideline. A Bakery should not be the only outdoor space available for residents of higher buildings. 3. There are no houses being produced in these plans and no firm percentage of housing to provide truly affordable, social rent or even affordable for rent housing leaving the site open to be exploited for high and build to rent developments. 4. A requirement for different housing on the site should be set. 5. Together with the other 3 sites in the Leytonstone ward a total 1700 homes over and above the current 4830 households and entirely composed of rental flats will alter the demographics of the area which is primarily a settled family orientated area where people from the more urban areas move to, to raise children. This housing will be a social housing and flexible asset for public use and benefit. Highlighted currently by its use as a Covid-19 vaccine centre. New commercial units are sufficiently close to Leytonstone town centre or the high street to be a complement. The area is residential with a school very close. This does not improve pedestrian and cycle links to the station - it redirects an existing direct, safe and well used route popular with junior school children away from roads. The suggested re-orientation suggests steeper ramps than existing. The proposed railway is extremely mature and may even be subject to a new TPO. Any works that require crown thinning will result in additional optical crown maintenance and management work from completion onwards. 100 new homes adjacent to regenerated MUGAs will conflict with HT guidelines of maximum distances to habitable rooms and cause noise complaint issues. Opportunities will also be limited for new tree planting when combined with 100 new homes.	It is not legal compliant as you have given no skyline drawings to show the effect on the light and sightlines into George Tomlinson Primary school. You should draw a skyline drawing to show this. Opportunities will also be limited for new tree planting when combined with 100 new homes.	Yes	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to new development sites in the Borough.</p> <p>The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchment areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant environment for all sections of the population in Waltham Forest.</p> <p>There are many definitions of 'affordable housing'. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA)</p>
Simon Abbott				S418 - Church Lane Car Park, Leytonstone	No	No	No	Response	Response	No	-	<p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p> <p>As set out in the Local Plan, all new residential development in the borough will be required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. If yes, please explain why?	Council's response
Ellen Chen-Mumshon				S418 - Church Lane Car Park, Leytonstone	No	No	No	So many housing and residential towers on a small space. It will reduce that amount of light into and overlook the grounds of the school. Increased noise pollution and population density in an area that is already populated with lots of housing.	To consider the reduction of open space and reduction of light to the surrounding areas.	No	-	<p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.</p> <p>The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Ruth Kaufman				S418 - Church Lane Car Park, Leytonstone	No Response	No	No Response	There is no information about maximum height of developments. Tall buildings will overlook neighbours and damage the overall character of Leytonstone. There is no requirement to ensure adequate green space and support for biodiversity. This combined with dense housing could create issues of the future. There is no requirement for social housing, for affordable space for community use, or for additional space for services such as schools. The total plans for new housing will put pressure on existing services.	Specify requirement for maximum height, ratios of green space to residential or commercial use, provision of affordable community spaces, support for education and social housing.	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Kate Perry				S418 - Church Lane Car Park, Leytonstone	No	No	No	I feel this proposal will over power this local area. Taking light away and the sense of space from this both up area. It feels too close to noise and pollution, thus bringing the feeling of noise and pollution closer to local school. The proposal is too high and overly higher than anything in this area. It will overlook this school and shade the outdoor space (which is not large for a school). The development feels imposing and not in-keeping with the area. It would be a shame to lose the flexible community space that the church Lane car park gives to Leytonstone (markets, concerts, covid centre, community events have all been held here) having no flexible space near the town centre limits what events or community proposals can be held in the future. The high street does not feel it can support all the shops in the proposal plus other proposed shopping areas.	If the site is developed it must be much lower - 4 stories only. This should also involve expanding the community playground and basketball space and keeping a flexible community space that can be used for various events.	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p>
David McKean				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	High rise residential blocks in this location would have the potential for my children's primary school to be overlooked by parents and pedestrians. Also I grew up around this area and a concerted effort was made to take down the large number of high rises around the late 1990's as they provided ghettoisation and a large gang culture which is still around but nowhere near as bad as it was. I ask the question, what is the purpose of rearing these issues?	Make this a green area and don't build a high rise building on it.	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Suzanne Welch				S418 - Church Lane Car Park, Leytonstone	No	No	How is this going to affect George Tomlinson school in terms of pollution and noise from building traffic? How will the final build affect the school in terms of light into the playground and building?		-	-	<p>To ensure that the level of growth planned in Local Plan Part 1 does not have any adverse effect on the Air Quality in the borough, The Council commissioned an Air Quality Study 2 as part of the evidence base. The approach has been to determine vehicle trip generation and distribution for each site allocation, without and with the Local Plan, and the expected net changes in AADT (Average Annual Daily Traffic) on roads within 200m of the existing Forest Special Area of Conservation. The changes have been determined with full Local Plan implementation (The Local Plan scenario) and for each year between 2022 and 2036. In addition, a Sensitivity Test was undertaken to assess the potential implications should higher levels of car parking be permitted within the low Public Transport Accessibility Level (PTAL) areas of the North of the Borough and coverage of Controlled Parking Zone(s) (CPZ) are not intended to cover the whole of the borough. Therefore, it is considered to represent a worst case scenario of development being delivered without any further policies constraints on vehicle use being delivered through the Local Plan. One of the key conclusions of the report was the net reduction in overall traffic on most of the borough's roads in the Local Plan period.</p> <p>As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p> <p>In addition, The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p>
Sybil Ritzen				S418 - Church Lane Car Park, Leytonstone	No Response	No Response	<p>No, it is not effective or justified for the following reasons:</p> <ol style="list-style-type: none"> <li>This site is long and narrow and bordered by a tube line that in normal times will run a 24-hour service and the A22 motorway. It is also adjacent to the station entrance so unlikely to provide an acceptable living environment for most people. It does not meet the council's own aspiration to provide good quality livable homes. A similar number of work live units in this site may be a compromise option.</li> <li>The skyline study indicates the possibility of 2 buildings one of 10-12 and another of 6-8 storeys which will again dominate the current area of the terraced shops and Victorian terraced housing and the grade 2 listed Church. The buildings should be no higher than 2 storeys above the current immediate Building.</li> <li>The plan for this site (like the other sites in Leytonstone ward) proposes a requirement for set number of homes which will dictate only taller buildings of small flats. Collectively it is driving a direction for housing in the area of small flats without garden space rather than a variety of housing (Haltham Forest IDP Core Strategy - Proposed Submission Page 48.</li> <li>8.8. The housing to WF require 2 or more bedrooms. 78.2% of demand require 2 or more bedrooms. 12.9% of existing households are overcrowded (national avg. 3%) The different sites should be offering a mix of housing and ensure some garden area.</li> </ol>	<p>Similar number of Work live units in this site may be a compromise option.</p> <p>The buildings should be no higher than 2 storeys above the current immediate building.</p> <p>The different sites should be offering a mix of housing and ensure some garden area.</p>	No	-	<p>The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sizes. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade 1 listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p>
Shelley Usual				S418 - Church Lane Car Park, Leytonstone	No	No	<p>The area is over populated as it is a small primary school nearby. The area does not need anymore small flats that nobody can afford!</p>	<p>The area is over populated as it is a small primary school nearby. The area does not need anymore small flats that nobody can afford!</p>	No	-	<p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. Norman Haynes				S418 - Church Lane Car Park, Leytonstone	No Response	Yes	Yes			No	-	This response is noted.
Margaret Walls				S418 - Church Lane Car Park, Leytonstone	No	No	No	It is unclear how people in the local area have been consulted about this development. No one other (apart to on my street seems to know about this, I am therefore unsure to what extent this major proposal is an inclusive consultation. How all communities been informed? The maps/plans provided are not clear enough for people to understand. Need to have more detail and 3D diagrams of this site and within Leytonstone including other proposed buildings so can see full impact.	Similar height to other buildings in the area so that it does not block views of the city and surrounding areas which are a real asset to Leytonstone.	No	I would like to strongly oppose high rise buildings in the area.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Helen Gowers				S418 - Church Lane Car Park, Leytonstone	No	No	No	High rise are not in keeping with area and will use space that is utilised by the community in many ways - not least the covid testing centre. The site is also very close to a primary school and the high rise would overlook play spaces and block out valuable sky line when the children are playing. It would also unternable to live in these flat with main road and train line so close. We dont need more retail space we need enough units on the high street used properly - will impact the integrity of the area as a desirable place to live as totally out of keeping with other buildings in the area.	I dont believe houses should be out in this spot at all - and less so high rise - anything taller than the homes already in the area. Its actually shocking this site has been suggested at all - it works perfectly well as it is and more so when the covid testing centre is gone.	Yes	For transparency	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Adrian Nettlehip				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	If this is a public consultation, the technical language and use of very specific questions, which have no specific meaning in common language would appear designed to exclude the participation of the people most affected by this proposal.	Communicate the proposed changes in plain English and circulate them widely.	Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Iason				S418 - Church Lane Car Park, Leytonstone	No	No	No	The drawings provided don't do a good job of properly visualising how the end result will look, but even as such it's already clear the area will feel claustrophobic. Not suitable to be so near to a school: the surrounding streets are already too congested, with people performing dangerous manoeuvres while children and families are walking past trying to get to school. I can only envision that with an extra 100 homes in such a confined space this situation will only get worse and eventually children will be hurt.	It would be much better for the area to invest in keeping this space as a flexible community space, allowing activities such as markets, more space for children and green areas.	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redeployment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.
Gary Hellen				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	There has been no consultation with the local community about this site. parking is a problem in the immediate vicinity, removal of a car park will only make a worse. I see the proposal for a 13 story block without any consideration to loss of privacy or evening light to the immediate housing block or overlooking of the school playground. There would be significant impact to the local area, it would not fit harmoniously with the Edwardian housing block, and St Johns would be overshadowed, when that should be the key building in the area. The homes would be directly next to the railway, the noise would be horrific, it is possible to hear overnight engineering works through closed windows in Rudgeley Road.  The council needs to have short term memory, this site was the Church Lane underpass under the railway line and was filled during the A12 cutting construction, can the land support a lower block?	This is not a reasonable development site for the proposed buildings.	No	-	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  This response is noted.
Liz Floyd				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	It fails to provide meaningful detail, including artist impressions. It fails to say how many homes will be Council rented properties. It fails to address issues around local services, such as a shortage of GPs. Where are the amenities for residents, such as green space and playground areas?	Modifications should be made in line with the above response.	No	Because I am an interested resident	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online on Waltham Forest Council's website.
Elsie Burgess				S418 - Church Lane Car Park, Leytonstone				What does potential for height mean? It is not specified. I do not support a tower block that dominates the space/ dominates the lovely St John's Church and fundamentally changes the nature of the area. I understand the need for new housing - will some of the site be houses or is it flats only? All flats should have a balcony and/or access to their own open / shared open space. Need a balance between high density and personal space/community spaces. Council has shown us that All Flats should take into account working from home enabling defined work space to be accommodated.		Yes	-	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Rachel Jones				S418 - Church Lane Car Park, Leytonstone	No	No	No	This site is adjacent to a 24 hour tube line and a busy station, as well as being incredibly close to the A12. There will be significant noise here for families living here as well as no outdoor space for them, and noise if they were to open windows. This would be extremely poor quality housing.  The proposal of high rise buildings is particularly disturbing especially in the absence of any skyline drawings. This would spoil the skyline and be completely out of keeping with the existing buildings. Furthermore high up windows would permit the view of several of the playground spaces in George Tomlinson school, where children do sports and play outside. This is a threat to the welfare of children attending the school and risks prostitution.  Construction on this site would additionally cause pollution on the school grounds.  This development also removes the very limited multi-use community space which has been utilised for local events for many years.  Additionally there is an existing perfectly functional pedestrian and cycle bridge crossing the railway lines, which the plan seems to be making out does not exist, and does not need any enhancement. This is used by many people and the inevitable closing of this bridge for the development would be a great inconvenience for many people.	This site is completely unsuitable for housing due to noise. There is no need for additional retail space as there are many nearby empty units. Its position adjacent to a busy primary school makes it unsuitable for a high rise development. I don't think there is any part of this proposal which is redeemable. Please leave it as an open community space. A weekly veg farmers market at weekend would make so much more sense.	No	-	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.

Clare Mccotter				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	Planned building work is close to a school and it's likely planned accommodation will overlook school playground. Added pollution and noise during construction puts school children at risk. New high rise developments conflict with previous years of work to knock down such buildings.	Surely the area would better benefit from expanded green space and improved amenities for families and young people.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Sophie				S418 - Church Lane Car Park, Leytonstone	No	No	No	Much too high! The height of the proposed building would allow those residents to look over the local primary school playground which is a safety concern. Noisy building work and pollution is also an issue for the school & the proposed building would take away a lot of the light from the school and surrounding houses. The area is already densely populated and we don't need to build up the area even more. The car park, when not being used as a covid test site, is handy to the local community and has hosted markets. Building here would take that away. I cycle with my children over the A12 every day and there is really no issue with the current cycle path at all.	Much too high! M. Muzaffar				S418 - Church Lane Car Park, Leytonstone	No			Too close to the railway. Would be too noisy for families. Houses with gardens that back on to railway, so houses a little further from railway line would be much more suitable for this area, if you want to develop the car park. But where would those who need to drive, park for the station??				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as 'Call for Sites' exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the council's decisions when deciding scope and location of development in the borough. We feel the sites chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.
Delta Gould Luffus				S418 - Church Lane Car Park, Leytonstone	Yes	No	No	There has been no consultation around the effects on a local primary school				The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Alison Chan				S418 - Church Lane Car Park, Leytonstone	No Response	No	No	The existing High Street is in need of funding, many shops are shut which could do with letting and help to improve with signage, many look cheap and/or not well. Money would be better spent on this.				The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Bonnie				S418 - Church Lane Car Park, Leytonstone	No	No	No	Would overlook children playing in a playground.		Yes		Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.

Ede Edworthy				S418 - Church Lane Car Park, Leytonstone	Yes	No			I think it's a great mistake to allow lower blocks in any development in Waltham Forest. We had to remove almost all the tower blocks, many years ago, because of the problems, both structural and social that they caused. I don't think you should identify areas as "potential for height" as then you will have only weak grounds to object to any monstrosity a developer would wish to build. I would want all those yellow stars removed.	No	-	This response is noted.

				S418- Church Lane Car Park, Leytonstone	No	No	No					This response is noted.
Francesco Babolin				S418- Church Lane Car Park, Leytonstone	No	No	No					This response is noted.
Michael Kelly				S419- Tesco and adjoining sites, Leytonstone	No	No	No	This plan is not legally compliant and it is unsound and it fails to comply with the duty to co-operate. These are very technical terms and it is not entirely clear what they mean. However, as these are the questions I will provide my views on these. The development of S419 which refers to the Tesco and adjoining sites in Leytonstone is not legally compliant as the proposal has not been put up for public consultation by local stakeholders living in the local area adjacent to the proposed development. I have spoken to many neighbours in my street and none have any awareness or knowledge of these proposals. This proposed development of 8 or more story dwellings will have a significant impact on the local skyline and houses. Also, the loss of the car parking at Tesco will certainly impact on local people who use this shop. The people who shop in this Tesco value being able to park and shop. To remove this car park is discriminatory against disabled, elderly and families who need to transport their groceries home as they are too heavy to carry on bicycles or on foot. The Tesco car park provides an essential service locally as people can park for up to 2 hours and they can access local shopping on Church Lane and the High Street. This enables the local community shops to attract customers into the local area. This therefore enables the local high street shops to attract customers to shop locally. Impact on the local environment: Local residents will no longer be able to do their grocery shopping at Tesco as car parking will no longer be sufficient. This will force locals to travel further to do grocery shopping. This will result in more use of cars and pollution. The infrastructure required is not part of this plan. The infrastructure requirements necessary to facilitate the necessary services that will be required by the increase in local resident numbers. At present the health service struggles to provide enough GPs, dentists and hospital capacity for the local community. The plan should include explanation as to how greater capacity can be achieved in the local health service. The increase in the number of homes proposed on this site and the consequent effects on the local infrastructure, in particular increasing demand on already over-burdened transport, health, social care and education services. It is unclear as to the height of any proposed tower blocks. Anything over 6 stories would, in my view, significantly impact on adjacent neighbourhoods. This brings me to affordable family homes. I am not convinced of the case for a large expansion of 1 and 2 bedroom apartments which would not be suitable for families.	Tesco value being able to park and shop. It is discriminatory against disabled, elderly and families who need to transport their groceries home as they are too heavy to carry on a bicycle or on foot. The new development proposals for S419 need to provide provision for visitor car parking for people visiting residents of the new development. Otherwise the remaining car parking outside Tesco will be occupied by visitors. Therefore, further limiting the opportunity to park and shop at Tesco. The proposal of 8 storey or more development will dwarf the surrounding homes. It will block the light to their house and gardens. Creating such a large building will have a negative impact on the value of the properties. Being overlooked by such a development is an invasion of the privacy of these homes. This does not fit with the other homes in the area. The best modification to the plans would be to have a much more conservative development. In keeping with the local homes the structures should not exceed 3 storey. This would create a much more balanced skyline. Also, the additional impact on the local community services and infrastructure could be absorbed by visiting provision. Although, some planning and consultation as to how the increased demands would be met in future needs to be undertaken. A consultation and consideration of what the expanded requirements will be needs to be undertaken before these proposals in this development can be properly considered. Impact on the local environment: Local residents will no longer be able to do their grocery shopping at Tesco as car parking will no longer be sufficient. This will force locals to travel further to do grocery shopping. This will result in more use of cars and pollution. The infrastructure required is not part of this plan. The infrastructure requirements necessary to facilitate the necessary services that will be required by the increase in local resident numbers. At present the health service struggles to provide enough GPs, dentists and hospital capacity for the local community. The plan should include explanation as to how greater capacity can be achieved in the local health service. It is unclear as to the height of any proposed tower blocks. Anything over 6 stories would, in my view, significantly impact on adjacent neighbourhoods. This brings me to affordable family homes. I am not convinced of the case for a large expansion of 1 and 2 bedroom apartments which would not be suitable for families.	No	As a local resident I would like to participate and be consulted to ensure any local development project would include my input and that developments are not undertaken without enabling local residents to participate in the development of our local community	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online on Waltham Forest Council's website. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units in Designated Centres to be converted to residential use at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage and having residents located within the borough's centres, ensuring that most people daily needs can be met within a closely to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Tommy Krampton				S419- Tesco and adjoining sites, Leytonstone	No Response	No Response	No Response		Less residential units with emphasis on affordable family homes.	Yes		Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S419 - Tecco and adjoining sites - Leytonstone	No	No	No	<p>The skyline documents do not provide a view from the adjacent green spaces i.e. The hollow ponds and Washbad Flats. A skyline drawing should be done for the Leytonstone site to show the effect on both these parklands.</p> <p>It is not sound because it is not justified or effective for the following points:</p> <p>1. The site plan allows for the removal of a 17th century building locally listed, a row of Victorian houses with shops below and a locally listed church in favour for a local theatre group and other social groups. So fails the aim to carry forward a cultural legacy and wipes a physical history from the high road.</p> <p>These buildings should be excluded from development site.</p> <p>2. The height of the two towers maximum 28 and 24 storeys. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The skyline studies do not include more distant view in particular the local open green spaces of Ashwood and Washbad Flats part of Epping Forest which are lower. Nor is there any recognition that this area of Leytonstone is 20 metres above sea level with the washbad flats part of Epping Forest is at 20 meters. This will not be enhancing the natural environment.</p> <p>The height of the buildings should be limited to the height of a maximum of 2 storeys higher than the neighbouring buildings.</p> <p>3. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provision (6.6/1000 people) of open green space already and such developments will further dilute the provision widely acknowledged as important for the health and wellbeing of people. The amount of open space should be recorded as a requirement other than a guideline. A balcony should not be the only outdoor space available for residents of higher buildings.</p>	<p>Much increased realistic engagement efforts, whereby internet access and self navigation is not the concentrated consulting focus methodology. A far greater emphasis applied, rather than the current single minded outlook demonstrated by LBWFC Council to create a neighbourhood engagement, devoid of family and female friendly transport options, which result in the risk of the existing cultural and architectural diversity and capital city environment enjoyed by residents, being made extinct by it through cut and non-inclusive strategy.</p>		-	<p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in these cases that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p>
Hilary Douse				S419 - Tecco and adjoining sites - Leytonstone	No Response	No	No	<p>A 3 storey town house, which is not in the draft plan, and is not in the plan. I have looked at comments made on the draft plan and people were concerned about height and density, yet this persists here in the plan. I have no problem with the site being used for additional housing but the density means that the dwellings will be both high and small to maximise 'units'. The forward of the plan through the 'document' means that people come here to raise families. The result of this plan will be small units that are unsuitable for children and families. People have to leave Leytonstone to find affordable family housing and this plan will not help people to remain settled in the borough. Small units mean that people grow old of them and they do not facilitate a stable community with ownership of the place you live. The heights that look likely, will not only impact on the view from the high road but also impact upon the green spaces that we really value, Washbad Flats &amp; Hollow Ponds. Actual houses or good family sized low level flats would be great in this area. But NOT high rise where no one would choose to bring up children. There is a shortage of family housing and an oversupply of flats with nothing in between. This does not make family housing affordable and sends the risk of people being trapped in unsuitable accommodation for a long time. The transport, health, school, daycare infrastructure is already under strain. The level of density proposed will not help this.</p>	<p>Please make the developments low level and large enough and green and affordable enough to enable families to remain in the area so that we have a sense of community.</p>		It would be good to have a say as I feel strongly about the proposals	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA).</p>
				S419 - Tecco and adjoining sites - Leytonstone	No Response	No	No	<p>This is probably the most daunting public consultation I've attempted to engage with. The questions seem 'technical', and the fact ("legally compliant") seems to imply that without specialist knowledge and expertise any response is likely to be discounted. Local residents (conductively transmitters in this process) are not offered a definition of "soundness" other than a oblique mention of the National Planning Policy Framework. The "safety to operate" is not explained. It does appear that the views and aspirations of ordinary local people are not fit to be heard here, though providing access to two boxes may be considered to be the other boxes perhaps.</p> <p>Yet the proposals which this process seeks to ratify are of vital interest to ordinary local people, and I feel I must make some representation, vain though it might turn out to be. So I'll say that the Local Plan is unsound, in that it flies in the face of local wishes, and that the duty to co-operate has not been met as the wishes of local people are being ignored.</p> <p>My particular interest is Leytonstone, as that is where my "forever home" stands. It is a pleasant, settled, suburban area, which benefits from environment and social culture from having a high proportion of residents who regard it as their permanent or semi-permanent home. That manifests itself in things like the strong local residents' associations, and the regular parties of their pickers. The proposals to pre-approve the cramming of large numbers of modest flats, in tower blocks which will dominate the skyline for miles around, represent a significant and unrepresentative change to the character of our area. It will alter the heart of Leytonstone, as has happened in parts of Walthamston already, from a suburban area to an urban one. I can't offer a scientifically systematic survey of sentiment (any more than the Council can) but I view this with dismay and I've encountered very few local people who don't. If "soundness" involves a requirement for proposals to be sympathetic to the wishes of local people, then the Local Plan is unsound.</p>	<p>There is certainly a continuing need for new homes. There are certainly parts of Leytonstone which are capable of sympathetic development which could provide some of those needed homes. But the scale of these proposals, both in the impact on the balance of types of household dwellings, and in the skyline, are inappropriate and widely unwellcome. A council whose priority was to represent the people who elected it would not be seeking what is effect pre-approval for such drastic changes to a settled and well-loved suburban village. A restriction to a maximum of eight stories in the central location currently occupied by the Tecco estate, with a maximum of six stories elsewhere in the town centre, and four elsewhere, is the right sort of balance between housing need and the preservation of amenity.</p>	Yes	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online on Waltham Forest Council's website.</p>
				S419 - Tecco and adjoining sites - Leytonstone	No	No	No	<p>There is no parking at all provided for the supermarket. This means that people and people with limited access to the large shops they need to. People who work hours of at night need to travel safely by car. Even smaller families cannot carry weekly shops by hand or on bike. This is disadvantageous people access to basic food and household necessities. Treating people unequally is against equal opportunities. Also, making a smaller supermarket is a health risk during pandemics.</p>	<p>Ensure supermarket is arkly and spacious for the large community it serves. Ensure parking is provided by eliminating some of the tower blocks you are planning.</p>		-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.</p>

If yes, please explain why?	Council's response
Sally Duncan				S419 - Tesco and adjoining sites - Leytonstone	No	No	No Response 1. I do not feel that adequate consideration has been given to the environmental impact on the area. The proposed skyline documents do not show the huge difference to the skyline from either Wansford Flats or the Hollow Ponds areas. 2. I feel that a great deal of local consultation has been missed due to the fact that the usual casual meetings of local people in the area affected where these proposals would have been discussed and disseminated had not been able to take place. 3. I do not think that an adequate study has been given to the impact of thousands of new residents in the area and the availability of GP's, with current waiting times of 2 weeks for an appointment and a shortage of GP's, simply saying that you would increase practice slots to 10,000 patients is not feasible - where will the GP's come from? 4. Stating that there is a current surplus of school places does not necessarily mean that increasing the population in this area will not increase demand and thus create a shortage of places. All the local primary schools have already expanded to capacity. 5. Having worked in Iford for many years, I have watched the town centre change completely. The traffic congestion is terrible at any time of the day. 6. The massive increase in flats built in Iford has not created anything near affordable for many people. Currently one bedroom flats are being advertised for sale for £250,000. Shared ownership schemes do not really make this affordable charging massive rent and service charges on top of mortgage payments. We have three adult children none of whom, despite working, can afford to buy a home. 7. There is a need for more housing in this area, but I feel that more consideration should be given to providing family homes, with more local green space which will encourage families to come to the area to settle. Could has shown the need for people to have more access to outside space and this is not achieved by a balcony.	1. I think that skyline plans need to be redrawn from both Hollow Ponds and Wansford Flats to show the real impact and change to the surrounding area. 2. Consideration should be given to extending the consultation period to give local people more of a chance to discuss when covid restrictions are relaxed. 3. A realistic study of where and how new GP's will be recruited. 4. A realistic study of where, if necessary, additional school children will attend. 5. A realistic study of what is 'affordable', and there is no mention of ensuring that any new accommodation will be for local people and not investors buying to let. 7. Assurances that through analysis of the local housing requirements have been given. Flats will always be sought and accepted, but are quickly outgrown or not suitable for families. Green spaces are needed for all new developments, and currently Waltham Forest has one of the lowest acre/7,000 of population, and this proposed scheme does nothing to improve this.	Yes	I have lived in the area for over 25 years and feel that local input is more important to ensure effective longterm development. The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a split in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.	
Marjina Leewen				S419 - Tesco and adjoining sites - Leytonstone	No	No	No 1. The drawings do not give an indication of the impact on the local parkland, Hollow Ponds and Wansford Flats. In an area of climate crisis, which the council has officially acknowledged, it is a real step backwards to build a building highrise in this area that may have a real impact on these important green spaces. 2. The plan also suggests the removal of culturally significant buildings, failing the aim to safeguard cultural legacy. 3. The height of the suggested development (24 and 28 stories) is shocking for an area where they would not be in keeping, overpowering the skyline and potentially also local capacity. The height should be in proportion with the surroundings, not looming over them, max 2 stories above. 4. The plans do not set out requirements for green spaces integrated within the development. This is more important than ever to get air, light, and as I understand, a requirement within the climate and sustainability agenda. Green spaces are increasingly important for threatened birds and pollinators as well as offering people green spaces for improved wellbeing and mental health. 5. There is a real concern that the proposal for a vast number small rental flats will alter the demographic from what people appreciate this area in the first place, an area for young families to settle with kids. Especially the Browning Road conservation area with its village appeal may be lost, which is tragic.	I am not a legal expert and this process is already very complicated for a 'normal' local resident to grasp, so I cannot really say too much about what changes are needed for legal compliance. I would suggest the council reflects on all points and my wish is to give particular consideration for climate and environmental sustainability for the future. I am not against a residential block on the Tesco site, it is the sheer size that is suggested that is disturbing and would be a real shame for residents here, and likely the impact on the nearby Epping Forest, which would be heavily impacted, not only visually but also due to an increase in footfall, lighting, and possible decline in safety.	No	The HBA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. In April 2020, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is a new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.	
Rachel Britton				S419 - Tesco and adjoining sites - Leytonstone	No	No	No detailed evidence of the skyline plan has been produced, not any reference to the impact this will have on the natural area or the historic buildings e.g. St John's church of such high rise buildings have been produced. There also appears to be no reference to the added pollution that will be created within the town centre by so many more dwellings being built by people who will use cars. Congestion and pollution are already incredibly high in the area.	re legally compliant The document should be online for the whole period of consultation and clearly accessible re soundness: 1. These buildings should be excluded from development site. 2. The height of the buildings should be limited to the height of a maximum of 2 storeys higher than the neighbouring buildings. 3. The amount of open space should be recorded as a requirement rather than a guideline. A balcony should not be the only outdoor space available for residents of higher buildings. 4. A requirement for affordable housing on the site should be set. The housing stock should be above the ward.	No	Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newness of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
Sarah Ribben				S419 - Tesco and adjoining sites - Leytonstone	No	No	No Response Reason: The online document for the physical infrastructure has been difficult to find despite me emailing the error on the 20th December 2023, it would appear that the website has different document access depending on links. The document should be online for the whole period of consultation. The timing of the consultation at Christmas was at least 2 other consultations that were held in the part of the plan and open consultation. (The date has subsequently been deferred by 2 weeks now, it is not ideal because it is not justified or effective for the following points. 1. The site plan allows for the removal of a 17th century building locally listed, a row of Victorian houses with shops below and a locally listed church in focus for a local theatre group and other social groups). So far the aim to carry forward a cultural legacy and witness a physical history from the high road. These buildings should be excluded from development site. 2. The height of the two towers maximum 28 and 24 storeys. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The skyline studies do not include more distant views in particular the local open green areas of Bowwood and Wansford Flats part of Epping Forest which are towers. Nor is there any recognition that that area of Leytonstone is 30 metres above sea level with the Wansford Flats part of Epping Forest is at 20 metres. This will not be enhancing the natural environment. The height of the buildings should be limited to the height of a maximum of 2 storeys higher than the neighbouring buildings. 3. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provisions (0.44ha/2000 people) of open green space already and such developments will further dilute the provision widely	re legally compliant The document should be online for the whole period of consultation and clearly accessible re soundness: 1. These buildings should be excluded from development site. 2. The height of the buildings should be limited to the height of a maximum of 2 storeys higher than the neighbouring buildings. 3. The amount of open space should be recorded as a requirement rather than a guideline. A balcony should not be the only outdoor space available for residents of higher buildings. 4. A requirement for affordable housing on the site should be set. The housing stock should be above the ward.	No	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
John Mallinder				S419 - Tecco and adjoining sites, Leytonstone	No	No	No Response Is the plan legally compliant? No. Reasons: 1. The skyline documents do not provide a view from the adjacent green spaces i.e. the Hollow ponds and Wainstead Flats. 2. There is insufficient detail as to the level of car produced pollution these residents will be exposed to from the adjoining A12. This then goes against the 'Creating a Healthy City' section of the London Plan. Is the plan sound? No. Reasons: It is not sound because it is not justified or effective for the following points: 1. The site plan allows for the removal of a 37th century building locally listed, a row of Victorian houses with shops below and a locally listed church (a focus for a local theatre group and other social groups). So fails the aim to carry forward a cultural legacy and expose a physical history from the high road. 2. The height of the two towers maximum 28 and 24 stories. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The skyline studies do not include more distant view in particular the local open green areas of Bowwood and Wainstead Flats part of Epping Forest which are lower. Nor is there any recognition that the area of Leytonstone is 30 metres above sea level while the wainstead flats part of Epping Forest is at 20 meters. This will not be enhancing the natural environment. In addition the statement "The centre of the site has been identified as appropriate for two tall buildings of 18- to 24 stories and 18- to 28 stories (this study sees 24- and 28 stories) creating a landmark on the Leytonstone Town Centre skyline and a further definition of the town centre of central Essex." The plan is not legally compliant as the skyline documents do not provide a view from the adjacent green spaces i.e. the Hollow ponds and Wainstead Flats. A skyline drawing should be done for the Leytonstone sites to show the effect on both these parklands. The plan is not sound because it is not justified or effective for the following points: 1. The site plan allows for the removal of a 37th century building locally listed, a row of Victorian houses with shops below and a locally listed church (a focus for a local theatre group and other social groups). So fails the aim to carry forward a cultural legacy and expose a physical history from the high road. These buildings should be excluded from development site. 2. The height of the two towers maximum 28 and 24 stories. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The skyline studies do not include more distant view in particular the local open green areas of Bowwood and Wainstead Flats part of Epping Forest which are lower. Nor is there any recognition that the area of Leytonstone is 30 metres above sea level while the wainstead flats part of Epping Forest is at 20 meters. This will not be enhancing the natural environment. This will not provide a "better sense of arrival" into the area, how does a high block of flats say anything about an area apart from this not a nice place to be? 3. The height of the buildings should be limited to the height of a maximum of 2 stories higher than the neighbouring buildings. 4. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provisions (0.41ha/1000 people) of open green space already and such developments will further reduce the provision widely acknowledged as important for the health and wellbeing of people. 5. The amount of open space should be recorded as a requirement rather than a guideline. A balcony should not be the only outdoor space available for residents of the buildings. These sites also a response to both S419 Tecco and Adjoining Sites, S420 Metalan Leytonstone.	Legal compliance: 1. Please provide the above skyline views for the proposed development. 2. Please provide more detail as to the level of car produced pollution the new residents on this site will be exposed to. The Plan Sound. 1. The building mentioned above should be excluded from development. 2. The height of the buildings should be limited to the height of a maximum of 2 stories higher than the neighbouring buildings. 3. The amount of open space should be recorded as a requirement other than a guideline. A balcony should not be the only outdoor space available for residents of higher buildings. 4. A requirement for different housing on the site should be set. 5. The housing stock should be more varied.	Yes	I grew on Becontree Road and returned to live here once more after 20 years away and feel there are many things that can be done to improve the new residents on this site. Through the evidence published in the Character Interconsultation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of generally affordable homes, however intermediate housing can and will play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.	
Suzanne Welsh				S419 - Tecco and adjoining sites, Leytonstone	No	No	No Response Is the plan legally compliant as the skyline documents do not provide a view from the adjacent green spaces i.e. the Hollow ponds and Wainstead Flats. A skyline drawing should be done for the Leytonstone sites to show the effect on both these parklands. The plan is not sound because it is not justified or effective for the following points: 1. The site plan allows for the removal of a 37th century building locally listed, a row of Victorian houses with shops below and a locally listed church (a focus for a local theatre group and other social groups). So fails the aim to carry forward a cultural legacy and expose a physical history from the high road. These buildings should be excluded from development site. 2. The height of the two towers maximum 28 and 24 stories. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provisions (0.41ha/1000 people) of open green space already and such developments will further reduce the provision widely acknowledged as important for the health and wellbeing of people. 5. The amount of open space should be recorded as a requirement rather than a guideline. A balcony should not be the only outdoor space available for residents of the buildings. These sites also a response to both S419 Tecco and Adjoining Sites, S420 Metalan Leytonstone.	The plan is not legally compliant as the skyline documents do not provide a view from the adjacent green spaces i.e. the Hollow ponds and Wainstead Flats. A skyline drawing should be done for the Leytonstone sites to show the effect on both these parklands. The plan is not sound because it is not justified or effective for the following points: 1. The site plan allows for the removal of a 37th century building locally listed, a row of Victorian houses with shops below and a locally listed church (a focus for a local theatre group and other social groups). So fails the aim to carry forward a cultural legacy and expose a physical history from the high road. 2. The height of the two towers maximum 28 and 24 stories. Dominate the nationally listed Leytonstone House and the Browning Road conservation area. The skyline studies do not include more distant view in particular the local open green areas of Bowwood and Wainstead Flats part of Epping Forest which are lower. Nor is there any recognition that the area of Leytonstone is 30 metres above sea level while the wainstead flats part of Epping Forest is at 20 meters. This will not be enhancing the natural environment. This will not provide a "better sense of arrival" into the area, how does a high block of flats say anything about an area apart from this not a nice place to be? 3. The height of the buildings should be limited to the height of a maximum of 2 stories higher than the neighbouring buildings. 4. The plans do not set a requirement for open green spaces for residents in the developments nor public spaces near the buildings. Leytonstone ward has one of the lowest provisions (0.41ha/1000 people) of open green space already and such developments will further reduce the provision widely acknowledged as important for the health and wellbeing of people. 5. The amount of open space should be recorded as a requirement rather than a guideline. A balcony should not be the only outdoor space available for residents of the buildings. These sites also a response to both S419 Tecco and Adjoining Sites, S420 Metalan Leytonstone.	No	Through the evidence published in the Character Interconsultation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of generally affordable homes, however intermediate housing can and will play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.	
Fiona Sidiaci				S419 - Tecco and adjoining sites, Leytonstone	Yes	No	Yes General Comments I support development of the sites mentioned and support having a local plan so that development is a bit more planned and cohesive. I also appreciate the need for more housing in the area and understand the benefits that development can bring to an area in terms of investment. On the question of Soundness: Like many people I am concerned about the height of the buildings that are being talked about in the Skyline Study document. I feel that they are excessive for what LP1 categorises as a local centre such as Leytonstone and that their impact on the skyline, on the balance of types of household dwellings would outweigh any benefits the development might bring. The sites are very close to listed and heritage buildings and in particular St John's church next to the Metalan site which is central to Leytonstone life in terms of both location and community. The Tecco site is very close to conservation areas such as Bowwood Rd and given the height of this area any tall and taller buildings will also be visible from areas of Epping Forest such as Hollow ponds, views from here are not depicted in the document. The top down planning approach that takes a number of homes requirement against a 2025 both a period of change in between then and now) and then divides the allocation out over the sites available for development.		No	Through the evidence published in the Character Interconsultation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. This response is noted. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA). The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the Borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email post. As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 1 document is available to view in full online on Waltham Forest Council's website.	
Martina Leewen				S419 - Tecco and adjoining sites, Leytonstone	No	No	No Response 1. My big concern is the impact of this project on the nearby green spaces: Hollow Ponds and Wainstead Flats. I feel it is not compliant as it does not show the impact of a higher rise here visually and also in terms of the benefit on this valuable natural resource including wildlife. I question whether such an enormous height rise is in line with the current climate emergency. 2. The plan also appears to remove a number of historical locally listed buildings, which is contrary not in line with the aim of protecting the cultural legacy of the area. 3. I think the height of the suggested developments (24 and 28 stories) would dominate the Browning Rd conservation area and be out of keeping with the height of other buildings in the area, looking over the sky line. The height of the building should really be limited to 2 floors above others in the area. 4. I'm also concerned about the number of suggested homes and negative environmental impact of concentrated population increase on the nearby Epping Forest area. 5. The plans do not clearly set out green space requirements, when we know this is so important to give a green corridor to pollination, as well as spaces for people who benefit as well as research. Clearly points out Leytonstone ward already suffers from a low number of trees and green spaces. 6. There also appears to be a lack of variety of accommodation in these plans, with small flats dominating. There is concern that the number of flats planned, there may be a shift in the demographic of this family friendly area. A better balance of a mix of housing should be a requirement for this plan.	Ensure that there is a clearly set out green space requirement for these developments (before a site with the same size ground) below the slope / jobs of the high rise to be in keeping with the local area, rather than looming over it. Gather information on the impact of a development on the natural habitats of Hollow Ponds and Wainstead Flats area. Allow towers housing stock.	No	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA). In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. Through the evidence published in the Character Interconsultation Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Jake Green				S419 - Tesco and adjoining sites - Leytonstone	No	No	No	Tower blocks in the area are simply not the answer - it is a heavy handed approach to the housing crisis.	Maximum 3-4 story apartment blocks would be a good compromise.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Valli				S419 - Tesco and adjoining sites - Leytonstone	No	No	No	Developments should be appropriate to the area. The vast overcrowding of a small area will only result in more traffic in local roads and educational and healthcare service provision is not sustainable for such a proposed large population. The placement of this high rise and subsequent population is not compliant with the conservative style of housing Leytonstone is home to.  Developments should be scaled down and allow for ample amenities for residents as what value is there to our lovely Leytonstone if we spoil its tranquil urban nature.	High rises should be scaled down in height to ensure they do not exceed current high rise levels while ensuring that developments ensure ample provision for cycling, walking, cars, delivery vans.	No	Residents should be part of the modification process and should be present to review proposed to ensure concerns are adequately addressed as well as to add support for modifications which meet the needs of residents.	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.
Simon Abbott				S419 - Tesco and adjoining sites - Leytonstone	Yes	Yes	Yes	Special consideration needs to be made in consideration of the Macdonalds restaurant and how it is used by vehicles. It currently contributes significantly to congestion along the adjacent high street which is present for the majority of each day. Motorists by vehicles entering the car park from the high street waiting for an opportunity to enter and blocking the single lane high street traffic while waiting. This traffic always backs up and can frequently cause obstruction as far back as the Green Man roundabout.  Either create full roof ways of entering and exiting the car park without obstructing other traffic, or remove option of car use of Macdonalds completely - this would provide significant amount of additional development space for the plans.  Existing junction at Tesco car park entrance does not have a box junction classification and regularly results in car park gridlock with no way out from cars blocking exit. High usage consequences such as these need to be considered within new plans.		Yes	-	Proposed new development that would result in a change of access and egress from the site in both operational and construction phases will be subjected to a detailed study of the site to assess the current and projected traffic flows in the area. This will be taken into consideration as part of the pre-application and planning application process by the Council's Highways Department. Conditions will be placed on the planning application to make improvements to the highways and to that access/egress of the site when it is deemed necessary.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Elaine Burgess				S419 - Tesco and adjoining sites - Leytonstone				A mixture of houses (not just flats) is needed. There is a shortage of family houses in Leytonstone. This shortage has led to current house prices rising and being unaffordable to many young and not so young people/couples looking to start a family and/or to respond to the needs of their growing family. This prevents young families from living here and a more transient population here for a few years only and not staying to 'commute'. As much as flats are needed for people to get on the housing ladder, if there are only flats this can lead to a very mobile population that move in and out of the area to start a family. Communities need a good mixture of both types of accommodation.  Potential for height is not explained. Is this three or four stories or are we looking at heights similar to ones at Barkthorpe Road? I would be against anything over 3-4 stories high I wouldn't want to see large tower blocks dominating the area which 'sticks in' the space at ground level. Needs to be kept in keeping with the area and especially the historic Leytonstone House.  Affordable housing is not explained. Affordable for who, I hope people in 'normal' jobs currently unable to get on the housing ladder.		No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Rebecca Fanning				S439 - Tesco and adjoining sites - Leytonstone	Yes	No		The question of height suggests reverting back to the problems associated with John Drinkwater tower which blocked views of war-torn flats. Rather than building up, would encourage the plans to find an optimum level which do not encourage antisocial behaviour and continue access to a large local supermarket to avoid the need to drive to Woodford, Leyton or Stratford for large supermarkets.	Avoid height	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Location (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).  Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.
Julia Ingal				S439 - Tesco and adjoining sites - Leytonstone	No Response	No Response	No Response		Plan has no parking provision mentioned. This site is and would remain an important supermarket for the area therefore parking is vital if it is to be viable. Access to the site immediately from Green Man roundabout would ease traffic congestion in Leytonstone High Street making it an overall more attractive place to visit. Parking could be under the site.	No	-	The supermarket would need to be reproduced as part of any development that comes forward on this site that has an active frontage onto Leytonstone High Road.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Michael De La Lama				S439 - Tesco and adjoining sites - Leytonstone	No	No	No	You cannot demolish the Welsh church or the ancient "tenement". They are too architecturally important to lose and the character of the area will suffer and become faceless if they are lost.	You cannot demolish the Welsh church or the ancient "tenement". They are too architecturally important to lose and the character of the area will suffer and become faceless if they are lost.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  In Local Plan Part 1, Policy 72, Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these issues that would lead to either substantial harm or total loss of a designated heritage asset.
Margaret Walls				S439 - Tesco and adjoining sites - Leytonstone	No	No	No	It is unclear how people in the local area have been consulted about this development. No one else I spoke to on my street seems to know about this. I am therefore unsure as to what extent this major proposal is an inclusive consultation. How all communities been informed? The maps/plans provided are not clear enough for people to understand. Need to have more detail and 3D diagrams of this site and within Leytonstone including other proposed buildings so can see full impact.	Having lived in the area for 50 years I am very concerned about this proposal for many reasons. The proposal for high-rise flats in several locations around Leytonstone including this one shows lack of consideration of the impact on local residents who currently or are likely to live here. A 3D model showing all the proposed flats in situ in Leytonstone would show the more clearly and has not been provided here. I enjoy many walks in the local streets and the views of the city and other historic buildings. I am depressed to think that these flats are likely to block such views. Has anyone considered how the skyline will look? It is not clear how Tesco will be able to continue to operate without a car park. I am certainly unable to carry large items home and therefore need to be able to use my car for this which will be the case for most people. I also feel the lack of car park spaces will mean that the streets closest to Tesco will be used for parking for shopping and visitors to the flats therefore making it impossible for local residents to park, especially at the weekends and after 2:00pm when there are no restrictions. Peak times will become a nightmare. I believe some housing should be created but too many flats will mean more pressure on the infra structure and services. Without car park space residents of the local area will have to drive elsewhere to shop, further impacting the environment and leading to constant congestion. Will there even be enough NHS, school staff etc available to support increased numbers? Has this been considered in light of current shortages in services. Public transport will not be able to accommodate the proposed increased numbers - most flats are likely to have 2 extra commuters at peak hours. A realistic number of flats needs to be considered along side sufficient parking for customers so that everyone can continue to enjoy living in Leytonstone. Increased rents for many shop owners from private landlords has made it very difficult for small business to operate. Hopefully some affordable rental spaces could be created as part of the development eg restaurants or shops.	I would like to strongly oppose high-rise buildings in the area.	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online with Waltham Forest Council's website.
Karol Salschicki				S439 - Tesco and adjoining sites - Leytonstone	No Response	No	No	No definition of soundness has been provided. I assume the word is being used in a sense specific to local planning, but as there is no definition it is impossible for a member of the public to make a sensible comment. This should invalidate the consultation.  If you are being 'sound' in the sense of being designed to meet foreseeable local needs, I think the plans for the Tesco site are not sound. They appear to make little provision for car parking. It is unrealistic to expect people to carry their weekly food shopping home by public transport or cycle, in particular if they are shopping for a family, are older or have disabilities. I am in favour of encouraging car use where possible but I do not think the approach is sound in this case. If the site is redeveloped to provide a supermarket without car parking, people will just drive to supermarkets further away to do their main weekly shopping.	Ensure there is the same amount of car parking provided for the redeveloped supermarket as there is present. Of course the parking could be provided in a multi-storey car park.	Yes	-	This response is noted. Waltham Forest has an identified need to provide additional industrial floorspace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorspace, and the intensification of industrial provision is encouraged.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Liz Floyd				S419 - Tesco and adjoining sites Leytonstone	No Response	No	No	There has not been full and proper consultation with the local community and the wording in this survey seems to be designed to alienate people who might want to contribute.	Full and meaningful consultation with the local community about the development proposals in the Local Plan, detailed and clearly labelled articles/implications showing the proposed structure and open spaces; provide detail about what infrastructure will be provided to service the proposed new homes, and in particular NHS health services. Any new housing should be truly affordable housing at Council rent levels to ensure that families are able to afford to stay in the area. Given the health risks posed by tower blocks, and the loss of light to adjoining homes and schools, the new builds should not exceed 4 stories.		Because I am an interested resident	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. Rachel Britton				SA20 - Matalan Leytonstone	No	No	No	No detailed evidence of the skyline plan has been produced, not any reference to the impact this will have on the natural area or the historic buildings, e.g. St John's church of such high rise buildings have been produced. There also appears to be no reference to the added pollution that will be created within the town centre by so many more dwellings being built by people who will use cars. Congestion and pollution are already incredibly high in the area.			-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use classes that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow retail units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontages and having residents located within the borough's centres, ensuring that most people's daily needs can be met within a close proximity to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support our high street and town centre use that may emerge in the future to help maintain their vitality and distinction.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Sophi Ritten				SA20 - Matalan Leytonstone	No	No	No	The website has been challenging to access documents presumably because there have been technical changes to it. The physical infra structure papers have been unavailable for part of the duration of consultation. A full 4 weeks should be made available to access documents. It is not sound because it is not justified or effective for the following reasons: 1. The draft skyline document indicates two taller buildings, only one is visible on the document for consultation. It is therefore not clear what is being allowed. The plans should be clear about the building heights that would be necessary to achieve the housing requirement of the council. 2. This site is topographically higher than the nearby parts of Epping Forest and no skyline studies are available from that view point to judge impact on the nationally important open green space in the adjoining borough. A skyline study should be done. Leytonstone ward has a density of 305 people per hectare and the 4 sites identified in the Leytonstone centre in the form of high-rise flats will increase the density by 332 or 39 people per hectare depending on the flat sizes. Indeed, the adjoining wards all have densities ranging between 126 to 359 people per hectare and are earmarked for further densification Waltham Forest LDF Core Strategy - Proposed Submission Page 42 58. Removing to Wf require 3 or more bedroom. 72.2% of demand require 2 or more bedrooms. 23.3% of existing households are overcrowded (national avg. 3%) This site has already had a development of 50 one bed flats and three 2 bed flats.	A full 4 weeks should be made available to access documents. The plans should be clear about the building heights that would be necessary to achieve the housing requirement of the council. A skyline study should be done regarding proposal to green spaces especially taking into account of the topography. The local authority should not be used as a throughfare or alternative garden for the proposed development. This view should be protected.		-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Hilary Douce				S420 - Matlani Leytonstone	No Response	No	No	I have looked at comments made on the draft plan and people were concerned about height and density, yet this pertains here in this plan. I have no problem with the site being used for additional housing but the density means that the dwellings will be both high and small to maximise floors. The forward of the "Shaping the Borough" document states that people come here to raise families. The result of this plan will be small units that are unsuitable for children and families. People have to have experiences to find affordable family housing and this plan will not help people to remain settled in the borough. Small units mean that people grow up of them and they do not facilitate a stable community with ownership of the place you live. The heights that look likely, will not only impact on the views from the High Road but also impact upon the green spaces that we really value; Wansford Flats & Hollow Ponds. Actual houses or good family sized low floor flats would be great in this area - but NOT high rise where no one would choose to bring up children. There is a shortage of family housing and an oversupply of flats with nothing in between. This does not make family housing affordable and causes the risk of people being trapped in unsuitable accommodation for a long time. The transport, health, school, daycare infrastructure is already under strain. The level of density proposed will not help this.	Low level housing that does not impact on the skyline. Houses or flats with green spaces large enough to accommodate families.	Yes	It would be good to have say as I feel strongly about the proposal.	<p>Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA).</p>
-				S420 - Matlani Leytonstone	No Response	No	No	The introduction of enormous overbearing towerblocks, combined with the already lesser green space in this part of the borough would equate to a degradation of quality of life and the absolute elimination of the cherished and cherished old settings of many existing valuable assets, such as St John's Church, Epping Forest, Hollow Ponds, and Brewhar Road Conservation Area. Where will all the people living in the flats go for outdoor leisure? What additional health services will they access? It is also completely unrealistic that new homes would attract at least 50% of the car value in additional vehicles on the already depleted roads (additional vehicles). Currently amongst the many bus routes, Leytonstone High Rd, where all of this development branches from, features ONE singular bus route that remains within the borough (D7), meaning that many residents are unlikely to remain in the borough when spending their money on shopping, leisure and further adding doubt upon the real need spending LDFP Council is chasing. There is also a huge assumption that all new residents are able to undertake their professional occupation from a workspace, can care workers or need nurses do this, of course not. This is greenwashing at its worst and the impact to the elderly and less privileged appears completely disregarded.	Much increased realistic engagement efforts, whereby internet access and self navigation is not the concentrated consulting focus methodology. A far greater impartiality applied, rather than the current single minded outlook demonstrated by LDFP Council to create a homogenous village environment, devoid of family and family friendly transport options, which result in the risk of the existing cultural and architectural diversity and capital city environment enjoyed by residents, being made extinct by it thought out and non inclusive strategy.	-	<p>Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>Waltham Forest a wide range of measures are being implemented to promote road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p> <p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p>	
Tony Penhigon				S420 - Matlani Leytonstone	No Response	No Response	No Response	It is unclear as to the height of the proposed tower block. Anything over 6 stories would, in my view, significantly impact on adjacent neighborhoods. The number of homes proposed on the site, coupled with building proposals in other sites would significantly affect the local infrastructure, in particular increasing demand on already overburdened transport, health, social care and education services. This borough needs more affordable family homes. I am not convinced of the case for a large expansion of 1 and 2 bedroom apartments which would cause isolated families.	A greater emphasis should be placed on building affordable family homes.	-	<p>Through the evidence published in the Character Interference Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. Marin Mitchell				S420 - Matlani Leytonstone	No Response	No	No Response	I have no specific comments on the legality of the local plan in respect of this proposed development site. However I consider that the proposal is contrary due to the scale of the proposed development. Its proposed scale and height will have a negative impact on Leytonstone town centre including the historic St John's church which is the focal point of the town centre. I am also concerned at the potential loss of commercial and retail spaces and thus material loss in business cases income due to the council and the Mayor for key local and strategic services such as transport which will be offset by the extra raised in council tax by the proposed new residential development. The height potentially being considered would obstruct views of the historic St John's church which is a key landmark. There would also be the loss of parking spaces which would have equal implications as it would make the town centre more difficult to access for families, elderly and disabled residents locally. There will also be significant disruption to the town centre while any redevelopment work is undertaken which would be to the detriment of existing residents and businesses.	I oppose the proposed development at the current Matlani site given its proposed height and scale. It is not a suitable location given its proximity to the historic St John's church site and may lead to significant losses in revenues to the council in business sites in a key town centre commercial location. A smaller development commensurate with the existing surrounding residential developments such as Kirkdale House, Robert House and Nexus Court might be more acceptable but would still potentially raise similar challenges and issues.	-	<p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. If yes, please explain why?	Council's response
Malgorzata 1				S420 - Matellan Leytonstone	No Response	No	No Response	The proposed use of the new development will have a significant negative impact on the current character of the area. Any new apartments will block out light on the existing open community space of the church yard and for directly neighbouring residential block Nexus Court. The existing car park provides access for many customers from the surrounding area to the local, independent owned businesses on the high street. Removing this will threaten the closure of small businesses.	The maximum number of stores should not be more than four to maintain the character of the local area. The total number of new flats on the proposed land should not be more than 30 to match the nearby Nexus Court and Robert House.		-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2025).</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Elisabeth Nicholson				S420 - Matellan Leytonstone	No Response	No	No Response	It would be nice to see this area redeveloped but 150 homes is excessive. Where will people in these homes park? High Rise buildings will make the area feel more enclosed and impact views.	Keep it commercial redevelopment. Not high rise. Keep parking.	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Characterisation and Identification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Liz Floyd				S420 - Matellan Leytonstone	No Response	No	No	There has not been full consultation with the local community. The drawing shows an area where there is potential for height, but does not specify how high, which has led to speculation over tower blocks. Any new housing should be Council rent levels and truly affordable.	Detailed plans, including artists' impressions, should be published. A rationale for building tower blocks should be produced, with evidence. Any new dwellings should be available at Council rent levels. New home building must be matched by infrastructure planning and plans for new services, such as health services.	No	Because I am an interested resident	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>Through the evidence published in the Characterisation and Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.</p> <p>The allocations require affordable housing in line with the policy approach set out in Local Plan 1.</p>
Barnikel Robert				S420 - Matellan Leytonstone	No	No	No	I think this will add to the traffic problems we already have around here, an extra 150 dwellings will cause chaos. Traffic already grids to a halt on the one way system	There will be a big inconvenience to the area if building starts, as the demolition process then the building operations needs shops and houses. The BRM site is better suited	Yes	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes towards encouraging walking, cycling and public transport use, planning applications for all new development must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
-				S420 - Matlahan Leytonstone	No	No	No	Businesses should be encouraged to keep the town centre alive not to be closed down for more housing where we want have the infrastructure to support more people. We need doctors and dentists and facilities before more new homes.	Before allowing new homes we need to see a plan to keep the town centre thriving. The council need to manage greedy landlords selling off shops for homes and any new homes built by housing companies should have to also provide facilities for doctors, dentists, child care, community centres and shops.	No	-	<p>The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use classes that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow retail units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontages and having residents located within the borough's centre, ensuring that most peoples daily needs can be met within a close to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.</p> <p>The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>

Maigrout 1				SA20 - Matlani Leytonstone	No	Response	No	No	The size of the proposed development will have a very negative impact on the neighbourhood and its character. Any new apartments will block out light to the existing open community space of the church yard and for directly neighbouring residential block Nexus Court. The existing car park is a private access for many customers from the surrounding area to the local, independent owned businesses on the high street. Removing this will threaten the closure of small businesses.	Any new development should be limited to max 4 storey and no more than 10 flats to match the nearby Nexus Court and Robert House.	-	-	This response is noted.
-				SA20 - Matlani Leytonstone	No	Response	No	No	Any new apartments will block out light on the existing open community space of the church yard and for directly neighbouring residential block Nexus Court.  The commercial unit in place currently as Matlani is well patronised by many local residents and also draws in many people in the immediate area and from further away. The local demographics of many young families, particularly rely on the convenience of quick and cheap baby and children's sections.  The existing car park is a prime location that provides access for many customers from the surrounding area to the local, independent owned businesses on the high street. Removing this will threaten the closure of small businesses.  The existing road layout of the one way system through the high road already causes several points of congestion all throughout the week, additional properties will mean any and all additional traffic through the area in relation to these flats including residents and visitors.  The amenity boundary that is marked are parking bays for Nexus Court residents and a right of access way. These would need to be maintained, with acceptable manoeuvrability space to actually park in those bays.  With Nexus Court residential block so close to building site and many residents working from home, the build would be required to not exceed legal and tolerable noise levels to inflict on Nexus Court residents, particularly whilst working.	My main alternative proposal is that the focus should be on the other sites proposed for redevelopment, as they are better suited for already being in larger open spaces with far less impact on an already struggling part of the High Road and congested area/directly adjacent to an existing residential block, but if proceeding on this site then the following should be considered:  The negative impact on the local community and small businesses needs to be addressed in full consultation at an open meeting. Plans need to be shared in conjunction with Council presented plans for infrastructure considerations and maintaining services in the area. This needs to cover the points on Traffic and road layout (needs significant rethink about redirecting roads), accessibility to businesses on the High Road (via commercial car park spaces), removal of the matlani commercial unit.  The noise levels on the build work need to be dampened in some way to not damage hearing of local residents and be taken place outside of office hours and night time hours.  Plans should be adapted to ensure building height does not exceed a level that would obstruct light on considered areas mentioned above.  Plans should be adapted to ensure that no infringement on the existing right of access ways for the Nexus Court private residents parking bays and appropriate clearance allowed for manoeuvre, given the angles of the spaces.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy, loss of daylight/sunlight and noise.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre developments that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough and maintain vitality in our distinctive high streets and town centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/indoorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
Justin Locke				SA20 - Matlani Leytonstone	No	Response	No	No	Section 24 of the Planning and Compulsory Purchase Act 2004 requires that local development documents must be in general conformity with the spatial development strategy (like the London Plan).  Policy D3.1 of the London Plan deals with London form, character and capacity for growth, paragraph 3.1.2 concerns understanding the existing character and context of an area. My concern with this aspect of the plan is that it envisages 150 metres, and the plan indicates a location where there is 'potential for height'.  A high-rise building in the location and context of the Matlani site is not consistent with the character of the area, which does not include any tall buildings, except for the church. Such a building has the potential to 'loom' over the area and will have undue prominence in such a central location, as well as competing with the view of central Lambeth down the High Road and from Westfield Flats (where the church is clearly visible). By contrast, the adjacent Nexus Court is a medium-rise building, next to which a high-rise building would be out of character. Accordingly, this aspect of the plan is not in general conformity with the London Plan.	To achieve general conformity with the London Plan, this aspect of the plan should be modified so as to remove the 'potential for height'.	-	Assuming no other respondents make the same points as me I would want to make my arguments in person.	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Fiona Sinclair				SA20 - Matlani Leytonstone	Yes	No	Yes	No	Please take this as a response to both SA19 Tesco and Adjoning Site, SA20 Matlani Leytonstone. General Comments I support development of the sites mentioned and support having a local plan so that development is a bit more planned and cohesive. I also appreciate the need for more housing in the area and understand the benefits that development can bring to an area in terms of investment. On the question of Soundness: Like many people I am concerned about the height of the buildings that are being talked about in the Skyline Study document. I feel that they are excessive for what LPA categorises as a local centre such as Leytonstone and that their impact on the skyline, on the balance of types of household dwellings would outweigh any benefits the development might bring. The sites are very close to listed and heritage buildings and in particular St John's Church next to the Matlani site which is central to Leytonstone life in terms of both location and community. The Tesco site is very close to conservation areas such as Browning Rd and given the height of this area any tall and taller buildings will also be visible from areas of Epping Forest such as hollow ponds, views from here are not depicted in the document. The top down planning approach that takes a number of elements of terms requirement contained in 2019 (with such a period of change in between them and now) and then divides the allocation over the sites available does not feel to be a 'Character or' design led approach and I feel it is likely to lead to plans only coming forward for tall buildings containing small flats and not bring forward plans that deliver a good mix of housing in such different needs. It has not been made clear how it has been decided that a centre such as Leytonstone has moved from being designated as a 'Local Centre in LPA including a site indicated for 'transformational development' the Skyline document does not show the impact of tall and taller buildings from the viewpoint of Epping Forest and I feel it may be more to not be a good indicator of the impact of the other potential buildings of height. In terms of Green space I feel that green/open spaces should not be only in the form of balconies, space offset elsewhere in the borough or through signposting		Yes	-	This response is noted.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduce the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active heritage and having residents located within the borough's centre, ensuring that most people daily needs can be met within a closely to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and destination.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (S SAC).  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of uses. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.  All new development will need to provide an appropriate amount of well-designed, suitably located and usable private and community amenity space.  As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online on Waltham Forest Council's website.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.

Johnny Worthington				S420 - Matlain Leytonstone	No	No	No	<p>First, this site would be better served by shops than flats. This area of the high street is very popular with shoppers. B&amp;M would be better suited for this type of plan.</p> <p>Second, the proposed building will lead to a big increase in traffic, in an already congested area.</p> <p>Third, the proposed building will lead to an increase in the demand for visitors permits. Parking in residents bays in Lennie Road and Kirkdale Road is already extremely difficult due to a lack of supply.</p> <p>Fourth, there will be a huge increase in noise for the duration of the demolition and rebuild. This will be difficult for local residents, pedestrians and shop keepers.</p> <p>Fifth, the height of the proposed building will affect sunlight on nearby areas including the church yard.</p>	Modify Matlain into smaller shops. Any new building should be no higher than four storeys.			<p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>

No

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				S420 - Matlaton Leytonstone	No	No	No	Why are you taking away all our retail shops we have a poor range of shops in Leytonstone. You are taking away Matlaton and B&M SO WHAT ARE YOU LEAVING IN WITH CHOCORIS SHOPS BETTING OFFICES AND WALBAYS FIS BUILD SOMWHERE ELSE	Build flats where the town hall is		-	The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use classes that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow retail units in Designated Centres to be converted to residential use at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active forecourt and having residents located within the borough's centre ensuring that most people's daily needs can be met within a close to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses than may emerge in the future to help maintain their vitality and distinction.
Flavia Abela				S420 - Matlaton Leytonstone	No	No	No	Any tall building will spoil the little village feel that is left of this area and obstruct the Church tower which is currently visible from a 360-degree radius.  Any new apartments will also block out light on the existing open community space of the church yard and for directly neighbouring residential block Nexus Court.  The commercial unit in place currently at Matlaton is well patronised by many local residents and also draws in many people in the immediate area and from further away. The local demographics of mainly young families particularly rely on the convenience of quick and cheap baby and children's sections.  The Church, Matlaton and the residents at Nexus Court have a long-standing agreement / relationship and often work together for the H&C of the people who live and work around the car park ensuring it is clean and well lit.  The existing car park is in a prime location that provides access for many customers from the surrounding areas to the local, independent owned businesses on the high street. Removing this will threaten the closure of small businesses.  The existing road layout of the one-way system through the high road already causes several points of congestion all throughout the week, additional properties will mean any and all additional traffic through the area in relation to these flats including residents and visitors.	I propose that the focus should be on other sites proposed for redevelopment, as they are better suited for already being in larger open spaces with far less impact on an already struggling High Road and congested area directly adjacent to an existing residential block, but if proceeding on this site then the following should be considered:  The negative impact on the local community and small businesses needs to be addressed in full consultation at an open meeting. Plans need to be shared in conjunction with Council presented plans for infrastructure considerations and maintaining services in the area. This needs to cover the points on Traffic and road layout (need's significant rethink about pedestrian routes, accessibility to the high road (as commercial car park space), removal of the Matlaton commercial unit.  Regarding the noise levels: Many residents now work from home, have long term stress or are elderly and do not work. Any building or converting the Matlaton into a Supermarket will mean noise throughout the day and throughout the night as they have to do deliveries. This will impact all the residents in Robert House, surrounding houses, particularly Nexus Court.  As for the building work this will need to be dampened in some way to not damage hearing of local residents and be taken place outside of office hours and night time hours.  Plans should be adapted to ensure building height does not exceed any level that would obstruct light.  An considered areas mentioned above.  Also having more residents in such close proximity will raise noise levels and rubbish too.	Yes	As a resident of many years in this area, home owner who works from home and takes care of an elderly resident very integrated in the local community it would be important to be included in all ongoing discussions	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy, loss of daylight/sunlight and noise.  Through the evidence published in the Character Identification Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Melinda Briggs				S420 - Matlaton Leytonstone	No	No	No	The possibility for height site will block the natural light to the block of flats adjacent to the Matlaton carpark.	None should be considered as the area is designated as an open space.	Yes	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Barnial Robert				S420 - Matstall Leytonstone	No	No	No	I live in Nexus Court, which are the flats in the car park already. The disruption caused by the demolition of matstalls and the construction of new houses would be a nightmare. We already have a shortage of parking here, due to us buying any car using matstall car park, where would all the vehicles park belonging to these new places? A better site would be B&M. We need matstall here it brings a lot of people to the area. Plus it will block out our view		No	-	As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Fawa Abela				S420 - Matstall Leytonstone	No	No	No	Any tall building will spoil the little village feel that is left of this area and diminish the Church tower which is currently visible from a 360 degree radius. Any new apartments will also block out light on the existing open community spaces of the church yard and for directly neighbouring residential block Nexus Court. The commercial unit in place currently as Matstall is well patronised by many local residents and also draws in many people in the immediate area and from further away. The local demographics of mainly young families, particularly rely on the convenience of quick and cheap baby and children's necessities. The Church, Matstall and the residents at Nexus Court have a long standing agreement / relationship and often work together for the H&S of the people who live and work around the car park ensuring it is clean and well lit. The existing car park is in a prime location that provides access for many customers from the surrounding areas to the local, independent owned businesses on the high street. Removing this will threaten the closure of small businesses. The existing road layout of the one-way system through the high road already causes several points of congestion all throughout the week, additional properties will mean any and all additional traffic through the area in relation to these flats including residents and visitors. This location is bounded by the 100m road on one side for Nexus Court. You haven't provided any detail or an artists impression of the proposed new scheme. The existing pedestrian access is presumably unchanged. Other than a cycle park how is this supposed to benefit cyclists? Where are the amenities for new residents? How many homes will be genuinely affordable? New skyscrapers are a dreadful idea, you have just spent two decades tearing down all existing local ones, why is building new ones going to work? They are an eyesore.	I propose that the focus should be on other sites proposed for redevelopment as they are better suited for already being in larger open spaces with far less impact on an already straggling High Road and congested area directly adjacent to an existing residential block, but if proceeding on this site then the following should be considered: The negative impact on the local community and small businesses needs to be addressed in full consultation at an open meeting. Plans need to be shared in conjunction with Council presented plans for infrastructure considerations and maintaining services in the area. This needs to cover the points on Traffic and road layout (needs significant rethink about redirecting roads), accessibility to the High Road (via commercial car park space), removal of the Matstall commercial unit. Regarding the noise levels: Many residents now work from home, have long term illness or are elderly and do not work. Any building or converting the Matstall into a Supermarket will mean noise throughout the day and throughout the night as they have to do deliveries. This will impact all the residents in Robert House, surrounding houses particularly Nexus Court. As for the building work this will need to be dampened in some way to not damage hearing of local residents and be taken place outside of office hours and night time hours. Plans should be adapted to ensure building height does not exceed any level that would obstruct light. See considered areas mentioned above. Also having more residents in such close proximity will raise noise levels and rubbish too.	Yes	As a resident of many years in this area, home owner who works from home and takes care of an elderly resident very integrated in the local community it would be important to be included in forthcoming discussions	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Margaret Walks				S420 - Malpas Leytonstone	No	No	No	It is unclear how people in the local area have been consulted about this development. No one else I spoke to on my street seems to know about this, I am therefore unsure to what extent this major proposal is an inclusive consultation. How all communities been informed? The maps/plans provided are not clear enough for people to understand. Need to have more detail and 3D diagrams of this site and within Leytonstone including other proposed buildings so can see full impact.	Similar height to surrounding buildings. Not blocking area close to church. Providing sufficient car park space for residents and visitors so that it does not impact on other nearby streets.		I would like to strongly oppose high-rise buildings in the area.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  As set out in the Council's Statement of Community Involvement, Local Plan consultations are still accepted by email and post. The Local Plan 2 document is available to view in full online on Waltham Forest Council's website.
Michael Kelly				S420 - Malpas Leytonstone	No	No	No	This local plan has not been communicated to the local community. After consulting many of my neighbours it became clear they had no awareness or knowledge of these building proposals. Therefore these plans do not provide local stakeholders the opportunity to have any input into these developments. Therefore, failing to do the necessary consultation of local stakeholders who are going to potentially be impacted. This process needs to be better communicated to stakeholders and the consultation period extended.	Limited to the same height as existing building. A variety of home and different kinds of housing. Also reuse of commercial for residential. Where are the impact studies on how this will impact on Leytonstone village high street. Where are these residents going to park their cars. This is bound to create more pollution and cars on local roads. Congestion in area and therefore producing more environmental damage. Need a range of different variety of housing. Should be terraced family houses as well as 2-3 storey developments. The proposal to build a large number of dwellings needs to include planning for retail and also green space.	Yes	As a local resident I would like to participate and be consulted to ensure any local development projects include my input and that developments are not undertaken without enabling local residents to participate in the development of our local community	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Elaine Burgess				S420 - Matikan Leytonstone	No Response	No	No Response		The following statements should be stronger and read: Proposals should not impact negatively on the adjacent listed buildings, including any potential impact on settings or views, in particular the Grade I Listed St John's Church, Leytonstone. Proposals should provide opportunities for urban greening, tree planting and provision of open space. Potential for height risk explained. Would need to be no higher than 3 stories so as not to dominate the lovely St John's Church and so not 'hem it in' or dominate the high street. Housing needs to be a mixture of family houses and flats to create a longstanding community feel not a transient flat population that move on to find family homes out of Leytonstone due to their shortage here. Diversity is an issue, given COVID we all need more space in our flats/houses to accommodate working from home and more outdoor space/balconies.		No	-	This response is noted.
-				S420 - Matikan Leytonstone	No	No	No Response	This plan contravenes the 'Creating A Healthy City' section of the London Plan. The site is right next to a congested part of the high street which regularly exceed safe pollution levels. Not only would the residents of these new homes be exposed to harmful air quality, but if the plan is to build up then this would cause a 'canyon' effect on the already narrow high street, further trapping in pollution and affecting pedestrians.	The congestion / air pollution on the high street would need to be brought down to safe levels before new housing and/or high rise buildings can be developed on this site.	No	-	This response is noted.	
Eve Edworthy				S420 - Matikan Leytonstone	Yes	No	-		I think it's a great mistake to allow tower blocks in any development in Waltham Forest. We need to remove almost all the tower blocks, many years ago, because of the problems, both structural and social that they caused. I don't think you should identify areas as "potential for height" as then you will have only weak grounds to object to any monstrously a developer would wish to build. I would want all those yellow stars removed.	No	-	This response is noted.	
Jake Green				S420 - Matikan Leytonstone	No	No	No			No	-	This response is noted.

Vibhuti Misra				S421 - Avenue Road Estate and Thorne Close	No	No	No	It would overlook local school, block light and be obtrusive to the skyline in regards to safeguarding, people would be able to look into the school playground, also during building works, this would cause noise and dust pollution during building works	2/3 levels building	-		Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of day/light/night.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Mr Alexander Paragon				SA22 - Cathall Leisure Centre, The Epitome Community Centre, Jubilee Centre	No	No	No	No where on this page do you explain (or link to) a definition or outline of what legally compliant or sound would be in this context. As such this consultation is impossible to respond to as a lay member of the public, thus rendering the consultation unsound. As there is a legal requirement to carry out a consultation which the public could reasonably be expected to be able to participate in - which this fails to do - the plan can not be legally compliant - nor can it meet a basic duty to co-operate.	Please give us the criteria of legal compliance and soundness which we can then use to meaningfully take part in this consultation. The lack of this information makes participation impossible for the average person.		-	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: •Research/ fact finding, the choices made in the plan are backed up by facts. •Evidence of participation of the local community and others having a stake in the area; and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: •Sound infrastructure delivery planning; •Having no regulatory or national planning barriers to delivery; •Delivery partners who are signed up to it; and •Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. •The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPB should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Sally Bitten				SA22 - Cathall Leisure Centre, The Epitome Community Centre, Jubilee Centre	No Response	No	No Response	The plan is not sound because it is not effective in guaranteeing a replacement swimming pool. The area has a younger demographic and poorer population compared to other parts of the borough and decent facilities for young people and employment is greatly needed. The older population also benefit from this pool and especially since the hospital no longer offers a hydrotherapy pool. The plan is not justified as the swimming pool has been only recently refurbished, it is not sustainable to keep knocking down buildings.	The wording should be revised to specify the need to retain the swimming pool.	No	-	<del>This Duty to Cooperate which is demonstrated by the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to ensure the effectiveness of the Local Plan Document, better and</del> The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
Tony Pamphill				SA22 - Cathall Leisure Centre, The Epitome Community Centre, Jubilee Centre	No Response	No	No Response	The leisure centre and swimming pool is a well used community asset. There is no indication as to whether a swimming pool of a similar size would be included in any new plans.		No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Erik Edworthy				SA22 - Cathall Leisure Centre, The Epitome Community Centre, Jubilee Centre	Yes	No	No		I think it's a great mistake to allow tower blocks in any development in Waltham Forest. We had to remove almost all the tower blocks, many years ago, because of the problems, both structural and social that they caused. (I don't think you should identify areas as "potential for height" as then you will have only weak grounds to object to any monstrosity a developer would wish to build. I would want all those yellow stars removed.		-	This response is noted.
Charles Thorne				SA23 - B&M and Adjoining sites	No Response	No	No Response	My only comment is that the redeveloped site MUST provide a similar retail store as existing plus adequate carparking, the current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc, but small shops that already exist elsewhere in a high street but also parking to enable taking their bulky shopping home by car- this cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high wear/tear-like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantras of providing high density housing at all costs on every development site.	Address the issues raised above	No	-	The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure is identified in the Infrastructure Delivery Plan (IDP) can be secured. The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Cassandra Toller				S423 - B&M and Adjoining sites	Yes	Yes	Yes		#VALUE!		-	-	This response is noted.
Laura Thomson				S424 - Northington Road Sites	Yes	No	Yes		I believe the application for the Northington Road is unsound on the basis that it is not justified. Adding 150 new homes to a very small site would mean increasing the traffic in the area and increasing pollution at a time when we want to reduce our environmental impact. The planning application put forward by the developer does not have space allocated for parking so it is unclear where residents would park other than on existing roads which would not have capacity. Given the increase in housing in the area this should also be matched by increased public facilities e.g. surgeries, and schools.	Fewer homes for the space provided to reduce knock on environmental impact. Additional public facilities to serve this and the wider local community.	-	I would like to confirm compliance with the Reg10 prices	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Walkways, Footpaths and Recycling guidance for the developer sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
-				S424 - Northington Road Sites	No	No	No		Too many residents and pollution	Give a green space	Yes	-	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. 				S424 - Northington Road Sites	No Response	No	No			-	-	This response is noted.
				S425 - Walthamstow Central Bus Station	No	No	No	No one asked for the council to do this development. It was not contained in any manifesto and is therefore a decision made by the council without prior mandate.	Scrap current plans and get councillor's to set it out to voters in the next set of council elections. Give residents a referendum on the plans rather than placing it into a consultation process.	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S425 - Walthamstow Central Bus Station	Yes	Yes	Yes			-	-	This response is noted.
				S425 - Walthamstow Central Bus Station	No	No	No	The local people have opposed this again and again but the council keep on pursuing it. The overdeveloped area will see a removal of open space and with all the illegal road closures LTNs increased traffic.	For no change. It is ethically wrong to over populate a place. Its a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night; something we local are already experiencing. This will increase further.	-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
				S425 - Walthamstow Central Bus Station	No response	No	No response	This site is totally unsuitable for more housing in conjunction with a retained bus station. The existing site is only just large enough to contain space for bus stops, ticket offices, parking and manoeuvring for numerous buses. There is no space for both flats and buses to coexist side by side here. It will be extremely difficult and expensive to provide flats above with enough headroom for double decker buses below and not form the light and outlook of adjoining residents. Also there will be serious public health, pollution and light issues for future residents being next to or above buses with constant fumes and noise, as is currently experienced by the existing flats in Tower Mews to the east. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every development site.	Stop unnecessary and unwanted over-development of this site!	-	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Abigail Woodman				S425 - Walthamstow Central Bus Station	Yes	No	Yes	The plans for Walthamstow town centre constitute overdevelopment. Waltham Forest Council argues that it wants to retain and enhance what make the borough special, but if all the plans are brought forward as described the character of Walthamstow town centre will be utterly destroyed.	The local plan for Waltham Forest must acknowledge that limiting development " particularly limiting the height of buildings " is essential if the character of the borough is to be preserved.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S425 - Walthamstow Central Bus Station	No	No	No	The "potential for height" on the map will have a detrimental impact on the existing local residents who live in the flats along plane tree walk, who live above the Tesco on Lathbourne Avenue, and who live on the opposite side of the road above the station.	Do not build a tall structure in that position. Ensure existing residents are not adversely impacted by building works and right to light	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S426 - The Mall	No	No response	Yes			-	-	This response is noted.
				S426 - The Mall	No	No	No	The local people have opposed this again and again but the council keep on pursuing it. The overcrowded area will lose a remnant of open space and with all the road closures increased traffic.	For it remain as it is, it is ethically wrong to over populate a place. Its a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night something so local are already experiencing. This will increase further.	-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Abigail Woodman				S426 - The Mall	Yes	No	Yes	The plans for Walthamstow town centre constitute overdevelopment. Waltham Forest Council argues that it wants to retain and enhance what make the borough special, but if all the plans are brought forward as described the character of Walthamstow town centre will be utterly destroyed.	The local plan for Waltham Forest must acknowledge that limiting development "particularly limiting the height of buildings" is essential if the character of the borough is to be preserved.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Madeline Munday				S426 - The Mall	No	No	No	Legality: All the open space, which was given to the people of Walthamstow in exchange for land taken to make the railway, should remain a public space.  Soundness: 1. In light of the climate emergency, very tall buildings are extremely wasteful of energy. 2. Open space and trees in particular are important for mental health.	1. (legally) Keep all the lime trees and open public space. 2. (Soundness) Buildings of 5-6 storeys maximum, in accordance with the Government's national Model Design Code (January 2022) for town and city centres. Maximum density of 120 dwelling/ha/acre.	No	-	Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.  Through the evidence published in the Character intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Ruth Doyle				S426 - The Mall	No	No	No	This is too much development. I want my son to be able to see the sky when we are in Walthamstow. The council wants to set the borough off to private developers. This is really sad for local people. Walthamstow is losing its identity.	In an already overcrowded area current developments should be done with the aim to improve mental health only - CREATE GREEN SPACES. Overpriced blocks of flats that block out the sun do not benefit anyone's identity.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				5426 - The Mall	No Response	No response	No response			-	-	This response is noted.
Charlotta Lathane				5427 - St James Quarter	Yes	No	Yes	In order to maintain the character of the St James St area it's essential to limit the height of buildings. Having high-rise buildings on the High Street will damage the character of St James Street. Also, the CRATE scheme has transformed the area into a desirable one, and removing this and replacing it with characterless high-rise flats will make it an undesirable area. The area is already severely lacking in good restaurants, pubs and social areas. Removing CRATE will remove the few social spaces the area has.	The height of buildings needs to be limited, and more areas for socialising, more retail space and restaurant spaces are essential to replace what is being taken away.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Any development coming forward on sites will be subject to the full planning application process to ensure that the development coming forward is mixed use that will maintain and enhance the vitality and the general leisure and night-time economy which contributes to the vibrancy of the St James St area.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Ryan De Sta Croix				5427 - St James Quarter	No Response	No	No Response	The plan does set out that any plans must take into account the development severely reducing direct light to existing residences. Additionally the area is already densely populated with two new high rise estates opening in the last 3 years. Future plans should be required to assess the impact of increasing the amount of densely populated residential buildings and should preference the building of family homes, not flats/apartments.	A requirement to:  Ensure no new development adversely affects the direct light existing dwellings receive  Require the development of family housing stock to balance out the dense residential buildings (flats/apartments) already in the area.	-	-	This comment is noted. Any development coming forward on sites will be subject to the full planning application process to ensure that the development coming forward is mixed use that will maintain and enhance the vitality and the general leisure and night-time economy which contributes to the vibrancy of the St James St area.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Jane McCormick				5427 - St James Quarter	No Response	No	No	I don't know what these terms mean but we need to stop building high rise flats across Walthamlow. I don't know how local govt is able to keep granting planning permission to build more and more across tiny areas.	Keep the maximum height the same as existing buildings. Frontage in keeping with the historic frontage of the road - and replace back to this, where it may have been previously removed. It is important that we provide homes for people. It is equally important that any building adds to the appearance of the area. St James has been a long neglected part of the borough. It was totally neglected until the property boom of recent years made it an attractive place for young professionals to move to. It is fantastic that the council now want to improve the area, but it needs to be a real improvement to the appearance and use of the public realm - not just a vehicle to make more money through the profit maximising exploitation of developers. We've had enough of this in Walthamlow.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. 				S427 - St James Quarter	No Response	No	No	*Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.	For more local consultation, including borough-wide questionnaires, with no work to be approved that does not have at least a 50% approval rating.	-	-	At drafting stage there were many in-person consultation events held in both the North, Central and Southern parts of the borough which used the format of round-table discussions between council officers, residents and other stakeholders. For this pre-submission stage, due to COVID restrictions that were in place at the time, there were three online consultation events held for sites for the South, Central and North of the Borough. These events were focussed on the requirements of responding to a Local Plan pre-submission consultation which is a more technical consultation focussing on Local Plan soundness and legality.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S427 - St James Quarter	No	No	No	The overcrowded area and increased anti social behaviour in the local area.	For no change but open the roads and allow traffic built up on these main roads to flow easier. It is ethically wrong to over populate a place. It is a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night, something we local are already experiencing. This will increase further with more gentrification of the area.	-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Catherine John				S427 - St James Quarter	No	No	No	There should not be any high rise buildings on this site		-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need to establish policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Sean Dewey				S427 - St James Quarter	Yes	Yes	Yes	My only concern which I know this building was only there temporarily prepared but like many others love CRATES on St James street which supports many small businesses and has brought nightlife to St James street, taking this away would make St James street dull and boring again and the last thing that is needed here is housing. I would like to see CRATES remain on this street and if you can work around by building new apartment retail units for these businesses to go back into with housing on top then that would be one good idea. Another idea would be to move CRATES to somewhere permanent where these businesses can still trade locally.	I ideally would like to see CRATES remain on St James street as it has brought more life into that area. Could you maybe move CRATES to somewhere near to St James street where people can still enjoy this thriving music retail space.	-	-	This comment is noted. Any development coming forward on sites will be subject to the full planning application process to ensure that the development coming forward is mixed use that will maintain and enhance the vitality and the general leisure and night-time economy which contributes to the vibrancy of the St James St area. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Guy Gibbs				S427 - St James Quarter	No Response	No	No	If the plan - as appears to be indicated in the Floor-making Plan diagram etc - will involve removing the Crates development and replacing it with flats - that would be a disservice to existing residents.		No	-	This comment is noted. Any development coming forward on sites will be subject to the full planning application process to ensure that the development coming forward is mixed use that will maintain and enhance the vitality and the general leisure and night-time economy which contributes to the vibrancy of the St James St area. Uta Keyman				5427 - St James Quarter	No		The St James Street area is close to the unique open green space of the Marshes and the Walthamow Wetlands, both registered as a nature reserve. In the north of the borough, developments must be designed to "minimise access to Egging Forest and "mitigate for urban effects to ensure to adverse effect on the Egging Forest SAC. However, in the south of the borough, intensive developments are planned. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Egging Forest SAC is given by legislation, there is no reason why the same approach cannot be taken towards the marshes. Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing and needs to be protected. Yet this proposed intensified development including two high rise buildings, potentially towers, will completely destroy that with 300 homes bringing an estimated 1000 more people to the area, alongside an increase in domestic pets. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable marshland area close by.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. Please do not build more high-rise buildings in the area.	No	I live and work close by and the development will have an impact on my life and the life of my community.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Louise Stern				5427 - St James Quarter	No		The Blackhorse Lane SIL abuts the Walthamow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important lake and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.  (i.e. S469 - Blackhorse Lane SIL.)	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	Yes	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Guy				5427 - St James Quarter	Yes	Yes	CAHTE has been fantastic for local businesses and the local community around St James, whether replacing this space should at least provide the same floor space for small and independent businesses (if not more).  The bus waiting space at the other side of the track needs to be redeveloped, it's dirty and feels very unsafe at night.	Guarantee the same floor space for independent businesses	No	-	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
-				5427 - St James Quarter	Yes	Yes	No Response Yes  The train platforms at St James street station are a huge height gap for passengers who are boarding or disembarking. Can this please be looked into and funding provided by local development.	-	No	-	This comment is noted. Projects to upgrade stations to make them more accessible will be put forward by TfL, Network Rail and the train operating companies.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Alessandro Clumpechini				5427 - St James Quarter	Yes	Yes	Yes	-	No	-	This response is noted.

Abigail Woodman				S428 - High Street Sainbury's	Yes	No	Yes	The plans for Walthamstow town centre constitute overdevelopment. Waltham Forest Council argues that it wants to retain and enhance what makes the borough special, but if all the plans are brought forward as described the character of Walthamstow town centre will be utterly destroyed.		No	-	The Plan will protect and enhance Waltham Forest's existing green spaces and blue spaces, deliver new green and blue spaces and go as far as possible to meet the borough's Objectively Assessed housing need. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D2. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023).  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The site allocation requires that commercial floorspace is provided as part of new development.
Macklin Munday				S428 - High Street Sainbury's	No Response	No	No Response	This is not sound because the density of housing is too great 400 dwellings/hectare, when the National Model Design Code (January 2021) for city or town centres recommends 120 maximum.		No	-	Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Lary				S428 - High Street Sainbury's	No Response	No	No Response	Please stop removing facilities that the public does need and replacing the spaces with flats, very few of which are affordable for local people. There is no capacity if the area to support the volume of new residents - schools, doctors and other public services		No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active forecourt and having residents located within the borough's centres, ensuring that most people's daily needs can be met within a close proximity to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.
Christine				S428 - High Street Sainbury's	No Response	No	No Response	How many private land lords waltham forest needs no mention of social housing whats so ever		No	-	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. J				S428 - High Street Sainbury's	No	No	No	Has due consideration been given to where locals will buy groceries when you are encouraging us not to have a car / drive??		No	-	The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.  The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
				S428 - High Street Sainbury's	No Response	No	No	My only comment is that the redevelopment site MUST provide a similar retail store as existing plus adequate carparking. The current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc, but small shops that already exist elsewhere in a high street but also parking to enable taking their bulky shopping home by car- this cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high street/retail sites without noise and pollution problems. Not all sites are suitable for housing and there is no need to significantly follow the mantra of providing high density housing at all costs on every "development site."					The Council sets out its strategy for managing change in the Borough's Town Centre, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
				S428 - High Street Sainbury's	No Response	No	No	"Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.				Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Jane McCormick				S428 - High Street Sainbury's	No	No	No	This is our local supermarket. If it closes where are we supposed to buy food. I will be forced to drive more every week to shop for food. How does this fit with Walthamstow's strategy of people using their cars less?				The Council sets out its strategy for managing change in the Borough's Town Centre, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Ruth Doyle				S428 - High Street Sainbury's	No	No	No	How on earth can you build 300 homes on this site? This is developing green mud		no		The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,000 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Abigail Woodman				S430- Osborne Grove	Yes	No	Yes	The plans for Walthamstow town centre constitute overdevelopment. Waltham Forest Council argues that it wants to retain and enhance what makes the borough special, but if all the plans are brought forward as described the character of Walthamstow town centre will be utterly destroyed.	The local plan for Waltham Forest must acknowledge that limiting development "particularly limiting the height of buildings" is essential if the character of the borough is to be preserved.	-	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S430- Osborne Grove	No	No	No	The overcrowded area and increased anti social behaviour in the local area.	For no change but open the roads and allow traffic built up on these main roads to flow easier. It is ethically wrong to over populate a place. Its a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drink on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night something we local are already experiencing. This will increase further with more gentrification of the area.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and best to generate high numbers of private car/trip-based vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that assist in reducing crime.

If yes, please explain why?	Council's response
Abigail Woodman				SA11 - Slow Car Wash & Valeting and Walthamstow Trades Hall	Yes	No	Yes	The plans for Walthamstow town centre constitute overdevelopment. Waltham Forest Council argues that it wants to retain and enhance what make the borough special, but if all the plans are brought forward as described the character of Walthamstow town centre will be utterly destroyed.	The local plan for Waltham Forest must acknowledge that limiting development "particularly limiting the height of buildings" is essential if the character of the borough is to be preserved.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				SA11 - Slow Car Wash & Valeting and Walthamstow Trades Hall	No	No	No	-	For no change but open the roads and allow traffic built up on these main roads to flow easier. It is ethically wrong to over populate a place. Its a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people driving on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night something we local are already experiencing. This will increase further with more gentrification of the area.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Sarah Ferrari				SA11 - Slow Car Wash & Valeting and Walthamstow Trades Hall	No Response	No	No Response	We need to look after the Trades Hall as an important community asset. Loss of trees and open space	There need to be provisions in place for the Trades Hall to continue as an important community asset. Also need to make sure there will be green space and trees not chopped down, with more added. Very important as the council has declared a climate emergency so must stick to their promise.	-	-	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  This comment is noted, the Trades hall is recognised as a Asset of Community Value (ACV). As such this portion of the site has been removed from the site Allocation. The Slow Car Wash portion of the site is still vacant and has been identified as being suitable for development.
Ruth Doyle				SA11 - Slow Car Wash & Valeting and Walthamstow Trades Hall	No	No	No	Site is too small for proposed plans.	-	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.
Abby-Lee Walger				SA11 - Slow Car Wash & Valeting and Walthamstow Trades Hall	No	No	No	Librally dont understand what is going on here. 17 Hoe St is owned and run by the community. We wont be giving over the site to become a huge block of flats.	Remove 17 Hoe Street from it	Yes	I still dont understand whats happening here but if the Trades needs to be represented we will do that	This comment is noted, the Trades hall is recognised as a Asset of Community Value (ACV). As such this portion of the site has been removed from the site Allocation. The Slow Car Wash portion of the site is still vacant and has been identified as being suitable for development.

Tushar Kulkar				SA12- 152-154 Blackhorse Road	No	No	No	This directly clashes with the council's objective and legal obligation of reducing private car ownership. The current building contains a car rental firm. The presence of the firm reduces private car ownership of households in the local area. Therefore it is not legally compliant.  Furthermore, creating a tall building here would be pointless because it directly clashes with the current development strategy. The skyline is being created to the North of the Blackhorse Station. This single tower would be incoherent and is unsound.	The existing commercial use of a car hire firm would need to be kept within the new building which would change the number of flats that could be built.  The tall building would need to be removed altogether.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Abigail Woodman				S432 - 152-154 Blackhorse Road	Yes	No	Yes	This site is close to the Walthamstow Wetland, a Site of Special Scientific Interest (SSSI), a RAMSAR site and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest SAC is deemed worth of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is reckless and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed.	No	-	The local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Colin Miller				SAS- 59-69 Sutherland Road	Yes	Yes	Yes			No	-	This response is noted.
Jennifer Song				SAS- 59-69 Sutherland Road	No Response	No Response	No Response	<p>Few things must be included into consideration of this area.</p> <ul style="list-style-type: none"> <li>- The local residents suffer greatly from delivery vehicles and lorries clogging this area on daily basis. This issue must be addressed and improved.</li> <li>- The local residents suffer greatly from speeding vehicles on this particular road. From lack of surveillance and traffic calming measures. This issue must be addressed and improved.</li> <li>- The local residents do not want to see any unlawful, unsightly business taking place. Currently there is a meat factory which is not hygienic to the street environment and the building itself is visibly full of rodents and smells which turn potential buyers away from this area. Current business brings large lorries to this street and causes congestion. Fire hazard also caused by storage goods on the streets in front of the area. Unattractive street environment.</li> <li>- If the development becomes higher than current height, it would block the view from the opposite residents' flats. Also it would cause privacy issues of flats facing closely to each other. Sun path study must take place if it gets any higher than current two storey building.</li> <li>- Due to the businesses taking place within these units, there is lack of safe place for pedestrians, cyclists and children to walk, cycle and play. Integrated public area and improved road condition is desirable.</li> <li>- Improved connection with Blackhorse Road station is desirable, there is an empty plot which could integrate a direct footpath/cycle lane to lead up to Blackhorse Road (rather than through Workshop which is very narrow and awkward for cyclists and pedestrians to share) would boost the connectivity and regeneration of this area which is fairly run down at the moment.</li> </ul>		Yes	As part of the residents' association, there are a lot of complaints and issues that must be addressed.	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. Local Plan policies take into account the need to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use. Planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Colin Miller				SAS- 59-69 Sutherland Road	Yes	Yes	Yes			No	-	This response is noted.
-				SAS- 59-69 Sutherland Road	No	No	No	<p>- [a] This will overcrowd the area and increase anti social behaviour in the local area. It doesn't support the needs of the local area that need safe spaces for women. Leisure centres with dedicated women times. Or for roads to be open to women can walk freely and independently without hearing attacks.</p>	<p>For no change but open the roads and allow traffic both up on these main roads to flow easier. It is ethically wrong to over populate a place. It's a health and safety hazard to over populate a local town which is already over crowded. This will mean anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night something so local are already experiencing. This will increase further with more gentrification of the area.</p>		-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Johnny Furlong				S436 - Wood Street Families and Homes Hub	No	No	No	The planning approval did not consider at risk vulnerable adults that live in the adjacent site in the IQ Living facility for adults with mental health issues. All of the planning documents it never mentions that this health and social care facility is next to the Families and Homes hub even though this was stated as an issue to the council. The proposed development will remove all sunlight from the only outdoor space the residents in the IQ Living social care facility. This will have a major negative impact on their lives. The council has failed to consider the needs of these vulnerable adults that are in their care.	No development on this site should happen that negatively impacts the residents in the social care facility that is next door. This would mean a fewer rise development or reoccupation of the blocks so not to impact the residents.	Yes	because no one else if standing up to for the vulnerable residents	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ruth Doyle				S436 - Wood Street Families and Homes Hub	No Response	No Response	No Response	Are these 'new homes for (disproportionately) needed/social housing or will they be ridiculously unaffordable, in turn driving up local house prices and pricing everyone out of the area?	INVEST IN SOCIAL HOUSING	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

-				S437 - Fellowship Square (Town Hall Campus)	No	No	No	Your public funds. You have just closed all the roads off. Causing so much traffic on roads. Spent nearly 3 years building that new foundation. Constantly diverging the roads.	For no change but open the roads and allow traffic built up on these main roads to flow easier. It is ethically wrong to over populate a place in a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night, something us local are already experiencing. This will increase further with more gentrification of the area.	No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ben Westwood				S437 - Fellowship Square (Town Hall Campus)	No Response	No	No	With regards to S437 - Fellowship Square (Town Hall Campus), this development (specifically Block H) does not comply with Waltham Forest Development Management Policies regarding protecting the privacy of current local residents, due to the six storey height of the building and its close proximity to properties and gardens on Farnham Avenue, which will be overlooked.	Reducing the height of Block H, perhaps in combination with increasing the height of those blocks further away from the site boundary (e.g. Block E) in order to maintain the number of units across the site	No		Details regarding the final appearance of the development will be decided through the planning application process.  Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S437 - Fellowship Square (Town Hall Campus)	No	No	No	Section 33.4 of the Waltham Forest Development Management Policy (adopted October 2013) and part of the Waltham Forest Local Plan states: "Privacy is an important aspect of residential environments. Neighbouring occupiers are entitled to a reasonable level of privacy, both within their homes and outside in their private gardens. This policy therefore seeks to ensure that new buildings and extensions to existing properties do not compromise the privacy of occupants of neighbouring dwellings. The policy goes on to state: "As a guide, the Urban Design SPD sets out minimum clearance separation distances between the windows of habitable rooms and kitchens in opposing dwellings."  Section 5.9.2 of the Waltham Forest Urban Design SPD (Supplementary Planning Document - adopted October 2013) states: "Previous design guidance on residential developments (SPD21) set out the following minimum clearance separation distances between the windows of habitable rooms and kitchens in opposing dwellings. (Habitable Rooms include all rooms normally used for living and sleeping as well as kitchens of 2.3 sq. m. or more in size. Bathrooms, toilets, closets, landings, lobbies and recesses are excluded.) (These being: c.20 m between two-storey dwellings; c.30 m between dwellings with a maximum height of three storeys; c.40 m between dwellings with a maximum height of four storeys; c and so on. The document also states: "Independently of the minimum separation		No

Ben Westwood				S437 - Fellowship Square (Town Hall Campus)	No Response	No	No	No	<p>Regarding S437 - Fellowship Square (specifically Block H), the plan breaches BRE guidelines regarding impact on neighbouring properties.</p> <p>As stated by in section 3.3.1 of the Daylight and Sunlight Analysis Report, BRE guidelines recommends that the Annual Probable Sunlight Hours (APSH) received at a given window in the proposed case should be at least 25% of the total available including at least 5% in winter. Where the proposed values fall short of these, and the loss is greater than 4%, then the proposed values should not be less than 0.8 times their previous value in each period. The data in the report contains examples of where this guideline is breached. For instance, as per p21 of the report, Window W1240 at 29 Farnam Avenue will have winter APSH % reduced from 9% to 1%, and Annual APSH % reduced from 39% to 25%. This shows the proposal breaches BRE guidelines as it reduces the APSH received at window W1240 to below 5% in winter, the loss is greater than 4%, and the proposed value is less than 0.8 times their previous value in each period.</p> <p>It is noticeable that the report does not identify the breaches of BRE guidelines that are evident in the data it contains, and falsely claims concludes that the proposal is fully compliant with BRE guidelines, when the evidence contained in the report shows that this is not the case.</p> <p>It is quite possible that windows at neighbouring properties will experience similar breaches of BRE guidelines, however this cannot be established as the report omits APSH analysis on adjoining properties of 33 Farnam Avenue, 31 Farnam Avenue and 27 Farnam Avenue.</p> <p>Overall, the Daylight and Sunlight Analysis Report is not fit for purpose, and its conclusions should be disregarded.</p>	Reduce the height of Block H, perhaps in combination with increasing the height of Block B further away from the site boundary (e.g. Block B) in order to maintain the number of units across the site	No	-	Details regarding the final appearance of the development will be decided through the planning application process. <p>Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
				S437 - Fellowship Square (Town Hall Campus)					the town hall car park has a number of pool points for charging electric vehicles. I do not wish to see this facility being removed and not replaced as this would cause a huge inconvenience to the local residents that currently benefit from this facility.				The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
E Gilan				S438 - Sterling House, Willow House & Homebase	No	No	No	No	Buildings of 18 storeys will cause issues with reduced light and increased shadow and have an impact on privacy across the neighbouring properties as well as increasing issues with parking in an already busy area, since there is no parking provision for the new properties.	Reduce the height of buildings to a maximum of 7 storeys. This will minimise the issue of reduced light, increasing shadow and lack of parking.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. 				S442 - Travis Perkins	No	No	No Response	I consider that the density is too great and will have adverse effects on space standards and quality of life for future residents. Tall buildings should be avoided as it has been demonstrated they consume more energy and give out more carbon emissions than lower rise. Whilst the creation of a district centre and step free access to the station is to be welcomed, there is insufficient greenery in what is already a very hot & landscaped environment along Wood Street.	Reduce the number of dwellings by one third. Insist upon good design in the development guidelines, to correspond to the principles in the London Plan that intensification should be accompanied by good design. In order to improve the carbon footprint double the amount of green space.	-	-	<p>The London Plan (2021) sets a 50 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,820 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>

Colin Miller				S44 - Priory Court	Yes	Yes	Yes			No	-	This response is noted.
Abigail Woodman				S44 - Priory Court	Yes	No	Yes	One of Waltham Forest Councils justifications for the building campaign embodied by this site allocations document is the need to provide housing for people on the boroughs housing waiting list. Only social housing meets the needs of the majority of those on this waiting list, it is well-recognised that so-called "affordable housing" is not affordable for most of those that are insecurely housed. Therefore, council-owned land must be used to deliver only social housing. We, as a community, want everyone from our community who needs a home to have a home and our land (because it is justifiable to view council-owned land as land belonging to the community) should be used exclusively to provide homes for those in need. To do anything else is fuelling an increase in house prices and pushing the Council to house vulnerable families hundreds of miles away from their support networks in our community.	The local plan should make it unequivocally clear that council-owned land cannot be developed for housing other than social housing.	No	-	There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.
Nicole Robinson				S44 - Priory Court	Yes	Yes	No Response			No	-	This response is noted.
-				S45 - 234-240 Bland Road	No	No	No	The overcrowded area and increased anti social behaviour in the local area.	For no change but open the roads and allow traffic both up on these main roads to flow easier. It is ethically wrong to over populate a place. Its a health and safety hazard to over populate a local town which is already over crowded. This will see more anti social behaviour especially with the open bars introduced in the area. Who will police this? There already is a problem with middle class white people drunk on the streets. There has been an increase of noise in the middle of the night especially on Friday and Saturday night something no local are already experiencing. This will increase further with more gentrification of the area.		-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new reality allocation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder. The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
Colin Miller				S45 - 234-240 Bland Road	Yes	Yes	Yes	Looks Great! A focus on Commercial space would be good. The area lacks space for new hospitality and retail.		No	-	The Site allocation will require development coming forward on this site to re-provide commercial floorspace as part of the planning application process. The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Alexandro Campochi				S45 - 234-240 Bland Road	Yes	Yes	Yes			No	-	This response is noted.

Mike Chimes	S446 - Salisbury Car Park and Adjacent Sites	No	No	No	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation 'flow framed' Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan may be rejected. Failing to comply with "rules that are not transparent to consultees. Consultation on the site allocation LPD element of the Wiltshire Forest Plan has been taken forward more or less in parallel with consultation with the main plan LPD for 2020-2035. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been coloured by political positioning, while others have been subject to those making orderly meetings. Effectively, it is difficult to determine whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, and essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees showed, or have been difficult to access online. In general however it has been apparent both from LPD and what has been stated at consultation meetings, a major driver for the intensification of development across the borough has been a housing target of c. 3800 homes per year. While LPD has a large weighting for GDS02, and central government guidance is urging all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the borough will meet expected housing need. More	Based on the personal knowledge of the location and the problems associated with recent developments it is not believed the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts as will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LAE2 zone and downwind of the road meaning there will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. But the rest of the area will also be subject to these increases and the proposed sited the natural air flows possibly result in pockets with even a higher r concentrations. Wiltshire Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above. If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1930's we realised in the 1930's that people needed space and New Towns were developed to address these issues. This was the M1962 -	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: -Research/ fact finding, the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area. -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding, the choices made in the plan are backed up by facts. -Evidence of participation of the local community and others having a stake in the area. -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Having no regulatory or national planning barriers to delivery. -Delivery partners who are signed up to it and -Coherence with the strategic of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects. Although it is important that policies are flexible, the DPO should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Anthony G Thorne Lip	S446 - Salisbury Car Park and Adjacent Sites	No	No	No	No	No	No	The question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 19. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). 14(1) A local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. In the 1930's we realised in the 1930's that people needed space and New Towns were developed to address these issues. This was the M1962 -	Yes	Because there are too many unanswered questions	This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new culture of congestion, parking problems and improve air quality. Additionally, Wiltshire Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.

Mike Hill				S446 - Salisbury's Car Parks and Adjacent Sites	No	No	No	<p>THIS IS WHAT IM PUTTING ON THE SITE ALLOCATION CONSULTATION:</p> <p>Question: Is it legally compliant to putting "No."</p> <p>Where it asks "Is it sound" Im writing in "No."</p> <p>Where it says "Does it comply with the duty to cooperate" Im putting "No."</p> <p>Then underneath it says "Give Details". This is where you can write in your objections/comments.</p> <p>Im putting:</p> <p>The plan is seeking to build more homes than required by the London Plan.</p> <p>To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "them" (in planning terms) to existing residents who will suffer the consequences of over-heating, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Without parking these proposed developments will disadvantage older people.</p> <p>Lastly "set out modifications you consider necessary to make the Local Plan legally compliant and sound."</p>				<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Dillon				S446 - Salisbury's Car Parks and Adjacent Sites	No	No	No	<p>It is not clear what the justification for the Council's decision is. The plan does not have any concern for the views and opinions of those already living in the area and borough of this proposal.</p> <p>The impact of more homes will be even more congestion and what with the newly created quiet ways are making getting around harder than ever. Many people moved to the suburban areas of London because they were less densely populated and most of the properties were lower level and not an eyesore. And the roads were free from congestion most of the time. This will make things worse.</p> <p>People did not move to Waltham Forest so they could cycle 10 miles to work in central London too. So if public transport is overcrowded and roads are overcrowded then it because the population is already too dense in this area.</p>	Inclusive consultation by way of consultation letters sent to every person over 18 living in Waltham Forest. Act only on the results of the consultation. Alternatively have the consultation with all the representative residents associations within the borough and then all those that are not represented by any committee to obtain the views as above.		Please explain this question	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Mustafa Kurbud				S446 - Salisbury's Car Parks and Adjacent Sites	No	No	No	<p>The proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy with an additional demand for parking. Consultation is flawed as no hearings/public meetings to advise residents. Shortage of doctors, dentists etc.</p>			<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Where proposals affect existing care facilities, the policy set out in Local Plan Part 1 ensures that there can be no loss without demonstrating that there is a surplus of that form of accommodation in the area and that it is no longer required. There is a considerable need for additional capacity to meet the needs of an ageing population.</p> <p>New supported and specialised accommodation will meet stringent criteria to ensure that facilities are high quality and fit for purpose.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. Sain Dewey				S46 - Salisbury's Car Park and Adjacent Sites	Yes	Yes	Yes	My criticism of this development proposal is the possible threat to Salisbury's shopping centre even though it just says car park and other areas connecting it. My mother works at this supermarket and I want confirmation that the supermarket will not be destroyed at all during development process. I want the star on your image where the supermarket currently is as in for potential of height. Does this mean that you want houses on top of the supermarket and if so then how will this be achieved without loss of retail jobs. Will the supermarket still can during this development.	To make this development proposal compliant then I want to see from this is more trees/improvement to the river chng that does not require loss of green space or any felling of any of the trees that are currently on site.  Also, I want the full confirmation that workers job will be protected on this site during development and will not result in the partial loss of supermarket retail space during development as this will result in local uproar and protests.	Yes	-	<p>The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Agnes Sepelo				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	Residential development too close to a heavy trafficked road - strong impact on health. Building new flats will not improve pedestrian and cycling connection!	Improve efficiency of the site in terms of commercial development. Building new residential units so close to heavy traffic is against the law.	No		<p>In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journeys in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. The former part of a holistic approach by the borough to reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>
Emk Halli				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	You should be removing chisford mount with shops etc, not putting more and more housing, we have already lost barns and low class shops are surrounding it, I think its time for a regenerate and adding more stores and housing let the solutions	Revamp chisford mount with more shopping options to attract middle class people and do not add more housing its overcrowded and over populated as it is	No		<p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow Retail Units, or Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active footpaths and having residents located within the borough's centres, ensuring that most people daily needs can be met within a closer to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road networks. These policies also support new high street and town centres use that may emerge in the future to help maintain their vitality and distinction.</p> <p>Through the evidence published in the Character Interim Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Waltham Forest Residents' Community Association				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	The local authority has failed to consult with the two local residents' associations and has failed to reach our vulnerable residents and those who do not have internet. Many elderly local residents do not have smart phones or internet and many residents can't afford the luxury of internet. All these people have been excluded. There has been no display of information within the highlighted area. Salisbury and the local area flooded last year. To build further on the land would increase flood risk. The infra structure to assist current local residents is already over stretched. Parking in the area is vital to the bus depot and car showrooms as well as local residents and visitors. Reducing/removing the car parking would damage the local area and businesses significantly		No		<p>This response is noted.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the associated test that there are no clear sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against by the lifetime of the development and is not an on or off the site.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP practices, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The consultation was not an predominantly on the commonspace online engagement platform. However, in line with our Statement of Community Involvements copies of Local Plan Documents are always available at all Waltham Forest Branch Libraries and in the Town Hall Reception. The Council always accepts consultation responses submitted by email and post.</p>
Valencia Lobou				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	How can you justify building more flats in an area already overpopulated? Before any new flats are considered, you should prioritise making our lives better. We need more GPs, more and better schools, more public transport and don't even get me started on the traffic on the main roads. Do you people even live in Chisford? How can you decide for us what is best for us? Or you are just concerned about creating more revenues for the council? For you it's just about parking and parking, closing roads, keep the speed to 20 miles and a fixation on creating bike lanes that no one uses. It is time for you to start respecting our views as we see the ones paying the taxes and living in here. We need more meetings with the council and please stop ignoring us.		No	I would like, for once, have my opinions heard.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Conservative Councillors (General)				S46 - Salisbury's Car Park and Adjacent Sites				<p>We do not believe the designation of this site to be "effective" given the embedded value of the existing uses far exceeding the likely residential development value of the site when the Council's policies of seeking 50% affordable housing are taken into account. This is a well-established retail store, hotel, car dealership and community transport hub, with playing fields adjacent to it. The car dealership opened less than five years ago.</p> <p>We do not believe this site to be viable because the value of the proposed 800 residential units is unlikely to be able to bear the cost of either buying out the existing uses or replacing them with adequate compensation to the occupiers for their loss of business during the period of redevelopment. The designation as a "Transformation" like suggests very tall buildings, which will be situated adjacent to an urban motorway and downhill of a waste incinerator.</p> <p>Neither factor would appear to have been properly considered in assessing the likely higher cost of development and the impact of that on viability. The Chingford Hall estate, which lies about 500m west of this site was redeveloped in the 1980s/90s and tower blocks were demolished. The resulting homes, a mix of two and three story terraced houses and three and four storey flats, have established a character for the area which has proved popular and less prone to negative outcomes such as anti-social behaviour and crime. Such factors should be considered when land is designated, but does not appear to have been.</p> <p>We believe this site should be designated as a "Transition" site with an FAR no greater than 2.0.</p>				<p>The Local Plan, in both part 1 and 2, is being prepared to ensure it meets the test of soundness and is "effective". It indicates who is to be responsible for making sure that the policies and proposals are met, and when planned growth is expected to be delivered. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process. Although it is important that policies are flexible, the two-part plan is clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met will be clearly listed in an Annual Monitoring Report.</p> <p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p> <p>The site referred to is not identified as suitable for tall buildings in Local Plan Part 1. Constraints such as the proximity of the north circular are identified in the Place Making plans and will be expected to be taken into account in any proposed development to ensure exemplary design and high-quality place making. Local Plan 1 also requires any new development to incorporate design solutions and crime prevention measures that assist in reducing crime and enhancing community safety.</p> <p>The identification of sites as appropriate for a Transformation, Transition or Reinforcement approach to character-led intensification aligns with evidence in the Characterisation and Intensification Study (2019), and design-led area based masterplans, feasibility studies and area frameworks. Following adoption, all proposals for redevelopment will be subject to the policy tests relating to Character-led intensification and high quality design set out in Local Plan Part 1. Local Plan Part 2 gives the opportunity to establish additional site specific requirements and guidance to ensure that development is of the highest quality and appropriate for its location.</p> <p>All submitted planning applications that do not meet the London Plan 'fast track' definition are subject to viability review, which the Council has independently assessed.</p>
Nicola Forristal				S46 - Salisbury's Car Park and Adjacent Sites	No	No	No	Proposed developments would be out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing, no parking provision. Plan seeks to build more houses than required by the London Plan. Existing residents will be overlooked, loss of privacy and day light, additional demand for parking. Consultation flawed due to lack of communication. Shortage of infrastructure of health care and education.	Build homes to height of existing buildings, provide parking, healthcare, education.			<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
-				S46 - Salisbury's Car Park and Adjacent Sites	No	No	No	Where is the parking provision? Extra pressure on local amenities in shops, dentist, schools etc. High rise will be detrimental to the existing residents.	Parking needed. Also low rise not high rise. More educational and health provision will be needed.	No		<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Shula Taylor				S46 - Salisbury's Car Park and Adjacent Sites	No	No	No	There is too much reliance on electronic responses, alienating a large proportion of people who don't use the internet as a source of info, namely elderly or people who English is not their first language. I am concerned that the height of the buildings is too high and the loss of supermarkets that people can walk to. I do use Salisbury and Colford as I live over the moor, and I can't carry my shopping up that hill. There is no direct bus either, still me to walk a long way. This will stop me using the Moors and I will go somewhere I can park. I can't use my bike either as I simply cannot cycle up that hill. With no access to parking, the area will die. I'll go to Station Road in Chingford where I can park. I have a household with 4 adults. We are already penalised by ULEZ, congestion charge, much as you don't want cars, for many of us, these are ESSENTIAL. We all have busy lives and simply don't have time to walk to the shops.		No		<p>This response is noted.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Anne Nagle				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	The proposed development would be out of keeping with the area with no levels of affordable housing, no parking provision for disabled or older people. Existing residents will be overlooked and loss of daylight and sunlight. The additional demand for parking will push everyone up the hillside or down towards the allot. There has been no consultation with the public and new homes will require extra hospitals, schools, doctors etc which haven't been taken into account on any level.	Housing should be in keeping with the area of low rise housing. Additional provisions for schools and doctors need to be included and also very importantly parking for the disabled people. Everyone needs access to excellent shops and bus/travel links which need conforming how the buses will turn now especially the 158 bus. There are a lot of details missing.	No	As I have lived in Chisford all my life and know the services we used to enjoy (don't want to see these lost). My son studied for his Level 1 in library for example and that is now unavailable and more resources are required.	Through the evidence published in the Character Intermittency Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Bakir				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	The council & developers aren't considering the traffic congestion, the transport infrastructure or other residents. Waltham forest has too many developments & it was too busy & populated as of 2021		No		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Zahra Kakem				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	It would be out of keeping with the area with no parking provision which already overflows parking in nearby streets. The Plan needs to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking.  Furthermore, this Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting. There is a shortage of doctors, hospitals, dentists, schools in the area and this would always overburden an area which has had its resources stretched to the limit.	Consider building homes to height of existing buildings to be necessary consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for this plan to be compliant and sound.	No	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me by way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Sarah Rose				S446 - Salisbury's Car Park and Adjacent Sites	No Response	No	No	Very little information has been provided to the general public to explain the proposed development. People don't want extra people without extra infrastructure. Building on a flood zone where there is an antiquated drain system which I believe we have in the UK is a bad idea. I do think this area could do with improving but not at the expense of green areas and local people. I notice that some of the green spaces that previously were accessible to the public have now been fenced off which is a worrying development.	Less homes, more infrastructure. Explanation as to why this area has been chosen for development when it is a noted flood zone.	Yes		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  Holding sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy D1 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.
										No

				S446 - Sanbury's Car Park and Adjacent Sites	No	No	No	Old people will be disadvantage regarding parking as will families. The plan seeks to build more homes than required by the London plan. Houses are needed with gardens which helps nature not multi storey buildings which do not benefit anyone. Affordable housing is needed. One housing estate built on school land caused problems because the housed children who had no school to attend and a playing field had to be built on to solve the problem. How we have no schools, no doctors surgery and local hospitals can cope as more building will be coming soon on the A406. Buildings should be of the same height as of existing buildings. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting and I don't know how to do it.	Public meeting. Every household notified of meeting. Waltham Forest never listen to the people they just do what they want. They took all toilets away after promising we would have facilities, you find it hard to believe what they say. Cheap Chingford low rise and built houses not flats. One people parking spaces as eventually cars will be electric and will need parking as cyclists need to park their cycles. Buses and trams do not get you to your place of work, and Waltham Forest has built on industrial sites unlike Harleggy who provide for the workers.		-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/trip/short vehicle trips. Redevelopment of these sites in accordance with local plan policies should significantly reduce vehicle traffic across the borough.
Ruth				S446 - Sanbury's Car Park and Adjacent Sites	No Response	No Response	No Response				-	This response is noted.
Michelle Hensley Francis				S446 - Sanbury's Car Park and Adjacent Sites	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London plan. Existing residence will be overlooked, loss of privacy daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc, centers.	Build homes to height of existing buildings, provide parking healthcare education facilities.		I want to have my say, this is the area where I live I will be affected by any changes good or bad	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The sites in this document were consulted on between October and December 2020 in a Draft Site Allocations Consultation. During this time there were in-person engagement events held at various locations across the borough. Due to Covid-19 restrictions in place at the time of this consultation, it was decided for the safety of residents and officers to hold the meetings online.
Teena Antonio				S446 - Sanbury's Car Park and Adjacent Sites	No	No	No	You are ruining chingford	You are ruining Chingford	Yes	-	The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Gloria Jones				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	Overdevelopment of area		-	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Ms A. Fraser				S446 - Salisbury's Car Park and Adjacent Sites	No Response	No	No		Only the green space, shop front & extending bus routes idea, is the only positive and unintrusive idea out of the entire proposal - not over 400 new homes for obvious reasons: over-crowding, pollution, 10 min on already stretched services, GP's, schools etc. Of course, it is quite difficult to properly understand what is going on because we are unaware if the proposals breach standards/compliance due to paperwork, documents and everything available to look at being incredibly complicated to properly comprehend.	Yes	Many members of the community do not receive effective communication and/or are unaware of how to access and participate. Plus people receive information differently to seeing and hearing in face to face meetings, it is a more productive tool for communicating for many.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by mail and post.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest, these policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor, sports facilities, parks, and green areas. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
Karan Bush				S446 - Salisbury's Car Park and Adjacent Sites	No Response	Yes	No Response	* the development adversely affects older and disabled people and those families purchasing to bulk from the supermarket. * it does not address the need for an attendant increase in community infrastructure * it does not take account of increased pressure on public transport services * the proposed density may put pressure on the space standards of individual dwellings * it may not address the housing needs of the borough in a holistic manner, ensuring that the needs of older and disabled persons are met.	* Reduce the number of dwellings by half to 250 * Relate the supermarket because it is a valued service/commodity in the area, but rather than creating a tall building "which uses more energy per sq metre than low rise and emits twice as much carbon" according to University College London's Energy Institute, consider building above the supermarket and low rise. * Specifically address the need for community infrastructure by specifying the provision of a doctors and dental surgery together with community meeting spaces and play areas for children * Specify that some homes should be allocated for various groups such as social rented and consider whether some should be specially designed to be attractive to older people. ( proper pitched throughout the development) in order to encourage the release of under occupied family homes.	Yes	-	The Council is committed to delivering new housing in the borough of different types and tenures to meet the needs of its residents.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Valerie Platt				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. I feel strongly about this point as I am 75 and live on Broad Cascades, EA 9ET, where parking is already very challenging. I frequently have to park on New Road or other side roads a long way from my house. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation framed as no leaflets/public meetings to advise residents, only a Zoom meeting. Shortage of doctors, hospitals, dentists, schools etc.	Build homes to height of existing buildings, provide parking, healthcare, education etc.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Melanie Draper				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	It will cause massive overcrowding	Leave the site alone	No	Democracy	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
				S46 - Sarnbury's Car Park and Adjacent Sites	No	No	No	This needs to be displayed physically as well as online otherwise people without access to the internet or ability to go online can not be consulted. There is no link to the local plan on this link. How does this plan to invest infrastructure in the Borough. Viewing this in isolation does not allow the public to make an informed decision.	Show analysis on flood risk. Show relationship to overall local plan. Where is retail provision proposed. The smaller shops currently available to meet sustenance for Sarnbury. If Sarnbury to be relocated that will marginalise access to affordable food and push retail further away, risking more car use and therefore increasing more people. What is the air quality here. If focus not been suitable site for this housing without more intervention and green boundary. There is no green space added which does not comply with London Plan. There are no planned amenities for play. Where are all the extra schools being built? A more detailed plan is required to be able to make a comment. The information provided is of insufficient detail and no evidence of rationale is provided here. No link to this. Why is this a good place for housing? Why is it good to lose jobs? Why is it good to build by A50? What are the mitigation measures. What is the Carbon target, why are you no meeting? Why is there no infrastructure and green space added? What is the impact on the biodiversity of the adjacent stream and hedger? Why is this area of nature not being incorporated and improved? How will this link to the bus cleaning area, hotel and car rental adjacent?		-	<p>This response is noted.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exemption test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The consultation was run on predominantly on the commpage online engagement platform. However, inline with our Statement of Community Involvements copies of Local Plan Documents are always available at all Waltham Forest Branch Libraries and in the Town Hall Reception. The Council always accepts consultation responses submitted by email and post.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-free. Additionally, the policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p>	
				S46 - Sarnbury's Car Park and Adjacent Sites	No Response	No	No Response					This response is noted.	
Ray Anderson				S46 - Sarnbury's Car Park and Adjacent Sites	No Response	No	No	Council building excessive housing above requirements while removing ALL local supermarkets. No benefit to Chingford citizens as all Council is corrupt look at why Claire Coghil 'resigned' - rotten from top down	Why is council building more housing that legally required? All council development needs through investigation as instigated under Coghil's watch..		-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. Sharon Walker				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	I believe in change for good reason and community benefit, however the proposed development of the Chingford mount area exceeds necessity. The higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 2 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,330 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	I have lived in Middleton Avenue for 33 years Chingford has been a constantly changing environment with a diversity and vibrant culture. However regardless of the changes it has still maintained its suburban character. I believe in change for good reason and community benefit, however the proposed development of the Chingford mount area exceeds necessity. The higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 2 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,330 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	-		
Sain Dewey				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	I am against this as you are proposing that Sainsbury's car park area adjacent sites needs housing. It also states here that you want comprehensive redevelopment of this site to create new retail which includes provision of retail units. You want to deliver 420 new flats on this site with a good car at the back corner of where Sainsbury's supermarket currently is for the possibility of development height. I would be most disappointed if you consider building on a part of this retail store which would result in loss of jobs and a smaller retail building when you again have a whole car park and an extra bit of brownfield site to build these flats on. As another works in the clothes department of this store and she would be angry if this resulted in loss of her job or temporary closure of this supermarket to make way for these flats as she struggles to make money.	You like to use this phrase in relation to existing retail premises such as Sainsbury and Morrisons. "The provision of existing retail use at a reduced footprint", which means you would mean reducing these supermarkets to a size of a Tesco express store which then you would have a brand new on the development proposal. If you want to make this legally compliant then I suggest you build further away from the Sainsbury supermarket and use the height for the side/middle of the car park and also use the neighbouring brownfield site you have listed well. This includes a solid promise that no jobs will be lost in this supermarket.	No		The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Emily Thomas				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No Response	This Sainsbury has been at the mount for a very long time and is the life and soul of the place. It's taken away where do you expect local elderly people or people without cars to shop? Another proposal is to build a supermarket, that would leave only Tesco express as a local supermarket. There has always been variety at the mount, Sainsbury's supermarket is always busy and this does not make sense for this to be replaced with flats that have no parking, the loss of local train station at the mount. Increasing the housing in the area is just going to overpopulate. Strongly disagree with this proposal, this is coming from someone who has lived in Chingford all their lives.	See above	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of revenue to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.
-				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	The building plan height alone (3 proposed stories) is too high this build should match like for like in height and area in total only, or lower. Not only will the proposed build stand out as a monolithic block with 100% block "natural lighting for the houses adjacent to this structure. When a street light is faulty not working the area is dark, this will be an issue. The area will look like during daylight hours, not alone at night. There are no proposed parking in your development. There should be parking made available for both residence and any proposed businesses. Parking will be an absolute issue as cars, even now prior to your plans block or park across the private drive to houses. This both increment and. Issue. The yellow line currently in place are no parking, only after 6.30pm onwards.	As discussed above. New build should not (at its maximum height, exceed the current building height. Parking to facilitate all proposed homes and businesses.	-		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a possible measure.</p>
C Alan				S446 - Sainbury's Car Park and Adjacent Sites	No	No	No	The proposed developments would be completely out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing; there are no parking provisions, who are there never any parking provisions with these developments? Why are the council dictating who can and cannot own a car, this will disabuse many people. Why are more homes being built than the London Plan requires? What care has been taken to existing residents in regard to the additional demand for parking, the loss of privacy by being overlooked due to the development, the loss of daylight/sunlight. Why was there only an online zoom meeting? Many elderly in the borough could have a clue what a zoom meeting was or how to set one up, this made the consultation flawed as it limited who knew about the proposals as no leaflets or public meeting for people to attend and air their views was arranged. There are too few gp surgeries, hospitals, dentists, schools etc. in the borough as it is without adding this colossal development into the area!	Do not make the build so excessively high. This is not in keeping with surrounding buildings. Parking is horrendous around the area as it is, provide more parking and with half an hr free, vastly improve healthcare, education, dentists etc. .	No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Timothy Boyle				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	The development is very urban and very city centric. The area is suburban and has no adequate transport links nearby E and Tube network. The proposed high rise development actually takes out a main bus terminus at Albert Crescent and it actually puts in local neighbourhood traffic by blocking Cherrydown Ave. The properties proposed are too tall and bring nothing to the area of any value.		No	-	The Local Plan requires a character led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Kathryn Ullman				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	This site is a flood plain and has flooded recently, an event that is likely to become more frequent. It is not suitable for housing because of closeness to the North Circular, pollution levels are high. Two large businesses would potentially be lost and with that many jobs. There is also a hotel on the site and a petrol station. What will happen to them?	This hotel and existing shop should remain where they are. Maybe some housing next to the shop on right hand side.	No	No one takes any notice of events.	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
David Hill				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No Response	It takes away a much valued Supermarket and the associated Petrol Station with so many additional homes on this site WINE will people go to do their shopping? Clearly there is no consideration for the needs of local people (many of who are elderly/helpo already live in the area.	Provision of shopping facilities with adequate car parking - not all of us can use bicycles or have ready access to public transport!	No	-	The Council sets out its strategy for managing change residents shopping habits to continue to help them meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Sheraz Dar				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	I live within a few hundred yards of this proposed development. The vast majority of my neighbours have no idea about these proposals. Further more detailed information needs to be provided door to door and a more intense and appropriate consultation needs to take place	This area cannot cope with additional housing. The local facilities just do not exist. It's hard enough to get an appointment with a doctor and a dentist as it is without piling more people into the area. There was very little increase (bar a nursery 6 years on) after the dog stadium was built. Pre covid you couldn't even get on a bus to Walthamstow at peak times as there was such an increase in the local population due to housing and the crooked billet roundabout was always ground to a halt. This is going to be going to make everything even worse!	No	As a local resident of 20 plus years we should be integral to the decision making process	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
-				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Sainsbury's is a very needed and busy supermarket with the appropriate size car park. And should not be replaced with housing.	NO COMMENT	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.

Michael Shellock				S466 - Salisbury's Car Park and Adjacent Sites	No	No	No	It is perceived by local residents that this proposed redevelopment is unclear in what changes are actually going to take place and if the existing Salisbury's Superstore is going to remain and development take place around it. The proposals are vague and seem driven by the Waltham Forest Council's habitant desire to build, build, build, regardless of the wishes of the local population.	Unless there is clarification about what is proposed for this site, then it should not move forward in any shape or form and until this and all the other so-called regeneration proposals in the E4 area is properly explained to the local population. Further, the randomness of the proposed redevelopment sites in the E4 area under the the Councils LPI & 2 is hardly a cohesive plan for the next 10 - 15 years and so is flawed.	No	do not consider that proper representations have been made to the people of Chingford and Highams Park about the impact of the Councils decision which will have on this part of the borough.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>

If yes, please explain why?	Council's response
Shiraz				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Waste of money yet again LBWF building more homes without having any consideration of the impacts on local infrastructure, schools, hospitals		No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Frederick Oghant				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No Response	This site, so close to the North Circular (which is not in the UEL), should not be redeveloped for residential purposes.		No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car-capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p>
Jan Prior				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No	"Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.	Far more local consultation, including borough-wide questionnaires, with no work to be approved that does not have at least a 50% approval rating.	No	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p>
Liz McNaughton				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No	Removal of car parks does not remove the need for cars. This council has lost all view of the safety and function of the people in this borough.	You have worded this document in a way that is inaccessible to the majority of normal people as you can justify doing a "consultation" that no one can answer.	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Mudassar				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provisions, and this will severely disadvantage the elderly. The plan seeks to build more houses than required by the London Plan. Existing residents will be even isolated, subjected to a lack of privacy, loss of daylight/sunlight which may cause mental health concerns, and additional demand for parking. There is already a huge strain on the infrastructure within hospitals, doctors, schools, etc, which will only get further strain.		No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D5. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The London Plan (2021) sets a 10-year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figures were equivalent to approx. 1,800 homes per year, but targets were deconcentrated across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,820 new homes per year, as well as the London Plan identified need for 1,820,000 homes per year across London.</p>
AJ				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Surely you can't build here? Leave us alone	No more new schools, doctors, dentist etc!!! Chingford have a lot of elderly people & we need our supermarket! You go on about cycling, but what if you can't cycle? Like me, I have disabilities & rely heavily on my car... think about your actions & how it will affect the already over populated people of Chingford.	No	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be fully sustainable.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality.</p>

				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	There is no extra infrastructure to support such a plan and we should not be going back to tier blocks	Decline the plan	No	-	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	This will reduce availability of car parking spaces for a busy supermarket. The proximity to the A403 and the already congested B166 roundabout is undesirable for noise and air pollution reasons. This will increase the requirement for schooling, health, dental and recreational facilities which are already overstrained.	Reduce the residential density.	No	-	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S446 - Salisbury's Car Park and Adjacent Sites	No Response	No	No Response	No mention is made of a supporting infrastructure to support the 430 new homes inhabitants. Exploring potential green areas does not necessarily result in their being adopted eg. improvements to the river ching (clearest mean that improvements will be made) and plan is hardly inspiring, couldn't seem to see many trees.	Sort out a good infrastructure for the area (schools, doctors etc and addressing points above. Why is it being proposed?	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The Borough's Local Plan has a policy on protecting and enhancing the environment (as the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Doesn't Matter				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	leave Chingford alone!	leave Chingford alone!	No	no one wants your flats	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S446 - Salisbury's Car Park and Adjacent Sites	No	No	No	Not needed too	Tower blocks are too high for the area	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Harriet Adam-Smith				S446 - Sansbury's Car Park and Adjacent Sites	No	No	No	There has been no outreach to local residents about these plans. The local community do not want this! The language used is opaque and you are clearly not really interested in consulting with local people	The Chingford Road is already completely clogged with traffic. It can take 45 mins to drive from the amount to the toilet on a Saturday or rush hour. Adding more homes will make this completely impossible to use. With no real bus lanes it's not a case of using public transport as that is just as slow as taking the car. Local's from all across the borough are having difficulties seeing GP and getting nursery and school places. What is being done to increase infrastructure in the area? With no tube we are reliant on roads?  Also both Morrisons and Sainsburys are busy supermarkets used by people from across the borough. We need these superstore size supermarkets WITH parking.  The only thing that seems beneficial is importing the extremely dangerous and badly lit walking route on the Ching and the billed underpass. At the moment many (especially women) do not feel safe walking either at night or via on the bus.	Yes	The question needs explaining in layman terms?	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S446 - Sansbury's Car Park and Adjacent Sites	No Response	No	No	The 3 developments add approximately 5000 new homes with at least 2000 more people into the area which will swamp the existing drained services. Why do we always see additional homes but no additional doctors, schools or dentists. Why does the council continuously put more and more pressure on the existing over stretched facilities. When was the last time we saw a new doctors surgery, school or rns dentist	Add more doctors surgeries, schools and rns dentists instead of adding to the existing pressures that the above have already			The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
				S446 - Sansbury's Car Park and Adjacent Sites	No	No	No	You are taking away a good store that is used by a large population of Waltham Forest. You are making it very difficult for disabled and older people who rely on the parking facilities at this branch to be able to shop at this store with a very large variety of products which certain members of the community are unable to access anywhere else.	There are no modifications you can make, you should leave the area alone.			The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
				S446 - Sansbury's Car Park and Adjacent Sites	No Response	No	No	This is asking local residents to answer question that are completely incomprehensible. How I know if its legal? What is sound? Duty to co-operate? THE SITE PLAN SHOWS LITTLE DETAIL WHY NOT JUST ASK OUR OPINION	WHAT IS HAPPENING TO SANSBURY usual rubbish about pedestrian and cycle what about car users			The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
John Townsend				S446 - Sansbury's Car Park and Adjacent Sites	No	No	No	It does not keep with the look of the local area and will damage wildlife and encroach on local green spaces		No		The Local Plan requires a character-led approach to intensification, including 3/4 buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No	There has been no clear consultation with the residents about this development. Chingford Mount area does not have the capacity to cope with as much additional housing as it does not have proper transportation links as well as enough facilities (schools, GP practices, dental offices).	I think you should not build high rise buildings in this area as it is not aesthetically pleasing. It will also block out a lot of natural light for the residents that are opposite the car parks.	-	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No Response	My only comment is that the redeveloped site MUST provide a similar retail store as existing plus adequate carparking. The current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc. (not small shops that already exist elsewhere in a high street) but also parking to enable taking their bulky shopping home by car. This cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high warehouse like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every development site.	Address the issues raised above	-	-	The site allocation requires that commercial floorspace is provided as part of new development.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  All applications will be required to submit a Construction Logistic Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
A)				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	It doesn't fit in with Chingford & Beaf stound will do what it wants, doesn't care about the people of Chingford. We need Sainsbury's at Chingford Mount. The elderly, people with disabilities, car-less families use Sainsbury's, including me. I have disabilities.		-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Mary Pickering				S446 - Sainsbury's Car Park and Adjacent Sites	No					Yes	Essential that public is fully consulted and that information is readily and easily accessible to the whole community.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Joanne Aldridge				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	1. No consideration has been taken into account on how the car park is used. The car park is used to facilitate parking for by multiple social groups. People use Sainsbury's & Argos to carry out family weekly & bulky large item purchases -> Employers are increasing the work load of people the average day is often 10/10 hours at work and family commitments at day shop to squeeze in is not practical. 3. Witham Forest is a deprived area, people on low income do not have the luxury of being able to shop on line, often low income families are refused credit / bank accounts. 4. The parking area to the right of the store is used by working parents with babies and under fives to drop off their children for day care and need parking, personally with-out parking I would have to give up work as the time frame to get to work would not allow for public transport this is a problem most working parents have. 5. At the weekend the adjoining playing fields are used by football / sports groups and it's children, many travel distance to play and visiting teams would not be able to attend. Often parents with multiple children have many clubs they need to get their children to in a set period of time. 6. At a time when we are trying to regain social interaction for many children who have suffered social & emotional development during lockdown. If parents can not get their children to these places we will see adverse effects. Developing a "55" village environment doesn't allow for new relationships and expanding social circle.	Keep the car parking. Introduce a shop creche. Planned infrastructure to support any development.	Yes	To insure the full and transparent account is noted and fed back to interested parties	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. 				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Removing a necessity for more unaffordable housing. One of the only supermarkets in Waltham Forest/Chingford that is easy to get to and has ample parking.				The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Gulzem Akan				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	More old people families who have no car will be isolated they can't afford to travel out to get milk. We use the town to meet socialise stop by get food shopping if we have no Sainsbury's or Iceland where are people supposed to buy food from!				As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
David John Anderson				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	too much too little space	reduce to zero housing	No	simply to judge	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,820 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Graeme King				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	Where is the revised infrastructure to support this development. Doctors schools etc		Yes		The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Mike Turpin				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No	No Response	Residential buildings should not be built so close to a major road as it is a health hazard	Set back the residential element of the development as far as possible from the A406.	No	To ensure that LBWF comply with the approved Local Plan.	In April 2020, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.

A)				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	No	We need Sainsbury's, too many people use it for 'OJ's to take it away. From the elderly to the young use Sainsbury's. Where will the local people shop if you take it away. Not all people drive, or can use public transport. Sainsbury's is the heart of Chingford mount. Their absence care about the local people of Chingford, they just want to be their pockets.	Just leave Sainsbury's alone. Building too many flats, will be awful. We already struggle to get doctors appointments, there's no NHS dentist appointments, schools are also a problem.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The site allocation requires that commercial floorspace is reproduced as part of new development.
-				S446 - Sainsbury's Car Park and Adjacent Sites	No Response	No Response	No Response	No		Do not build over this land. The car park provides great value to the families who reside in the community.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	No	we do not need more flats in this area. all the flats that council build either look horrendous and/or are tiny 1/2 bedroom type flats, where no one wants to live because they are so tiny. this area used to have a 1980's art deco style edison cinema until council agreed that it could be pulled down. look there now across at cherydown ave. there is a boring square, tasteless orange brick both square for a shop and offices. we cannot trust council to build anything, that block that replaced the edison cinema, that should be pulled down and a museum put up instead.	we need parking space in chingford. sainsbury's originally agreed to have this car park and that should stay as was promised to the residents. keep it as it is please.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Glynis Devlin				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	No	This site sits Sainsbury's Car Park and Adjacent Sites. These plans are not clear enough to be able to comment on a structural basis. There are not enough specifications. However, given the number of homes designated to these sites would indicate high rise developments. This is not in keeping with the local area and why would you want to develop this site with all these homes? Where are the plans for parking facilities for all the people who would live here. Local roads are already extremely congested with the added movement of traffic in and out of Sainsbury's car park. The added pressure on local services would be immense i.e. healthcare, schooling and social services. Do these developers and local council think Chingford can be changed for the better by building on every bit of open space? Chingford is not a town or city. We certainly do not want high rise developments. People who have lived in houses, in a nice area, do not want to be towered over by a building monstrosity.	don't believe there are any modifications here. leave the area as it is with some green space and sky.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	No	Lack of infrastructure.	Better infrastructure.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Adam Esbah-Eddafas				S446 - Sainsbury's Car Park and Adjacent Sites	No	No	No	No	Sainsbury is an important feature of the area.	Sainsbury is an important feature of the area.	Yes	I'm a resident and want to be involved in changes to my area.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.

Tim Hancock				S466 - Salisbury's Car Park and Adjacent Sites	No	No	No	<p>Strongly Object to this exaltation [Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding/densification to the surrounding environment negatively affecting the current residents]"</p> <p>This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and timely origin to this approach to development activity is to provide a resolution to an upstream problem created from several decisions concerning not failure to control congestion, and defend the sanctity of the family by previous and current politicians, motivated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore are affected by the shortening and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of following on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, spit and spirit, it is verily impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are a reversion of the failures that are evident in the communities of this town, and are a reversion to the failures that are evident in the communities of this town, and are a reversion to the failures that are evident in the communities of this town.</p> <p>The plan is seeking to build more homes than required by the London Plan.</p> <p>To achieve that higher number, the form of development is significantly of keeping with the existing character of the area and will cause "them" (in planning terms) to existing residents to suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.</p> <p>These proposed developments cannot be delivered with policy compliant levels of affordable housing.</p> <p>Without parking these proposed developments will disadvantage older people.</p> <p>The Consultation is flawed as non online residents have not had a chance to comment as they received no letters, advising of the plans. There has been no public meeting.</p>	<p>Reject on the basis of continued densification to local community and strain on local services, as pointed out above.</p>	Yes	<p>This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing private car to be parked, with a concept for the consideration toward the current people in the vicinity, while it is also an assault on their existing cultural and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert on our way to a time. SO YES, STRONG OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will undertake the future wellbeing of the indigenous community?</p>	Offensive Response	
Valen Ejarle				S447 - Cork Tree Retail Park	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules that are not transparent to consultees.</p> <p>Consultation on the site allocation SP2 element of the Heatham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2020-2026. This has involved the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been cancelled by political point scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had difficulty low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1000 homes per year. While EWEF has a large meeting for 100000, and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More</p>	<p>DONT WANT THIS SITE DEVELOPED AT ALL, we will lose all the shops which are being built, should our wishes be ignored, then any building would have to be...no high rise, no overlocking/over shadowing existing homes, provide parking for ALL new residents, plus replace the existing shops and existing shoppers car park for everyone to use. provide additional doctors, hospitals, dentists and schools etc, etc for all new residents. This area is already heavily polluted from the road...more homes here would be disastrous.</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>This site should be considered as part of a group comprising SA 46, SA 48, SA 49 and SA 50 possibly extended further to take into account the north circular, with full consideration of the implications for these developments on active transport infrastructure improvements to meet west public transport beyond and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population</p>	<p>Yes</p> <p>I will want to be involved, this is our life!</p>	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by the Characterisation and Intensification Study (2020).</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October, December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Mike Chimes				S447 - Cork Tree Retail Park	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. More</p>	<p>It is suggested that until master plans are developed, through consultation, for the main centres identified in LP, consultation on individual sites is flawed.</p> <p>This site should be considered as part of a group comprising SA 46, SA 48, SA 49 and SA 50 possibly extended further to take into account the north circular, with full consideration of the implications for these developments on active transport infrastructure improvements to meet west public transport beyond and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population</p>	Yes	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p> <p>This site should be considered as part of a group comprising SA 46, SA 48, SA 49 and SA 50 possibly extended further to take into account the north circular, with full consideration of the implications for these developments on active transport infrastructure improvements to meet west public transport beyond and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared Justified Effective This means that the Local Plan should be based on a robust and credible evidence base including: Research/Fact Finding: the choices made in the plan are backed up by facts. Evidence of participation of the local community and others having a stake in the area, and the Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: Sound infrastructure delivery planning. Having no regulatory or national planning barriers to delivery. Delivery partners who are signed up to it, and Consistency with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should be flexible and able to be monitored. The Local Plan should include who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process, or more significant changes to respond to circumstances such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p> <p>Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>	
Conservative Councillors (Valley)				S447 - Cork Tree Retail Park				<p>Cork Tree Retail Park This site already functions as an industrial site. However, any intensification without proper supporting infrastructure is not, in our view acceptable or practical. Although this site is adjacent to the A405, North circular, it is also opposite and adjacent to residential properties</p>	<p>Yes</p> <p>The Cork Tree retail park is not currently designated as Strategic Industrial Land. This designation will be made through Local Plan Part 1. It currently functions as an out of town retail park.</p> <p>Walham Forest has been identified need to provide additional floorpace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorpace, and the intensification of industrial provision is encouraged, whilst meeting other policy requirements – for example relating to existing residential amenity.</p> <p>Further guidance will be provided in the Industrial Intensification SPD.</p>	Yes	<p>The Cork Tree retail park is not currently designated as Strategic Industrial Land. Lloyd Parkinson				SA47 - Cork Tree Retail Park	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no half an hour public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.			Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward as a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.

Aj				SA47 - Cork Tree Retail Park	No	No	No	I live in half lane near this site! Full time is already a very busy main road, which most of the time sees traffic jams from early morning to late evening. The pollution from the road & the incinerator is appalling. Cars speed & because we are on the bend, this causes problems to get out of site turning. There's rubbish everywhere, we never see leaf clearing ball bins & the side kerings. People park where they want without any consideration for others. We are like the forgotten part of the borough. I have discussions, physical & mentally & the situation here doesn't make it any easier		Yes		As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Robert Deering				SA47 - Cork Tree Retail Park	Yes	Yes	Yes	Any new green infrastructure must be maintained. There is currently a tendency for wooded/green areas to be frequented by people with anti-social behaviour, and for them to be used to dump litter, rubbish and stolen goods. Areas like the Ching foreground, green areas of Chingford Hall Estate and Memorial Park are neglected, rubbish strewn and vandalised.	Maintenance and policing is crucial. A neglected green space will soon deteriorate and become a harbour for criminal activity.	No		The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. Any new areas of green space must be accompanied by a maintenance plan to ensure their long-term successful establishment. Any new development will need to incorporate design solutions and crime prevention measures that are reducing crime.
Judy Caddle				SA47 - Cork Tree Retail Park	Yes	Yes	Yes		Better access to the Cork Tree Retail Park is necessary as bottleneck traffic could build up on North circular preventing free flowing traffic.	Yes		The access and agree to and from this site will be reviewed with any planning application for development that comes forward.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Kathryn Uman				SA47 - Cork Tree Retail Park	No	No	No	No	On a flood plain, lots of jobs loss of businesses	leave well alone		No one takes any notice of emails	Housing sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing flood risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street/L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Cheryl Tagge				SA47 - Cork Tree Retail Park	No	No	No	No	many people work here and is a nice area for shopping with many people going to shop their on a daily basis and not fair to take it down	TO NOT TAKE AWAY THE SHOPPING CENTRE		-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Richard Iles				SA47 - Cork Tree Retail Park	Yes	Yes	No	Response	I am not sure if sufficient consideration has been given to local residents. A problem which pervades all these plans is that demolition and (re) building on this local well of itself create high energy use, high CO2 generation and above all for this site pollution which is already considerable in proximity to the North Circular Road. However, as a committed walker and member of a local Ramblers Group I am pleased to see that proposed provision of green walking routes is cited here and in other developments. The borough contains two green North-South walking corridors and lacks East to West green links between the two.	I think that, if possible, development should take place over a long time-scale. Hopefully the pollution level will reduce as vehicles become cleaner.		-	The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.
Kathryn Uman				SA47 - Cork Tree Retail Park	No	No	No	No	Storage and distribution - what does that mean? What about the shops that are there, where are they going to go? Use them regularly.	Leave this area alone		No one takes any notice of emails	Storage and Distribution are the industrial use classes that the council will encourage to come forward on this site as and when planning applications are made. This is to address an identified need for industrial floorspace in the borough.
Miss Vignali				SA47 - Cork Tree Retail Park	No	No	No	No	Unfit for the area which is residential	Should be further away from residential homes		-	The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
-				SA47 - Cork Tree Retail Park	No	No	No	-	-	-		-	This response is noted.

Conservative Councillors (Valley)				S448 - Morrisons Supermarket and Car Park				Morrisons Supermarket and Car Park Morrisons is a large, well-established retail store and the site also hosts a Barnsley's Health Club and Spa. The site has history barnyard housing on its northern boundary and playing fields to the southern side. There is further green space east. There is little information with which to gauge the density of the proposed development. The reduction of a supermarket will have a detrimental impact. We note the site is Flood Zone 2 & 3. We are aware of issues with the groundwater impact of the stadium development causing flooding in the adjacent gardens. We do not consider this to be a viable site a large scale development.					It is through the allocation of sites in Local Plan Part 2 that we can ensure site specific considerations around access to green space, appropriate land uses and reduction of flood risk can be embedded in planning policy.  Having sites allocated for development ensures that they demonstrate that flood risk can be successfully managed by following the process set out in Local Plan Part 1. This ensures that development at site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development would not increase flood risk either on or off the site.
-				S448 - Morrisons Supermarket and Car Park	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over-burdened, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only online Zoom meeting. Shortage of doctors, hospitals, dentists schools etc.				The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:  Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unit requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning. - Having no regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. - The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the OPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.	
David John Anderson				S448 - Morrisons Supermarket and Car Park	No	No	No	too much too little space.	leave alone		simply to judge	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.	
Valen Ejarle				S448 - Morrisons Supermarket and Car Park	No	No	No	The plan is seeking to build more homes than required by the London Plan. To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "Nuisance" (in planning terms) to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on street parking from flats built without adequate parking for new residents.  These proposed developments cannot be delivered with policy compliant levels of affordable housing.  Without parking these proposed developments will disadvantage older people.  The Consultation is flawed as non online residents have not had a chance to comment as they received no leaflets advising of the plans. There has been no public meeting.	DONT WANT THIS SITE DEVELOPED AT ALL. we will lose morrisons jobs to being built, which is a lifeline for older and disabled local residents who cannot travel should our wishes be ignored, then any building would have to be... no high risk, no overloading/overshadowing existing homes, provide parking for ALL new residents, plus replace the existing shoppers car park for everyone to use, provide additional doctors, hospitals, dentists and schools etc, for all new residents.	Yes	we all want to be involved... this is our life!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a brief of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations respond to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character led approach to intensification, including tall buildings and building heights. In accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Mike Chimes	S48 - Morrison's Supermarket and Car Park			S48 - Morrison's Supermarket and Car Park	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan may be rejected. Failing to comply with "rules that are not transparent to consumers. Consultation on the site allocation (LPI) element of the Washburn Forest Plan has been taken farward more or less in parallel with consultation with the main plan (LPI) for 2020-2035. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been very coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, and essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees showed, or have been difficult to get into online. In general however it has been apparent both from LPI and what has been stated at consultation meetings that major driver for the intensification of development across the borough has been a housing target of c. 3800 homes per year. Whilst LPPF has a large working list (2020), and central government guidance is driving local authorities to ensure they develop townfield sites, it is not clear that all sites selected for housing development in the borough will meet expected housing need. More	It is suggested that until master plans are developed, through consultation, for the main centres identified in LPI consultation on individual sites should be considered as part of a group comprising SA 46, 47, SA 48, 49 and 50, possibly extended further to SA 45 and also the north circular, with full consideration of the implications for these developments on active transport infrastructure, improvements to east west public transport beyond, and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed. I have been prepared. This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding, the choices made in the plan are based up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: -Sound infrastructure delivery planning. -Housing or regulatory or national planning barriers to delivery; -Delivery partners who are signed up to it; and -Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough 'x', in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.	
	S48 - Morrison's Supermarket and Car Park			S48 - Morrison's Supermarket and Car Park	No	No	This form of collecting comments does not allow me to vote my concerns about the plan, described as above. I do not think this form of collecting my comments works because it only allows me to answer prescribed questions and is pagging me to write about Morrison's supermarket. It is obvious we need supermarkets to buy food, if you remove this where will we shop?	See above	Yes	This form of collecting comments does not allow me to vote my concerns about the plan, described as above. I do not think this form of collecting my comments works because it only allows me to answer prescribed questions and is pagging me to write about Morrison's supermarket. It is obvious we need supermarkets to buy food, if you remove this where will we shop?	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: -Positively Prepared -This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: -Research/fact finding, the choices made in the plan are based up by facts. -Evidence of participation of the local community and others having a stake in the area, and -The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. Anthony G Thorne Lip	S48 - Morrison's Supermarket and Car Park			S48 - Morrison's Supermarket and Car Park	No	No	The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012. 19. Before submitting a local plan to the Secretary of State under section 22 of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1). 14(1) a Local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain. (2) The bodies or persons referred to in paragraph (1) are: (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments it is not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Domestic Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic. A number of the proposed sites are right on the boundary of the LAE2 zone and driveway of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. Part the rest of the area will also be subject to these increases and the proposed asset the natural air flows possibly result in pockets with even higher concentrations. Washburn Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being above the area to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the motters lived above. If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the 1930's that people needed space and New Towns were built with green spaces, development and open areas. This was the 1930's.	Yes	Because there are too many unanswered questions. This response is noted. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. As set out in the Local Plan, all new residential development within the borough is required to be car free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a healthier environment, parking problems and improve air quality. Additionally, Washburn Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision. The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation. Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.

At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider opening more people into an already vastly over populated area?</p>	Yes	<p>Do not trust the council or planning teams</p>	<p>Through the evidence published in the Character Interconversion Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Walham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Andrew Featon				S48 - Morrisons Supermarket and Car Park	No	No	No	<p>We need more local supermarkets with good parking not less. Morrisons is an important local facility and could be bigger not smaller or taken away. The local area has a shortage of facilities (Doctors/hospitals/schools etc) now. The local authority is restricting parking spaces when we need more and there will probably be little parking onsite for those homes. The addition of masses of extra homes will have a severe detrimental effect locally.</p>	<p>We need more local supermarkets with good parking not less. Morrisons is an important local facility and could be bigger not smaller or taken away. The local area has a shortage of facilities (Doctors/hospitals/schools etc) now. The local authority is restricting parking spaces when we need more and there will probably be little parking onsite for those homes. The addition of masses of extra homes will have a severe detrimental effect locally.</p>	Yes	-	<p>The Council sets out its strategy for managing change in the retail offers to remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality.</p>
Ahuj Patel				S48 - Morrisons Supermarket and Car Park	No	No	No	<p>The plan is to reduce the space of an existing well developed and maintained large supermarket. The supermarket would presumably be reduced in size as also suggested for the Sainsbury site down the road. The combined plans will reduce footprint for supermarkets significantly reducing choice for residents, eg cables and clothing and opticians and chemist, Argos, and other services like car wash and petrol will be at risk of closure leading to significant job losses and a detriment to the local community. Further along with Sainsbury site it is proposed to build a large number of housing, but there are no plans for developing a new school or new GP surgeries which over time will result in poor access to these services and your existing residents. The road and transport infrastructure is not improved either leading to significant congestion and over-crowded buses.</p> <p>It is observed that in both Sainsbury and Morrisons car park approximately 1/4 to 1/2nd of the car parks are not used, so could be developed on. However, this should not come at the reduction of space to the existing supermarket sites. In fact with more housing the need increases.</p> <p>These 2 sites are important to the surrounding communities - Walham Forest, Chingford, South Woodford, Leyton, Highams Park.</p>	<p>Not reduce footprint size of supermarket. Redone to utilize only provided car park spaces typically unused, improve transport links and provide additional schooling and GP surgery for the increased population and already stretched existing resources.</p>	No	<p>To ensure requirements are met</p>	<p>The Council sets out its strategy for managing change in the Borough's retail offer to ensure that it remains relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain its vitality.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.</p> <p>The Council is committed to playing its part in tackling the housing crisis. Lloyd Parkinson				S448 - Morrisons Supermarket and Car Park	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.		Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Maria Broom				S448 - Morrisons Supermarket and Car Park	No	No	No	Ok so I do not really understand the wording of the above as I am not a councillor or work in the planning department of a council or even have a brilliant education BUT I AM overwhelmed by the amount of development that the council wants to fit squeezed into Waltham Forest over the next 10 years or so. We are overcrowded already, schools, dentists, and doctors are FULL UP. This area is a state with so many problems already what with our streets dirty and crime a problem, people not looking after their homes, its already a dump, so stop making it worse with flats galore with hardly any parking. Stop ruining Cleverly Hill etc.....	Please re read the above as I have the same message to say again here. The wording is hard to reply to as to me it sounds double-dutch. Why change a perfectly good supermarket and gym. Sort out the building at the junction of the entrance to Morrisons. This hasn't been touched for years.	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
M Crump				S448 - Morrisons Supermarket and Car Park	No	No	No	We have ENOUGH housing in Waltham Forest what we need is this car park leaving well alone we need supermarkets and parking	no	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Shezar Dar				S448 - Morrisons Supermarket and Car Park	No	No	No	Consultation of local residents has been very poor. Little if anything has been posted I'm unaware of any face to face dialogue. This seems to be another attempt to slip things through the back door.	This area cannot cope with additional housing. The local facilities just do not exist. It's hard enough to get an appointment with a doctor and a dentist as it is without piling more people into the area. School places is another issue. There was very little increase (bar a nursery 6 years on) after the dog stadium was built. The covid job couldn't even get on a bus to Walthamow at peak times as there was such an increase in the local population due to housing and the crowded billet roundabout was always ground to a halt. This is going to go to make everything even worse!	Yes	As a local resident of 20 plus years we should be integral to the decision making process.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Conservative Councillors (General)				S448 - Morrisons Supermarket and Car Park				We do not believe the designation of this site to be "effective" given the embedded value of the existing uses far exceeding the likely residential development value of the site when the Council's policies of seeking 50% affordable housing are taken into account. This is a well established retail store and adjacent gym. The designation of this site as a "Transformation" site suggests very tall buildings which would be out of keeping with the suburban character of the area and over-dominant in an area of two storey terraced and semi-detached housing. It would also be downwind of the waste incinerator and the additional cost of construction to ameliorate this would not appear to have been considered in assessing the potential viability. We do not believe this site should be considered for any greater level of development than would be supported by a "reinforcement" designation with an FAR no greater than 1.4.		No		<p>The site referred to is not identified as suitable for tall buildings in Local Plan Part 1. Constraints such as the proximity of the north circular are identified in the Place Making plans and will be expected to be taken into account in any proposed development to ensure exemplary design and high-quality place making. Local Plan 1 also requires any new development to incorporate design solutions and crime prevention measures that assist in reducing crime and enhancing community safety.</p> <p>The identification of sites as appropriate for a Transformation, Transition or Reinforcement approach to character-led intensification aligns with evidence in the Characterisation and Intensification Study (2019), and design-led area based masterplans, feasibility studies and area frameworks. Following adoption, all proposals for redevelopment will be subject to the policy tests relating to Character-led intensification and high quality design set out in Local Plan Part 1, Local Plan Part 2 gives the opportunity to establish additional site specific requirements and guidance to ensure that development is of the highest quality and appropriate for its location.</p> <p>All submitted planning applications that do not meet the London Plan "text box" definition are subject to viability review, which the Council has independently assessed.</p>
Graeme King				S448 - Morrisons Supermarket and Car Park	No	No	No	0 provision for support services. Doctors, dentist and schooling which is already lacking in availability at acceptable numbers without adding further property developments at the Morrisons and Sainsbury's site.	Provision of a junior school and health centre as there has been no new provision including the Bush, Walthamstow dog development and now the 2 proposed developments at Morrisons and Sainsbury's.	-	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>

Sean Dewey				S448 - Morrisons Supermarket and Car Park	No	No	No	No	you are proposing to S448 Morrisons's supermarket and car park. It states that there will be a re-provision of existing retail use but at a reduced floor space while also saying that you aim to have 230 new homes on this site and also has a yellow star for where you would like to see height which is right on a corner in front of where the supermarket is. If this results in the loss of people's jobs, and reducing the size of Morrisons's supermarket to a size of a large Tesco express then I would see this as most unacceptable when you have a whole large car park to do the development on.	you like to use this phrase in relation to existing retail properties such as Sainsbury's and Morrisons: "The provision of existing retail use at a reduced floor space", which I guess would mean reducing these supermarkets to a size of a large Tesco express store which then you would have a new layer on the development proposal. To make this development legally compliant, you will need to move the development further away from Morrisons's and use the side and middle area of the car park and not demolish the supermarket or partially demolish it for flats. This includes no loss of people's jobs.		-		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. Kathryn Uman				S448 - Morrisons Supermarket and Car Park	No	No	No	No	The site is a flood plain and unsuitable for housing. No mention is made of replacing the fitness centre and petrol station.	store should be enlarged and no housing on the site.	No	No one takes any notice of emails	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.	
-				S448 - Morrisons Supermarket and Car Park	No	No	No	No	Morrisons is a valuable and very reasonably priced supermarket. Also on the site is a fitness centre. Neither of these should NOT be demolished and replaced with housing	NO COMMENT	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The Council sets out its strategy for managing change in the retail offer to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough.	
Kathryn Uman				S448 - Morrisons Supermarket and Car Park	No	No	No	No	No new building on flood planes. Not environmentally sound to demolish buildings just to replace them. Would Morrisons go elsewhere if they had to close for some time? Where will people shop if this and Sainsbury's close? Also health centre what about that?	This site is not suitable for any redevelopment	No	No one takes any notice of emails	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.	
Mike Georgou				S448 - Morrisons Supermarket and Car Park	No	No	No	No	Local people will be deprived from vital services, e.g. place to go grocery, use to reduce floor space and reduced parking spaces. The right of the development will not keep up with the character of the area. The number of extra homes will lead to strain on public services, additional traffic and congestion to already heavily congested area.	The supermarket space and parking should be left as is the new buildings should be no more than 3 storeys with provision for parking.	No	People who live in the should have a say on the area future	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements, and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
Bill Rodney				S448 - Morrisons Supermarket and Car Park	No	No	No	No	It is increasing population without increasing retail and social infrastructure provision. It is over development. It will increase pressure on car parking spaces causing pressure on surrounding residential areas. You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets	Reduce residential density	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 63,000 homes per year across London. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. Sean Dewey				S448 - Morrisons Supermarket and Car Park	Yes	Yes	Yes	My criticism of this development is similar to my Sainsbury's criticism as well this result in the loss of workers jobs. It states that there will be re provision of existing retail site at a reduced floor plate, does this mean that the supermarket will become smaller to make way for housing and will this affect workers jobs. What will happen to the garden (top section where people go to buy garden plants by the side of Morrison's).	Similar to the sainsburys by crooked billet. I want to see improvement to river ching and the green space that goes alongside the morrison's supermarket. I do not want to see loss of existing trees/shrubs on this site area that goes along the side of the supermarket.  I highly recommend that you keep the existing outdoor garden (shopfront) by the side of Morrison's as lots of people including myself rely on buying these plants for our gardens as they are cheap and not expensive. If the supermarket is to become smaller then I recommend that you make sure that people jobs in the supermarket are not affected by this as this will result in protest/public upsur and strikes.	No	-	The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
Pete				S448 - Morrisons Supermarket and Car Park	Yes	Yes	Yes	Like all the other proposals, it's just an updated list to the last list they put out a few years ago. They're not definitely going ahead with anything unless the relevant companies want to sell their land or the council wants to repossess any of the properties? It's all what could be done to those sites and it's definitely going to happen.	None	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as 'Call for Sites' exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the councils decisions when deciding scope and location of development in the borough. We feel the sites chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.
Kay Anderson				S448 - Morrisons Supermarket and Car Park	No Response	No	No	Will need local supermarket which residents can walk to. Why is council building housing in excess of requirements by the mayor of London?	Why is council building more houses than requested by mayor of London?	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. These policies also support new retail uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Mark Feakes				S448 - Morrisons Supermarket and Car Park	No Response	No	No	It seems ridiculous to try and build even more homes and impact local amenities to an area that's already busy. My family is already having to travel into a more expensive travel zone to go back on ourselves as it takes three times as long to get to Watlington as Chigfold Mount now. This will only make things worse. Not sure what the overall ambition is - is the hope longer term residents will gradually move out of the area?	While there is no extra infrastructure things should be left as they are. I encourage the decision makers behind this to travel to Chigfold on the bus from the Town Hall to experience things for themselves.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
-				S448 - Morrisons Supermarket and Car Park	No Response	No	No Response	Car access into and out of the site is heavy and single lane, this would add to the traffic congestion. The end of Morrison avenue at the junction is often congested in all 4 directions and there is no option to widen the roads.	Widening of roads to enable access, across the junction (impossible because of road structure, and all down Morrison Ave	No	-	Access and egress to and from the site will be reviewed as part of the planning application process.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Wastebank Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

Jan Prior				S448 - Morrisons Supermarket and Car Park	No Response	No	No	*Potential for height" indication on map has not been discussed with wider community and other interested bodies in the borough.	For more local consultation, including borough-wide questionnaires, both to work to be approved that does not have at least a 50% approval rate.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S448 - Morrisons Supermarket and Car Park	No	No	No	New housing will increase pressure on already inadequate local services eg. schooling, health and retail. No justification for reducing the existing retailer floorspace.	Reduce residential density.	-	-	The London Plan (2021) sets a 32 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,000 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S448 - Morrisons Supermarket and Car Park	No Response	No	No Response	My only comment is that the redeveloped site MUST provide a similar retail store as existing plus adequate carparking. The current facility here is very valuable and much used and needed by the local community. We need not only easy access to large stores for food, DIY, white goods, gardening, etc. (not small shops that already exist elsewhere on a high street) but also parking to enable taking their bulky shopping home by car. This cannot be easily done by public transport! There should be no significant reduction in retail floorspace or carparking unless absolutely necessary or if the store owner wishes to. Also it can be very difficult and expensive to provide flats above large high warehouse-like stores without noise and pollution problems. Not all sites are suitable for housing and there is no need to dogmatically follow the mantra of providing high density housing at all costs on every "development site.	Address the issues raised above	-	-	The site allocation requires that commercial floorspace is provided as part of new development. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. All applications will be required to submit a Construction Logistics Plan (CLP) prior to commencement of the development which will include suitable measures and monitoring methods that will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

				S448 - Morrisons Supermarket and Car Park	No	No	No	No	Morrisons is a much needed supermarket and petrol station. Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Very much doubt? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT	-	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.  The Council sets out it's strategy for managing change in the Borough's retail offer to ensure that it remains relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality.  This response is noted.
				S448 - Morrisons Supermarket and Car Park	No Response	No	No	No Response	Has there been any consultation at all with local residents?	Reduced number of residences, more family homes not flats, the area is now saturated with flats	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Jeanne Aldridge				S448 - Morrisons Supermarket and Car Park	No	No	No	No	1. Morrisons/ supermarket site throughout its opening period is used by a cross section of the community and during the day by the senior generation and community groups (including disabled people in mini buses, fire brigade, home helps who bring their clients to the store by personal vehicles or they can make their own purchases & retain a degree of independence and a tie to the outside world). To some it is not just a place to shop, but also a place to meet friends, in the cafe, a day's outing for some. Many people do not qualify for the blue badge but have needs for parking. 2. The area marked for housing development is close to the store where there is greater need for parking, it also blocks the through route along the river Ching 3 the area will become a danger zone, children playing by open water, moving vehicles that are becoming even more of a dumping ground, poor lighting, a closed development either increasing isolation and crime in an area already experiencing high crime and anti-social behaviour. 4. The language used throughout the soundness consultation is deliberately written to only reach high level academics. The people of Chingford come from many parts of the world being working and contributing to the area, I have not seen any documentation written in other languages, this form itself is diverse and difficult to use. It does not allow for a fair representation.	Housing located to the area adjacent to the gym (opposite end of the carpark)	To insure the full and transparent account is noted and fed back to interested parties	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The Council sets out it's strategy for managing change in the retail offer to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new retail uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.	
Jane Sias				S448 - Morrisons Supermarket and Car Park	No Response	No	No	No Response	It's hard to grocery shop in the borough with adequate parking, especially for those that benefit from family and disabled parking, unless you are building more schools and doctors this will make borough services worse.		Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a newsworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kenneth Clements				S448 - Morrisons Supermarket and Car Park	No Response	No	No	No	Chingford needs more commercial sites ie jobs, not housing		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities.

Tim Hancock				S448 - Morrisons Supermarket and Car Park	No	Response	No	<p>I strongly object to this expropriation [Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, degradation to the surrounding environment, negatively affecting the current residents"]</p> <p>This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come, a significant and truly origin to this approach development activity is to provide a resolution to an upstream problem created from several decisions concerning failure to control congestion, and defend the sanctity of the family by previous and current politicians, motivated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore are affected by the decreasing and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and as a result of following on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, spit and sweat, it is verily possible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are evident in the town of Waltham Forest, where you are building taller and taller buildings with no parking facility. You are also creating more shops and retail when you can't get any taken for those already in use on high street. And when you see those who shop in Chingford supposed to park when the Sainsbury's car park is the only parking area? If you want to be free shopping from Sainsbury's and it is heavy, where do we park? Another scheme on paper that remains housing with no parking and to demolish already over-crowded facilities, in Chingford the school area full of GPs, shopping, transport links are not sufficient to take this kind of wealth of people. Also as taking more and more of the native you destroy what is a green, open air and village like feel to this part of the Borough. For years you have created Chingford like an afterthought with little care or in comparison to the 'poorer' parts of Waltham Forest, yet now you have run out of places to build you are keen to just build them and park people in tight. Everything is under too much strain already. Try building the resources first, including a hospital that we don't have to pay £12.50 a day to visit and then think of some sensible lower buildings rather than this.</p>	Reject based on continued degradation to local community and strain on local services, as pointed out above.	Yes	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Sainsbury's using tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at all admitted, spend, with a consent for the consideration toward the current people in the vicinity, while it is also an assault on their existing cultural and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONG OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
T Gaudi				S449 - Sainsbury's Hall Lane	No	Response	No	<p>throughout Waltham Forest you are building taller and taller buildings with no parking facility. You are also creating more shops and retail when you can't get any taken for those already in use on high street. And when you see those who shop in Chingford supposed to park when the Sainsbury's car park is the only parking area? If you want to be free shopping from Sainsbury's and it is heavy, where do we park? For years you have created Chingford like an afterthought with little care or in comparison to the 'poorer' parts of Waltham Forest, yet now you have run out of places to build you are keen to just build them and park people in tight. Everything is under too much strain already. Try building the resources first, including a hospital that we don't have to pay £12.50 a day to visit and then think of some sensible lower buildings rather than this.</p>	Everyday people should have a say in these proposed works. The legal person you put this under means nothing unless you are a lawyer, journalist or architect. Yet it is real people lives, their facilities and their skyline that you are impacting. This definitely feels like build them high and park them in tight. How about building a hospital that we don't have to pay £12.50 to access?	Yes	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping, work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is optimising the use of space that exists within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow flatlet units in Designated Centres to be converted to residential uses at the ground floor level. This move has offered a level of protection for many of the Borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontage, are having residents located within the Borough's centres, ensuring that most people daily needs can be met within a close by their front doors. This has knock on benefits to health, air quality and saving congestion on the Borough's road network. These policies also support us to high street and town centre uses that emerge in the future to help maintain their vitality and distinction.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023).</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of homes to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>	
Catherine Coleman				S449 - Sainsbury's Hall Lane	No	Response	No	<p>Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/night, additional demand for parking. Consultation is flawed as no walkable/pedestrian meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools etc.</p>	Build homes to the height of existing buildings and provide healthcare and education facilities etc.	No	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2023).</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/nightlight.</p> <p>This response is noted.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied in the examination that the Local Plan meets the four soundness tests which are:          - Positively Prepared          - This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.          - Justified          - This means that the Local Plan should be based on a robust and credible evidence base involving:          - Research that reflects the choices made in the plan are backed up by facts.          - Evidence of participation of the local community and others having a stake in the area, and          - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.          - Effective          - This means the Local Plan should be deliverable, requiring evidence of:          - Spatial infrastructure delivery planning.          - Having no regulatory or national planning barriers to delivery;          - High quality design aligned to local and          - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</p>	
Terry Miles				S449 - Sainsbury's Hall Lane	No	Response	No	<p>1. Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs, and is informed by agreement with other authorities, so that current need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.          "No an NPPF should be seeking to preserve the "local character" of the area residents close to Chingford's High Street Park as the area has a history of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter &amp; St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents views are being ignored.          The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 30 years and LDFP is proposing 27,200 new homes by 2030 - a very significant excess of 15,000 over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why there pressure on local councils to build on every possible space?          Also, the housing target in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.          The majority of the new properties are flats - the Preditents has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that</p>	no one is listening to the residents of Chingford - !!	No	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be intermediate and the expected mix of uses. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.</p> <p>In Local Plan Part 1, Policy 7- Designated Heritage Assets: There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to other substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
