Martin				S456 - Chingford Library and Assembly Hall	No	No	No	Out of keeping with area, lack of parking, disadvantage elderly residents. Existing residents overlooked. Loss of privacy daylight/sunlight. Shortage of local amenities schools, doctors dentists	Build to existing local building height, provide parking, schools, all that's needed by new residents	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Susan Reynolds				S456 - Chingford Library and Assembly Hall	No	No	No	New build not in keeping with the area	Smaller build	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Terry Milnes				S456 - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fulfills the legal duty to meet the development needs of their area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects. (National Planning Policy Framework, page 6).	don't do it	No	no one is listening to the residents of Chingford - !!	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  In April 2019, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design, and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Gabrielle Marshall				S456 - Chingford Library and Assembly Hall	No	No	No			No	-	This response is noted.

Cathy Houchin				S456 - Chingford Library and Assembly Hall	No	No	No	The plan is totally out of character to the local area	Lower stories.	-	-	Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
-				S456 - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fulfils the legal duty to meet the development needs of the area, align growth and infrastructure, improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).  This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.  It does not fulfil the Council's duty to be sustainable, in the following ways:  1) It is not economically sustainable  The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 364) states 12,640 new homes over 10 years and IDP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.  The plan, and specifically the library development, does not "positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through heavy tower blocks. 2) It is not socially sustainable  We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan are not aligned with the needs of the area, business, a vibrant community.	I do not believe that the local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs.  This programme of intensification prioritises housing above all - to the significant detriment of the environment, local business, and the conservation area.  It does not fulfil the Council's duty to be sustainable, in the following ways:  1) It is not economically sustainable  The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 364) states 12,640 new homes over 10 years and IDP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.  The plan, and specifically the library development, does not "positively and proactively promote economic growth. 				S456 - Chingford Library and Assembly Hall	No	No	No			No	-	This response is noted.
Joy Heatherley				S456 - Chingford Library and Assembly Hall	No	No	No	The current plans do not appear to take into account the concerns of major neighbouring landowners (City of London Corporation) or the difficulty that Epping Forest District Council has had in obtaining any planning permission since 2018 for developments due to negative impact on the Epping Forest Special Area of Conservation. The neighbouring borough of Enfield is building vast numbers of new flat homes close to the boundary of what is a very short distance from Chingford and Highams Park.  Any development of over 3 stories in North Chingford, and specifically in the Conservation Area, would not meet the criteria of Policy D9 of the London Plan. The Local plan is not consistent with regional and national planning policy, which states that:  A) Tall buildings should only be developed in locations that are identified as suitable in Development Plans.  B) Development proposals should address the following impacts: i) visual impacts a) the views of buildings from different distances  C) long-range views " these require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views. C) mid-range views from the surrounding neighbourhood" particular attention should be paid to the form and proportions of the building. It should make a positive contribution to the local townscape in terms of height, proportions and materiality. C) immediate views from the surrounding streets " attention should be paid to the base of the building. It should have a clear relationship with the street, maintaining the pedestrian scale, character and vitality of the street. Where the edges of the site are adjacent to buildings of significant lower height, the edges of the site should be designed to be in keeping with the surrounding buildings.	Please see the suggestions outlined above.	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC) The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPAs), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade II listed buildings and their settings as their retention helps to ensure the boroughs history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough.  The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.

Stephen Hudson				S456 - Chingford Library and Assembly Hall	No	No	No	The proposed structure is out of keeping with Chingford green. It should be limited to 2 storeys. There are no parking facilities.	Maximum 2 storeys. Underground car parking.		To make sure the plan meets the wishes of local residents.	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Bill Rodney				S456 - Chingford Library and Assembly Hall	No	No	No	It is near development. It will increase pressure on car parking spaces causing pressure on surrounding residential areas. Temporary loss of amenities while redevelopment undertaken. You should not be encouraging new development because of embedded carbon contrary to net carbon zero targets.	Do not demolish. Retain existing structure. Protect the continuing provision of community facilities. Temporary relocation of library and meeting if necessary because of disturbance or noise at developer's expense. Such temporary provision to be agreed with community groups.	Yes	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
Kashif Ghoprah				S456 - Chingford Library and Assembly Hall	No	No	No	I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs.  This programme of intensification prioritises housing above all - to the detriment of the environment, local business, and the conservation area.  It does not fulfil the Council's duty to be sustainable, in the following ways:  1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1) requires 2,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks.  2) It is not socially sustainable We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with resident views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would materially change the character of the area, urbanising the gateway to the Forest. It does not fulfil a social objective to support strong, vibrant and healthy communities.  3) It is not environmentally sustainable	Please see above suggestions.	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ian Connor				S456 - Chingford Library and Assembly Hall	No	No	No	I do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs.  This programme of intensification prioritises housing above all - to the detriment of the environment, local business, and the conservation area.  It does not fulfil the Council's duty to be sustainable, in the following ways:  1) It is not economically sustainable The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1) requires 2,640 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not 'positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through busy tower blocks.  2) It is not socially sustainable	Please see the suggestions above.	Yes	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.

John Aulis				S456 - Chingford Library and Assembly Hall	No	No	No	The height of the proposed building is not in keeping with the surroundings	Reduce the height of the buildings	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
				S456 - Chingford Library and Assembly Hall	No	No	No	We do not believe that the plan fails, the legal duty to meet the development needs of the area, align growth and infrastructure improve the environment, mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).		No	-	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2037/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption on the favour of retention and enhancement of Designated Heritage Assets such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permission will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset in the borough. A character-led approach is supported by evidence from the Characterisation and Identification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Tim Hancock				S456 - Chingford Library and Assembly Hall	No Response	No Response	No Response	<p>I Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, denigrations to the surrounding environment, negatively affecting the current residents)</p> <p>This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions, catering on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is supported by corporate interests who are not attached to the community and therefore unaffected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally responsible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that we see in a modernist housing model, which is a complete failure to provide a sense of community and belonging to its residents.</p>	Project based on continued denigration to local community and strain on local services, as pointed out above.		This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by impacting anyone at breakneck speed, with a disregard for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I see have to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
Raymond Moffat				S456 - Chingford Library and Assembly Hall	No	No	No	The local residents don't want this development but the council is pushing ahead with it despite their objections	Comply with local residents views on the size and character of the proposed development	Yes	There is no point putting the proposal out for public consultation if you don't then listen and act on their views, participation is part of that process	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Brian Dujon				S456 - Chingford Library and Assembly Hall	No Response	No Response	Yes			No	-	This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Andrew Fearn				S456 - Chingford Library and Assembly Hall	No			Too many houses not enough local parking, too high so not suitable for area			-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 3 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Miguel Loureiro				S456 - Chingford Library and Assembly Hall	No	No	No	There is a petition with over 4,000 signatures saying residents don't want any development in North Chingford. This has been completely ignored by Waltham Forest Council. I always thought the council was there to listen to its residents, how wrong was I...		No	I'm a resident so I feel I should have a say in what happens to my neighbourhood	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Kay Anderson				S456 - Chingford Library and Assembly Hall	No Response	No	No	30 new homes cannot possibly make a positive contribution. Council is building houses above requirements, why 30 plans under Clark Coughlin watch... see why she "wags"?	Council needs to be thoroughly investigated re any planning as corrupt as the core. Follow the money, does not benefit Chingford citizens at all.	Yes	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Paul Cooke				S456 - Chingford Library and Assembly Hall	No	No	No	This is a Conservation area, as such redevelopment of any kind would be wrong. The redevelopment proposed though is particularly unsound as it is not remotely in keeping with the surrounding area. As such would be impossible to implement in any compliant way in a Conservation area.	Realistically a Conservation Area cannot be redeveloped. Any work that has carried out would have to be in keeping with the area.	Yes	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>
Anthony G Thorne Lip				S456 - Chingford Library and Assembly Hall	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>18. Before submitting a local plan to the Secretary of State under section 22 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35; and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 34(1).</p> <p>18(1)(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(a) such of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan,</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these issues will be reduced I do have my doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are a right on the boundary of the ULEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. The rest of the area will also be subject to these increases and the proposed aspect the natural air flow possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density hung allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In the it was realised in the 1930s that people needed space and New Towns were built with more development and more space. This is the 1960s is</p>	No	Because there are too many unauthorised work	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to make safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Marlyn Trantham				S456 - Chingford Library and Assembly Hall	No	No	No	Does not comply with the duty to cooperate. If it did, then residents' view would be cooperated with. We do not want this development in our Conservation Area.	Modify the Local Plan to ensure that the existing library and Assembly Hall remain as built. Reduce the hire charges for the Assembly Hall and you may find that the income received will offset the running costs. Why do you want to add a Cafe to the library space? There are already 15 cafes within a half a mile of this location. Also, the library should be a built place and the last thing needed is another gathering point for mothers and their screaming kids!		Looking forward to the Zoom meetings on the 23/11 and 13/12 to see how the Council continues to divert around all the questions!	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document is available for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Helen Chivers				S456 - Chingford Library and Assembly Hall	No	Response	No		The new development should be no higher than 3 stories. Retail and commercial uses is not required as there are already enough shops/cafes in North Chingford and we already have many which have shut down. There is inadequate parking for new flats on this site. The new building should be in a traditional style in keeping with surrounding houses and to enhance the heritage site.	Yes		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required in some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future, supporting them as they evolve and develop to continue to help residents to meet their daily shopping work and recreational needs as well as helping the Council ensure an effective delivery of its 15-minute neighbourhood objectives, which reduces the dependency on car use and ownership. Part of ensuring the resilience of our High Streets and Town Centres is by optimising the use of spaces that exist within them. The Council has recently adopted an Article 4 Direction which removed permitted development rights which allow for certain uses at designated Centres to be converted to residential uses at ground floor level. This move has offered a level of protection for many of the borough's shopping parades that are occupied by retail uses such as shops and cafes. This helps to retain the character and vitality of our High Streets and Town Centres. Delivering housing above an active frontages and having residents located within the borough's centres, ensuring that most people's daily needs can be met within a close by to their front doors. This has knock-on benefits to health, air quality and easing congestion on the borough's road network. These policies also support new high street and town centre uses that may emerge in the future to help maintain their vitality and distinction.
Yvonne Sanders				S456 - Chingford Library and Assembly Hall	No	Response	No	Is the Plan "sound? There are 4 tests at para 35 of the NPPF:  Has the Plan been "positively prepared? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.  Has an LDFW been seeking to preserve the "local character" of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 4 story building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 5,000 signatures objecting to this particular development proposal and residents' views are being ignored.  The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1) 164 states 12,640 new homes over 10 years and LDFW is proposing 27,000 new homes by 2030 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?  Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.  The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing types.	Modifications: Ensure that the very strongly expressed wishes of local residents are heard and incorporated into designs. ANY new developments in North Chingford are no more than 3 stories in height so that they do not spoil the historic context and beautiful views on make a delightful suburban setting into an inappropriate urban scene as Policy D9 of the London Plan.	No	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of new builds to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centre.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest's Waste and Recycling guidance for the developers sets out operational requirements and measures that enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Tom Clarke Mgr				S456 - Chingford Library and Assembly Hall	Yes	No	Yes	We remain of the position that this site allocation compromises the function of the Assembly Hall as an important performance and rehearsal venue for local groups. Whilst floorspace as set out within the site requirements is one indicative measure of effective provision, it is vital that sufficient volume is available as well as supporting facilities and infrastructure such as sound and lighting and changing/dressing rooms. As such the narrow focus of the local council negatively impact on provision and cause harm to the social and cultural well-being of the local community. Loss of function would constitute loss of provision and would therefore be contrary to Local Plan, London Plan and NPPF policy.  As set out at the previous stage of consultation we do not necessarily object to this site being redeveloped or intensified, although noise-generating and residential uses are not necessarily compatible unless carefully designed. We do object to the insufficient focus on adequate re-provision. We note the Council officer's response to our previous comment that specific matters can be addressed at application stage, but we consider the response fails to appreciate the importance of usability of space and that the narrow focus on floorspace would become an adopted policy position should this plan pass unamended.	If this site allocation is to be retained we recommend reconsideration of the bid to ensure the function of the Assembly Hall is maintained, not just floorspace, to ensure adequate retention or re-provision and to ensure the hall remains fit for purpose meeting the needs of its users.	Yes	The threat to this facility is of concern to us given other losses across the wider area extending beyond the borough.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  This response is noted.

Linda Wesley				S46 - Chingford Library and Assembly Hall	No	No	LBWF should be seeking to preserve the 'Local Character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of north London at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? It is not justified. Developers should be required to build on land/sites that they have received permission to develop within a reasonable period and NOT land bank it, rather than redevelop more new sites. It is clear that any tall (more than 3 storey development) at any of the locations in North Chingford identified in the LP2, would NOT meet the criteria of Policy P29 of the London Plan. There are also issues relating to lack of parking and impact on the numbers of residents requiring school places, GP's and the transport links are not great, so traffic congestion in the area will increase.	As at summer 2020, the Council had over 1,500 empty properties. More should be done to ensure that existing empty homes are brought back into beneficial occupation promptly. In addition, developers should be required to build on land/sites that they have received permission to develop, within a reasonable period and NOT land bank it, rather than redevelop more new sites.	-	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher densities in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to ensure safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-used and land to generate high numbers of private car/instored vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.	
-				S46 - Chingford Library and Assembly Hall	No Response	No Response	I am informed that you are planning to build 1,815 new flats in Chingford. This will bring intolerable pressure on all our local essential services including doctors, hospitals and schools. Why are you more interested in bringing in thousands more residents than in the welfare of your residents who have been here many years? I would welcome an answer to this question. Michael Learner (resident since 1975).	Stop building any new flats.	No	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The London Plan (2021) sets a 12% minimum housing target for Waltham Forest of 12,640 new homes (1,054 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target table of the Council's identified housing need of 1,815 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	
-				S46 - Chingford Library and Assembly Hall	No	No	It does not fulfil the legal duty to assess the development needs of their area; also growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).	do not believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs. This programme of intensification prioritises housing above all - to the significant detriment of the environment, local businesses, and the conservation area. It does not fulfil the Council's duty to be sustainable, in the following ways: 1) It is not economically sustainable: The Council is seeking to build more than the London Plan requires. The London Plan (Pg 4.1 Pg 164) states 12,640 new homes over 10 years and LBWF is proposing 17,000 new homes by 2035 - a very significant excess of 42% over the required target. The plan, and specifically the library development, does not positively and proactively promote economic growth. Indeed, it has been opposed by local shop owners who are concerned that development of the library into a cafe and retail space would in fact act as damaging competition. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to drive visitors and economic prosperity, rather than homogenising the area through binary lesser models. 2) It is not socially sustainable: We do not believe that the Council has entered into joint working with good faith. Consultation with residents has been poorly managed, with residents views seemingly disregarded at all stages of the development process. In addition, the suggested developments included in the Local Plan would materially change the character of the area, undermining the gateway to the Forest. It does not fulfil a social objective to support strong, vibrant and healthy communities, by ensuring that a sufficient number and range of homes can be provided to meet the needs of present and future generations; and by fostering well-designed, beautiful and safe places, with accessible services and open spaces that reflect current and future needs and support communities' health, social and cultural well-being, and regeneration should take into account the aesthetic, the historic context and the value of existing buildings. 3) It is not environmentally sustainable: The plan, and specifically the library development, does not positively and proactively promote economic growth. There are enough cafes in Station Road, we don't need any more. This is the opinion of many local shop owners. Whilst we need new housing, we need development that reinforces the unique character of North Chingford. Its unique character is why we live there and we want to encourage more people to visit. To build on the conservation area will seriously damage its unique character and have a detrimental effect on our enjoyment of our local area.		-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  In Local Plan Part 1, Policy D2 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any divergence from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Nanna Monoroff				S46 - Chingford Library and Assembly Hall	No	No	I believe that the Local plan, specifically referring to the development of the North Chingford Library and Assembly Hall, does not meet the area objectively assessed needs.  This programme of intensification prioritises housing above all - to the significant detriment of the environment, local businesses, and the conservation area.  It does not fulfil the Council's duty to be sustainable, in the following ways:  1) It is not economically sustainable  The Council is seeking to build more than the London Plan requires. The London Plan (Pg 4.1 Pg 164) states 12,640 new homes over 10 years and LBWF is proposing 17,000 new homes by 2035 - a very significant excess of 42% over the required target. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.</p>
Vanda Collins				S456 - Chingford Library and Assembly Hall	No	No	No	There is no infrastructure in place e.g doctors schools. Parking is already very limited. Whippes Cross hospital can cope with the amount of patients it has.		No	-	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>Whippes Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2019, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whippes Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character led, which allow a new state of the art hospital to be developed alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.</p>

If yes, please explain why?	Council's response
				S456 - Chingford Library and Assembly Hall	No	No	No	Your council already spent near enough a million on redecorating this library when you 'upgraded' it and the hall next door, what happens if that you make it much more expensive to the hall that grass the local film makers no longer want there, you also made the library worse by getting rid of all the nice wooden bookshelves and not making the children's area big enough, now you propose to change it all again - who to say this won't just be another big waste of money, and also now you want to put flats on top of the library, a lot of children go to the library, it should be a place of peace and calm, not worrying about who's living above the library, and how on earth is this going to make the area nice for residents who live in this area now? It cannot and you are showing disregard for people who live around the library now. It would be nice if you could expand the library and make it a real place of learning and restore nice old wooden fittings, make the hall cheaper to use and encourage local groups to use it and put on talks and theatre productions there for children, but we do not turn into a block of flats effectively.	make the library a central place for peace and learning, it doesn't need noisy flats above it, the flats above it will take much away from the fourth floor as the proposed building works those of more and more flats makes away from the lovely area of Chingford.	-	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Christine Shephard				S456 - Chingford Library and Assembly Hall	No	No	No	LBWV should be seeking to preserve the local character of the area. This would be significantly changed with the building of tall blocks of flats. The proposed plan for five stories in a conservation area need to be a village green, close to existing listed buildings seriously compromises the existing village feel of the area.	The outstanding need is for houses with gardens rather than flats with no need for homes with outside space or car parking spaces. Building housing with no parking means trades people or those needing personal transport to work will not be able to live in these units. This will exclude many who do the most needed for a vibrant, integrated population.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Pauline Whitbread				S456 - Chingford Library and Assembly Hall	Yes	No	No	1. Has the plan been positively prepared? LBWV plan for the changes to the Assembly Hall and Library has not been positively prepared. LBWV has not provided a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities. This means that unmet needs from neighbouring areas is accommodated when it is practised to do so and is consistent with achieving sustainable development. LBWV should be seeking to PRESERVE the LOCAL CHARACTER of the area. Residents close to move to Chingford and Highams Park as they are both low rise suburbs. If LBWV does not agree with this statement then why did you knock down the Chingford Hall flats as well as the Catholic centre and replace the arcades with housing? They both became ghettos, so why are you considering creating ghettos again? North Chingford and Highams Park are the gateway to Epping Forest. It is totally inappropriate to change the character of the area from low rise suburban housing to tall high rise flats that will be totally unsuitable for the windows to the forest. Queen Victoria gifted Epping Forest to the people and the residents of Chingford have a duty of care in all aspects of ensuring the forest is well cared for as well as the window/gateway to the forest is also appropriate. Witham Forest is the oldest building in the Borough situated next to the Assembly Hall, to demolish such a 4 to 6 storey building would be totally inappropriate and ruin the amazing feat of a 17th Century building with such history surviving. To construct a high rise building on The Green would destroy the ethos of the Conservation area. To walk from The Bull and Crown through the churchyard of St. Peter and St Paul's historic church, the calmness and the feeling of completeness due to the trees, the green, the new rise buildings would totally destroy the making of the area to add a high rise building would be hugely offensive. Why are the local planning officers insisting that the shops comply with changes to the front of the building regarding shopfronts etc when you are proposing a high rise building in the middle of a conservation area?	LBWV have deliberately allowed the Assembly Hall to decay. Lack of use happened due to enormous costs. Local schools used to hold Music Festivals there but due to the ridiculous rise in hiring it, even to local schools, became untenable. We had to move our Music Festival to Hawley Hall in Woodford! LBWV have intended to allow the Assembly Hall to become inoperable, they have also stripped it of its heritage. The brickwork on the outside should be retained and the Assembly Hall should be restored back to its former glory. The small hall at the Assembly Hall was always used as a lay clinic. Why was this stripped? Why does it make a cake? How many cafes are there already in Station Road?  When will the link from Chingford Station to Stratford be reinstated? Why is North Chingford always ignored? The roads are only repaired/recreated as a last resort? The constant traffic queues along Station Road and King Head Hill and King Road! What is being done to reduce these? And you want to add more buildings which will add to all of these problems. Have you considered changing the junction at Station Road and The Green? Since you removed the fiber triangle onto Station Road you have just exacerbated the problem. The queues are now ridiculous. Have you looked at the paved roundabout in Epping/Croxtle Road? When are you going to make the junction at Larkhall Road safer? Another paved roundabout would make it safer for pedestrians and drivers. Witham Forest should treasure North Chingford instead of imposing high rise houses.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Tom Wise				S456 - Chingford Library and Assembly Hall	No	No	No	There are dozens of submissions that outline the facts of why the development is not sound or in keeping with the area. I do not intend to repeat this again. However, it is obvious that WFC do not respect the wishes of local people or understand the unique qualities of the area which make people not only live here but seek to protect it from unsuitable development. The lack of meaningful local consultation is lamentable. Those consultations that did take place indicated two things: firstly the WFC personnel who attended have no knowledge of Chingford's history, traditions and the desires of the residents, and perhaps more worryingly no desire to change this, secondly that WFC have no interest in the views of the residents as they are determined to increase density and diversity so as to make Chingford indistinguishable from Watlington.  Any development above 4 stories in Chingford would not be in keeping with the local village character and not in keeping with the character of the green.	Renovate not destroy.	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to pressure us for electing the wrong MPs  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Marin Board				S456 - Chingford Library and Assembly Hall	No Response	No	No	I do not know if the plan is legally compliant. I do know that the lack of parking provision will cause a major problem in the local area. I also know that there is no capacity in local doctors surgeries or any other basic infrastructure to support more homes in this area. There is no requirement for further retail provision or front facing shopping units (at least 8ft) look at the number of charity shops. Such a development will ruin the urban grain of the area by blocking light and changing the nature of this area.		Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Ian Ferguson				S456 - Chingford Library and Assembly Hall	No	No	No	This system is not right for elderly. This scheme does not respect conservation area character.	Deliver letter that elderly local people can write on and send back their opinion. Demonstrate how the proposal respects the conservation area.	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. During the consultation, residents have also had the option to send their consultation responses to us either by post, or email and copies of the Local Plan and supporting documents have been available in the Town Hall Reception, and at all branch Libraries.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Rosalind Zukas				S456 - Chingford Library and Assembly Hall	No	No	No	The central government guidance to amend plans to focus more on the North of the UK and not to build on floodplains does not seem to have been taken into account since the original documents were drawn up. Further local consultation needs to be undertaken before any money is wasted on an unwanted project.	Amended documents need to be drafted and the whole process needs to be started from the beginning taking account of the changes. For this site, despite a large petition against the project and the reduction in the number of dwellings since the original quotes, it still remains an unnecessary expense for the taxpayers of the borough. No consideration has been given to the fact that the foundations of the building would need to be rebuilt and access for building works could not be from the residential area immediately behind as that would deny local residents access to their properties and the road way would be unlikely to support the weight of any construction vehicles. The drainage is also in need of repair as the basement area has flooded in the past. A better solution has been suggested to replace this plan by using the Richmond Road car park instead. This would provide larger size homes, easy access and the additional infrastructure of a doctor's surgery without reducing the size of the Assembly hall and library which only need refurbishment, for which I understand funding has already been allocated.	No	So that the "local" councillors realise the opposition to this plan is not going to change.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
										Yes

Q E Foxy				S456 - Chingford Library and Assembly Hall	No	No	No	The proposals will have a huge detrimental impact on the conservation area and the Green if implemented. There are also questions regarding the foundations needed for the building and the effect on surrounding structures to build them.	Renovate the existing structure and omit the extra housing accommodation.	-	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Pam And Cliff Mivov				S456 - Chingford Library and Assembly Hall	No	No	No	Station road is already too busy and this would spoil what is a very special building and green space		-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Karen Jones				S456 - Chingford Library and Assembly Hall	No	No	No	You are building these without the necessary infrastructure. Where will they park, plumbers, electricians and/or working nights any mum with kids all need cars. The impact on the surrounding area will be horrendous	Build housing with parking	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Marilyn Gould				S456 - Chingford Library and Assembly Hall	No	No	No	Isn't this a conservation area? Why are you so hell bent on building extra housing on this site - ruining the character of North Chingford.		No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 05,000 homes per year across London.
Marilyn Tresham				S456 - Chingford Library and Assembly Hall	No	No	No	The Plan is NOT sound as too many new units proposed without the requisite infrastructure. Possible NDN compliance with higher requirements due to Sany Bricks advice for planning permission from their owner - surely this is not legal? Plus the Council met it's duty to cooperate - NO, not with us residents as you do not appear to listen to our objections.	The only modification needed is to not try to turn North Chingford into Walthamston with building of those proposed new units. Is it legally compliant that the freehold of the Library/Assembly Hall site will be transferred to the Council's wholly owned company, Sany Bricks, for the building works to be completed? Is it for SB applying for planning permission to built this monostrory directly to their parent company - surely this is illegal? North Chingford does not need the vast amount of new units, we are already full.	No	Looking forward to the Zoom meeting on the 29/11 and 13/12 to see how Ian Garrud continues to skirt around all the questions?	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
-				S456 - Chingford Library and Assembly Hall	No	Response	No	Although the current building is not particularly attractive, any development needs to be sympathetic to the environs. If 30 dwellings are to be built, what consideration has been given to school places, GP facilities and parking? Also the cost of hiring the assembly hall needs to be reduced so that it can be more fully utilised		Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Leif Buscum				S456 - Chingford Library and Assembly Hall	No Response	No	No	I don't know enough details about the legality of the building being made. Will it have fire compliant cladding? Will there be multiple staircases?	The building should not be more than 3 floors to fit in with the surrounding buildings. Any residential flats should be offered at a decent rental or sale price. More 2 bed flats for half a million pounds or 2k+ monthly rentals are not what London needs. If that's the plan for this development it sounds like a waste of time.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  There have been changes made to regulations concerning fire safety, and the government has indicated that this requirement will apply for building of over 18m in height following consultation. Depending on proposals, they will therefore have to reflect the appropriate threshold.
Gary James				S456 - Chingford Library and Assembly Hall	No	No	No	North Chingford does not have enough schools, Doctors, play areas for the amount of flats proposed. It will totally take away the village feel and destroy the close community. I totally object to this plan!	North Chingford does not have enough schools, Doctors, play areas for the amount of flats proposed. It will totally take away the village feel and destroy the close community. I totally object to this plan!	No	We are entitled to hear the case by case procedure and put forward our objections	The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Paul Ziles				S456 - Chingford Library and Assembly Hall	No	No	No	This is out of keeping with the village character of Chingford Green. The listed cottages will be overlooked. Building without car parking is detrimental to current residents as well as new residents creating pressure on street parking.	Chingford green developments should be no higher than existing 3 stories. Also parking has to be provided on new developments. The current level of cycles in Station Road is more than adequate for the area, so another included in the plans is a complete waste.	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Kathryn Connor				S456 - Chingford Library and Assembly Hall	No	No	No	It does not fulfil the legal duty to assess the development needs of that area, align growth and infrastructure; improve the environment; mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (Regional Planning Policy Framework, page 16).	This plan does not meet the definition of "Sound" from the National Policy Planning Framework, paragraph 35.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. In April 2019, the Council declared a Climate Emergency. In the Chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net-zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of future, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
Sally Topping				S456 - Chingford Library and Assembly Hall	No Response	No	No	Not in keeping with the surrounding area and lack of infrastructure in place to support an increased population		No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Jennifer Johns				S456 - Chingford Library and Assembly Hall	No	No	No	It cannot be correct to build a new residential block above the library in a conservation area. The proposed buildings are not in keeping with the buildings surrounding the area.	A building which blends into the area not one which is in stark contrast to it!	No	-	Through the evidence published in the Characterisation and Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sites used that development at higher density is required on some sites with urban and district centres and in close proximity to bus and rail stations. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 3) means that through development by infrastructure is identified in the infrastructure Delivery Plan (IDP) can be secured.

If yes, please explain why?	Council's response
Ms S Clark				SAS6 - Chingford Library and Assembly Hall	No	No	No	No	The plan does not fulfil the duties outlined in the National Planning Policy Framework, page 6 - development needs. The plan does not meet the definition of "sound". National Planning Policy Framework (para. 85). The proposed developments at SAS6, SAS5, SAS7 and SAS8 do not meet the area's objectively assessed needs. I would dispute that there has been any objective assessment of the area's needs, the programme of intensification priorities housing above any other consideration. All these proposals constitute a threat to the local environment particularly the nationally important Epping Forest which is the predominant feature of the area and which gives the area a unique place in Waltham Forest. The current urban landscape, with a few unfortunate exceptions, leads comfortably and pleasantly to various points of forest access and fits harmoniously into the many different viewpoints. The Conservation area around Chingford Green is under threat from the Authority which should be protecting and enhancing its character. The Local Authority has acted in bad faith throughout the Local Plan process by first refusing to confirm that it wished to develop the library and assembly hall site, then, in the middle of a pandemic announcing its intentions to dispose of the site to its subsidiary. The Authority has failed to engage with residents who are not able to participate in online events. On line events were poorly managed and totally inadequate. The latest issue of Waltham Forest News the Authority's own publication does not mention this consultation and the extended date for responses. I responded to the two previous stages of the Local Plan and found the process very confusing and misleading, the responses from Waltham Forest to the previous points raised were formulaic and uninformative. The process of reviewing documents and policies on line is very time consuming and difficult if one is constrained by limited technical equipment. In addition to lack of regard granted to local residents the Authority does not appear to have adequately consulted with the other major stakeholder in the area i.e. the City of London Corporation as Conservator of Epping Forest.	I am not legally or professionally qualified in this field. I would ask that the views of those respondents whose knowledge and expertise far exceeds mine be given consideration.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
David Dooks				SAS6 - Chingford Library and Assembly Hall	No	No	No	No	Not in keeping with adjoining buildings, excessive development will add to already limited parking space on surrounding roads, changing the Assembly Hall as proposed will render it unused over time. Development will cause excessive disruption.		-	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Helen Chivers				SAS6 - Chingford Library and Assembly Hall	No Response	No	No	No	I do not believe that this will be a sensitive development. North Chingford has a village atmosphere and the Assembly Hall is in a heritage area. Any building should be in a traditional architectural style in keeping with the area and should be a place of beauty for local residents. Modern flats tend to be ugly boxes with no character. I am not convinced that new flats will be built in an appropriate style. Building lots of new flats with no parking will be a nightmare for local residents who already struggle to park their cars. Parking permits is not the answer as people will have to pay but still be unable to find a parking space. The new assembly hall will not be large enough for large functions and we definitely do not need any more cafes in North Chingford. Please do not destroy the character of North Chingford.	No	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Paul Macdonald				S456 - Chingford Library and Assembly Hall	No	No	No	This will ruin the low rise village feel of north chingford.  With regard to traffic, the high road is already gridlocked on Saturdays and at times through the week. The additional cars (which people will own even if there are nonparking spaces) will clog up surrounding roads and the traffic will be diverted down a small handful of streets.		-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	
Key Taylor				S456 - Chingford Library and Assembly Hall	No	No	No	A block of flats, with no parking in the middle of Chingford Green conservation area, next to historic cottages... totally not in keeping with the local area.  Parking for each property, Chingford is the gateway to Essex, public transport isn't great in that direction, we have parking will just push cars into the local streets which in turn will stop shoppers being able to park and kill the local shops.  The plans show a smaller multi use room instead of the Assembly Hall, a cheaper larger space which local people can afford to hire not a smaller room which will be not much use to the local community in what we need locally. Before the Council raised the cost of hiring the Assembly Hall it was used for more local events.	Fewer floors, so more in keeping with other local properties, it should be no higher than the shops opposite, not as high as the church steeple.  Parking for each property, Chingford is the gateway to Essex, public transport isn't great in that direction, we have parking will just push cars into the local streets which in turn will stop shoppers being able to park and kill the local shops.  The plans show a smaller multi use room instead of the Assembly Hall, a cheaper larger space which local people can afford to hire not a smaller room which will be not much use to the local community in what we need locally. Before the Council raised the cost of hiring the Assembly Hall it was used for more local events.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. -				S456 - Chingford Library and Assembly Hall	No	No	No	No consideration of conservation area, listed cottage, distance to forest.		No	-	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.	
Geraldine Cleveland				S456 - Chingford Library and Assembly Hall	No	No	No	The proposed work on the assembly hall and library is completely inappropriate for the site overlooking, as it does Chingford Green bounded by its historic buildings one of which goes back to the fifteenth century.  The building will be far to tall to fit in with surrounding buildings, will be an ugly dark evening glowering over the Green. In short it will 'over-develop' the site and, as has been suggested, not match the tapering church spire adjacent, this being an excuse to build this lump. The houses next to this structure will lose what little privacy they have.  The excuse that the borough needs more housing is an excuse to over-urbanise the north Chingford area and the borough seems to be taking a leaf out of the Boris book and raising rough shod over the population with no regard for the opinions and feelings of the general population.  As a socialist and Labour voter all my life I thought never to see this behaviour from Labour council, shameful.	In short the structure with its 40 plus flats and no parking will completely inappropriate for an area already under reserved for schools and GP care to name but two. The 'improved' library is simply an to add this monstrosity to the area. DO NOT build this, simply improve the library and modernise the Assembly Hall to provide a really useful facility for the whole borough.  The excuse that the borough needs more housing is an excuse to over-urbanise the north Chingford area and the borough seems to be taking a leaf out of the Boris book and raising rough shod over the population with no regard for the opinions and feelings of the general population.  As a socialist and Labour voter all my life I thought never to see this behaviour from Labour council, shameful.	-	-	The plans impact the people living next to the proposed site most yet no one has contacted or directly about the impact to our lives this building will have. I feel this is rude at the least and totally dismissive of our views and opinions and shows a lack of willingness to compromise. This is a conservation area and we have had to jump through many hoops to maintain our buildings in accordance with the rules. However this building will be double glazed? I now feel that the conservation rules are being torn up by politicians so why should we abide by them anymore? Why do we have to get planning permission for double glazing when 3 doors away your propose to put it in, why should we have to get planning permission for a dormer window when your building 6 storeys 3 doors away, and why cant we have solar panels on the front?	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Caroline Robidge				S456 - Chingford Library and Assembly Hall	No	No	No	Anything more than 2 storeys is not in keeping with the areas conservation status.	Reducing plans to no more than two stories and including increased budgeted alterations for local services - parking etc.	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Kathryn Ulsain				S456 - Chingford Library and Assembly Hall	No	No	No	This is a negative development which would destroy the conservation area and take away an important public amenity and replace it with a substandard building. We are having a safe forced on us although there are over 25 cafes in the vicinity of the hall. The current library is a quiet space and a safe would destroy this amenity. The new hall is far too small and should be no smaller than the existing one. Nearly everyone in Chingford is against this plan	Renovate the current building. We were told that it would be too expensive but this has turned out to be untrue as millions are being on other buildings in the South of the borough but as usual Chingford doesn't count.	-	No one takes any notice of emails	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The site allocation requirement ensures the reposition of the library in the new development.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Chingford Green assembly Hall/Library must remain as it is with just the refurbishments needed. Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park areas?	NO COMMENT	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The site allocation requirement ensures the reposition of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) reposition of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Susan Doyle				S456 - Chingford Library and Assembly Hall	No Response	No	No	No response to no comments required	This site looks good as it is, original. 30 flats should not be built here especially next to a National Listed Heritage Asset, it will ruin Chingford Green. Also there is not enough parking if this area NOW, where will the people living in these proposed 30 flats park?	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. Key Voller				S456 - Chingford Library and Assembly Hall	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling in doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Sue Keating				S456 - Chingford Library and Assembly Hall	No	No	No	The council is giving priority to housing with this development plan with little consideration to the local conservation area. This applies to other proposed development sites in North Chingford too. There will be little if any benefits to the local economy, North Chingford does not need another cafe. The proposed dwellings which will be tower block style will be detrimental in appearance to the character of North Chingford. There has been little proper consultation with local residents. Additional housing may be required but development should be sensitive to the area, the proposal for the library development would result in an ugly building totally not in keeping with the area. The development will have a negative environmental impact. Residents of the new flats would need to seek parking in nearby streets adding to congestion in the area. The new residents would also lack any outdoor space something that over the last two years has become seen as an increasing necessity for quality of life.	The council should be exploring other possible developments or modifying the existing plans in order to avoid harm to the aesthetics and the heritage to this area of London, see further points above	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  All new development will need to provide an appropriate amount of well-designed, suitably located and usable private and community amenity space. Proposals coming forward on allocated sites will still be subject to the full planning application process.
Marlin Cobett				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	This development is out of keeping with the Chingford Green Conservation area. A tower block development is entirely wrong at this location.	Renovate the existing library and assembly hall, they are lovely buildings	No	-	The site allocation requirement ensures the provision of the library in the new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Diane Rowbury				S456 - Chingford Library and Assembly Hall	No	No	No	It takes away the very heart of north Chingford. The assembly hall is a place where shows, weddings and other community events happen. The library is a meeting place and a place for the community to read, borrow books, use the internet and has space for children events etc. You will be trying to squeeze all this into smaller areas with no historical feeling		No	-	The site allocation requirement ensures the provision of the library in the new development.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
-				S456 - Chingford Library and Assembly Hall	No	No	No	The proposed development will put great demands on local services which are greatly over stretched at this present time particularly when associated with the other developments that you are considering in the local area.	Any developments in this area should give far greater consideration to the points I have made above. You should substantially reduce the use of any developments and make sure they do not detract from the architecture in these areas.	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Lack of schools Lack of doctor surgeries Not enough public transport for the area	More schools More doctors surgeries More public transport	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

If yes, please explain why?	Council's response
Key Anderson				S456 - Chingford Library and Assembly Hall	No Response	No	No	30 new homes cannot possibly make a positive contribution. Council is building houses above requirements: why? All plans under Claire Coghill watch. See why she 'voiced'...	Council needs to be thoroughly investigated re any planning as consent to the core. Follow the money. Does not benefit Chingford citizens at all...	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Its not in keeping with the area. We do not need more homes, affordable homes will attract the wrong type of people to the area.	Revamp of the current hall and library I support but they need to remain the same aesthetics, floor space and should not be any higher	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. Oliver Gover				S456 - Chingford Library and Assembly Hall	Yes	No	No	The plan for the Chingford Green, Library and Assembly Hall site is in direct contravention of the site's place as part of a Conservation Area. The new library plan is really a clumsy attempt to fudge a Facelift Bargain on the community by suggesting a relatively minor improvement in return for a travesty of a development including 30 residential apartments which, presumably, will be accompanied by families needing to access already heavily stretched local services. The environmental impact on North Chingford as the gateway to Epping Forest and as a refuge from London's urban sprawl will be significant although this has already begun.	Scrap it.	-	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA)  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Lis Poley				S456 - Chingford Library and Assembly Hall	No Response	No Response	No	I dont think the council care or have consider local residents thoughts on this development. It will be totally out of character. The poor people who live on chingford green directly next door, it will completely ruin the area.	N/a	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Karen Prentice				S456 - Chingford Library and Assembly Hall	No	No	No	Not taking notice of local environment e.g. neighbouring buildings. Not taking notice of local people. This site is at the centre of our community, and a large housing block is completely out of keeping and unsympathetic to the area, both aesthetically and practically. There is no room for extra parking, and the emphasis on other modes of transport will be ignored. The homes will be like rabbit hutches.	Don't build on this site as it is completely out of keeping with the local area.	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Nicola Doody				S456 - Chingford Library and Assembly Hall	No	No	No	The plan is not in line with the local area. Waltham Forest seem adamant to blight the area of north Chingford with high rise buildings despite push back from the people of north Chingford. My property is directly inside this site and light into my home as well as my privacy will be blighted.	Upgrade and replace what is already there if not energy efficient. Do not build on top and destroy the area around the green which is steeped in history. Listen to the local community.	No	My property is set to be blighted by this development	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. The character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach.
Gillian F				S456 - Chingford Library and Assembly Hall	No	No	No	The local plan does not listen or take into consideration the views and wishes of the residents. They refused their plans through with no regard to others. The consultations are biased and worded in such a way as these council interpret whichever way they want which is always contrary to the locals.	The plan needs to be set out in plain English, without wording in such a way as allowing the council to do what they want regardless. There should be a more open method of allowing residents and local businesses to express their views, and not being constrained by misleading biased questions as always happens with these proposals.	Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
				S456 - Chingford Library and Assembly Hall	No	No	No	No consultation other than on line. No way off responding other than this. I have tried numerous times and my comments dont appear.	Proper consultation- not online dependent.	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Raymond Maffei				S456 - Chingford Library and Assembly Hall	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsustainability of their plans for North Chingford and the surrounding area	Reduce the size of any redevelopment so it is in keeping with the local area, in both height and style, this is a badly sited and these plans are not what the area requires, it is too intensive and out of character	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
-				S456 - Chingford Library and Assembly Hall	No Response	No Response	No	It appears there has been no cooperation in consulting and listening to needs of residents, if they had been brought on a journey, communicated to properly and listened to perhaps this would be a such a sensitive development. In this question you're asking about the local plan in general, not specific to this development. How are residents meant to understand what you're asking them if you're not clear in any communication about this?	How are people meant to understand the legal compliance of each development? Language like this alienates residents and is a barrier to participation in surveys like this. Make this a proper consultation rather than a simple box ticking exercise on this inaccessible website. To make this particular development sound, rebadge the proposals based on feedback from residents, go out to consultation and this time do it properly with a thorough understanding of the issues raised and how you're going to address them.	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Sade Sally				S456 - Chingford Library and Assembly Hall	Yes	No	No		I believe that the site will be too tall considering its location in a conservation area.	-	-	The site allocation requirement ensures the provision of the library in the new development.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities, within walking distance to the residential catchment areas.
-				S456 - Chingford Library and Assembly Hall	No	No	No	Not in keeping with the area		No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).
Parakevou Markou				S456 - Chingford Library and Assembly Hall	No	No	No	No as LBWV should be seeking to preserve the 'Local Character' of the area - residents close to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It's NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents' views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg 164) states 12,640 new homes over 20 years and LBWV is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing targets in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Witham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them. Delivery of housing targets should not be delivered in such away so as to reduce the number of trees and green spaces in the area.		No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).
Mike Collins				S456 - Chingford Library and Assembly Hall	No	No	No	I do not believe parking for residents has been taken into account		No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Miklos Sag				S456 - Chingford Library and Assembly Hall	No Response	No	No Response	The Chingford Library and Assembly Hall is an iconic building, part of the heritage of North Chingford. The proposal is excessive, high rise and over-development which will change the very nature of our local area in North Chingford. I believe, this proposed development will also put more demands and pressure on local infrastructure and services, such as schools, doctors, utilities which will have a negative impact on the local' lives.	Keep Chingford Library and Assembly Hall as is, and do not proceed with redevelopment.	No	-	The site allocation requirement ensures the reposition of the library in the new development. The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Gloria Jones				S456 - Chingford Library and Assembly Hall	No	No	No	This is a gross overdevelopment of the Green, there is not enough parking as it is without more flats. This is a village area not a high rise area.	cancel plans	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Sally Payling				S456 - Chingford Library and Assembly Hall	No Response	No	No	Legally compliant? Like I guess, the majority of people I am not legally trained so have no idea (as you are without a doubt well aware).  Unsound? Absolutely. A high rise development would be totally out of character with the surrounding conservation area, historic buildings and the role Station Road plays as the gateway to Epping Forest. Also it doesn't take much intelligence to understand the extreme pressure 30 households would put on local schools and doctors' surgeries as well as the continuing problem of parking.  Duty to co-operate? I think not. As the pandemic abates (we hope) more time to face consultation on these matters need to be arranged as there are many people who are unable or unwilling to fill in this type of frankly off-putting form.	Duty to co-operate - a meaningful consultation accessible to all.  Unsound - little thought has been put into the impact this development would have on all the aesthetics of the surrounding historic space by parking (i) the pressure on schools and GP surgeries. There is no doubt that the supply of safe, affordable housing nationwide is at a critically low level. I can see that we, the residents of Chingford, need to free up space to help solve this problem. However, 30 units on this site is a nonsense. Any development should be curtailed to 3 storeys. The community hub on the ground floor should contain a well stocked library, large assembly space and smaller meeting rooms. I agree with previous comments that a cafe is hardly a priority in Station Road!	No	-	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:
Cheryl Tagge				S456 - Chingford Library and Assembly Hall	No	No	No	Place of study for several kid's won't be appropriate to move. I attend the library a lot and the next closest library would be in redbridge in woodford. A very long distance by public transport. Stop trying to run several kid's futures.	Unacceptable	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S456 - Chingford Library and Assembly Hall	No	No	No	All new homes obviously house many new residents but no provision is ever made for new schools or doctors surgeries. It is hard enough to get a preferred school or doctors appointment already. This view applies to all new development in Chingford.	Provide new schools or extended school places and doctor's practices.	No	-	The local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Jason				S456 - Chingford Library and Assembly Hall	No	No	No	I would love to put the detailed and eloquent responses that perfectly articulate how these plans are out of keeping with the area (especially this conservation area), aren't the type of housing required and just plain aren't necessary.  However after witnessing the utter incompetence and illegal behaviour of LBDF during the mis-labelled 'consultation' and the subsequent farcical implementation that ruined the Walthamstow Village area. All whilst introducing traffic chaos and subsequently increasing pollution (along with the high risk developments on every single car park and available space.  So I'll opt for the comment earlier... You're corrupt, incompetent and operate illegally. You should be ashamed of yourselves.		No		Response noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
				S456 - Chingford Library and Assembly Hall	Yes	Yes	Yes					Included	
Rebecca Boylen				S456 - Chingford Library and Assembly Hall	No	No	No	Lack of additional infrastructure for additional inhabitants - surgery schools shops parking - everyone of these flats has the right to have a car and there is no parking associated with these flats and not enough disabled parking either. The flats are not of character with the rest of suburban Chingford. The green will be used by many more people and will lose its character.	Less flats, more parking more sympathetic drain and not as high rise		-	-	
Stuart Mecklenburg				S457 - North City Auto's Chingford	No Response	No	No Response	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively excludes those who need their own transport for work or due to age or other circumstances. Not positively prepared.  Not Effective: No additional infrastructure planned to cope with the totality of developments S455-58  Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the settings of surrounding buildings. Any proposal of more than 3 stories would not meet policy 29 of the London Plan	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs rather than a wealthy elite of how people should be made to live.	No	Not necessarily me but certainly representatives of the affected local community who seem under represented in these planning decisions	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 22 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets, in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Having no regulatory or national planning barriers to delivery; - Delivery partners who are signed up to; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.  This Local Plan should be flexible and able to be monitored.  The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.	
John Hugg				S457 - North City Auto's Chingford	No Response	No	No	Legally compliant how do I know - the plan sound the duty to cooperate what is that please explain	"No as LWPF should be seeking to preserve the 'Local Character' of the area - residents choose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats, and urbanise the area which is the gateway to the forest.  The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 p. 364) states 12,640 new homes over 20 years and DPP is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, why is there pressure on local councils to build so many more houses?  Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to reduce housing development in London and the South-East and more in the North as part of the levelling up programme.  The majority of new properties are flats, the feedback has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and assumed (not just allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them.  Delivery of housing targets should not be delivered in such ways as to only provide minimum standards and should be sequenced in such that development overflows existing residential areas to the detriment of existing residents or adversely affects the character of areas which are valued by existing residents. Land optimisation should also be considered in the context of the delivery of housing targets."	"No as LWPF should be seeking to preserve the 'Local Character' of the area - residents choose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats, and urbanise the area which is the gateway to the forest. Delivery of housing targets should not be delivered in such ways as to only provide minimum standards and should be sequenced in such that development overflows existing residential areas to the detriment of existing residents or adversely affects the character of areas which are valued by existing residents. Land optimisation should also be considered in the context of the delivery of housing targets."	Yes	To see what your intentions are and to argue against development	The robust measures proposed to both avoid and mitigate any recreational harm to the Epping Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy, have been developed in consultation and collaboration with Natural England, the City of London Corporation (conservators of Epping Forest) and Lee Valley Regional Park, all of whom have expressed support for the work Waltham Forest have undertaken (see joint letters at LPE4, LPE4 and LPE42). Natural England are clear that they agree with the conclusions of the HMA and consider the Plan sound on the basis of the well considered and detailed evidence and strategies produced and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at LPE4 and LPE42.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and is close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density, the preparation of the Site Allocation Document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  In Local Plan Part 1, Policy 22 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will be granted unless robust justification is provided the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
Mike Chrimes				S457 - North City Auto's Chingford	No	No	No	It is unclear from the online site allocation consultation what signification the plan is intended to comply with, for that reason it is difficult to see how my submission from a member of the public, as opposed to a planning professional, can judge the right compliance. That suggests the consultation is flawed.  Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Other valid objections or suggestions for amendment to the plans may be rejected for failing to comply with rules that are not transparent to consultees.  Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP1) for 2020-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the status of meetings which have been followed by political point-scoring, while others have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.  One would say however that a system of consultation partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had significantly low numbers, represented by the number of attendees allowed, or have been difficult to get into online.  In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 2000 homes pa. While LWPF has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop affordable sites, it is not clear that all sites selected for housing development in the Borough will meet increased housing need. More	It is suggested that until master plans are developed, through consultation, for the main centres identified in LP1, consultation on individual sites is paused.  With reference to site S457 the chief officer in a bullet point order is to provide 30 homes. It is unclear whether this is justified alongside the loss of local employment occasioned by the development, despite the commitment to non-residential floorspace.  This site is one of a number of "grey" motor vehicle sites considered for development. The borough's strategic objectives refer to the provision of a variety of employment opportunities. Individually this might not represent a great loss of flexibility or vehicle related employment, but there needs to be holistic view of the demand for such sites across the area, which is far more motor vehicle dependent than southern Waltham Forest.  The development guidelines refer to enhanced pedestrian and cycle connectivity, but no routes are indicated on the planning map. This issue should be addressed.  The guidelines refer to minimising access to Epping Forest SAC. In reality this site is close to Epping Forest, and pedestrian and cycle access is improved off-site via footways. Appropriate development here could help address this.	Yes	I do not feel the online consultation enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Fact finding: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Having no regulatory or national planning barriers to delivery; - Delivery partners who are signed up to; and - Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.  This Local Plan should be flexible and able to be monitored.  The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan, Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.  Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination through the planning application process.

Ian Connor				S457 - North City Area's Chingford	No	No	<p>I do not believe that the plan fulfils the legal duty to remedy the development needs of their area, align growth and infrastructure, improve the environment mitigate climate change (indicated by making effective use of land in urban areas) and adapt to its effects (National Planning Policy Framework, page 6).</p> <p>This is because we dont believe that the plan meets the definition of "Sound from the National Planning Framework, paragraph 35. This program of identification priorities housing above as to the significant detriment of the environment, local business, and the conservation area.</p> <p>It does not fulfil the Councils duty to be sustainable, in the following ways:</p> <p>11 It is not economically sustainable</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 344) states 12,640 new homes over 30 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target.</p> <p>The plan does not "positively and proactively promote economic growth. Whilst we need new housing, we need development that reinforces the unique character of North Chingford in order to draw visitors and economic prosperity, rather than homogenising the area through heavy tower blocks. North Chingford is a suburban not urban. This location is particularly adjacent to forest land, North Chingford is the Gateway to Epping Forest. The Conservation of Epping Forest are far from impressed with the current plans for urbanisation of the area and its detrimental effect on the forest and its environment.</p>	<p>See above. Low rise housing only ( certainly no more than 3 storeys) The effect of this and other developments on the local residents, and the local environmental impacts need to be addressed in more detail. A no point has this process left a genuine consultation just a "going through the motions exercise. The detrimental effect on local residents (unsightly high rise, parking issues) and environment (on the edge of the forest) would be seen outweigh the benefits.</p>	No	-	<p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1264 per year) based on a London-wide assessment of capacity/available sites in 2021/78. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA), will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Anthony G Thorne Lip				S457 - North City Area's Chingford	No	No	<p>The question falls to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 33 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations available in accordance with regulation 35, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 38(1).</p> <p>11(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are:</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emission Waste Plant which results in higher than normal/infant mortality rates and even though they state the new larger plant will be more efficient then will still be emissions. Although they suggest these have not be removed do have my doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LUZ zone and downwind of the east meaning that will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the LUZ charge. But the rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. In 2018 it was realised in the 2021, that people needed space and how Towns were built with narrow developments and narrow areas. This has created a build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p> <p>If we took in the East End in the Victorian era the population density lead to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In 2018 it was realised in the 2021, that people needed space and how Towns were built with narrow developments and narrow areas. This has created a build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>	No	Because there are too many unanswered	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new diversity of operation, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through a s106 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Lloyd Parkinson				S457 - North City Area's Chingford	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with affordable housing, no parking provision, this will disadvantage other people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, bright/light, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life, etc. Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>	<p>Shortage of doctor, hospitals, dentists, schools, demands on the roads, the effects on the quality of life</p>	No	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1264 per year) based on a London-wide assessment of capacity/available sites in 2021/78. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,800 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this planning submission and review, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>	
Yvonne Sanders				S457 - North City Area's Chingford	No	No	<p>Is the Plan "sound? There are 4 texts at para 35 of the NPPF:</p> <p>Has the Plan been "positively prepared? This means providing a strategic vision, as a minimum, seeks to meet the area objectively assessed needs and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is in the area and is consistent with achieving sustainable development.</p> <p>The LBWF should be seeking to preserve the "local character" of the area - residents chose to move to Chingford &amp; Highgate Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter &amp; St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 344) states 12,640 new homes over 30 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs of the local population.</p>	<p>Ensure that any development is no more than 3 storeys in height due to the location of the site so as not to "obscure" the forest so that it does not cut on the view of the forest, as per Policy 6 of the London Plan.</p>	Yes	I wish to have the opportunity to explain why the Councils proposed developments are not suitable.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S427 - North City Aurb's Chingford	No	No	No	<p>I do not believe that the plan fulfils the legal duty to meet the development needs of their area, align growth and infrastructure, improve the environment mitigate climate change (including by making effective use of land in urban areas) and adapt to its effects (National Planning Framework, page 6). This is because I don't believe that the plan meets the definition of 'Sound' from the National Planning Framework, paragraph 35.</p>	<p>The current plans do not appear to take into account the concerns of major neighbouring landowners (City of London Corporation) or the difficulty that Epping Forest District Council has had in obtaining any planning permission since 2018 for developments due to negative impact on the Epping Forest Special Area of Conservation. The neighbouring borough of Enfield is building vast numbers of new flats/homes close to the boundary of ERFW, a very short distance from Chingford and Highams Park.</p> <p>Any development of over 3 stories in North Chingford, and specifically so close to the Chingford Plain, would not meet the criteria of Policy D9 of the Local Plan. The local plan is not consistent with regional and national planning policy, which states that:</p> <p>All Tall buildings should only be developed in locations that are identified as suitable in Development Plans.</p>		-	<p>The Local Plan requires that all new developments should deliver high quality design that is responsive to the local character of an area. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Study recognises the impact that development can have in conservation areas and advances a sensitive approach.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the Identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Andrew Fearon				S427 - North City Aurb's Chingford		No		Too many houses too little parking Height not compatible with area			-	<p>The Council is committed to playing its part in tackling the housing crisis. Paul Wellard				S427 - North City Aurb's Chingford	No	No	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>		No	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Abigail Woodman				S437 - North City Auto's Chingford	Yes	No	Yes	Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. And in the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to "minimise access to Egging Forest and "mitigate for urban effects to ensure no adverse effect on the Egging Forest SAC. Protecting Egging Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Egging Forest SAC is done by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.		It is essential that green spaces have a voice at the table during the examination hearing sessions.	The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward.  The Borough's Local Plan has a policy on protecting and enhancing the environment that has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  These robust measures proposed to both avoid and mitigate any recreational harm to the Egging Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy, have been developed in consultation and agreement with Natural England, the City of London Corporation (conservators of Egging Forest) and Lea Valley Regional Park, all of whom have expressed support for the work Waltham Forest have undertaken (see joint letter at LP42, LP41 and LP42). Natural England are clear that they agree with the conclusions of the HRA and consider the Plan sound on the basis of the well considered and detailed evidence and strategies produced and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at LP44 and Natural England's response to the Inspector's Further AMO, dated 23rd January 2023.
Alicia Goulter				S437 - North City Auto's Chingford	No Response	No	No Response	The plan has not been positively prepared since it does not seek to preserve the local character of the area. Chingford is a low rise suburb that forms a gateway to Egging Forest, as such it is NOT appropriate to allow tall buildings to be built in the area. This site is adjacent to the entrance to Egging Forest. The only way to fit 30 dwellings into such a small space would inevitably lead to a building of several storeys high.  LBWF is seeking to build more new homes (27,000 by 2035) than required by the London Plan (Fig 3.7g, 3.64). Housing targets should not be met by only providing minimum standards such that the development overruns existing residential areas to the detriment of existing residents or adversely affects the aesthetic and historic character of areas.  The plan is not consistent with Regional and National planning policy since LBWF is intending to build many more homes than the London Plan requires - see paragraph above. The London Plan states that tall buildings should only be developed in locations that are identified as suitable, a site within a few meters of the edge of the forest is clearly not suitable for even a moderate tall building as it would totally dominate the landscape. The plan states that proposals should take account of and avoid harm to, the significance of London's heritage assets, this proposal does the opposite.	The maximum height of any development on the site should be no more than 3 storeys this should be stated on the local plan rather than around 30 new homes. The number of new homes should be reduced.	Yes	-	Through the evidence published in the Character Intentionality Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2023/18. The original draft London Plan figure was equivalent to approx. 1,400 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  The Local Plan requires a character-led approach to intensification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intentionality Study (2020). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.
Mrs Geraldine Fordall				S437 - North City Auto's Chingford	No	No	No	This process is far too officious - it risks excluding residents from being heard. I am not a highly qualified person. I am applying as a long term resident of Chingford Green Ward. I consider all Local Plan sites in North Chingford to be unsound. In the case of the North City Autos, Chingford, consider this to be a wholly inappropriate oversized and over-tall development given its position in close proximity to Egging Forest and Chingford Meadows. It is a listed building. Such a development will contribute significantly to the character of Station Road, North Chingford and the gateway to Egging Forest, and rob it, of its semi-rural feel and character for both residents and visitors alike. This proposal can not be considered "sensitive, as it would be a significant overdevelopment, unlike the current building on the site, which is low and set well back from the road.  Chingford is suburban with the North Chingford area, in particular, having a semi-rural feel, which is much loved by residents and visitors. The area is mainly 2/3 story residential buildings, and as such, the proposed development for the North City Autos, Chingford site, would visually overwhelm and overwhelm the site, currently occupied by a modest sized business with forecourt. It would urbanise the site and contribute to further urbanising of the semi-rural neighbourhood. It is an entirely unsuitable proposal for a suburban area, adjacent to Egging Forest, with a Conservation Area at the other end of Station Road.  My family and I choose to live in North Chingford because of its low rise, open, village feel / semi-rural character. The LP will destroy everything that makes our local community special and unique - and the Council refuse to listen. As with all other sites in the North Chingford area, the LBWF is ignoring the views of local residents and their wish to keep the practices character of North Chingford intact. Whatever happened to the mantra "Residents First".	I am a local resident - I am not equipped to say why my suggestions would make the LP highly compliant and sound.  LBWF needs to listen and engage more with its residents/local community and acknowledge there are other ways of doing things instead of ignoring them and ploughing on with their proposals regardless, as we have done in the case of the LP North Chingford sites - it makes residents feel totally powerless.  Reduce the number of proposed homes contained in the LP to the required number only and remove highly sensitive sites such as the North City Autos, Chingford site. Bring back empty domestic properties around the borough into use through a programme of refurbishment. Reopen the Chingford Green Conservation Area and restrict any development in suburban neighbourhoods, to less dense, low rise - no more than 3 stories.  Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals such as North City Autos, Chingford and Chingford Green and any nearby developments adjacent to forest boundaries, unlike the ugly concrete and glass box buildings with balconies which are springing up around the borough.  Include a better mix of housing in the 10 - houses, maisonettes and bungalows, with gardens - not just studios, soul-less flats. Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.	No	-	Through the evidence published in the Character Intentionality Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2023/18. The original draft London Plan figure was equivalent to approx. 1,400 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.  The Local Plan requires a character-led approach to intensification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intentionality Study (2020). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.
-				S437 - North City Auto's Chingford	No Response	No	No Response	Overdevelopment in a sensitive area adjacent to Egging Forest	Change use to amenity space more appropriate for its location adjacent to Egging Forest	No	-	The Council is committed to playing its part in tackling the housing crisis. The Borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of houses to give the Council the best chance of taking the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.  The Borough's Local Plan has a policy on protecting and enhancing the environment that has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
John Hugg				S457 - North City Auto's Chingford	No	No	No Response	I would want to see exactly what is being proposed there it is the gateway to the forest and should be in keeping with that max height 3 storey, car parking, disabled parking? Charging points etc.? What about the jobs lost at the garage?	As above a controlled height space with adequate parking		To see what your intentions are and to argue against over-development	<p>Through the evidence published in the Character Intensification Study, sites are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.105 planning obligation.</p>
Brian O'Leary				S457 - North City Auto's Chingford	No Response	No	No Response	I believe the proposal to be unsound for the following reasons: 1. In LP1 Policy 2 "scale of growth", has an overly ambitious target for homes in the borough, i.e. 27,000. This is 14% higher than the London Plans recommendation. I have argued elsewhere that this figure has not been justified and is probably flawed; however, this is what crosses the 0-2 site proposals regarding scale and intensity. 2. Whilst not quite adjacent to Epping Forest this site is within 100m or so. The scale will not in my view be a very welcoming sight upon entering Station Road Shopping Centre of North Chingford, nor would it be a satisfactory addition to visitors of Chingford Park and Forest. 3. The site is adjacent to a row of popular restaurants and bars which, particularly on weekends, holiday periods and major sporting events are very busy and noisy. Residents of the flats are therefore likely to suffer a loss of amenity. 4. Epping Forest & Commons Committee rightly have concerns "... 4.4a allocations within 500m of Epping Forest and the EFASC. Of particular concern to the Conservators are the proposed residential developments within 500m of the Forest boundaries in general, as well as the SAC in particular. We consider that the site allocations choices, densities and design must be modified at the Regulation 19 stage, and in the submission Local Plan itself, to protect the character of Epping Forest and ensure a more clearly outstanding edge between dense urbanity and the Forests natural aspect. This is particularly important in North Chingford and Leytonstone, as discussed below, but needs to apply to all place-making within 500m of Forest edges, including to historic green lanes." Also "...In the Submission Local Plan (LP2) Policy EFC, in demanding 'Project-level' WFCs for developments in this zone, there is a recognition that urbanisation effects may lead to adverse impacts on the SAC, however, we would also add that for such sites within a short walking time of the Forest, it is very difficult to mitigate the impacts of recreational pressure. Also, frequency of visits to the Forest from such close allocations are likely to be high and will be a significant factor in this regard." No Effective: No additional infrastructure planned to cope with the totality of developments S455-58 Not consistent with regional/national policy: Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding buildings. Any proposal of more than 10 stores would not meet policy of the London Plan	A more appropriate development for this location would be leisure and hospitality sector businesses, including short stay hotel accommodation, or further civic or community facilities. Whatever the replacement proposal, mass and height need to be looked down. The current site is occupied by North City Autos. The building has a 2 storey equivalent height and is set back from the road with ample space around. This type of density and shoulder height complements the context and should be maintained.	Yes	To ensure my representations obtain a full consideration	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base including: • Research/Findings: the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area; and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning. • Having no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p>
Jane Kennebun				S457 - North City Auto's Chingford	No Response	No	No Response	This is not in keeping with the local character. It changes a largely low rise area and impacts views and skyline. Parking needs have been ignored and includes those needing their own transport for work or due to age or social circumstances. Not positively prepared. No Effective: No additional infrastructure planned to cope with the totality of developments S455-58 Not consistent with regional/national policy: Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding buildings. Any proposal of more than 10 stores would not meet policy of the London Plan	Developments should be of the same height and as close to character as possible of their surroundings. Facilities on site should be suitable for a diverse demographic and their needs and not change the character of the neighbourhood	Yes		<p>The Local Plan requires a character-led approach to characterisation, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy P2 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. Lambros Poulas				S437 - North City Auto's Chingford	No	No	No	Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentist, nurses and local schools.	Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentist, nurses and local schools.	-	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Helen Chivers				S437 - North City Auto's Chingford	No Response	No	No	The new building should be no higher than 3 storeys and should be in a traditional style in keeping with the other buildings in Station Road. This is the gateway to the Forest so should be architecturally sensitive and of a design which will enhance the area. No one wants to come leave the station and be greeted by an ugly view before they arrive at the forest.	The new building should be no higher than 3 storeys and should be in a traditional style in keeping with the other buildings in Station Road. This is the gateway to the Forest so should be architecturally sensitive and of a design which will enhance the area. No one wants to come leave the station and be greeted by an ugly view before they arrive at the forest.	-	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D3. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p>
Lynn Ferguson				S437 - North City Auto's Chingford	No	No	No	There have been no meetings or events that enable non-computer literate residents to participate which discriminated against many groups including the elderly and those with only verbal English. The proposal is part of plan that exceeds the government building requirements and is in any case no up-to-date with respect of Covid/Brexit changes to requirements.	Proper consultations with all local residents instead of the current lip service.	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Council-ill cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>
Susan Doyle				S437 - North City Auto's Chingford	No Response	No	No	No response so no comment required	"SENSITIVE BOUNDARY" says it all. If 30 new homes are built here, they shouldn't have any window on this boundary so the homes on Forest View do not have a problem with "Privacy". Also, if built, where will the homeowners park their cars, if you believe they can park in Forest View, where will the commuters park?	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. Steven Montgomery				S437 - North City Auto's Chingford	No Response	No Response	No Response	Thank you for setting out how you propose to redevelop this site. The location is a perfect opportunity to redevelop into homes. Residents in these new homes will be able to live on a thriving high street, be within 10 minutes of Liverpool Street station, and enjoy living right next to such a beautiful forest. Incredible! It should be clear already but perhaps it's worth saying, residents at these new homes don't need a car. I am happy to say that not everyone in Chingford is obsessed with cars. In fact, the current site as a car garage, at the end of a high street, next to a forest, is completely unsuitable for the modern world. We need to stop putting cars before people, especially in relatively high density areas. The redevelopment of this site into homes is a good start.	Please don't build a block of really horrible flats. I'm sure you can think of something that's actually good. There are some good new builds in other parts of Waltham Forest like Wood Street and Walthamstow.		-	<p>This response is noted.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centre, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p>	
Raymond Muffat				S437 - North City Auto's Chingford	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsuitability of their plans for North Chingford and the surrounding areas.	This development takes no account of the style and characteristics of the area, especially as it is so close to Epping Forest. The plans should be in keeping with the style of the area and the location and need to be drastically scaled back.	No	-	<p>The Local Plan requires a character-led approach to identification, including building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). Cat				S427 - North City Aun's Chingford	No	No	No			No	-	This response is noted.
-				S427 - North City Aun's Chingford	No	No	No			-	-	This response is noted.
Tim Hancock				S427 - North City Aun's Chingford	No Response	No Response	No Response	[Strongly Object to this exploitation (Development implies something justicible and THIS ISN'T THE CASE, these proposals are simply adding to overcrowding, denigrations to the surrounding environment, negatively affecting the current residents) This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions/cartering on failure to control immigration, and defend the sanctity of the family by previous and current politicians orchestrated by commercial interests, and pushed on the public by propaganda from the media that is propagated by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.  Fundamentally the building of this nature is an unethical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.  The reason this is an obvious attack is: the nature of these developments, are completely void of any substance or virtue related to accommodating or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.  The current proposed developments are reminiscent of the failures that are	Reject based on continued denigration to local community and strain on local services, as pointed out above.	-	This development is another step on the way to creating a dead zone and destruction of a health balanced community, through the method of Salami slicing tactics to dilute current communities. This approach also seeks to compound the destruction of local communities by impacting anyone at breakneck speed, with a contempt for the consideration towards the current people in the vicinity, while it also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I have to understand how the people who profit from it, and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response

Recovery Partnership;</p> <p>(xlvxxxxxxxviii) the Local Nature Recovery Partnership;</p> <p>(xlvxxxxxxxix) the Local Nature Recovery Partnership;</p> <p>(xlvxxxxxxxix) the Local Nature Recovery Partnership;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Epping Forest Road which results in higher than normal infant mortality rates and even though they state the new larger plan will be more efficient there will still be emissions. Although they suggest these have not been removed I do have doubts as well there are others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the ULEZ zone and downwind of the road meaning those will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the ULEZ charge. The rest of the area will also be subject to these increases and the proposed speed the natural air flow possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent covid pandemic showed that areas of high density living allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now label as anti-social behaviour, and mental health problems. In this it was realised in the 1920s that people needed space and new towns were built with green space and open areas. This also shows the importance of green space and open areas. God knows what the Corporation of London think about it??</p>	Yes	Because there are too many unanswered questions	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
John Hugg				S458 - Royal Epping Forest Golf Club	No	No	No	No	<p>A totally inappropriate development on the edge of the Forest has to believe that this is a serious plan. That area is the gateway to the forest is totally out of character and will impact on the forest. It is not a residential area and possibly a like development on the other side of the road? more flats more traffic more problems with infrastructure water, gas, electricity sewage charging points electrical distribution etc etc. And what happens to the leisure facilities you are going to stop people playing golf?</p>	<p>Leave it as is. We do not need more over development. Infrastructure would need to be improved. Parking would become an issue.</p>	Yes	To see what your intentions are and to argue against over-development	<p>The robust measures proposed do both avoid and mitigate any recreational harm to the Epping Forest SAC, primarily through the provision of Suitable Alternative Natural Greenspaces and financial contributions to fund the Strategic Access Management and Monitoring (SAMM) strategy, have been developed in consultation and collaboration with Natural England, the City of London Corporation (conservators of Epping Forest) and Lee Valley Regional Park, all of whom have expressed support for the work. Waltham Forest have undertaken (see joint letters at LPE4, LPE41 and LPE42), Natural England are clear that they agree with the conclusions of the HMA and consider the Plan sound on the basis of the well-considered and detailed evidence and strategies produced and the monitoring indicators proposed. For further detail, please see the Statement of Common Ground with Natural England at LPE4 and Natural England's response to the inspectors' further MIOs, dated 23rd January 2023.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s136 planning obligation.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p>
Paoline Whitbread				S458 - Royal Epping Forest Golf Club	Yes	No	No	No	<p>1. Has the plan been positively prepared? LBWFF plan for the changes to the area next to the Chingford Plains and Epping Forest not been positively prepared LBWFF has not considered a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities. This means that unmet needs are accommodated where it is practical to do so and is consistent with achieving sustainable development. LBWFF should be seeking to preserve the LOCAL CHARACTER of the area. Residents close to move to Chingford &amp; Highams Park as they are both low rise suburbs. If LBWFF does not agree with this statement then why did you knock down the Chingford Hall Estate as well as the Cathall Estate and replace the streets with housing? This both became ghettos, so why are you considering creating ghettos again? North Chingford and Highams Park are the gateway to Epping Forest. It is totally inappropriate to change the character of the area from low rise suburban housing to tall high rise flats that will be totally unattractive for the windows to the forest. Queen Victoria either Epping Forest to the people and the residents of Chingford have a duty of care in all aspects of ensuring the forest is well cared for as well as the window/gateway to the forest is also appropriate. Waltham Forest intend to totally over develop the area of the Royal Epping Forest Golf Club. The local people felt strongly about it that a meeting was held in St Peter's and St Paul's Church where there was standing room only to object to the proposal. You have now made this document so complicated by response to that it has become a huge challenge to try to complete it. There is a petition of over 6,000 signatures against this high rise development, which will probably grow. The council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.7) 164 sites 22,640 new homes over 20 years and LBWFF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to the Covid pandemic, the number of people living in London is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the pandemic has shown that families want houses with gardens. There should be a good mix of housing and not just flats.</p>	<p>Leave it as is. We do not need more over development. Infrastructure would need to be improved. Parking would become an issue.</p>	Yes		<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would be more piecemeal in nature, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The Local Plan requires a character-led approach to identification, including tall building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Bamar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the Identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINC), Special Areas of Conservation (SAC), Bamar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The London Plan (2021) sets a 20-year minimum housing target for Waltham Forest of 52,646 new homes (2,632 per year) based on a London-wide assessment of capacity/available sites in 2021/22. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 10,000 homes per year across London.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>
Yvonne Sanders				S458 - Royal Epping Forest Golf Club	No	No	No	No	<p>Has the plan been "positively prepared" This means providing a strategy which, as a minimum, seeks to meet the area's objectively assessed needs, and is informed by agreements with other authorities, and that unmet needs from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. This is NOT LBWFF should be seeking to preserve the "local Character" of the area - residents close to move to Chingford &amp; Highams Park as they are low rise suburbs of mostly houses at the very edge of London. The gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats to urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter &amp; St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and the council are being tight. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.7) 164 sites 22,640 new homes over 20 years and LBWFF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to the Covid pandemic, the number of people living in London is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the pandemic has shown that families want houses with gardens. There should be a good mix of housing and not just flats.</p>	<p>A tall building at this site would completely ruin the view of the forest for anyone who approaches it from the direction of Chingford Station, Henry VIII and Queen Elizabeth's. This is an area to watch the hunt and to see this historic view with a 6 storey building would be a travesty. Nothing above 3 storeys should be permitted in this location as per Policy D1 of the London Plan.</p>	Yes	I wish to have the opportunity to explain why the Council's proposed developments are not suitable.	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Brian O'Leary				S458 - Royal Epping Forest Golf Club	No	Response	No	<p>I believe the proposal to be unsound. There is no evidence that the Council has weighed up public harms versus benefits of a 4 storey proposal in its location as it is intended to be contrary to its own LPS Strategic Objectives 16 &amp; 17, Policies 72, 74, 78, 83 as well as the guidance &amp; spirit of Historic England Advice Note 4.5. Whilst recognising 'The nature of the area as an arrival point to the borough and gateway to Epping Forest (3.1.7), it then claims that 'This increase in height would enhance the North Chingford skyline, with the surrounding buildings together and going the streetscape greater definition to the built 'visual harm to the sensitive setting' would be evoked (3.1.6. (Draft Skyline Study 14/21) On the contrary, I submit:</p> <ol style="list-style-type: none"> <li>As it adjoins Heritage Area &amp; SAC: It is out of character and a potential blot on the landscape (Height &amp; scale against spirit of guidance Advice Note 4.5 (4.1), spoiling the aesthetic appreciation of a unique part of the Borough as one enters and leaves Epping Forest.</li> <li>As it is a large element in the Chingford hub proposal, no attempt has been made to take views about how residents view the character of the area. Architectural views about the desirability of the aesthetic symmetry of tall blocks at either end of Station Rd., is merely another subjective view that has not been open to democratic scrutiny by the community. Consultation to date has just been piecemeal, as each looked at in isolation.</li> <li>The building would overshadow the Pines, given the orientation of the sun, with effects on habitat and biodiversity. It seems no studies have been undertaken to predict impact. Not even a Shadowfall Analysis is presented, as shadowing is likely to be particularly significant in winter months.</li> <li>Residents will inevitably occupy car parking space currently used by visitors to Epping Forest, reducing their access.</li> <li>Epping Forest &amp; Commons Committee are facing significant mitigation problems with increased use of Forest due to Covid social distancing and lockdowns have reduced (S21/20). This is likely to continue post-Covid, so a reduction in residential density is necessary to allow the site to be used as a small site and at the same time provide for 'urban greening, tree planting and provision of open space' will mean the development, by necessity, will need to be tall tower block. This would be completely out of character for Station Road, and will impact views of the forest.</li> </ol> <p>To justify such a construction, LBWF need to demonstrate an essential need, which is simply not there. When the proposal to redevelop North Chingford were first made, the LBWF's argument was that these new homes were required to fill LBWF's quota for some larger London plan, presumably originating from County H&amp;L. Furthermore LBWF argued that unless it is operated to fulfil this plan, County Hall would impose a solution.</p> <p>It would be interesting to know the basis of this Greater London Plan, what reason was undertaken and who drew it up. Any research must have been based on 2019 data at the very least, and in all probability on data earlier than that. Furthermore, it almost certainly assumed that any trends observable at the time would continue unabated, and no doubt at a 'worst case scenario' rate.</p> <p>However, London is now a very different place to what it was pre-Covid and pre-Brexit, two major events which have had a corresponding major impact on the need for additional housing. Many former London residents have returned to the EU, and a great many others have moved out of London altogether. In addition, post-Covid many people's work patterns have irrevocably changed; these three factors taken together mean that commuting from London suburbs into Central London is highly unlikely to return to pre-2020 levels (at least in the foreseeable future).</p> <p>LBWF's proposal to build housing without parking spaces is quite unreasonable. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area does not have enough infrastructure to cope, such as doctors surgeries. This is already a problem with the existing development and will be substantially worsened and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>Soundness is not possible given the sensitivity of the context. The only remedy is to abandon the proposal.</p>	Yes	<p>To ensure my representations obtain a full consideration</p>	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p> <p>In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these duties to either substantial harm or total loss of a designated heritage asset.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Serve Macken				S458 - Royal Epping Forest Golf Club	No	Response	No	<p>LBWF's proposal to build housing without parking spaces is quite unreasonable. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area does not have enough infrastructure to cope, such as doctors surgeries. This is already a problem with the existing development and will be substantially worsened and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>Additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>	Yes	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery allocation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>	
Paul Wallard				S458 - Royal Epping Forest Golf Club	No	Response	No	<p>These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for other people. The area does not have enough infrastructure to cope, such as doctors surgeries. This is already a problem with the existing development and will be substantially worsened and schools provision.</p> <p>It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.</p>	<p>If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.</p>	Yes	<p>Residents and other stakeholders were consulted on this document at a draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Lambree Poulais				SAS8 - Royal Epping Forest Golf Club	No	No	No	Too many properties in a short space. Traffic suffers already there and there is no provision for the extra strain on traffic, as well as parking, doctors, dentists, nurseries and local schools.	Too many properties in a short space. Traffic suffers already there and there is no provision for the extra strain on traffic, as well as parking, doctors, dentists, nurseries and local schools.	No		<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP service, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
David Matson				SAS8 - Royal Epping Forest Golf Club	No Response	No	No	The proposals are unsound on three grounds: 1. The housing targets in LP1 remain unproven beyond assertion and diverge from the targets within the London Plan. As such they do not provide a sound basis for housing allocations on individual sites, such as SAS8. On the same grounds, LP1 fails to comply with the Duty to Cooperate with the Mayor's housing targets. 2. The sustainable policy to enable an 15 minute city has been strengthened in LP1. SAS8 is within a multi-function centre with a tourist element. However, SAS8 has not formed part of any master planning of the Station Road area. Instead, each site has remained one of many, in a scatter gun approach that evaluates each site as an individual opportunity site. The community has not been able to shape SAS8 within its context, to suggest uses as part of a wider whole. The Site Allocation is therefore unsound in that it does not reflect this wider consideration within the master planning area. 3. The proposals make no reference to height. Although the Council has made use of skyline studies that have considered proposals up to 6 stories, LP1 is the document, so that the public should be able to understand the implications of development here. At the moment, there is no notification that the site has a potential for height. The site allocation is therefore unsound because the public is not fully informed of the nature of the possible development.	1. The housing targets in LP1 should be revised, justified or revised to the levels set out in the London Plan. Development expectations on individual sites should then be revised. 2. Station Road/ North Chigford should be subject to a master planning exercise to tackle the twin issues of the 15 minute city and the areas closer to it. 3. The Site Allocations potential for height should be part of LP1, to provide the public with fuller information on the prospective development.	I have already sent written comments on LP1, and have been invited to take part in the Examination this February.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspector's examining the London Plan as the formula used to calculate supply from small sites was not chosen to be justified. The revised target falls short of the Council's identified housing need of 1,818 new homes per year, as well as the London Plan identified need for 45,000 homes per year across London. Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2021).	
Christopher Palmer				SAS8 - Royal Epping Forest Golf Club	No	No	No Response	A plan to squeeze 45 houses into such a small site cannot be compliant with density and/or height regulations. It is also unsound to propose that the plan will "provide enhanced pedestrian and cycle connectivity" when that connectivity is already perfectly adequate	Dramatically reduce the number of houses proposed to keep the development in keeping with existing neighbourhood in terms of density and height, as well as mitigating its impact on the rural nature of the surroundings	Yes	Because it's clear that those who developed the proposals have no understanding of the current nature of the area!	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. Stuart Kestevenbaum				S458 - Royal Epping Forest Golf Club	No Response	No Response	No Response	Not in keeping with local character. Changes a predominantly low rise area and impacts views and skyline. Parking needs ignored and effectively includes those who need their own transport for work or due to age or social circumstances. Not positively prepared.  Not Effective: No additional infrastructure planned to cope with the totality of developments S455 - 58  Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the setting of surrounding buildings. Any proposal of more than 3 stories would not meet policy D9 of the London Plan.	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs, rather than a wishful desire of how people should be made to live.	No	Not necessarily me but certainly representatives of the affected local community who seem under represented in these planning decisions	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have in conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 72 - Designated Heritage Assets, there is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new wave of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors will be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: •Research/fact finding: the choices made in the plan are backed up by facts. •Evidence of participation of the local community and others having a stake in the area, and •The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: •Sound infrastructure delivery planning. •Having no regulatory or national planning barriers to delivery; •Delivery partners who are signed up to it; and •Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. •The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to changing circumstances.</p>
Bianca Westwood				S458 - Royal Epping Forest Golf Club	No	No	No	Because the local people do not want residential buildings in that location	-	Yes	-	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S458 - Royal Epping Forest Golf Club	No	No	No		Just don't do it. The entrance to Epping forest should be left clear of high buildings, I have read through all other plans and whilst the others are particularly appealing I understand that housing is needed. This spot, however is where I believe the line ought to be drawn. I'm sorry that I can't be any more precise than that. I'm not sure why you expect the general public to be able to contribute in such a way.			The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Jason				S458 - Royal Epping Forest Golf Club	No	No	No	I would love to put the detailed and eloquent response that perfectly articulate how these plans are out of keeping with the area, aren't the type of housing required and just plain aren't necessary.  However after witnessing the utter incompetence and illegal behaviour of ERMV during the main 'consultation' and the subsequent farcical implementation that ruined the Walthamstow Village area. Whilst introducing traffic chaos and subsequently increasing pollution! Along with the high rise developments on every single car park and available space.  So I'll opt for the comment earlier... You're corrupt, incompetent and operate illegally. You should be ashamed of yourselves.				This Response is noted.
Tam Wise				S458 - Royal Epping Forest Golf Club	No	No	No	Do you really have to ask why this is inappropriate!	This is adjacent to protected forest land.	No	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).
Helen Chivers				S458 - Royal Epping Forest Golf Club	No	No	No	You should not be building flats so close to the forest which is a beauty spot enjoyed by thousands.	Low rise, attractive traditional style or preferably TO NOT BUILD ANY FLATS AT ALL. Most modern buildings look like ugly boxes and are not in keeping with the local architectural style.	Yes		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S458 - Royal Epping Forest Golf Club	No	No	No	It doesn't provide the housing needed by local residents. Its location makes it valuable to the council.	Build affordable housing as per the brief	No		There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.

Mrs Geraldine Kendall				S458 - Royal Epping Forest Golf Club	No	No	No	<p>This process is too officious - it risks excluding residents from being heard. I am not a legally qualified person. I am writing as a long term resident of Chingford Green Ward. I consider all local sites in North Chingford to be unsound. In the case of the Royal Epping Forest Golf Club, on Green Belt land and being into a protected green space, consider this to be a wholly inappropriate oversized and over tall development given its position on the boundary of Chingford Plains and Epping Forest. Such a development will subvert the gateway to Epping Forest, and rob it of its rural feel and character and forever spoil views from across the Plains, for both residents and visitors. There is no way this proposal, can ever be considered 'sensitive'.</p> <p>I am alarmed by this attack on green belt, in such close proximity to Epping Forest, Chingford, a suburb, with the North Chingford area, in particular, being a semi-rural feel, which is much loved by residents and visitors. The area is mainly 2/3 story residential buildings, and as such, this is an entirely understandable and unmissable proposal for an area which was once part of Essex and is still strongly linked to Epping Forest, through remnants of the forest, that now lie within the London, 68 parishes, including Chingford Green at the other end of Station Road.</p> <p>My family and I (choose to live in North Chingford because of its low rise, open, village feel / semi-rural character. The LP will destroy everything that makes our local community special and unique - and the Council refuse to listen. I am staggered that LDFW is ignoring this important historical boundary with Epping Forest (as S555, despite local opposition).</p> <p>Before importantly, the LP asks to build far more homes than is actually required by the London Plan, and has failed to take into account Brexit and fall in London population; the Covid pandemic and move towards working from home away from London, and the leveling up agenda requiring less development in London, which makes a mockery of the London Plan.</p> <p>Proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan asks to build more homes than the London Plan. Existing residents will be over looked, loss of privacy, early/late night, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc'</p>	<p>I am a local resident - I am not equipped to say why my suggestions would make the LP legally compliant and sound.</p> <p>LDFW needs to listen to its residents/local community and acknowledge there are other ways of doing things instead of ignoring them and ploughing on with their proposals regardless as they have done - it makes you feel totally powerless.</p> <p>Reduce the number of proposed homes in the LP to the required number only and remove sensitive sites such as the Royal Epping Forest Golf Club.</p> <p>Bring back empty domestic properties around the borough into use through a programme of refurbishment.</p> <p>Protect the Green Belt and restrict any development in suburban neighbourhoods, to less dense, low rise - no more than 3 storey. Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals such as Royal Epping Forest Golf Club and Chingford Green and nearby developments adjacent to forest boundaries - unlike ugly concrete and glass box buildings with balconies which are springing up around the borough.</p> <p>Include a better mix of housing in the LP - houses, maisonettes and bungalows, with garages - not just studios, so-called flats.</p> <p>Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.</p>	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rammar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value of any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rammar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The study recognises the impact that development can have on heritage assets and conservation areas and advocates a sensitive approach.</p>
Lloyd Parkinson				S458 - Royal Epping Forest Golf Club	No	No	No	<p>Proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan asks to build more homes than the London Plan. Existing residents will be over looked, loss of privacy, early/late night, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc'</p>	<p>Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.</p>	No	<p>Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 32,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the addition of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Tim Hancock				S458 - Royal Epping Forest Golf Club	No Response	No Response	No Response	<p>I Strongly Object, to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to pre-existing degradation to the surrounding environment, negatively affecting the current residents') This inconsistent and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions concerning our future to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppets by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a liberal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are North Chingford is supposed to be 'the gateway to the forest'. Any development over 2 storeys would be detrimental to the village</p>	<p>Reject based on continued designation to local community and strain on local services, as pointed out above.</p>	Yes	<p>This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contention for the consideration towards the current people in the vicinity, while it also an assault on their existing cultural and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short term financial terms, will underwrite the future wellbeing of the indigenous community?</p>	<p>Offensive Response</p>
-				S458 - Royal Epping Forest Golf Club	No	No	No Response	<p>Proposed developments would be out of keeping with the area. 				S458 - Royal Egging Forest Golf Club	No	No	No	This is one of the most ridiculous proposals Founded 1888 Are these people determined to destroy any building they find in the Chingford/Highams Park areas that does not conform to their "glass & steel" agenda? Are any of these proposals being supported or being put forward by local residents of Chingford/Highams Park areas? Are they in fact being proposed by people that do not live within the Chingford/Highams Park areas?	NO COMMENT		-	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  The Council sets out it's strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.
Miguel Loureiro				S458 - Royal Egging Forest Golf Club	No	No	No	Why hasn't the council asked the local community what they want? This is destroying a green space to build houses while at the same time destroying the village feel of Chingford	Consult with the local community on what they would want for that space. Why not build a playground for children? This is sorely missed in the area		I'm a resident so I feel I should have a say in what happens to my neighbourhood	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kay Anderson				S458 - Royal Egging Forest Golf Club	No Response	No	No	Council is building above housing requirements for the Borough- why? See why Claire Coghill resigned - all planning under her watch should scrap....	Council need to be thoroughly investigated as corrupt to core. No benefit to Chingford citizens at all.	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 2,800 homes per year, but targets were downgraded across London by the Planning Inspector examining the London Plan as the formula used to calculate supply from small sites was not down to be justified. The revised target falls short of the Council's identified housing need of 1,610 new homes per year, as well as the London Plan identified need for 6,000 homes per year across London.
Christopher Thorndyke				S458 - Royal Egging Forest Golf Club	No Response	No	No Response	The site is occupied by a historically important Golf Club which can be used by the local community (membership & hat hire) it is in a ideal location in the edge of the golf course and next to chingford pias & forest. To have such a high density of flats would be awful and totally change the preserved characteristics of the area.	The existing golf clubhouse should remain but the old 1930s houses used by Osteopath could be redeveloped with a few 2 storey flats (8-7)	Yes	-	In Local Plan Part 1, Policy 72 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviance from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The definition of tall buildings across the borough is sound and in conformity with the London Plan, as agreed in the Statement of Common Ground AT 02E27. The Local Plan is careful to identify the differing characters across the borough and sets clear policy expectations relating to them. Particular attention in relation to this is drawn to Policy 8 - Character Led intensification and the new 'Building Height' policy proposed through Main Modifications.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the borough.  The Local Plan has a policy on preserving existing parks and open spaces and enhancing access to for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of sports playing pitches.
Cat				S458 - Royal Egging Forest Golf Club	No	No	No			No	-	This response is noted.
Rebecca Boylen				S458 - Royal Egging Forest Golf Club	No	No	No	No parking. Housing too high should only be 2 story as other properties around. No infrastructure in place! No local schools - nearest school is catholic and not all inhabitants are catholic. No parking. Edge of green space - needs to be in keeping.	Lack of disabled parking - Lack of parking.	No	-	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Abigail Woodman				SAS8 - Royal Epping Forest Golf Club	Yes	No	Yes	Waltham Forest Council quite rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing, and in the south of the borough, access to the marshes is being used to support intensive development. In contrast, in the north of the borough, developments must be designed to "minimise access to Epping Forest and "mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.		It is essential that green spaces have a voice at the table during the examination hearing sessions.	The SANG strategy will be delivered as part of the Local Plan to ensure the spaces identified within it see improvements as development comes forward. The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Shaoun Medhurst				SAS8 - Royal Epping Forest Golf Club	No	No	No	"No as LBWF should be seeking to preserve the 'local character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of nearby houses at the very edge of London. The gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposed for a 4-story building in a Conservation Area next to the village green, historic wooden cottages and a Church is particularly offensive! There is a petition of over 5,000 signatures objecting to this particular development proposal and residents' views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.19 SAS8) states 12,040 new homes over 10 years and LBWF is proposing 27,000 new homes by 2031 - a very significant excess 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they have future proofed for them.	Impacts C Development proposals should address the following impacts: (i) visual impacts a) the views of buildings from different distances - long-range views: "These require attention to be paid to the design of the top of the building (it should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views. mid-range views from the surrounding neighbourhood" particular attention should be paid to the form and proportions of the building, it should make a positive contribution to the local townscape in terms of legibility, proportions and materiality. (ii) immediate views from the surrounding streets - attention should be paid to the base of the building, it should have a direct relationship with the street, maintaining the pedestrian scale, character and visibility of the street. Where the edges of the site are adjacent to buildings of significantly lower height or parks and other open spaces there should be an appropriate transition in scale between the tall building and its surrounding context to protect amenity or privacy. (b) whether part of a group or stand-alone, tall buildings should conform to the spatial hierarchy of the local and wider context and aid legibility and wayfinding (c) architectural quality and materials should set of an exemplary standard to ensure that the appearance and architectural integrity of the building is maintained through its lifespan (d) proposals should take account of, and avoid harm to, the significance of London's heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification, demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area as buildings, in the setting of a World Heritage Site must preserve, and not harm, the Outstanding Universal Value of the World Heritage Site.	Yes		The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC). Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Richard Iles				SAS8 - Royal Epping Forest Golf Club	No	No	No	This proposal to build 45 homes on the edge of Chingford plan, a large open area of Epping Forest will need a tall building highly visible against the Forest background quite out of keeping with the SAC and nearby heritage buildings e.g. Chingford Station and Victorian residences along Forest Avenue. It also has safety hazards due to its immediate proximity to a busy junction.	Project: Unnecessary development immediately impinging on the SAC. I cannot see how access to the SAC can be minimised with such a building adjacent to it.	No		This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EF SAC).
Janine Heath				SAS8 - Royal Epping Forest Golf Club	No	No	No	This plan isn't in keeping with the surroundings. This is on the cusp of forest land & should remain as such	The land should move used for housing	No		The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough. The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Raymond Moffat				SAS8 - Royal Epping Forest Golf Club	No	No	No	This development will be out of character with the area, it will be encroaching on the natural beauty of Epping Forest by its size and the character the area is of predominantly 2 story construction	Reduce the size of the development, Reduce the height to the 2 story average thereby protecting the views to and the character of Epping Forest and Chingford plans		There is no point putting the proposal out for public consultation if you don't then listen and act on their views, participation is part of the process	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). 				S458 - Royal Egging Forest Golf Club	No	No	No	This plan would be appropriate in a high rise environment area like that development at the junction of Blackhorse Road and Forest Road in Walthamstow.	I'm not sure how planners could possibly think this plan is in any way sympathetic to an area which merges into the open common land and Forest. Developers understood the need to complement surrounding building which do not detract from the natural beauty of the area. This proposal does not come close to that idea.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Jane Edison				S458 - Royal Egging Forest Golf Club	Yes	No	No response	You state 40 new homes. I assume this is flats. How tall will the building be? Will they cut the current trees that individuals have from their current dwellings?  What about the parking of their cars? Will all roads in North Chingford be restricted to permit parking so that local residents can park throughout the day. This is a real issue and one that needs to be addressed with all these plans for development.  Will Forest View be made into a public road so that residents could park here at the moment the road is a real disgrace.	1) Max of 3 storey tall 2) Permit parking in the whole of North Chingford to allow shoppers and residents to park without penalty. This will allow for the increase in residents as a consequence of all of these proposals that have been put forward in North and South Chingford. 3) Forest View to be made a public road, be brought up to standard and residents parking applied to the area.	Yes	An intended in North Chingford's future.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Peter Leggett				S458 - Royal Egging Forest Golf Club	No	No	No	Any development should not exceed the height of any existing buildings	Provision for car parking per residence and not exceed the height of existing properties	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.
Linda Ball				S458 - Royal Egging Forest Golf Club	No	No	No	One of the better parts of Chingford going to be spoilt by crammed in housing bringing the character of the area down - as in some many other parts of Chingford. Take one or two buildings down and cram in 50-100 more. Makes me mad	Let us keep a social club. Why does everything have to be made into small living accommodation.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Kay Anderson				S458 - Royal Egging Forest Golf Club	No response	No	No	Why is council building excessive housing? Above and beyond the requirements of the Mayor of London	Transparency in all council dealings as they are all corrupt to the core. Look at Clara Copple and why she resigned	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? Nicky				S458 - Royal Epping Forest Golf Club	No	No	No	Leave the forest alone. We need nature to survive. They clean our air - We don't need more pollution here. These trees are more valuable than apartments.	Scrap that plan	No	-	The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSAC)  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Stewart Newton				S458 - Royal Epping Forest Golf Club	No	No	No	Proposed development would be out of keeping with the area and cannot be delivered with policy compliant levels of affordable housing, no parking provision disadvantaging older people. The plan seeks to build more homes than required by the London Plan. Consultation failed as no notices/public meeting to advise residents, only an online zoom meeting. Shortage of doctors, dentists, schools etc.	Provide parking, healthcare, education, etc.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Susan Reynolds				S458 - Royal Epping Forest Golf Club	No	No	No	Recreational ground being taken away	Leave site as it is	No	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Kerry Della-Hogreave				S458 - Royal Epping Forest Golf Club	No	No	No	The town does not have public services to sustain the current residents in the borough. Adding more homes in North Chigwell will stretch small amount of services in the area. I.e. doctors, schools, s		No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Mal Trantham				S458 - Royal Epping Forest Golf Club	No	No	No	I find it hard to believe that being right on top of the SAC that the Conservators would agree to such a building on that site. I realise the site is privately owned and the Freeholder may wish to "cash in" on ERFV's suggestion to develop. The site is an integral part of the gateway to the Forest and as such the proposals are both unsound and fail to comply with the duty to co-operate by not listening to residents' objections.	Leave the golf club alone as that would make this part of the Local Plan compliant and sound.	Yes	I would like the opportunity to know what is going on and whether further input from residents will be listened to.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. 				S458 - Royal Epping Forest Golf Club	No	No	No	It doesn't provide the housing needed by local residents. Its location makes it valuable to the council.	Build affordable housing as per the brief			There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations, for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
				S458 - Royal Epping Forest Golf Club	No	No	No	This is a gateway to the forest. North Chingford is a semi rural location, unlike the rest of LBWF. This is clear overdevelopment and excessive and not in keeping with the remainder of the area or the will of the local people				The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.
Raymond Moffat				S458 - Royal Epping Forest Golf Club	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsustainability of their plans for North Chingford and the surrounding area!	It is intrusive and out of character for the area and needs to be drastically reduced in size to blend in to the where it is			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S458 - Royal Epping Forest Golf Club	No	No	No	No as LBWF should be seeking to preserve the 'Local Character' of the area - which is of low rise suburbs of mostly houses at the very edge of London. The LBWF to Epping Forest is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1 Pg 164) states 22,500 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space? Also, the housing target in the London Plan may be absent as the Government have stated that they are proposing to require less development in London and the South East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they will be future proofed for them. Delivery of housing targets should not be delivered in such away as to only provide minimum standards and should not be acquiesced to such that development overruns existing residential areas to the detriment of existing residents or adversely affects the character of areas which are valued by existing residents. Land regeneration should take into account the aesthetic, the historic context and the value of existing buildings such as may be identified as important by local communities in such areas designated for development. The proposals for no parking are social engineering. With no parking for vehicles, <a href="https://www.researchgate.net/publication/341666246">https://www.researchgate.net/publication/341666246</a>	Impacts C Development proposals should address the following impacts: 1) visual impacts 4) the views of buildings from different distances; 2) long range views " these require attention to be paid to the design of the top of the building. It should make a positive contribution to the existing and emerging skyline and not adversely affect local or strategic views; 2. mid-range views from the surrounding "neighbourhood" particular attention should be paid to the form and proportions of the building. It should make a positive contribution to the local townscape in terms of legibility, proportions and materiality 3. immediate views from the surrounding streets " attention should be paid to the base of the building. It should have a direct relationship with the street, maintaining the pedestrian scale, character and vitality of the street. Where the edges of the site are adjacent to buildings of significantly lower height or parks and other open spaces there should be an appropriate transition in scale between the tall building and its surrounding context to protect amenity or privacy 3) whether part of a group or stand alone, tall buildings should reinforce the spatial hierarchy of the local and wider context and aid legibility and wayfinding 4) architectural quality and materials should be of an exemplary standard to ensure that the appearance and architectural integrity of the building is maintained through its lifespan 4) proposals should take account of, and avoid harm to, the significance of London heritage assets and their settings. Proposals resulting in harm will require clear and convincing justification, demonstrating that alternatives have been explored and that there are clear public benefits that outweigh that harm. The buildings should positively contribute to the character of the area 4) buildings in the setting of a World Heritage Site must preserve, and not harm, the Outstanding Universal Value of the World Heritage Site, and the ability to appreciate it. The Council must also address the problem of infrastructure, where are the schools, doctor surgeries etc to support an increased population.			The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
David Haskhurst				S458 - Royal Epping Forest Golf Club	No Response	No	No Response	Why put a blot on the landscape, is there no place that you want to run				The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Fiona Cousins				S458 - Royal Epping Forest Golf Club	No	No	No			No	I don't really know what you mean? This consultation is too complicated, who is aimed at, if residents, you should by open.	The Local Plan regulations stipulate that anybody wishing to attend and give evidence at the Examination in Public (Local Plan Hearing Sessions) needs to specify the reason for their attendance. If wish to attend but not give evidence at the hearing sessions, members of the public are more than welcome to watch the hearing sessions from the public gallery (in person) or watch the sessions online depending on which format the inspectors choose.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Caroline Rubidge				S458 - Royal Epping Forest Golf Club	No	No	No	45 homes in an area adjacent to Epping forest with an existing vista of historic pile hills/Chingford plains and the Epping forest would damage biodiversity which is already under increased threat due to a range of ecological and local hazards. There is no parking provision in the area and the plans are too high rise in their nature and will be detrimental to the character of the area. Building work will disrupt two major roads in and out of a Chingford for months if not years.	Lower level plan - more in keeping with the area and less impact on biodiversity.	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S458 - Royal Epping Forest Golf Club	No	No	No			-	-	This response is noted.

				SAS8 - Royal Epping Forest Golf Club	Yes					Yes		This response is noted.
Royal Epping Forest Golf Club				SAS8 - Royal Epping Forest Golf Club	Yes	No	Yes	Re: reshaping the Borough Waltham Forest Local Plan LP2 This letter contains the response of the members of Royal Epping Forest Golf Club (the Club) to the lettering is used for quotes. We have plans drawn up for the development of the site which includes the clubhouse, 25 residential units and one commercial unit. This outline plan is the base of our proposal. We are more than welcome to share these plans with officers. We feel we must first briefly explain a little about the Club. The Club owns all of Strategic Site SAS8. The site has the Clubhouse, putting green and sheds, in a separate small house called Crossways which has a frontage on Station Road is the director's business of our tenant. The Club is the oldest golf club in the borough and the oldest in Essex. It was founded in 1888 and shortly thereafter secured Royal patronage. The Club is the only Royal club in Essex Golf Union and is one of only 66 or so golf clubs around the world with patronage from our Royal Family. The Club has a close working relationship with the Corporation of London who hold and run the Forest as Trustees. The Club is a members Club, a not-for-profit organisation which is run by the members, via a Management Committee. For the members, the Management Committee members are voted into office by the club members at Annual General Meetings. The Club has 4 staff. The tenants trade as Chingford Chloropractor. He has been a tenant for over 20 years and our members use his service. Our tenant has 2 employees. Over the past few years the Clubs Management Committee have been discussing options around golf club in terms of sustainability and longevity. The Club members are committed to the long term life of the Club and have authorised its Management Committee to explore options to develop the Clubs site.	The density of the development of site SAS8 (Royal Epping Forest Golf Club) in LP2 should be reduced from 45 dwellings plus commercial unit, to 25 dwellings plus commercial unit as well as accommodation necessary to enable the golf club to survive and prosper...		This is about the very survival of this historic Club	This response is noted.

Mike Chimes				SAS9 - 472-510 Landfill Road and James Road	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules that are not transparent to consumers." Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LP1 for 2009-2025. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from the specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point-scoring, which officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid but essentially a web-based technology can never be inclusive of the population as a whole. Certainly some meetings have had difficulty low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LP1 and what has been noted at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 3800 homes in. Whilst EWFC has a large existing lot (60000), and central government guidance is driving all local authorities to ensure they develop	There should be clearer reference to the Highams Park Plan with reference to site SAS9 the chief driver in both point order is to provide 45 homes. It is unclear whether this is justified alongside the loss of local office accommodation occasioned by the development, despite the commitment to non-residential floor space. The footprint of the site is a key one in Highams Park retail centre, and in an area one to develop with a narrow nose opposite the Broadway to achieve the intensity of housing development it appear to be proposed to include a 10/11 building at the rear, despite its impact on modern housing at Wilton Place. This suggestion of a tall building seems to be at odds with the nearby (2003) Highams Park Plan which allows for development in character with the neighbourhood. There are no tall buildings in the retail centre, and it would change the skyline of Highams Park and the area's essential suburban character. The site is occupied by a variety of businesses. There would be a potential loss of character and variety which is supported by the NP plan if the site were developed monolithically. It is suggested that provision for a tall building is dropped from this site and the site is withdrawn pending fuller consideration with the Highams Park Planning Group who are requested consultees. This boundary is close to the railway platforms yet this is not described as a sensitive boundary, so it would be fair for anybody on the development and should be shown as such. It is strange that this site is identified for development on that of the Regal Cinema, currently something of an eyesore due to neglect, but a key to the future character of the area is not included		I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: - Policy Prepared - This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. - Justified - This means that the Local Plan should be based on a robust and credible evidence base involving: - Research/Testing: the choices made in the plan are backed up by facts. - Evidence of participation of the local community and others having a stake in the area, and - The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. - Effective - This means the Local Plan should be deliverable, requiring evidence of: - Sound infrastructure delivery planning; - Having no regulatory or national planning barriers to delivery; - Delivery partners who are signed up to it; and - Evidence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. - The Local Plan should be flexible and able to be monitored. - The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough', in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process. This Duty to Cooperate with the Administration, the Council, the local community and other stakeholders should be included in the Local Plan Document, before adoption

				S459 - 472-510 Larkhall Road and James Road	No	No	No	The plan will light the area making it very dark and drab and not in keeping with the area and the principles of the Neighbourhood Plan limiting height and density of development and respecting impact of any additional car parking and car journeys on existing neighbourhoods.	Much lower height and reduced accommodation as not to overwhelm the local schools and Doctors		-	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Development proposals will need to be in general conformity with the Highams Park Neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Anthony G Thorne Lip				S459 - 472-510 Larkhall Road and James Road	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>10. Before submitting a local plan to the Secretary of State under section 10 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations available in accordance with regulation 16, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>11.7(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(3) The bodies or persons referred to in paragraph (2) are"</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Clingfold suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal/infant mortality rates and even though they state the new larger plant will be more efficient they will still be emissions. Although they suggest these have to be removed do have doubts as will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LEZ zone and downwind of the road meaning that will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LEZ charge. But the rest of the area will also be subject to these increases and the proposed against the natural air flows possibly result in pockets with even higher concentrations.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviours, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Clingfold Hall Estate where the 1960s tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In that it was realised in the 1920s that people needed space and open spaces were built into the developments and areas around them. This was a lesson that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely unusable, given that planning application ID2020 was withdrawn on 28 December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TfL's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five stories. That part of the development abutting the station should be no more than four stories and any five storey elevations further down towards 480 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Terrace Development on the other end of Larkhall Road to create a balanced effect and better architectural symmetry.</p>	Yes	<p>Because there are too many unanswered</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would lead to a shortfall in provision.</p> <p>The Local Plan requires that utilises infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilises infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make such necessary infrastructure will be provided as part of the proposal and secured through a L10B planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>
Gordon Turpin				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	<p>This submission is from the Highams Park Planning Group. We are the designated Neighbourhood Development Forum for the Highams Park area.</p> <p>The Highams Park Planning Group considers this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwarranted and unnecessary and will cause development on the site to be of a high and density that will completely change the much loved "village character of Highams Park District Centre.</p> <p>Our grounds for this allocation being unsound are, as follows:</p> <p>1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 stories. This fact is evidenced by planning application ID 2020 submitted to Waltham Forest Council which includes 68 flats, active ground floor space and a new station entrance. The application for just one part of the site. There are no other 6 or 7 story buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings.</p> <p>During our consultation on the Highams Park Neighbourhood Development Plan (HP Plan) most residents were clear that they wanted the plan to include policies that would preserve the much loved character of the Highams Park District Centre and that "new development should fit in. We included policies in the HP Plan to meet this requirement and the HP Plan was approved by referendum with a majority of 96.4% in March 2020. The fact that the HP Plan was adopted by the Council in July 2020, should have been a major consideration in their Site Allocations Document for the area. However, planning officers have clearly paid little heed to the HP Plan or to the many objections raised by local residents to this site allocation in their site allocations consultation.</p> <p>The following narrative shows how the Councils proposals fail to meet the requirements of the HP Plan:</p> <p>The Local Plan does not take account of the existing and adopted Neighbourhood Plan. In particular it does not respect limitations on height or change of character of the low centre and station. Furthermore employment at the location would be lost while development was in progress and unable to relocate back to Highams Park after development.</p>	<p>The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely unusable, given that planning application ID2020 was withdrawn on 28 December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TfL's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five stories. That part of the development abutting the station should be no more than four stories and any five storey elevations further down towards 480 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Terrace Development on the other end of Larkhall Road to create a balanced effect and better architectural symmetry.</p>	Yes	<p>I am Chair of the Highams Park Planning Group and it is my opinion that some of the site allocations fail to recognise the wishes of local residents as expressed in the Highams Park Neighbourhood Development Plan and we should take the opportunity to express our views to the planning inspector</p>	<p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be by sustainable.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025).</p> <p>Development proposals will need to be in general conformity with the Highams Park Neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. Lloyd Parkinson				S459 - 472-510 Larkhall Road and James Road	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan aims to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy day/night, additional demand for parking. Consultation flawed as no public/online meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc.	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	No	-	<p>Through the evidence published in the Characterisation and Intention Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Paul Willard				S459 - 472-510 Larkhall Road and James Road	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and townscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will cause a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	Yes	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Characterisation and Intention Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intention Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Dan Lamb				S459 - 472-510 Larkhall Road and James Road	No	No	No	Height of buildings not in keeping with character of Highams park. Highams park local plan being ignored. No provision for any new services to cope with all the new residents		No	-	<p>Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. If yes, please explain why?	Council's response
Mike Schm				S459 - 472-510 Larkhall Road and James Road	No	No	The local Plan is not sensitive to either the local plan not desirable does not conform to the architectural or low rise neighbourhood buildings and will bring high density unecessary development into one of the most polluted points in the area. Traffic converging from four directions and rail crossing barriers meaning static traffic for fifteen to twenty minutes every hour. The height of the buildings is also far in excess of the local character of Highams Park. In fact the emphasis should be on the park not the Highams.	You have completely ignored the Highams Park Plan and the majority of residents who clearly expressed their desire that Highams Park should retain it's character when any new planning decisions were taken. Waltham Forest Council actually adopted it in July 2020 and appear now to have ignored it. Democracy seems to have a low profile here. We are continually told that "we're Green" no, the voting public are green for voting in the same old "we got your votes last time we've got it again" political statement.		Democracy cannot be exercised unless people take part.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.	
Danielle Frase				S459 - 472-510 Larkhall Road and James Road	No	No	Building on this land will mean loss of a public swimming pool and health centre which are widely used by the community. As a young family just moved into the area we need these facilities and it is not clear if they are being replaced or quality of them. Also, more homes will mean more factories, schools etc which again as new people to the area we are already finding difficult to find. More homes bring more cars and the area already has too much traffic and no parking. It will make the area more congested and possibly dangerous in terms of traffic.	Replacement swimming pool and health centre. Limited number of houses with parking built to ensure overcrowding does not happen.	Yes	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/employer vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S459 - 472-510 Larkhall Road and James Road	No	No	The proposal has plainly ignored what was already detailed by the local Highams park planning committee. It has failed to keep in character with Highams park and has ignored all previous concerns raised.	Reduce the height of the building which may or may not mean a reduction of flats but anything above three stories is out of character for the area. Detail how what additional services for doctors and schools will be put in place.	No	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. If yes, please explain why?	Council's response
Stephen Lovell				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	No	I consider this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwarranted and unnecessary and will cause development on the site to be of a height and density that will completely change the much loved 'village character of Highams Park District Centre'. My grounds for this allocation being unsound are, as follows: 1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 stories. This fact is underpinned by planning application ID 202340 submitted to Waltham Forest Council which includes 68 flats, active ground floor spaces and a new station entrance. This application is for just one part of the site. 2. There are no other 6 or 7 storey buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings. The Highams Park Planning Group consultation on the Highams Park Neighbourhood Development Plan (NPPF) found most residents were clear that they wanted the plan to include policies that would preserve the much-loved character of the Highams Park District Centre and that "new development should fit in. Policies were included in the HP Plan to meet this requirement and the HP Plan was approved by referendum with a majority of 86.4% in March 2020. The fact that the HP Plan was adopted by the Council in July 2020, should have been a major consideration in their Site Allocations Document for the area. However, planning officers have clearly paid little heed to the HP Plan or to the many objections raised by local residents to this site allocation in their site allocations consultation. The following narrative shows how the Council's proposals fail to meet aspirations of the local residents or respect the policies in the HP Plan regarding the character of the District Centre. In view of the above it is clear that the level of development proposed for Site S459 will be: <b>c</b> wholly in breach of Highams Park Plan Policy CD02 with regards to character and design, and <b>c</b> contrary to the extent and emerging Local Plan which the Highams Park Planning Group submitted as a condition of the consent of the plan. We are aware of a response from the Highams Park Planning Group which addresses these sites and other opportunities in the Highams Park Neighbourhood Plan area. We support those comments in full.	The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely infeasible, given that planning application ID20300 was withdrawn on 6th December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TEL's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development abutting the station should be no more than four storeys and any five storey elevations further down at 480 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Tesco Development on the other side of Larkhall Road to create a boulevard effect and better architectural symmetry.		-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,664 new homes (1,266 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. Additionally, the plan emphasises the provision of GP practices and other health care facilities within walking distance to the residential catchments areas.
Conservative Councillors (General)				S459 - 472-510 Larkhall Road and James Road							No		This is noted.
A Harber Rally				S459 - 472-510 Larkhall Road and James Road	No	No	No	No	This level of development will not just be wholly in breach of HP Plan Policy CD02, it will completely decimate the existing character of Highams Park I agree with the Highams Park Planning Groups view which they base on extensive consultations with local people over the past eight years, that local residents highly value the light suburban character of the area surrounding Highams Park and do not want to see it dominated by an incongruous block of flats which will give the area a much more urban and inner city feel.			It's my local area and I want to be kept informed	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
-				S459 - 472-510 Larkhall Road and James Road	No	No	No	No	This is not in keeping with surrounding buildings. There is no infrastructure for this level of building. Does this with with the Highams Park plan?		Yes		The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Jane Ridgman				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	No	The height of the proposed redevelopment would undermine the character of central Highams Park. It currently has a village feel to it. Building a high rise, which would undoubtedly be fully judged by the date of new developments in Waltham Forest, would destroy the appeal of central Highams Park. I don't deny the site needs redeveloping but it doesn't need a high rise full of unaffordable boxes.	Make it low rise, and make it look good - not the cheap, nasty, gloomy and over priced developments that you're building in Waltham Forest. It might win you a quick buck but were stuck looking at it for a lifetime.		-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.

David John Anderson				S459 - 472-510 Larkhall Road and James Road	No	No	No	too much	Reduce or redesign for offices		simply to judge	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/218. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
-				S459 - 472-510 Larkhall Road and James Road	No	No	No	The proposed height of the development is not in keeping with the low level existing buildings of central Highams Park.	A max of 4 storeys high would be acceptable in this area.	Yes	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Nigel Mear				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	I consider the site allocation within the Local Plan to be unsound and have outlined the main reasons below.  Whilst I recognise the need for new homes, I feel very strangely that any development must enhance the area and not be an target and overdeveloped that it dominates and completely changes the character of the surrounding area.  I consider the site allocation unsound as it represents a huge overdevelopment of this site. The building height for too high and the development will be completely dominant and totally out of character with the surrounding buildings in the town centre and the existing station building. The proposed development clearly does not complement the existing character and appearance of the area and will essentially destroy the character of the centre of Highams Park.  This application also fails to comply with the requirements of Highams Park Neighbourhood Plan (Policy DP2: Character & Design) and a completely out of keeping with the character of Highams Park and the architecture of Highams Park Station and the Edwardian shopping district. It will be totally overbearing with an imposing inner-city feel that clearly has no resonance with the village character of Highams Park.  The proposed development is in fact the complete opposite of what the above policy stipulates. It will dominate the adjacent Highams Park Station, which is a distinctive and defining feature of the character of Highams Park District Centre, and will therefore be hugely damaging to the character of Highams Park District Centre as a whole.  The proposed development includes a new station entrance even though the vast majority of residents, who responded as part of the community	The new station entrance must be dropped. It is completely unnecessary given that there is already single level access to both platforms. Importantly the removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development abutting the station should be no more than four storeys and any five storey elevations further down towards 400 Larkhall Road. The design should match the four storey Highams Green Trioco Development on the other side of Larkhall Road to be congruent and create a local village effect and better architectural balance.  It is essential that any redevelopment of the site is at a much lower level of density and massing than included in S459 and which respects the important character of the area around Highams Park Station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/level from the site allocation brief is critical as it will allow for a lower rise development with less units and improve the viability of the site. To protect the character of the area around the station, the development should be four storeys abutting the station and rising to a maximum of five storeys further down at 472-474 Larkhall Road. The lower level should provide active employment spaces to minimise loss of employment in the District Centre.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to identification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019). The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Tom Hancock				S459 - 472-510 Larkhall Road and James Road	No Response	No Response	No Response	I Strongly Object to this application (Development implies something positive and THIS IS NOT THE CASE. These proposals are simply adding to overcrowding, designations to the surrounding environment, negatively affecting the current residents")  This is an unecessary and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centering on failure to control immigration, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppated by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.  Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding the attack to the wider country.  The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally responsible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.  The current proposed developments are reminiscent of the failures that are	Reject based on continued designation to local community and strain on local services, as pointed out above.	Yes	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contempt for the consideration towards the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms, will underwrite the future wellbeing of the indigenous community?	Offensive Response

Samantha Lushman				S459 - 472-510 Larkhall Road and James Road	No	No	No	These questions don't allow for nuance. Please abide by the Highams Park plan as agreed by our community and put forward by the Highams Park Planning Group.	The language you are using is off putting and unhelpful.  I would like buildings no higher than 4 stories. I would like an open green space designed like an amphitheatre for communal public events. I would like full and proper parking for new restaurants. I would like a shop to be designated as a community hub. I would like environmental sustainability to be built in to the building works as well as the final buildings and grounds. I would like to know what extra health care and education services will be put in place to support the families who move into new homes.	Yes	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of aspirational/available sites in 2037/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Malcolm Shyles				S459 - 472-510 Larkhall Road and James Road	No	No	No	It is unsound to build on what was once railway premises. Because most workplaces in the area are being built on, the only work becoming available is via the railway station. At rush hours the streets local to the station become overcrowded, there is the busy B road to the South, a similar road to the North and the level crossing opening and closing for at least 10 minutes an hour adding up to a total closure time of some 12 minutes or more. There is also regular non-passenger rail traffic. As the local work places have been built on more pressure has been put on the Victoria line and at morning peak hours crowd control is necessary. A wall is required to gain access to the single down escalator. Another underground station will soon be required. The proposed development also requires the demolishing of the recently built Lang and Cruickshank Offices, where many are employed. People are going to be put out of work? This is also a serious Climate Change Issue: repeated redevelopment of concrete structures is insane. Flats in this area is also insane, where can children safely play even if they get safely across the local roads to the site? This was after all the station coal yard. Whoever dreamt this up, needs to think again.	The whole plan is unnecessary. The ex-coal yard is unsuitable for housing.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/instigated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.

The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
				S459 - 472-510 Larkhall Road and James Road	Yes	No	No			-	-	This response is noted.
Tanya Guring				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	Potential for taller buildings to be delivered with additional storeys will be against the character of Highams Park. All recent Proposed developments have had active consultation with residents but this has been done without consulting so fails on duty to cooperate. As well as ruining the character of the street an increase in traffic in what is already a very congested road and filter need to the level crossing. This will be dangerous to pedestrians Commuters and school children that regularly use the road.	Maximum two storey building level with other residential housing. Provision of sufficient parking (eg basement level parking clear road markings for entry and exit, in accordance to current traffic layout).	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Mike Turpin				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	It should comply with the HPG plan accepted by LBWF in terms of height limits and style. No reason has been given why a new west side station entrance is required, the current one is quite new.	Abide by the HPG plan and limit height of all new buildings to avoid drastic changes to the character of the local area.	-	To ensure that LBWF comply with the approved Local Plan.	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Kevin Williamson				S459 - 472-510 Larkhall Road and James Road	No	Response	No	Endless and high density development leaves no green space or any other space - in GP and other NHS services, schools, transport and other infrastructure. After over 50 years residence in BMS, both council and private housing, it is no longer a fit or pleasant place to live.			-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of taking the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p>
Roger Hudson				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	<p>I consider this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwarranted and unnecessary and cause development on the site to be of a height and density that will completely change the much loved village character of Highams Park District Centre. My grounds for this allocation being unsound are, as follows:</p> <p>1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance station will require building heights of up to 7 storeys. This fact is evidenced by planning application ID 202040 submitted to Waltham Forest Council which includes 68 flats, active ground floor space and a new station entrance. This application is for just one side of the site.</p> <p>2. There are no other 6 or 7 storey buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings.</p> <p>During consultation on the Highams Park Neighbourhood Development Plan (NP Plan) most residents were clear that they wanted the plan to include policies that would preserve the much loved character of the Highams Park District Centre and that "new development should fit in". Policies were included in the NP Plan to meet this requirement and the Plan was approved by referendum with a majority of 96.4% in March 2020. The fact that the NP Plan was adopted by the Council in July 2020, should have been a major consideration in their Site Allocations Document for the area. However, planning officers have clearly paid little heed to the NP Plan or to the many objections raised by local residents to the site allocation in their site allocations consultation.</p> <p>The following narrative shows how the Council's proposals fail to meet aspirations of the local residents or respect the policies in the NP Plan regarding the character of the District Centre. In view of the above it is clear that the site allocation is unsound.</p>	<p>The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely unusable, given that planning application 202030 was withdrawn on 6th December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TfL's well documented financial problems. Removal of the east of the station entrance will allow the re-development of the site to go ahead with a maximum height of no more than four storeys. Efforts should be made such that the design matches the four storey Highams Green Terrace development on the other side of Larkhall Road to create a boulevard effect and better architectural symmetry.</p> <p>Support redevelopment of this site but at a lower level of density and massing than included in S459 and which respects the important character of the area around the station and provides design principles that mirror the architectural rhythm of the newer modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance from the site allocation will improve the viability of the site and allow for a lower rise development with fewer units. To protect the character of the area around the station, the development should be no more than four storeys. The lower level should provide active employment space to minimise loss of employment in the District Centre.</p>		-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.</p>
				S459 - 472-510 Larkhall Road and James Road	No	No	No	Why aren't they listening to the residents?	Limit heights to the same as other local developments (3 storeys max).	No	-	<p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
Fino Rehner				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	<p>The site allocation within the local plan is unsound because of the inclusion of the new station entrance and the consequent likelihood of development with excessive height and density that will damage the character of Highams Park - in particular the village character of the area around the station.</p> <p>The nature of the housing targets proposed for the site could allow up to 7 storeys in any development. That is wholly out of keeping with the surrounding area.</p> <p>The vote for the Highams Park plan by residents was a vote to preserve the character of the area. But the level of development planned for the site goes against the spirit of that vote, namely breaching CDP in the plan. This is supposed to preserve the character of the area around the station. Further the proposed site allocation will inevitably lead to development that does not respect the height, scale and mass of surrounding buildings, and does not respect the building line and character of the road in which it is located.</p> <p>I am also surprised that a new station entrance is included despite opposition in a previous consultation. It was lead to high-rise development. I would support a low-rise development with no new entrance as an alternative.</p>	<p>The plan for a new station entrance should be ditched and any development should be no higher than the Terrace opposite.</p>		-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>

David Jennings				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	The proposed development for this site is of a height and density that will totally destroy the village feel of Highams Park Centre. When the emerging local plan clearly states that the council wishes to retain the character of the Borough's historic neighbourhoods. Policy CD2 requires development to be of high quality design and should complement the existing character and appearance of the Area. Paragraph 5.9 of the MP Plan states, many areas have a clear architectural heritage, new developments in such areas need to fit in rather than stand out! The station building dates from 1933 and is a one storey building forming a key part of the area and will be dwarfed by a 6 or 7 storey building next to it. The provision of a new station entrance is completely unnecessary, as there are already two perfectly adequate step free station entrances, one on each side of the line. The proposed level of development will not even fit in with, or complement the fairly recent modern developments on the western side of Larkhall Road. It is well known that local people are vociferous in favour of keeping the village feel of the area around the station, and are totally against high rise blocks of flats slip bang next to the station, there are no other 6 or 7 storey buildings anywhere near here. It is clear from the proposed development, that consultations with local residents have been completely ignored.	We understand that there will be development of this site, but we feel that removal of a new station entrance from the proposals will allow a lower and less dense development of this site much more in keeping with the historic village feel of the area around the station.	Yes	I represent Highams Residents Association	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Slough Demetriou				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	None of the proposed plans make any mention at all to improvement to public transport. They only mention cycling, which isn't good enough and will leave cyclists, motorists and buses competing to use the already overly busy roads - especially around Highams Park where the roads are horribly congested on all directions since the level-crossing barriers are down.	We desperately need public transport improvements and better planning for the roads. The hands off attitude cannot continue, it seriously needs work. The barriers at Highams Park should be closed permanently, and the roads reconfigured with one way systems to allow traffic flow, and more trains per hour at Highams Park - higher capacity trains do nothing, it needs to be more frequent. This needs fixing before any new developments can be taken seriously.	No	Decision making seems to favour developers and be out of touch with the reality recognised by residents	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
										Yes

Jo Ann Richardson				S459 - 472-510 Larkhall Road and James Road	No	No	No	Height is above the Highams Park plan height guidelines.	Reduce height to align with surrounding buildings.		-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Kay Voller				S459 - 472-510 Larkhall Road and James Road	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling - doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no haafts or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to MP residents!	No	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Aucilar				S459 - 472-510 Larkhall Road and James Road	No	No	No	No tall building should be built in this zone as it will destroy the spirit of HP and the low habitations already existing.	Only 4 floor maximum habitations should be built. And also keep the local companies in the ground floor.	No	Because I am living here and I use the local facilities and shops.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
James Moore				S459 - 472-510 Larkhall Road and James Road	No	No	No	The council does not take representations on board. Locals do not want more residential development in Highams Park. This is being ignored.	Remove this allocation.	Yes	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of revenue to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.
Gillian Poulter				S459 - 472-510 Larkhall Road and James Road	No	No	No	This site has been designated as one with potential to build taller buildings. This site is at a prominent position in Highams Park, to build taller here is not compliant with the Highams Park Plan. Despite objections you have failed to co-operate with the wishes of the community living and working there.	This site borders the railway, however, so do residential properties on the other side of the track. This build severely impacts their quality of light and privacy, and has not been taken into account. It ignores the planning codes of the Highams Park Plan. You should listen to and take into account these codes and objections to make this a sound plan.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
David Aldridge				S459 - 472-510 Larkhall Road and James Road	No Response	No	No	High rise developments are not the answer and would not fit in with the character of the area. How can you ensure there is no conflict of interest when the former Labour council leader is now working for the development company?	Smaller developments only.	No	-	Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
										No

If yes, please explain why?	Council's response
Michael And Pamela May				S459 - 472-510 Larkhall Road and James Road	Yes	Yes	No	The inclusion of a new station entrance is unnecessary and will involve extra unneeded expense. The proposed height and density is contra to the village character of the area. There are no other 6 or 7 storey buildings close to the proposed development. Ergo, the new buildings will completely over shadow and dominate the area. The station is a one storey building and is a much loved and respected part of Highams Park. This development is 'wholly in breach of Highams Park Plan Policy CD2 with regards to character and design and, contrary to the extant and emerging Local Plan in which the overriding principles are stated as seeking to retain the character of the borough's historic neighbourhood'. This development is in danger of decimating the existing character of Highams Park District Centre and will do nothing to improve the area. We are in complete agreement with the comments and arguments put forward by The Highams Park Planning Group	Would like to see this scaled back to a more reasonable height and density. Would like for the village and community feel of the area to be protected both for existing and new residents. We are in complete agreement with the comments and arguments put forward by The Highams Park Planning Group		Are concerned about development of housing when there is no provision made for other infrastructure, ie schools, medical centres, transport, etc	Through the evidence published in the Character Intensification Study, The Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development at higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Simon Teppatt				S459 - 472-510 Larkhall Road and James Road	No	Response	No	Does not comply with the Highams Park Plan	Reduce the height. We do not want tower blocks!	Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Patricia Overland				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	The new buildings will be too high and a totally inappropriate development at the heart of the village area of Highams Park. There is nothing approaching the 6/7 storeys that these would need to be and are much higher than the other new apartment blocks. A new entrance to the station would increase footfall around the, already busy, Larkhall Rd traffic island crossing area.	restrict the height of any new buildings which would make this more sound by not overpowering the local area to the detriment of the 'village' feel. abandon the idea of a further station entrance which will make the scheme less expensive and more viable without the need to build so high.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Clare Baumfield				S459 - 472-510 Larkhall Road and James Road	Yes	No	No	Development way too high and out of character with Highams Park. Please refer to the local plan put in place by HPPG that was 90% agreed with by local residents. All for local development but must be in keeping. We don't need another entrance to station.	support redevelopment of this site but at a lower level of density and missing than included in S459 and which respects the important character of the area around the station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/exit from the site allocation brief will improve the viability of the site and allow for a lower rise development with less units. To protect the character of the area around the station, the development should be four storeys abutting the station and rising to a maximum of five storeys further down at 472 - 474 Larkhall Road	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Russell Wellard				S459 - 472-510 Larkhall Road and James Road	No	No	No	This does not comply with the Highams Park plan. Knocking down a 1980s building with years of life left in it is hugely wasteful.	Height should be a maximum of 2 storeys in keeping with the rest of Highams Park. Architectural style needs to complement the existing Highams Park buildings. This is not an appropriate site for high density housing.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. 				S459 - 472-510 Larkhall Road and James Road	No	No	No	Do you consider that the Local Plan Complies with the Duty to co-operate? Waltham Forests Proposed Submission Document LP2 dated 5th November 2021 does not comply with the Duty to Cooperate in at least four ways: [i] It is confusing to other agencies, and members of the public, that the SA numbers on the Reg 28 Local Plan are completely different from the SA numbers on the Reg 29 version. For example, the Larkwood Leisure Centre site is S454 in the Reg 28 version, but S462 in the Reg 29 version. Given it was a requirement of the government regulations that consecutive SA numbers, starting from SA1, are used in both documents, it would have been helpful if in the spirit of co-operation, for Waltham Forest to have included in the Reg 29 documents the Reg 28 numbers in brackets, say [The Master Plan document for the Larkwood Leisure site is (001) given as S454. Furthermore, unhelpful duplication occurs in Table 2, in the Sustainability Appraisal Framework Objectives document, that uses SA numbering (SA1, SA2 etc.) for each Objective. [ii] Hard copy forms have been provided in Borough Libraries for those without internet access, requiring the persons name, address, telephone and email. But these forms are probably not GDPR-compliant, as they do not state the use that will be made of the personal data (presumably that the name will be published along with comments, but the other details will be kept secure). [iii] The consultants appointed, ClearLead Consulting Limited, have not engaged with the complainants Park Neighbourhood Development Plan, that was supported by over 94% in a recent Council "run referendum. [iv] The "commongplace facility does not appear to permit responses except for those relating to (a) specific sites) - which the respondent has published on the website.		Yes		The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.

If yes, please explain why?	Council's response
David Smith				S459 - 472-510 Larkhall Road and James Road	No	No	No	This is horrid. It looks way out of place compared to other buildings in Highams Park and needs scaling back. People like years to save up and find areas they like, and it's key that when new buildings are added they fit with a surrounding area. Also, infrastructure must again, be considered, parking, schools, doctor's, transport.	New more than 3 stories high. Highams Park Plan Policy CD02 should be adhered to after HP06 was voted in.	-	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Development on all allocated sites will still need to go through a full planning application process in order to be approved.
Fiona Cousins				S459 - 472-510 Larkhall Road and James Road	No	No	No	This does not follow Highams Park plan		No	I don't really know what you mean? This consultation is too complicated, who is it aimed at? If residents, you should try again.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.  Development proposals will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.
Ian Burge				S459 - 472-510 Larkhall Road and James Road	No	No	No	It does not comply with the Highams Park Plan, why aren't you listening to local people who pay the Council Tax & elect the council	comply with HP 6 & provide local infrastructure to support new developments	Yes	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Ray Anderson				S459 - 472-510 Larkhall Road and James Road	No	No	No	Council's building houses over and above requirements. Why? One why Claire Coghil resigned, all plans muted under her watch should be scrapped.	Thorough investigation into council development planning as corrupt from top down. Does not benefit Chingford citizens at all.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
James				S459 - 472-510 Larkhall Road and James Road	Yes	Yes	Yes	-	-	Yes	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Janet McCarthy				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes	I agree with the Highams Park Planning Group's response as below: The WPC considers this site allocation within the Local Plan to be unsound, as the inclusion of a new station entrance is unwanted and unnecessary and will cause development on the site to be of a height and density that will completely change the much loved village character of Highams Park District Centre. Our grounds for this allocation being unsound are, as follows: 1. To meet the housing targets proposed for this site, and the inclusion of a new station entrance will require building heights of up to 7 storeys. This fact is evidenced by planning application ID 20340 submitted to Waltham Forest Council which includes 68 flats, active ground floor space and a new station entrance. This application is for just one part of the site. 2. There are no other 6 or 7 storey buildings in close proximity to the Site S459 and because of this, the level of development proposed will be overly dominant and totally out of character with the surrounding buildings. During our consultation on the Highams Park Neighbourhood Development Plan (HP Plan) most residents were clear that they wanted the plan to include policies that would preserve the much-loved character of the Highams Park District Centre and that 'new development should fit in. We included policies in the HP Plan to meet this requirement and the HP Plan	I agree with the views of the Highams Park Planning Group, as below: The new station entrance should be dropped, as it is unnecessary given that there is already single level access to both platforms, so a third entrance is not needed. A new entrance is also most likely unusable, given that planning application ID0200 was withdrawn on 08th December the day before it was due to be considered by Planning Committee due to questions over how it would be funded, especially given TE's well documented financial problems. Removal of the cost of the station entrance will allow the re-development of the site to go ahead with a maximum height of between four and five storeys. That part of the development abutting the station should be no more than four storeys and any five storey elevations further down towards 488 Larkhall Road. Efforts should be made such that the design matches the four storey Highams Green Tesso Development on the other side of Larkhall Road to create a boulevard effect and better architectural symmetry. The Highams Park Planning Group supports redevelopment of this site but at a lower level of density and missing than included in S459 and which respects the important character of the area around the station and provides design principles that mirror the architectural rhythm of the more modern Highams Green development on the other side of Larkhall Road. Removal of the unnecessary new station entrance/exit from the site	No	I trust the Highams Park Planning Group to represent my views.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mr. William Farrow				S459 - 472-510 Larkhall Road and James Road	Yes	No	Yes		I object to the redevelopment of 472-510 Larkhall Road and James Yard on the basis that it completely dominates and therefore alters the entire character of the centre of Highams Park. Being in such a prominent position (in the centre of Highams Park), this proposed construction is far too high in relation to the surrounding flats and properties many built in the Edwardian era. I also agree with the objections to this development already submitted by the Highams Park Planning Group.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
-				S459 - 472-510 Larkhall Road and James Road	Yes	No	No		Loss of facilities with no provision to improve infrastructure.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Paul Burden				S459 - 472-510 Larkhall Road and James Road	No	No	No	I do not believe that the Council has (adequately) taken into account the Highams Park Neighbourhood Plan, which it is legally obliged to consider	The Local Plan site allocation for S459 ignores several aspects of the Neighbourhood Plan, in that it the excessive height of the development (7 storeys) will overshadow the whole of the centre of the neighbourhood, destroying its character, particularly in the way that it will dominate the single storey Victorian station	No	-	Any proposed development coming forward on this site will need to be in general conformity with the Highams Park neighbourhood plan in order to be found sound. This site will be reviewed to ensure this is the case and any amendments made as necessary.
Simon Binks				S459 - 472-510 Larkhall Road and James Road	Yes	Yes	Yes			No	-	This response is noted.

Amanda Smith				S460- Shall Garage Highams Park	No	No	No	We need a petrol station just building more housing causes other problems not enough parking, doctors, schools etc.		No		<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The Borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Wastewater and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s.136 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Anthony G Thorne Lip				S460- Shall Garage Highams Park	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2022.</p> <p>19. Before submitting a local plan to the Secretary of State under section 20 of the Act, the local planning authority must"</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 31, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>18(1) A local planning authority must"</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Paul Willard				S460- Shell Garage Highams Park	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban/semi rural in terms of buildings and green spaces. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. They have no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries. This is already a problem with the existing development and will be substantially worsened and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	No		<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and health/care facilities.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>

If yes, please explain why?	Council's response
Steven Phillips				S460- Shell Garage Highams Park	No	No	No	I do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals as the site is open with additional people living in the areas. We as existing residents are already struggling to see a doctor or visit Whippes Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher/pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Create more GP surgeries, more hospitals, more schools to start with before building any more new homes in this part of the borough.	-	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes in Greater London over the next 30 years.  The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Whippes Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2018, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3: Infrastructure for Growth. The present Whippes Cross Hospital has been in operation for well over 100 years and as such finds the ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character lead, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.
Paul Leahy				S460- Shell Garage Highams Park	No	No	No			No	-	This response is noted.
Mike Chrimes				S460- Shell Garage Highams Park	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.  Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendments to the plan may be rejected for failing to comply with "rules that are not transparent to consultees.  Consultation on the site allocation LPA element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan LPA for 2020-2025. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point-scoring, while officers have been subject to about making orderly meetings difficult. It is difficult to determine whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.  One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had an artificially low number, represented by the number of attendees shown, or have been difficult to get into online.  In general however it has been apparent both from LPA and what has been stated at consultation meetings, a major driver for the reevaluation of development across the borough has been a housing target of c. 1800 homes per while WFT has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More	Clarify in how this aligns with the Highams Park Plan is essential. With reference to site S460 the chief driver in bullet point order is to provide 10 homes homes. It is unclear whether this is justified alongside the loss of local employment occasioned by the development, despite the commitment to non-residential floorspace.  This site is one of a number of "garage/motor vehicle sites considered for development. The borough's strategic objectives refer to the provision of a variety of employment opportunities. Individually this might not represent a great loss of a facility or vehicle related employment, but there needs to be holistic view of the demand for such sites across the area, which is far more motor vehicle dependent than southern Waltham Forest.  Most comments on the site stress the need for a garage in this area. The development guidelines refer to enhanced pedestrian and cycle connectivity, but work on cycle routes locally at this point has already been carried out.	No	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/ fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.  Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning. • Mapping on regulatory or national planning barriers to delivery. • Delivery partners who are signed up to it, and • Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored.  The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure projects, although it is important that policies are flexible, the OPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.  Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan.  Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Simon Banks				S460- Shell Garage Highams Park	Yes	Yes	Yes			Yes	-	This response is noted.
Jane Mulrady				S460- Shell Garage Highams Park	No	No	No			No	-	This response is noted.
James Christopher Trivedi Sarjimon				S460- Shell Garage Highams Park	No	No	No	This plan is unsound in that it removes a vital commercial provision from a viable area. It is the only parking filling station in Highams Park and its use is considerably greater than similar provision in that wider area. It increases the population in the area which has a shortage of medical care, social care and schooling.	Delete this proposal	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan Infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
				S460-Shell Garage Highams Park	No	No	No			-	-	This response is noted.
Steven Philips				S460-Shell Garage Highams Park	No Response	No	No	I do not feel any more homes should be built in Highams Park and South and North Chingford as we do not have the infrastructure such as additional schools, nurseries, GP surgeries or hospitals to be able to cope with additional people living in the areas. We as existing residents are already struggling to see a doctor or visit Whiggs Cross Hospital without considerable wait times now. Schools are over filled based on the current teacher/pupil ratio. I have not even mentioned the additional traffic and parking problems extra homes will cause.	Create more GP surgeries, more hospitals, more schools to start with before building any more new homes in this part of the borough.	-	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Whiggs Cross Hospital is important infrastructure asset for the borough and the wider sub region. Both Barts Health NHS Trust and the Council understand that hospital needs investment and modernisation to ensure that it is fit for purpose and it can improve the care patients receive. The hospital will receive funding through the Government's £2.7 billion Health Infrastructure Plan, announced in 2020, to create a new state-of-the-art hospital. The principle for delivering the new hospital is set out in Policy 3 - Infrastructure for Growth. The present Whiggs Cross Hospital has been in operation for well over 100 years and its continued ability to provide residents with the level of healthcare required increasingly challenging in aged buildings. The new hospital will be built to a design optimised to be much more efficient for the operation of a modern hospital facility whilst retaining the same number of beds. The development planned for the planning for the hospital site due to its location is character lead, which allows a new state of the art hospital to be delivered alongside new housing and allowing the key historic features of the existing hospital building and landscape to be retained, preserved and enhanced.
Lloyd Parkinson				S460-Shell Garage Highams Park	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc	build homes to height of existing buildings, provide parking, healthcare, education, etc.	No	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulators in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Catherine Casey				S460-Shell Garage Highams Park	No	No	No	I don't believe the consultation has been adequate or thorough. The almost entirely online nature of it has excluded many Chingford residents, many of whom don't even know its happening. The site Allocation document suggests one amount of potential development sites whereas the later version shows a greater number. This is misleading. Instead of projecting a large number of homes in a busy urban location overlooking a train track, the council could, for example, redevelop the Aldridge Way housing estate, incorporating the same number of homes in a purpose-built development. Finally this projection runs entirely contrary to the recently adopted Highams Park plan, almost unanimously approved by residents and councillors.	The number of units should be reduced, the height of the buildings should be greatly reduced and adequate leisure, GP and parking facilities should be incorporated.	Yes	if like to explain how busy the consultation has been conducted and how obscure the questions are, so that any further submissions not be misinterpreted	This response is noted.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The consultation was carried out in accordance with the regulators in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold engagement events online.
Mike Turpin				S460-Shell Garage Highams Park	No	No	No	It does not conform to the HPPG plan accepted by LBWF	Conformance to the HPPG plan in terms of height and design.	Yes	To ensure that LBWF comply with the approved Local Plan.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
Tom Wise				S400-Shell Garage Highams Park	No	No	No	We need this petrol together plus the associated retail. Over development has already taken place in this immediate area with increased pollution and congestion. There is already a shortage of parking for the station and retail in the area since the previous development took the station car park for housing. Surely enough is enough.	leave well alone	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs	The Council sets out its strategy for managing change in the Borough's Town Centre, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses than may emerge in the future. Additionally, the Local Plan sets out how the Local Plan will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  This response is noted.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment of congestion, parking problems and improve air quality.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Sarah Wood				S400-Shell Garage Highams Park	No	No	No	The plan does not adhere to the locally agreed Highams Park plan which protects the character of Highams Park. Building above 3 stories is not justified. Houses with gardens are needed in Highams park not more flats. Also, this is the only petrol station in the area.	Keep the site as a petrol station. If change of use is approved keep height of proposed development to below the tree-line.	Yes	-	Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The London Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Kay Voller				S400- Shell Garage Highams Park	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling- ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed- there have been no leaflets or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!		-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provisions for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
Kay Voller				S400- Shell Garage Highams Park	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-looked and will experience loss of privacy, and loss of natural light. There will be additional demand for local amenities where existing are already struggling- ie doctors, dentists & schools. Local infrastructure is never considered! There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed- there have been no leaflets or public meetings to advise residents, only an online Zoom meeting which is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents!	No	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provisions for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. John Aulis				S400-Shell Garage Highams Park	No	No	No	The height of the proposed buildings is too high. The plan is not compliant with the Highams Park Local Plan which the Council agreed to.	Reduce the height of all buildings to four stories.	-	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car but to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  Development proposals will need to be in general conformity with the Highams Park neighbourhood plan. This site will be reviewed to ensure this is the case and any amendments made as necessary. All development coming forward from this site allocations document will be subject to the full planning application process.
David John Anderson				S400-Shell Garage Highams Park	No Response	No	No	Tecoo building was bad enough, they only got permission due to the offer of affordable housing.	leave as a station	No	simply to judge	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. -				S402-Shell Garage Highams Park	No	No	No	Leave as alone you just want to build build build with no thought of schools, doctors and traffic.		-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.
Gary				S402-Shell Garage Highams Park	No	No	No	It will drastically increase the number of people and vehicles in a small area		-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Miss Vignali				S402-Shell Garage Highams Park	No	No	No	LBWV have lied to all residents and not informed us with enough time	See the above. You think that the residents are stupid well we are NOT	No	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. During these consultation events, the Council has accepted representations sent through the portal, email and assist.
A Harber-Rully				S402-Shell Garage Highams Park	No	No	No	This level of development is in breach of HP Plan Policy LDP2 and will ruin the existing character of Highams Park District Centre. The Highams Park Planning Groups view is based on extensive consultations with local people over the past eight years and concluded that local residents value the suburban character of the area surrounding Highams Park Station and do not want to see it dominated by incongruous blocks of flats above 4 and 5 storeys which will give the area a much more urban and inner city feel.  The proposal for a new station entrance is included in the site allocation even though there were many objections submitted during the Council's initial L2P consultation, that a new station entrance was not wanted if it meant high rise development by the station.	No additional exit to Highams Park station, keep developments to 4 storeys, no higher. Certainly not higher than the Tesco site opposite or you will ruin our town centre.	-	It's my local area and I want to be kept informed	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  This response is noted.
Miss Vignali				S402-Shell Garage Highams Park	No	No	No	Rubbish plans no consideration given to local residents	As above	Yes	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
				S402-Shell Garage Highams Park	No Response	Yes	No Response			-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.
Cathy Houlden				S402-Shell Garage Highams Park	No	No	No	Just disagree with the changes	No changes needed especially tower blocks	-	-	This response is noted.

Valen Ejaru				S401 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The plan is seeking to build more homes than required by the London Plan. To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause "harm" (in planning terms) to existing residents who will suffer the consequences of overlooking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. These proposed developments cannot be delivered with policy compliant levels of affordable housing. Without parking these proposed developments will disadvantage older people. The consultation I issued as a non-officer residents have not had a chance to comment as they received no leaflets advising of the plans. There has been no public meeting.	DONT WANT THIS SITE DEVELOPED AT ALL. we will lose all the existing facilities while its being built. should our wishes be ignored, then any building would have to be... no high rise, no overlooking/over shading existing homes, provide parking for ALL new residents, plus replace the facilities (gym,chivester/tenis etc and existing car park for everyone to use. provide additional doctors, hospitals, dentists and schools etc, all for new residents.		we all want to be involved... this is our life!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocation responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough. The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2025). The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of parks pitches. The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and other amenities.
Daniel Drew				S401 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	What is this legal mumbo jumbo? Trying to put people off from being against the plans?? Shame on you This plan involves shutting down 2 leisure centres in Chingford. This will have a massive negative impact on the community	You must keep the leisure centres. What will be left for the local Chingford community to get fit/ stay healthy/improve mental health? The answer is nothing will be left	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and other amenities. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: <b>Positively Prepared</b> This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. <b>Justified</b> This means that the Local Plan should be based on a robust and credible evidence base involving: <b>Research/ fact finding</b> - the choices made in the plan are based on facts. <b>Evidence of participation of the local community and others</b> having a stake in the area, and <b>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives.</b> These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <b>Effective</b> This means the Local Plan should be deliverable, requiring evidence of: <b>Sound infrastructure delivery planning;</b> <b>Having no regulatory or national planning barriers to delivery;</b> <b>Delivery partners who are signed up to it; and</b> <b>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</b> <b>The Local Plan should be flexible and able to be monitored.</b> The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. <b>Consistent with National Policy and in general conformity with the London Plan.</b> Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process. The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.
Brian O'Leary				S401 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No Response	The proposal is unsound because 1. The assessment of housing need and scale of housing growth is inconsistent with and not in general conformity with the London Plan. In its own Feb 2025 Strategic Housing Market Assessment, CLP (p83-10), the Council agrees in favour of GSA projections to that of the ONS. The Council then decided it needed to amend the London Plan's targets by increasing the Borough target by 14%. This has been without explanation never mind consultation. Arguably even the London Plan's own projected need could be met if only based on their own ONSA. This extrapolated previous trends. However many of the original causal influences have been reversed post Brexit and with Covid. If as a result the current trend growth has weakened, the ambition for more homes in London, and particularly in Waltham Forest, needs to be scaled back. Consequently the scale of the current proposal needs to be revised. 2. This location has notorious poor transport links. Addressing this issue should be a necessary condition for any development, never mind one of this intensity. This is a supposed condition of LP1 policy 4B. 3. Another prior condition would be sufficient social infrastructure to support this increase in population. The Council has failed to reassure residents that adequate schools, GPs and other community facilities can and will be provided. LP1 Policy 4E is inadequate and not reassuring in this regard. 4. The current leisure facilities, Gyms and Pools, are valued by the local community and are quite modern. There is a cause to doubt that any future redevelopment would guarantee their replacement in kind. These facilities are given credence by the Council's own stated Strategic Policy intentions in LP1, notably Policy 39 'Heritage of Centres. This Policy states that Waltham Forest Town Centre "... is the Borough's principal and economic hub. It will be the focus for investment in major... leisure, culture and tourist and other main town centres". Chingford Mount and the surrounding area is in need of an upgrading of the social and built realm and not the unbalanced removal of the amenities which Policy 39, 40, and 41 are intended to deliver.	None feasible without prior improvements to the transport and public provision in the area, as well as the Council revising its unbalanced Town Centre Strategy privileging WTC.	No	To ensure views fully considered	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: <b>Positively Prepared</b> This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. <b>Justified</b> This means that the Local Plan should be based on a robust and credible evidence base involving: <b>Research/ fact finding</b> - the choices made in the plan are based on facts. <b>Evidence of participation of the local community and others</b> having a stake in the area, and <b>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives.</b> These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. <b>Effective</b> This means the Local Plan should be deliverable, requiring evidence of: <b>Sound infrastructure delivery planning;</b> <b>Having no regulatory or national planning barriers to delivery;</b> <b>Delivery partners who are signed up to it; and</b> <b>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</b> <b>The Local Plan should be flexible and able to be monitored.</b> The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as a lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. <b>Consistent with National Policy and in general conformity with the London Plan.</b> Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process. The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.

Mr John Whitehead				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-loaded, loss of privacy, daylight/hourly, additional demand for parking. Consultation flawed as no 100% public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitalists, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.	Yes	So I am aware of the changes proposed in the local area	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning. • Having no regulatory or national planning barriers to delivery; • Delivery partners who are signed up to it; and • Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Mike Chrimes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules" that are not transparent to consumers. Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP1) for 2020-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, meet minded businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 3200 homes pa. While LBWF has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing intensification are brownfield sites. I do not see that leisure provisions will be replaced like for like. The fact that no new car parking spaces will be provided will place stress on the surrounding streets and there are no new GP places forecast. Chisgrove is exceptionally badly served in terms of public transport and the amount of housing projected would place further stress on what little there is.	Public consultation on this site exposed council officers, attempting to run an online meeting, to inappropriate comments, but revealed strong local ambivalence to the development of this site for housing and highlighted an inherent dichotomy between the council attempts to provide more housing through more intensive development, and its strategic objective of preserving and enhancing the historic and natural environment. The current site allocation brief represents a considerable backtracking on the scale of housing development presented to the public, the latter being reflected in the many adverse comments on the site allocation, and could be seen as evidence the council planning department have listened, particularly with the local green space designation. However there are strong arguments against inclusion of this site in the Borough Plan for the next 15 years: Most of the buildings on the site are relatively modern, and represent considerable investment by their owners/tenants which they are unlikely to want to relinquish in the time frame, without their demolition the site is too small for a housing development. In its strategic objectives the Council makes much of its commitment enhancing the Borough's natural environment, promote citizens life chances, provide a variety of development, and also elsewhere the concept of a 15 minute city. The facilities on this site provide a range of leisure facilities within 15 minute reach of much of the north of the Borough - swimming, gym facilities. These facilities were hard won, the former site being earmarked in a planning void for years. There can be no guarantee that this would not happen again if the existing facilities were demolished, setting back achievement of a 15 minute city. This site should be removed from the Local Plan	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	The Council's Examination in Public consultation and comments were undertaken with stakeholders through and other public bodies in accordance with the requirements of the Local Plan Document. In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Catherine Casey				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It is not clear that all sites selected for housing intensification are brownfield sites. I do not see that leisure provisions will be replaced like for like. The fact that no new car parking spaces will be provided will place stress on the surrounding streets and there are no new GP places forecast. Chisgrove is exceptionally badly served in terms of public transport and the amount of housing projected would place further stress on what little there is.	This site should be removed from the Local Plan	Yes	Id like to explain how badly the consultation has been conducted and how obscure the questions are, so that any further submissions not be misinterpreted	The site allocation equipment ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post. The site allocation equipment ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and land to generate high numbers of private car/prohibited while trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Local transport is not always convenient and safe on dark evenings.</p> <p>I feel it would be a waste of money and bad for the environment demolishing newly built facilities.</p>	-	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure to meet the need.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p>	
Terry Milnes				S461 - Larkwood Leisure Centre and Nursery and the land to the Rear of Larkwood Leisure Centre	No	No	No	<p>There are so many but this space isn't big enough to list them all, here are a couple -</p> <p>1800' should be seeking to preserve the 'Local Character' of the area - residents close to move to Chingford &amp; Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build flat blocks of flats and urbanise the area which is the Epping Forest.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg S46) states 12,440 new homes over 20 years and 1800' is proposing 27,000 new homes to 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing targets in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the north as part of the levelling up programme.</p> <p>The majority of the new properties are flats, the Forebirds has shown that families want house with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Wattham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this type of property is provided and sustained (not allow them to be converted to houses), so that residents do not have to move away from their support network of family and friends to live in a property they feel is future proofed for them.</p> <p>Delivery of housing targets should not be delivered in such way as to only provide minimum standards and should not be expected in such an unbalanced manner, unless otherwise specified in the document.</p> <p>The question fails to provide a definition of the area to which the plan should apply being The Town and Country Planning (England) Regulations 2022.</p> <p>18. Before submitting a local plan to the Secretary of State under section of the Act, the local planning authority must</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and</p> <p>(b) ensure that a statement of the representations, procedures and a statement of the fact that the proposed submission documents are available for inspection and the places and times at which they are inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 35;</p> <p>18(12) 'A local planning authority must'</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are'</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Chingford needs good quality houses with gardens in keeping with the area. An Infrastructure to accommodate the additional residents and sympathetic buildings.</p>	no one is listening to the residents of Chingford -!!	<p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).</p> <p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality.</p> <p>The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>	
Anthony G Thorne Lip				S461 - Larkwood Leisure Centre and Nursery and the land to the Rear of Larkwood Leisure Centre	No	No	No	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Domestic Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these have not been removed do have no doubts as well there is other which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LEZ zone and downwind of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the LEZ charge. The rest of the area will also be subject to these increases and the proposed quiet the natural air flows possibly result in pockets with even higher concentrations.</p> <p>Wattham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problem with the Chingford Hall Estate where the S460 tower block was removed as there were major problems with all the matters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It is the same realised in the 1930's that people needed space and New Towns were built to reduce the density and improve quality of life.</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Domestic Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. It is the same realised in the 1930's that people needed space and New Towns were built to reduce the density and improve quality of life.</p>	Yes	<p>Because there are too many unanswered q</p> <p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing a part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new delivery of congestion, parking problems and improve air quality. Additionally, Wattham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan requires that utilises infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilises infrastructure capacity to adequately support their proposal. Additionally where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L100 planning obligation.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p>

D Nurse				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The proposed developments would be out of keeping with the area, they cannot be delivered with the policy compliant levels of affordable housing. There are no parking provisions, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over-sited, loss of privacy, loss of daylight/sunlight, additional demand for parking, additional traffic congestion and pollution, and loss of green space. The consultation is flawed as there has been no public meetings to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists and schools.	Build homes and structures to the height of existing buildings. Developments should be in keeping with the area. Provide necessary parking and amenities. Provide additional services to support developments such as education, transport links, healthcare and education.	No	-	<p>Through the evidence published in the Character Interimification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. The original draft London Plan figure was equivalent to approx. 1,480 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p>
Cheryl Tago				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Living in this area parking is already tight already. When my Mother was heavily pregnant and another person had parked in front of the house and my Mum had asked them to move they refused to. So we had to walk a very long distance instead. Now imagine how it would be with 200 new homes near us. This is completely unacceptable. There are several elderly people living near by the area and this would cause a lot of distress to their lives. There will be a lot more traffic around the roads. More traffic leads to more pollution. Which is shameful on the borough's part because as a borough you have such a big impact and push for sites low emission zones but you yourselves are practising the opposite. How do you expect people to take you seriously. This is not the way forward and not wanting to see the big impact you would have on many people's lives	There are no modifications just to not continue this project	No	-	<p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations represents an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directly planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of benefit for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.</p>

There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p> <p>The site allocation requirement ensures the provision of leisure use. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p>
Paul Wellard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	These proposals are completely out of keeping with the character of Chigford. The area is predominantly low-rise suburban/semi-rural in terms of buildings and streetscape. In addition these tall buildings will overlook existing properties and have a serious detrimental effect on privacy. There is no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision. It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of their proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	Yes	-	<p>Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.</p> <p>Through the evidence published in the Characterisation and Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. If yes, please explain why?	Council's response		
Conservative Councillors (General)				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre				In our previous response, we supported the local campaign to designate part of the site as  Local Green Space and we are pleased that this has been accepted. A petition in support of that and asking that any development of the site replaced the leisure facilities and that houses for families were built rather than flats, and that the height of the existing buildings was not exceeded was submitted as part of the earlier submission. In order to gather more fine-grained responses on these issues, we asked local residents to complete a survey asking individual questions. A report on the responses to that survey is attached. In summary 93% of the 397 respondents did not want this site included in the Site Allocations; there was an even spread of responses as to which of the existing leisure facilities people wanted to see replaced; support for the inclusion of more non-residential uses on the site; 80% (344) of respondents said the proposed allocation of 200 was too many; 80% of respondents wanted to see large family houses or smaller houses, not flats, built on this site; almost no respondents wanted to see buildings taller than four storeys and most wanted a maximum of two storeys; it is our view that the designation of this site is therefore not "effective" because it is not possible to replace the leisure facilities and provide policy compliant affordable housing with any form of development which would be remotely acceptable or policy compliant. We do not believe the parallel masterplanning exercise has demonstrated viability, even with a form of development which is densely residential and which is of keeping with the character of the area. Again, there is no CPZ in this area and poor public transport, so it is likely developers would seek "exceptions" consent to include parking, further damaging the viability of the scheme.						This is noted.
Jackie Heale				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There is a covenant on this land that states it is for recreational use for the people of the area and is not to be used for residential. There has been no leaflets delivered to local residents or any notices in the Wartham Forest area regarding this development. The main source of information has been online. This excludes a lot of elderly residents and those that are tech poor. There is no indication given of how the existing infrastructure will be extended to deal with the extra drain on its services.	Full public meetings should be held as all covid restrictions have now been lifted. These should be widely advertised through all mediums to reach the most people. Adequate notice of these meetings should be given and several should be held at different times to make them accessible to all who wish to attend. It goes without saying the venues must be completely accessible. A full explanation, including all legal aspects should be explained regarding how the covenant on the land plans to be legally overturned in order to continue with the development proposal. A detailed proposal on the planned improvements to be made to the local infrastructure including school places, doctors surgery etc. At a time when our local hospital is going to have less beds more residential homes are being planned. Traffic management must be addressed. New Road is overused now. I appreciate as a council you hold the view that residents should not own cars, and as commendable as this maybe the council cannot stop residents owning, using, and parking cars. Enforcing CPZ parking zones is not the answer. This penalises existing residents so that the council's idea of providing no parking spaces for new developments and reducing the number of cars can be funded. New residents will have cars, will need to park them and this could cause problems in the area.			This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.		
Karen Nash				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be overcrowded, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.			There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The London Plan (2021) sets a 10 year minimum housing target for Wartham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The London Plan (2021) sets a 10 year minimum housing target for Wartham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
And Keekar				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I think the "legal compliance" is doubtful because I do not believe the designation of this site as a "Transition" site does not meet the criteria for that designation given in the Local Plan.  I think the plan is unsound, because I do not believe the site is capable of supporting 280 new dwellings without being a development which is harmful to the character of the existing surrounding area.  The local plan does not comply with the duty to co-operate since co-operation has not been widely sought, either avoided by lack of adequate public consultation.	Further public consultation	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of its capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sectors of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Raymond Muffat				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The council is pressing ahead without proper consultation blaming Covid for this and totally ignoring the objections of local residents about the unsuitability of their plans for North Ox Chislegard and the surrounding areas	It is out of character for the area and removes or reduces local leisure facilities, the number and style of the properties needs reducing and redesigned to blend in with the area. The leisure facilities should be expanded as the area is already short of these facilities, also the lack of car parking spaces is ridiculous and ignores the needs of the disabled, families and residents	No	-	Car parking can be provided as part of new homes in less well connected areas, subject to a justification in a robust Transport Assessment. As set out in London Plan Policy 16 criterion C: An absence of local on-street parking controls should not be a barrier to new development, and boroughs should look to implement these controls wherever necessary to allow existing residents to maintain safe and efficient use of their streets. Measures such as restricting all future occupiers except blue badge occupiers entitlement to a permit have been introduced in recent approvals, and secured by legal agreement.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sectors of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).
				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No Response	The plan takes no account of the additional infrastructure or amenities required to support the new residents. In addition, no regard has been given to existing residents' New Road and surrounding roads will not be able to handle the additional parking requirements or through traffic.				The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sectors of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.
Janette Anne Tyler				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed development out of keeping with the area, cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospital, dentists, schools, etc.	Build homes to height of existing buildings, provide parking, healthcare, education, etc.		-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. If yes, please explain why?	Council's response
Neil Hesson				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	No	The site was formally a leisure facility (Lido) land was for the enjoyment of the local community. The current development also has leisure facilities (incorporating swimming pools), which benefits everybody including children. Existing car parking also allows for non-residents to travel to the leisure centre. In addition the bar/terrace and existing nursery facilities as well as the Tocco and leisure centres themselves, provide a number of jobs. The proposal to include leisure and nursery facilities in any future housing development will not match the existing business in terms of scale or facilities for the wider local community, but will be geared towards the residents of the new development only. This can't be denied as within the existing plans there won't be sufficient car parking for visitors. Any scaling down of such facilities such as losing swimming pools will deny many members of the existing facilities and children the opportunity to enjoy these activities.	I don't believe the re-development of the existing site in its proposed format should be undertaken at all. I understand the need to build more homes, but the borough is becoming overdeveloped with no valuable supporting facilities which is to the detriment of local areas. The existing businesses are viable and employ a number of people whose jobs will be at risk. Any intention of replacing some of the facilities currently in place will not be enough, unless there is wider development of the site which then encroaches on green space. I accept this site may offer the option for building some properties. But believe these should be limited in number and built on the nursery site only.		-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.  The site allocation equipment ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Jayne				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	No	There should be absolutely no loss of any of the green space, Chingford is very lucky to benefit from lovely outdoor spaces that must be retained at all costs. The loss of any of the wood or green space would be an contradiction to climate and public health intentions around the environment as well as have a detrimental affect on the health and well being of all residents, particular putting children at a disadvantage and not supporting them having the best start in life.  High blocks of flats are not in keeping with the area and any residential dwellings should be no higher than the two storey houses that are in this location.  In line with public health ambitions to ensure residents are active the health centres on site should be retained. A loss in these would be of significant detriment to the health of local people, especially children who use the swimming pool.  Waltham Forest declared a climate change emergency in 2019 and the loss of green space and over increased urban development will be in contradiction to their aims and objectives towards climate change.	Building my the same height as local houses, no loss of green space and retain the health and leisure centres.	No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The site allocation equipment ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The local plan policy Biodiversity and Greenways will seek to protect and enhance biodiversity and geodiversity resources throughout the borough. The allocation requires the enhancement of the existing resources, and the new development to integrate green "buffers" and corridors, "wild" public amenity, green roofs and tree planting which will produce biodiversity net gain on sites.
Valen Bjarte				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	No	NO MORE FLATS PLEASE!! More doctors surgeries! more schools ! more parking for existing residents! PLEASE PLEASE PLEASE: before you even consider squashing more people into this lovely area, if you'd has thought to anything... it is that we need less people and more fresh air, more open space, more green.....	leave it well alone please x	No	we all want to be involved - this is our life!	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectorate examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,330 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Michael Shellock				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	No	This council appears keen bent on aggrating the exsistant leaseholders and owners of the recreational and other facilities & business on this site to encourage redevelopment. The local residents do not want this redevelopment and have been very vociferous in attacking the recent attempts by the council to the "make" this redevelopment which is itself very vague as to what EXACTLY is proposed for this site.	With this council's repeated attempts to build housing on this site that appear primarily to be blocks of flats the more local residents oppose it. As more and more building of residential properties are built, in what appears to be a flawed 10 - 15 year regeneration plan there are no explanations as to what plans there are for supporting this new infrastructure - additional school places, doctors' surgeries and the like.	No	I do not consider that proper representation have been made to the people of Chingford and Highams Park about the impact of the Councils desired wishes will have on this part of the borough.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The site allocation equipment ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
											Yes		

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
Sandra Beach				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No Response	Do we always have to comply or can we exercise a little vision and not build for the large party ugly flats all over Chingford. Residents require sports facilities and the ability to walk to their local supermarkets for the health benefits that brings. Working patterns are changing and people have plans to move out of the area in search of a less crowded environment, GP appointments, school pickup etc. What happens when tenants of the flats have families and require houses, and the aforementioned services.	Fewer flats, more houses. Encourage people to walk to supermarkets and sports facilities. Some people i.e. the elderly or those with young families will not be able to cycle but will walk to facilities if they are near enough.		-	The Council commits to a long-term objective of reducing levels of private car ownership and vehicle journey in the borough to achieve a 30% reduction in private car travel. The Local Plan policies seek a fundamental shift in favour of sustainable and active travel modes in support of this target. Residential development proposed within the Plan is car-free and employment development is car capped. Within the borough a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for motor vehicles. These measures include junction improvements that reduce motor vehicle dominance, improved pedestrian crossing facilities, low-traffic neighbourhoods (LTNs) and the expansion of cycle infrastructure. This forms part of a holistic approach by the borough for reducing vehicle trips by providing the infrastructure for sustainable and active travel and changing behaviours.  Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	
Emre Kucuk				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I am writing this to categorically object for the intention of any planning on the above site whatsoever.  The way in which this process has been handled from start to finish has been farcical at best.  The S461 Larkwood Development should be removed immediately from LP2 and any future plans to develop any residential dwellings on this site is not, in my opinion legal.  The whole of Larkwood Park within the boundaries of New Road, Larkhall Road, Larkhall Carport, Rogers Avenue, Underwood Road, Bourne Gardens and Normanshire Drive, is under a covenant.  That Covenant states quite clearly that it cannot be used for residential dwellings.  That should have immediately halted Waltham Forest planning department and others from it being included in the Local Plan.  Throughout this whole process Waltham Forest Council planning department, their associates Jaw completely ignored and bypassed their duties and obligations under the 'Statement of Community Involvement' and the local plan guidelines.  Not a single property in all roads adjacent and within the immediate vicinity have been notified or notified by post of the proposed plan, to there are many more others who are completely oblivious to the ongoing plans.	leave the site alone, as it is, in its current state do not build or do anything on it. That would make it legally compliant and sound. It's not been up for long, it works and caters very well for the community and local people. Providing good health, wellbeing, jobs and doesn't suffice the area at detriment to the local forest. The local infrastructures are not sufficiently supported or appear as though clearly thought not for an exponential rise in the suggested number of people. It heavily contradicts its strategic plan. It has set out on a majority of fronts.	No	The undertaking of this plan contradicts on multiple fronts it's strategy which has been set out from the onset. It is not legal in nature as it's under a covenant for use of any residential dwellings	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, outdoor and indoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) a policy requirement to preserve the existing level of provision of playing fields.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Chris Friedlander				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	The plan is unsound as it diminishes much needed amenities within the area and increases residential stress on local resources. South Chingford/Highams Park already has a high residential density that has had increases traffic and pressure on local amenities due to the mass development within Highams Park over the last 10 years. This will further apply pressure and make the location undesirable to live in.	The consultation duly acknowledges the importance of the green location behind the development, but does not take into consideration the need for parking, gym and swimming amenities for the local residents as there is no other alternatives nearby.	Yes	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorist vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	
Terry Miles				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The development is not in keeping with surrounding residential properties. There is no guarantee of blue for the leisure facilities and there is no parking provision at all. There are serious ecological implications with some ancient woodland being developed; too many residences and what are near enough amenities. It certainly doesn't enhance anything.	Build houses NOT flats. Give residents adequate parking and gardens in sympathy with the surrounding houses.	No	no one is listening to the residents of Chingford!!	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Richard Afrad Meredith Whyday Gladys Meredith				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre				The proposed development for nearly 500 new homes in south Chingford and Larwood sites is totally out of keeping with the area - no parking provision - existing residents will be overburdened with loss of privacy - where are these new residents going to park - surrounding roads are already congested with the strain on doctors/hospitals/dentists/schools etc.	Suggest to build new homes to height of existing buildings - provide parking/healthcare/education etc have a proper public meeting - not online or zoom.		TO MAKE AN OPINION	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.
Dr Shabb Khanfar				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	It would be out of keeping with the area with no parking provision which already overburden parking in nearby streets. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, there would be loss of privacy, loss of daylight/sunlight, and also additional demand for parking.  Furthermore, the Consultation is flawed as there was no leaflets/public meetings to advise residents but instead only an online Zoom meeting.  There is a shortage of doctors, hospitals, dentists, schools in the area and this would already overburden an area which has had its resources stretched to the limit. There is no mention of residential parking in the plans either.	I consider building homes to height of existing buildings to be necessary, consider the provision of more parking to be necessary, the provision of more healthcare, education and public services to be necessary for the plan to be compliant and sound.	Yes	As a local resident, I would consider it necessary to participate in examination hearing sessions as this would directly affect me in way of loss of privacy, loss of light and development out of character for the area.	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Christine Croxon				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	The larwood site was gifted to the area for recreation - High Rise is inappropriate and will block light to surrounding properties. It will also bring more antisocial behaviour and crime to this area which we are already struggling with.	Do not bring the site so close to the main road and build houses with gardens which is what the area needs.	Yes	The community is extremely concerned about the environment and impact within the area with the building process.	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Christine Croxon				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	The larwood site was gifted to the area for recreation - High Rise is inappropriate and will block light to surrounding properties. It will also bring more antisocial behaviour and crime to this area which we are already struggling with.	Do not bring the site so close to the main road and build houses with gardens which is what the area needs.	Yes	The community is extremely concerned about the environment and impact within the area with the building process.	Through the evidence published in the Character Intensity Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Kay Yoller				S461 - Larwood Leisure Centre and Nursery and the Land to the Rear of Larwood Leisure Centre	No	No	No	The proposed developments are not in keeping with the area. They cannot be delivered with the policy compliant levels of affordable housing, and are unlikely to benefit local people. No parking provisions have been considered, which will disadvantage older and disabled people. The plan seeks to build more homes than legally required by the London Plan. Existing residents will be over-loaded and will experience loss of privacy, and possible loss of natural light. There will be additional demand for local amenities where existing are already struggling - in doctors, dentists & schools. Local infrastructure is never considered, and New Road consistently has issues with traffic flow due to the width of the road and the existing traffic that uses it - including buses. The buses are vital for access for elderly residents. It has been suggested that the site will be car free. Who will police this and ensure that residents do not own a car. Or does car free simply mean residents can park in any of the neighbouring roads causing further issues?  There will be increased issues with parking, additional traffic congestion and pollution. The consultation is flawed: there have been no leaflets or public meetings to advise residents, only online Zoom meetings with faulty connections: this is not inclusive to all residents.	Build homes and structures that are in keeping with surrounding and existing buildings and that complement and are sympathetic to the area. Ensure that appropriate infrastructure is in place and that it can cope with an influx of people. Consult with your own education departments and the NHS to check the demand of services. Provide meaningful consultation to WF residents not flawed meetings via Zoom. Allow residents to have that say at a public meeting. Stop removing our amenities!	Yes	-	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensity Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) representation of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
										No

See Cooper				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	high rise will damage area		No	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Terry Miles				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This land has a covenant and should be solely leisure facilities: the proposed development is totally out of character with the existing residential dwellings. No parking or facilities are factored in. Worked communication which has resulted in many residents being unaware of this proposal.	Leave it as it is. The development behind should never have happened. Do not repeat this travesty.	No	no one is listening to the residents of Chingford -!!	The Local Plan requires a character-led approach to intensification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019). As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Mudassar				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No			Yes	-	This response is noted.
Sarah McGeigan				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The idea that the council could legally remove the ONLY community swimming facility used daily by school and young people that provides an affordable leisure activity can not be legally compliant.	This leisure centre cannot and should not be removed, the closest facility would be Withamerton this would ensure this type of activity would be lost so many families on this side of the borough.	-	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Antonios Zekis				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No			-	I wish to be rejected altogether.	This response is noted.

Seaph Demetrios				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It's just a feeble minded proposal to destroy woodland in favour of smelly tower blocks, that aren't in keeping with the area, and that look do not work. There is no mention of transport and infrastructure improvements in an area already desperately under-served by public transport. Ridiculous.	Don't destroy woodland, don't build such tall blocks and improve public transport. Ideally we need another station at the hub, and permanently closing Highams Park level crossing to allow more trains would hugely help the area.		Decision making seems to favour developers and not out of touch with the reality recognised by residents	<p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance for Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) the provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/historiated vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p>
Clifford Gray				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The proposal takes away what little leisure space we have in this area. It is not acceptable to build this number of houses in an area which is already short of leisure facilities health care and school spaces.		Yes	I do not agree with the proposed plan as they not in keeping with the area. It takes away needed parking in the area and the height of the building is unacceptable as it will overlook existing residential properties with loss of privacy and will affect the value of the properties in the area.	<p>Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Christine Croson				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The larkwood site was gifted to the area for recreation - High Rise is inappropriate and will block light to surrounding properties. It will also bring more antisocial behaviour and crime to this area which we are already struggling with	Do not bring the site so close to the main road and build houses with gardens which is what the area needs		The community is extremely concerned about the environment and impact on wildlife in the area with the building process  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The HRA for this document concludes that, with the measures put in place through the Local Plan, there will be no adverse effects on the Epping Forest Special Area of Conservation (EFSA-C)	
Tom Wise				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	As a long term Chingford resident I have witnessed repeated mismanagement and poor development of this site by WFC. Fantasies was an obvious non starter as local residents were quick to explain. It eventually lost the council over £25 million. Chingford residents largely moved here because of the fact that it was different to the rest of the borough - more like Epping Forest than Waltham Forest. We do not like high rise and high density developments. Why do WFC not use and employ local people rather than using people from Waltham Forest who do not know or understand the area, its wants and needs.  Consultations have been poor or non existent. This cannot be legal.  Obviously any development would have to replace the leisure, education retail and restaurants. These all require transport in an area where public transport is slim to non existent. In addition although WFC seem to believe they can provide housing, without providing parking. This is not sustainable and the number of housing units would require high rise which would destroy the area	Don't do it!	Yes	Because WFC consistently ignore local resident views in Chingford. They seem to want to penalise us for electing the wrong MPs	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Faima Mohamed				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Not in keeping with the area and why I moved to Chingford.		Yes	-	The Local Plan requires that all new developments should deliver high-quality design that is responsive to the local character of an area.
Mi A. Fraser				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	In summary, the influx of hundreds of people in the area will do the area so much harm, the health and wellbeing of existing residents, goods and services will be significantly overwhelmed and impact on quality of life for both old and new.	Of course, it is quite difficult to properly understand what is going on because we are unaware if the proposals breach standards/compliance due to paperwork, documents and everything available to look at being incredibly complicated to properly comprehend.		Many members of the community do not receive effective communication and/or are unaware of how to access and participate. Plus people receive information differently so seeing and hearing in face to face meetings is a more productive tool for communicating for many.	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  This is noted. However, it is through the adoption of Local Plans, that the required level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Borough's Local Plan has policies to improve health and wellbeing of all the people who live, study and work in Waltham Forest. These policies focus to improve active and sustainable transport choices across the Borough/ensuring sufficient availability of recreational spaces, both indoor and outdoor sports facilities, parks, and green areas. Additionally, the plan emphasizes the provision of GP practices and other health care facilities within walking distance to the residential catchments areas. Moreover, the plan aims to offer healthy food choices that cater to the diverse needs of the community. Overall, the focus is on creating a healthier and more vibrant living environment for all sections of the population in Waltham Forest.
-				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Proposed development would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be overlooked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no walk/join public meeting to advise residents, only online Zoom meeting. Outrage of doctors, hospitals, dentists, schools etc.		Yes	-	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. Jacqui Alexander				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	<p>1. It is well known that this site is under a legal Covenant which states that it cannot be used for residential dwellings, but must only be used for recreational use. It is currently being used for precisely this purpose - private gym, council gym (used by a local school), children's nursery and a play/recreation area. This point in itself is reason not to continue with the development.</p> <p>2. No homeowners nearby have received a leaflet advising them about the consultation. The council did not even include this information in the WF News which is delivered to all homes in Washham Forest.</p> <p>3. There have been no public meetings, despite restrictions being lifted. We only had online meetings which were beset with technical problems and mismanagement by the planning department, where we were not able to get our points across in the allocated hour, and also the host was talking so fast that we couldn't take it all in. Consequently we asked for Minutes of the meeting which we were promised but did not receive.</p> <p>4. This site has been allocated for development even though some of the buildings are relatively young in building terms. They are perfectly fine buildings, and are well used and loved by the local community.</p>	<p>THE FOLLOWING POINTS CORRESPOND TO THE SAME NUMBERS ABOVE:</p> <p>1. Remove this site from the site allocations list as it is unlawful.</p> <p>2. Extend the deadline and then further drop homeowners and also add the information into the WF News, as well as in mailshots.</p> <p>3. Due to the community not being given the opportunity to attend a public meeting, and the problems with the zoom meetings (as detailed), I think the deadline should be extended in order to make everyone aware of what the plans are for this site. Many elderly people were obviously excluded from zoom meetings, due to the meetings being inaccessible to them, and them having no means for equipment to access them.</p> <p>4. Public meeting would enable nearby homeowners who would be affected to be sent leaflets giving information about the forthcoming plans, and information to attend. This nearby homeowner are likely to be affected by occupiers of the planned 200 dwellings (as his face is, won't all be non-car owners "a lot of them will have cars and if there are no parking spaces, they will just park in nearby roads).</p> <p>4. You can't address this point, except not develop the site, and leave it exactly as is.</p>	Yes	I would like to be kept in the loop about all aspects of this.	<p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The land was given to the people of Chingford for recreation	The facilities of the site are well used and desperately needed for the number of residents, just took at the field and the car park to see the numbers using the pool and gym etc. The height of the building is completely out of character with the surrounding area. I have grave doubts for this sight, I am old enough to remember Larkwood pool being demolished, on the plans there was to be landscaping of the surrounding area with seats to admire the view, that never happened!	No	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Justin Meaden				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This site is supposed to be used for leisure purposes with a range of services provided and is a main hub for the surrounding area and residents, giving it over to vast amount of residential use with ridiculously small amount of recreational leisure facilities does serve the community	There is no modification possible which wont have a significant negative impact on the community, surely the health of its residents should be considered in this situation.	-	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area has a covenant against it and it is meant for recreational purposes only. There has been no public meeting where clarity can be sought on what is planned, there has been little publication about the consultation meaning that those individuals who might have protested knew little about it, there has been an emphasis on electronic communication discriminating against those individuals who do not use IT not understand it.	By doing the opposite of what has been done, namely publicising it more widely in a variety of communication styles, by having face to face meetings, by making the way people file their comments more easy to understand and complete.	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Sarah Moncoiff				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	Far too many flats without infrastructure to support. I doubt there will be enough social or affordable housing in the plan.	Less flats and keep the swimming pool		-	<p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p>
Emre Kucuk				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	-	-	No	The undertaking of this plan contradicts on multiple fronts it's strategy which has been let out from the onset, it is not legal in nature as it is under a covenant for use of any residential dwellings	<p>The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.</p>
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No					Yes	-	This response is noted.
Kath Goodwin				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	To get a total of 280 homes on that piece of land will require tall buildings which is not in keeping with any other building in the vicinity and will spoil the aesthetics of being in the woods and using the playing field. What will happen to the leisure facilities too? These need to be left alone as a lot of people use them.	Dont build any massive buildings that are taller than the already existing houses on the land and dont get rid of the leisure facilities.	No	-	<p>The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p>
Russell Wellard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There is a covenant on the land preventing development for housing.	This site should only be used for the recreation, gym, swimming pools etc. Degradation of these facilities is not acceptable. This site is not suitable for blocks of flats. Larkwood needs to be protected from over development.	No	-	<p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p>

If yes, please explain why?	Council's response
Sobhan Homay				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	The leisure centre is the only one in Chingford. Where do children go for swimming lessons, where do adults go to swim? This is taking away much needed facilities for low income families.	leave the area as it is. Every business on this site is utilised.		-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Alicia Murphy				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The government want us to get fit and healthy and council want to knock down the leisure centre's for more housing There must be other areas in Chingford that houses could be built.		No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The Borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
L Tyson				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Active frontage? What is that? There is already a Nursery and leisure centre. What is the garage entrance? The idea that people living in the proposed development will not have cars is ludicrous.	There should be no change to the area. Woodland Forest doesn't need building on. There are no modifications to be made. Except leave the trees and green space alone.	No	-	Active frontages mobilise the elevation of the building that faces the street at street level. The active frontage normally comprises of commercial, retail or leisure spaces as opposed to residential.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
Raymond Muffat				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This development is too large, it goes against local views, it removes the only leisure centre in North Chingford and is out of character for the area. The idea that people living in the proposed development will not have cars is ludicrous.	listen to local residents, down size the development plans to fit the character of the area, keep the leisure centre at its present size or even expand it but don't turn it into a leisure pool at the expense of swimmers, retain the parking facilities that are essential to many residents, who cannot use public transport.	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2020).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	By removing the only leisure facilities in the area, nursery, and family pub/restaurant can only be a disadvantage for the residents and families as there would be nowhere for people to socialise and keep fit. Local children/schools will also miss out on learning how to swim and working parents won't be able to have their children looked after by the nursery. Also by increasing the population of the area by getting in 200 plus homes will only effect the already overcrowded area with its poor transport and road infrastructure which would lead to a more busier road with extra cars, noise pollution and would also increase pressure on local schools, GP practices and dentists.	improve the local green area and playing fields with play park, better walking facilities, skate park, sports pitch, outdoor gym so that families and people alike and use and everyone will be eventually better off instead of being demoralised by looking at tower blocks of flats and no facilities to use.	Yes	-	The Council sets out its strategy for managing change in the Borough's Town Centres, High Street's, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centres uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the Borough.  In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Sarah Rose				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	I have already commented on this on my previous submission namely that it's uncooperative because it's building against the needs of existing residents who need more infrastructure not homes. As stated in the local covenant this area was left to the people by the Queen as a leisure area. The wonderful outdoor swimming pool which my parents tell me about is gone. Who wants to really swim outdoors on a hot day? Some lucky people have the beach. It is unsound because this is actually a flood area plus towerblocks were torn down as inadequate in the '70s, an inadequate housing and ghetto areas. Anyway, I am just adding that while someone has agreed to transform Larkwood green area with a skatepark, outdoor gym pitches etc, this would absolutely ruin the character of the area. I have lived here all my life and can safely say there are enough play parks around. This is a FLEED and should be left as such for everyone to enjoy. People currently like eating picnic, sunbathing, hanging out with friends and family, casual exercise, enjoying the FLEACE and quiet and walking their dogs. It seems very male orientated like so much in society to put in a skatepark pitches and gym and it would be grossly unfair. Look at Ridgeway park with the reputation of children's area. You now have to walk directly through it to access Chingford Ave. Not everyone wants to encounter children everywhere! We need safeguarding so this field isn't turned into a children's area like everywhere else in the borough with the corresponding increase in noise, general antisocial behaviour, mess and chaos. Not everything needs to be organised all the time. What's wrong with the pitches by the reservoirs in which there are many? Instead they're often empty and have also encroached further on public land recently. How about the skate park at Chant Lane or are people too busy to walk down the road these days? Incidentally with this new building that is currently popular, there are less and less areas open to dogs and dog walkers. We all know children are favoured over and enjoy more rights than dogs in London. Let them have one area! The current dog areas are small and not up to scratch. Chase Lane in particular is lacking even grass and a working fence. It's not transparent about who this area is, what takes place at it, etc. There is no infrastructure to support this plan. The leisure centre is a lifeline for local communities and Larkwood has already seen an increase in litter and fly tipping. With all the other proposals set to ruin Chingford, this site in particular needs to be left alone. We've lost our library now the only pool in Chingford is under threat. While the Council waves hand over that disco fountain, we need a change of personnel at this corrupt council.	Full transparency of construction contracts and who is benefiting. As it is not the local residents. You think when Coghlin resigned, the rest of the Council has integrity. Follow the money...	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. Lambros Poulas				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentist, nurses and local schools.	Too many properties in a short space. Traffic suffers already there and there is no provision for this extra strain on traffic, as well as parking, doctors, dentist, nurses and local schools.	-	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p>
Jacqueline Ahlher-Daines				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	With regard to the Larkwood Leisure Centre and Nuffield Gym, these provide the only swimming pools in this part of the Borough and therefore a swimming pool and gym area should be retained on this space to provide amenities for local residents.	Provide more detail as to what leisure facilities would be retained on this site for sports and particularly swimming.	-	I want to know why sports facilities are not being replaced in Chingford	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p>
Raymond Young				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area of land was designated (broad of use) as to be only used for the benefit and well being of local residents. Hence leisure facilities built. The building of accommodation is NOT improving the facilities for ALL residents, as only those living in the proposed property accommodation.	Identifications include the REMOVAL of ALL proposed being accommodation to comply with the arrangement of the land being used for leisure facilities as stated by the original owner of the land when permission was granted to build the leisure facilities. Finally, the proposals are not sound as the local facilities, eg Transport, schools, doctors, dentist, etc will not be able to cope with a increase of population on this site	Yes	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Council is committed to playing its part in tackling the housing crisis. Ian McGill				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I do not believe the allocation of this site meets the test of being "justified" because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area. High rise development would not fit in with local surroundings. There is no other extra infrastructure; doctors, hospitals, schools, dental practices planned. Chingford is already overcrowded and we need more leisure, not flats without gardens or parking spaces. If the current car park is lost local people will not be able to use the swimming pool in the same way. Local transport is not always convenient and safe on dark evenings. I feel it would be a waste of money and bad for the environment demolishing newly built facilities.	I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ella Goldworthy				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre				I am a local resident not a lawyer but I consider it fails to comply with the duty to co-operate in that it will NOT mean and follow local residents' wishes on the matter.	Any development of the area should fit in with the residential nature of the area - ie houses NOT blocks of flats of any size.		-	This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations Document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Helen Hitchell				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No					No	-	This response is noted.
Valen Ejarve				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	all do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on the site without a form of development which is harmful to the character of the local area.	I do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do I believe it to be "effective", as it is unlikely to be delivered in the Plan period because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on the site without a form of development which is harmful to the character of the local area.		we all want to be involved... this is our life!	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this plan, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	nothing	nothing	No	-	This response is noted.
Yvonne Sanders				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No	is the Plan "sound"? There are 4 texts at para 15 of the NPPF:  Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.  "No as LBWF should be seeking to preserve the "local character" of the area - residents chose to move to Clingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London. The gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 1,000 signatures objecting to this particular development proposal and residents are being ignored.  The Council is seeking to build more than the London Plan requires. The London Plan (Fig. 4.1) S461 states 2,240 new homes over 20 years and LBWF is proposing 27,200 new homes by 2035 - a very significant excess of 25% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 2 million, so why is there pressure on local councils to build on every possible space?  Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.  The majority of the new properties are flats, the Pandemic has shown that families want houses with gardens. There should be a good mix of housing to avoid the artificial inflation of the rental market. This would also benefit the area building close to the Forest, so will have a detrimental effect to it.	This is the only Public Gym and Swimming Pool in Clingford, built relatively recently with a long life ahead of it. It is not appropriate for this facility to be demolished, at what huge cost in Carbon emissions, to result in a smaller facility with more flats. NO to more intensive development of this site that would result in insufficient parking spaces for visitors to the Leisure Centre.		I wish to have the opportunity to explain why the Councils proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.
David Tyler				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		The only modification would be not to build on there	Yes	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

	Cheryl Tague			S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I enjoy going for swimming and during the lockdown have suffered with some mental health issues and still being under the age of 18 and being able to go the leisure centre that have been going to since the age of 11 has been incredibly helpful. Many of my friends and family under the age of 18 attend this leisure centre and for you to take away this place is incredibly sad that you would even think to take this away from many young people in the area. It's quite sad how young people are never considered when it comes to these development plans. We are the future leaders and it's as if you don't want us to fit for the future as taking away such valuable resources will take a big toll on many young kids lives and also adults. Boris Johnson has had a big push on his mental health by keeping us in school to develop our social skills and swimming classes that are placed on offer is one way of developing our social skills. Do you think that it's right and just to take this away from us? Having open spaces to walk around by the leisure centre has been incredibly helpful.	I don't believe the removal of the leisure centre is anywhere near legally compliant.	Yes	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Emily B				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	Yes	No	No	I don't think this plan has been properly considered in conjunction with your other plans for the Sainsbury's on Hall Lane or the redevelopment of Cook's Year retail estate. Together all three plans, if they happen, will absolutely gridlock South Chingford when it is already seriously congested. You cannot consider these plans in isolation. Where is the Equalities Impact Assessment?	See previous response, no EQIA	No	-	<p>The Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. This includes surface level car parks and out of town retail sites. Redevelopment of these sites, in accordance with Local Plan policies relating to car free development and better management of both Construction Logistics and Servicing and Deliveries, presents clear opportunities to significantly reduce vehicle traffic across the borough.</p> <p>The site allocation policy ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Malcolm Styles				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	On 2nd Sept I received the following letter from OJIM Property:  "I refer to your correspondence to Dr Charles Woodburn at BAE Systems dated 7 August 2021 which has been passed to OJIM Property who are the Investment Managers acting on behalf of the BAE Property Fund.  Please note that the Larkwood Retail Park has been owned by BAE Systems since 2013 and the Huffield gym, Busy Bees nursery and the new Tesco convenience store are all let on long leases and there is currently no intention for residential development."  The leaseholders for the next some 200 years, BAE Systems, have no plans for residential development on their property. So why has the LBWF come up with these plans?  The LBWF closed the well-loved Larkwood Pool purchased from public donations and the adjacent flower gardens and play area, the cricket/football pitch run down. This summer a local man was stabbed and killed by a youth with nothing better to do. By closing down youth facilities the youth of the area have nowhere to go. In past times there were plenty of activities for youth and this summer the pool would have attracted some 10,000 per day. The whole of Larkwood was on the Larkwood Park a major facility for Walthamstow and Chingford.  Closing down the remaining Leisure Facilities is not favourable to the physical and mental health of the neighborhood.	I should have thought that the owners should have been consulted.	No	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The site allocation policy ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.</p>
Kathryn Uman				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Site is covered by covenant which states site is only for leisure. Existing facilities would not be replaced as only a leisure centre and nursery are planned. What about the Huffield centre and restaurant. Also a large carpark is needed to enable people to get to the site as public transport is poor.	Keep the site as it is	No	No one takes any notice of emails	<p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Kathryn Uman				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Covenant on land which forbids the building of housing. There are 2 leisure centres on the land but only 1 is mentioned in the rebuttal. Environmentally sound to knock down new buildings.	leave the site alone there is no room for housing on this site and little public transport along new road so a car park is necessary.	No	No one takes any notice of emails	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of leasures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches. Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.
Neil Hooper				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Much like the Chingford Mount proposed developments. The proposal for 280 new homes on this site is ludicrous & completely in line with Waltham Forest's ongoing mission to reduce Chingford to a plain Council Estate. LBWFL "interesting" 1970's experiment on Chingford Hill Estate cost millions to rectify in the 1990's.	Reduce the number of homes a level consistent with local infrastructure and ensure that you are building quality homes for the residents. Not another Chingford Hill Estate slum that needs pulling down & redeveloping in 20 years time.	No	To ensure residents aren't ignored as usual.	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 47,000 homes per year across London.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Andrew Fearn				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Absolutely preposterous to fit in this amount of housing without parking and with the local infrastructure already struggling	Scrap the plan and retain the leisure centre and restaurants	Yes	.	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
Terry Milnes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Reluctantly poor consultation- this area has a covenant and should not be developed at all. Totally out of character to surrounding residential dwellings.	leave it as it is - great local facilities with ample parking	No	no one is listening to the residents of Chingford !!	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.  The Local Plan requires a character led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Sarah Rose				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No Response	No	I understand that the planning for building of homes includes no community provision, therefore no parking, school, doctors surgery etc. This would result in more people using current infrastructure at the expense of the current residents, therefore leading to diminished standards of living for current residents and local workers. Local infrastructure needs government support, it is not acceptable to not be able to access a doctor for weeks at a time.	Plans for corresponding infrastructure to be made alongside and incorporated into housing plans. Evidence of research-informed designs: the tower blocks of the 70s and 80s were torn down on the basis that they had been proved unsatisfactory... this leads many to question why they are now being rebuilt. I am pleased that the green space known as Lark Wood is being conserved, as is actually also a legal matter.	No	No but I imagine some people would.	<p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.</p> <p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p>
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	Yes	No Response	No Response	It doesn't acknowledge feedback from community members with respect to the leisure facilities provisions.	Ensure the leisure facility includes a pool.	No	-	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>The site allocation requirement ensures the provision of leisure uses. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Daf				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I think with the Covid19 folks going on, we have come to realise that woodlands should be left well alone, and the things there should be left undisturbed. I don't have a problem with the other sites, but I think there are what we need, not buildings. If you intend to just are buildings up, will they be 'green'. Heat pumps, harvesting rain water for the flushing toilets, no gas boilers, etc etc?	If you have no idea, except, this plan doesn't seem in line with the copd agreement and what the indigenous communities are protesting about, the destruction of wildlife and nature.  If you were to consider anything, it would be great to have the leisure center turned back to a Lido or outdoor swimming area.	Yes	I HAVE NO LEGAL KNOWLEDGE, BUT JUST LISTEN TO THE NEWS AND EXTENSION HELLION AND INSULATE UK	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Ian McGill				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I am totally against the redevelopment of the Leisure Centre site.  To achieve the number of homes planned to be built on these sites, the only way of fitting them in each area would be to go up in the air with high rise!  This form of housing is totally out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents. Without parking for the residents of these proposed developments this will cause massive parking wars in already very limited street parking around residential Chingford Mount and would disadvantage older people.  If the 280 homes are built then residents of New Road and surrounding streets will be extremely adversely affected. By building 280 flats on this site, overlooking upwards of five plus stories, would completely destroy residents' way of life.  These proposed developments cannot be delivered with policy compliant levels of affordable housing.  Once these homes are built will there be extra doctors, hospitals, dentists and schools or just hollow promises to do so?  Chingford Hall Estate was demolished in 1997, this was a High Rise development and low rise houses built instead. It is widely known that these small homes are not good for mental health. Covid has only shown how bad a problem this is. Why would the Council want to repeat their mistakes?	Please only build homes to the height of existing buildings and no higher and also provide parking for any new residents. Infrastructure should be provided for any new flats as trying to get a doctor's/dental appointment is extremely difficult. With so many new homes our local hospitals, schools and nurseries will be massively impacted, making things even worse for existing residents.  We do not want to lose our leisure centre. We have already lost our lovely art deco cinema and the beautiful old Albert High on Albert Corner to developers and what have we got now? Please leave it alone! It appears that every time the Council want to develop it just ends up being an eyesore and makes the area look worse.  Please look at other existing buildings that are derelict before this site.  There is a half-built block of flats near Morrisons Supermarket on Chingford Mount Road and the other derelict flat-roofed site in Old Church Road that should be looked at first with a view to redevelopment.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  Through the evidence published in the Character Intensification Study, the Local Plan policies have been prepared to ensure that on sites where higher density development growth needs to come forward, it can be delivered using a character-led approach to ensure it is in-keeping with the character and context of the local area. The housing need established in policies in Local Plan Part 1 sets out that development of higher density is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Thomas Townsend				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	There should be no residential development this should be for leisure only for the people in Chingford as per the original covenant anything else is a betrayal by bow?		No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations respond to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

Kathryn Usain				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I understand that a covenant is on this site which forbids anything other than leisure facilities to be built here. This plan is very sensitive it will take away 2 important leisure facilities which are necessary to the health of the local people. There are 2 leisure centres on this site one a private and one council owned all the facilities be rebuilt this is an environmental nightmare to demolish new buildings and replace them with substantial build. A large car park is essential for leisure facilities as not everyone is within walking distance and there is little public transport.	Leave the site alone I believe an objection is being made because of the covenant.	No	No one takes any notice of emails	<p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Michael Shellock				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Until the Council of LBWF properly communicates with and makes open and honest representations to and receives substantial support from local residents then any "Local Plan" cannot be considered to be valid.	Tough and tricky, considering the timescale and space here/hereon. We need better representation from local people in Chingford and Highams Park, since it is perceived by the majority in these areas that Chingford and Highams Park are under attack from this Labour-controlled council. The council have yet to justify why they are trying to build so many houses/flats in numbers that far exceed the requirements of Central Government and City Hall in London.	No	I do not consider that proper representations have been made to the people of Chingford and Highams Park about the impacts of the Councils desired wishes will have on this part of the borough.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against the proposal. 280 extra homes added to already over burdened public services as well as a loss of leisure facilities to the local area.		Yes		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Andrew Stoddart				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against proposal 280 extra homes in an area where public services are already strained. Also a loss of leisure facilities to the area.		No		The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2017/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,910 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. The site allocation requirement ensures the provision of leisure uses. Mrs Melana Benfield				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Once again, no proper consultation for local residents. Minimum should be a letter through the door with a form to fill in. Once again, there are not the school or health facilities in the area to cope with this amount of people moving to the homes you propose to build. These facilities are stretched to the limit as it is. Every child should be able to attend their local school. My children went to Larkwood school. They would not have stood a chance of getting into this school if these homes had been built a few years ago. Is there going to be parking allocated to these new homes or once again are local streets going to take the burden? Chingford Leisure Centre is a fine leisure centre which is very important to a lot of residents. What is going to happen to that? There is nothing wrong with it and should be left alone.	leave Chingford Leisure Centre alone, more doctors, dentists, hospitals and schools needed. Sort the parking situation out.	Yes	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches. Blanca Westwood				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The local residents are happy with the site as it is. We require public & private leisure facilities plus car parking.		No	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Caroline Rudage				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The existing site provides much needed local amenities designed to help working families and encourage healthy lifestyles. The new plan would reduce access/loss of these areas as a part of the borough already lacking new facilities.	Protect the two gym spaces and nursery area and car access as local transport links from north Chingford residents are poor and would cut off ability to access leisure facilities if parking was reduced.	No	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Mark Fookes				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The few provisions mentioned already exist. In this time the council is encouraging people to be more healthy and green we should keep this valuable outdoor space as it is.	Scrap the plans.	No	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Glyvis Devin				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	I took part in an "engagement event" in 2021 when members of the local community commented on these plans and made it clear they were opposed to the proposals. Consultation was flawed because a lot of people in the area were unaware of any plans for re-development here. Over-development of any area brings it's problems and where are the plans for parking facilities? According to the council representative at the 2021 engagement event people who would live in the new development would not have cars. A lot of people use the leisure facilities here and don't wish to have them taken away. Then there comes the same old problem of lack of plans for extra services. It's difficult enough trying to get hold of your own GP and finding a dentist. Social care has long been over stretched and what are the plans for extra schools? Chingford is a sub-urban area, not a town or city. High rise development and over-development will not benefit any of the residents here.	I suggest you leave the current site as it is. Retaining all the facilities as they are. Chingford is not overrun with swimming pools and leisure centres and so we would like to keep the local amenities we already have. All the facilities on this site are well established services	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Anne-Maria Luff				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The area does not need redeveloping. The leisure centre was renovated a few years ago. It is heavily used by the local residents who will be very disgruntled if the centre were closed for over a year whilst redeveloped. The other leisure centres gained help take on these residents swimming lessons, gym sessions and classes which the residents rely upon for mental and physical health.  The green area has been re-wilded and home to deer and other species and construction work would be catastrophic to their survival		No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

If yes, please explain why?	Council's response
Andrew Stoddart				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Against the proposal. There is a severe lack of leisure facilities in South Chingford. Young people have no distractions, knocking down the local library which has served the local community as far back as I can remember will only make the situation worse. The library is also a valuable resource to the elderly community. This beautiful historic building will be lost and a block of flats will be put in its place. A big shame and a loss to the community. We are constantly being told how important good mental health is. South Chingford will have NOTHING to offer its inhabitants as both the library and leisure centre at the Larkwood site will be lost. It isn't healthy putting this many people close to each other with no leisure amenities.		No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Environmental issues, use of forest area with destruction of wildlife	Don't do it! The air quality is better in this part of WF and the forest is why	No	-	In April 2019, The Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality neutral standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.
A Kean				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The masterplan is out of character of the area and being over-development likely to cause harm to the 'amenity' of existing residents, not least because the 300+ vehicles that will come new residents will impose significant additional demand on the on-street parking in the area.	Don't do it	No	-	The Local Plan requires a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It was the glorious Larkwood swimming pool. Long since shamefully demolished. Now we have fitness centres, Tesco and a pub. Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park areas?	NO COMMENT	No	-	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Gillian Prouler				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The directions to developers re leisure are extremely vague. There will be a loss of a private gym and pool and a public gym and pool. All of which are used by the wider community. Health, exercise and leisure centres are scarce this end of the borough. You are removing facilities with no clear indication that they will be replaced.	You need to make it clear that if the developer removes the current facilities it has to replace them, with adequate parking.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.
Antonio Zanki				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This facility is used by thousands of people every week. With plenty of parking facilities. Your plan to destroy completely the face of Chingford, something we do not want or wish, as residence of this area.		No	I wish to be rejected altogether.	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.

Rebecca Boylen				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		Not enough parking. Not big enough leisure facilities - there are 2 on this site			As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No Response	No			No		The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the DPD should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.
David John Anderson				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Too much too little space	leave it		simply to judge	The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Kathryn Connor				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.1 Pg 164) states 12,640 new homes over 30 years and LBWF is proposing 27,000 new homes by 2050 - a very significant excess of 62% over the required target.	is this proposal evidence led?	Yes		The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Jacque Stafford				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	We do not believe the allocation of this site meets the test of being "justified", because its designation as a "Transition" site does not meet the criteria for that designation given in the Local Plan. Nor do we believe it to be "reflective", as it is unlikely to be delivered in the Plan period, because the commercial uses on the site have many years of useful life ahead of them and it is unlikely that they can be replaced on site without a form of development which is harmful to the character of the local area.	As to the above I feel very strongly and agree with what I have sent in and could not have worded it better myself!	No		The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Russell Wellard				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	This area should remain as it is. Leisure centres need car parks for their customers. High density housing is completely inappropriate for this site.	Leave this site as somewhere for leisure and fitness.	Yes		The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.

If yes, please explain why?	Council's response
Timothy Boyle				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The site is under covenant and should be withdrawn from planning proposal. The site provides employment and leisure for the community and has been developed fairly recently so do not think legislation is unwanted, not needed and illegal considering the covenant. The need for extensive housing is not as severe as it was in 2016 or 2020 the site as it is served the community the best.	Minor development on the nursery site should be looked at instead	-	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Jennie				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	It has a covenant against it meaning it should be for recreational purposes only (ie not residential); no public meetings -- no mention in the local WF News. Loss of sports facilities.	Keeps all sports facilities, non residential development	-	-	The site allocation requirement ensures the provision of leisure uses. The Borough's Local Plan also has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. The Council is committed to ensuring that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community. Where sites that have an existing leisure facility use come forward as a site allocation (for example sports centres) provision of the leisure facility is a policy requirement to preserve the existing level of provision of playing pitches.
Paul Leahy				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Leave it alone. Chingford does not need new flats. There isn't enough room for new builds		No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	Yes	Yes	Yes			No		The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Cat				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No		It is totally unacceptable to eat away at more green space.	No	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Mr M Demetriou				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Absolutely disgusting, especially using part of the woodland. This should be completely unheard of.	LEAVE IT ALONE!	No	I do not agree with the plans	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
										Yes

Cheryl Tagge				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Not appropriate	Not to complete this project	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Cheryl Tagge				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	No	Ridiculous	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Cheryl Tagge				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Chingford is quiet and peaceful area. Stop ruining chingford	Don't build here	No	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
Sharon Legg				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	As a life long resident of Chingford and a regular user of the public leisure centre, I'm disgusted that the council is planning to get rid of this facility. Both the public and private leisure centres are well used, all year round. The council demolished the old 'Dino' site to build 'Fantasia' then demolished that to become the current centre. We used to have a cinema at Chingford Mount. Please stop taking away our facilities to cram more houses in for the council tax income. This just shows the contempt that the council has for its residents. This leisure centre doesn't just provide fitness facilities, it's a lifeline to some people who come to socialise and give structure to their day. It is used by all ages, from babies to elderly people and for schoolchildren learning to swim. It is exactly what the council should be promoting, not taking away.	Scrap the plans for this site altogether to demonstrate that that the authority care about its residents.	No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	How does this benefit people in chingford taking away our leisure centre and building more homes why dont you knock down Walthamstow swimming pool and build your new homes on that site.		No	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.

Timothy Boyle				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	The leisure centre and the land behind is subject to a covenant it is not for the land owner and the developer to re-write the covenant in order to achieve a goal. The centre including all surrounding buildings provide employment and leisure facilities for the community that the covenant is in place to protect.	The Nursery is in private ownership and has sought planning for some time but this has been refused as being too dense, too many properties for instance. It seems double standards are in place perhaps some reasonable development of the nursery could be allowed	-	-	The Borough's Local Plan has a policy on preserving existing parks and open spaces and enhancing access for leisure, sport and recreation. There is a commitment in the policy to try to ensure that there is adequate provision of recreational spaces, indoor and outdoor sports facilities and parks for all sections of the community, and to preserve the existing level of provision of playing pitches.
Cheryl Tague				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No	Not enough schools in the area in proportion to number of homes. Kid's will be the future prime ministers, doctors, lawyers of tomorrow. Many teacher shortages already due to the pandemic and will cause a significant reduction in school's GCSE, A-Level and SAT's attainment which will lower the countries average and not the way forward for the country as a whole.	Not to complete the project	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.
John Arthur Charles Walls				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	No Response		The existing leisure facilities (including Nuffield Health site) are fully used and form a vital element of our environment. Their loss would be unfortunate.	No	Far too often people who fail to express an opinion are counted as being in favour of proposals.	The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities, it is no longer required or would not lead to a shortfall in provision.
-				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No Response	No	Yes	It should be legally compliant	More trees	-	-	The Local Plan requires that developments must retain and protect significant existing trees. They should take account of existing trees and retain where possible.
				S461 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	No	No			-	-	Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.

Tim Hancock				S45 - Larkwood Leisure Centre and Nursery and the Land to the Rear of Larkwood Leisure Centre	No	Response	No	Response	<p>I strongly object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, designations to the surrounding environment, negatively affecting the community in a classic case of developers, maximising their profits and externalising the cost on to others who shoulder the burden for generations to come, a significant and fairly recent to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions, banking on future to control mitigation, and defend the sanctity of the family by previous and current politicians, orchestrated by commercial interests, and pushed on the public by propaganda from the media that is propagated by corporate interests who are not attached to the community and therefore an affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack on the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider county.</p> <p>The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and in virtue of follow on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is vitally responsible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are set out in the plan "Success There are 4 tasks at para 25 of the NPPF:</p>	REJECT This site was always intended for public facilities (book at the Larkwood pool).			<p>This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Satam using tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONG OBJECT, and I am keen to understand how the people who profit fit and meet in short term financial terms will underwrite the future wellbeing of the indigenous community?</p>	Offensive Response
Jaimie Newbery				S452 - Pear Tree House	No	No	No	No	<p>Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs; and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practicable to do so and is consistent with achieving sustainable development.</p> <p>The LBWF should be seeking to preserve the local character of the area - residents chose to move to Chipford &amp; Highams Park as they are low rise suburbs of north London at the very edge of London. The gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter &amp; St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents were in being ignored.</p> <p>The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.19) sets 2,640 new homes over 10 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?</p> <p>Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.</p> <p>The majority of the new properties are flats; the Pandemic has shown that families want houses with gardens. There should be a goal of housing that meets the needs and desires of the population. When was the last time a new house was built in the area? Changes in preferences for low rise and impacts views and skyline. Parking needs ignored and effectively include those who need their own transport for work or due to age or social circumstances. Not positively prepared.</p> <p>Not Effective. No additional infrastructure planned to cope with the totality of developments S455 - 58</p> <p>Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the settings of surrounding buildings. Any proposal of more than 3 stories would not meet policy 29 of the London Plan.</p>		Yes		<p>The Local Plan requires a character-led approach to identification, including full building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2020).</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 52,640 new homes (1,266 per year) based on a London-wide assessment of capacity/available sites in 2021/18. The original draft London Plan figure was equivalent to approx. 1,480 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formation of capacity/available sites in 2021/18. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 60,000 homes per year across London.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Rambar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCS), Special Areas of Conservation (SAC), Rambar sites, or Special Protection Areas (SPA) will not normally be granted planning permissions without appropriate mitigation measures in place prior to development.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p>Positively Prepared</p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p>Justified</p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>Research/fact finding: the choices made in the plan are backed up by facts.</li> <li>Evidence of participation of the local community and others having a stake in the area, and</li> <li>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p>Effective</p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>Sound infrastructure delivery planning;</li> <li>Having no regulatory or national planning barriers to delivery;</li> <li>Delivery partners who are signed up to it; and</li> <li>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>This Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant</p>	
Stuart Reichmann				S452 - Pear Tree House	No	No	No	No	<p>Not in keeping with local character. Changes in preferences for low rise and impacts views and skyline. Parking needs ignored and effectively include those who need their own transport for work or due to age or social circumstances. Not positively prepared.</p> <p>Not Effective. No additional infrastructure planned to cope with the totality of developments S455 - 58</p> <p>Not consistent with regional/national policy Borough's plans greatly exceed targets. This development adversely affects local views and harm the settings of surrounding buildings. Any proposal of more than 3 stories would not meet policy 29 of the London Plan.</p>	Keep developments of the same height and as close to character as possible with surroundings. Make facilities on site suitable for a diverse demographic and their needs rather than a solid device of how people should be made to live.	No	Not necessarily me but certainly representative of the affected local community who seem under represented in these planning decisions		<p>The Local Plan requires a character-led approach to identification, including full building and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2020). The study recognises the impact that development can have on conservation areas and advocates a sensitive approach. In Local Plan Part 1, Policy 22, Designated Heritage Assets. There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough (such as Grade II listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any divergence from these clauses that would lead to other substantial harm or total loss of a designated heritage asset.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.</p> <p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by independent Planning Inspectors appointed by the Secretary of State. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as those of funding for major infrastructure projects. Although it is important that policies are flexible, the DPM should make clear that major change may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Mike Chrimes				5462 - Pear Tree House	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, but for reasons it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules" that are not transparent to consultees.</p> <p>Consultation on the site allocation (LP2) element of the Waltham Forest Plan has been taken forward more transparently than the main plan (LP1) for 2020-2035. This has coloured the views of many attending the other online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, meet needs businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had sufficient low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 3200 homes pa. While WLVF has a large waiting list (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing intensification are brownfield sites and not greenfield sites.</p>	<p>While this site offers potential for development the change of use would result in the loss of care home facilities already in the charge of up to 33 residents on the site (APP/19/0306/W/18/2204283) partly because it would not address the local priority need for larger affordable homes.</p> <p>This site allocation should be either abandoned or reworded to take account of the above planning appeal decision (APP/19/0306/W/18/2204283)</p>	No	<p>I do not feel the online consultations enabled attendees to participate fully in the time frame allowed</p>	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <p><b>Positively Prepared</b></p> <p>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</p> <p><b>Justified</b></p> <p>This means that the Local Plan should be based on a robust and credible evidence base involving:</p> <ul style="list-style-type: none"> <li>Research/fact finding: the choices made in the plan are backed up by facts.</li> <li>Evidence of participation of the local community and others having a stake in the area, and</li> <li>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> <p><b>Effective</b></p> <p>This means the Local Plan should be deliverable, requiring evidence of:</p> <ul style="list-style-type: none"> <li>Sound infrastructure delivery planning;</li> <li>Delivery partners who are signed up to it; and</li> <li>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> <p>*The Local Plan should be flexible and able to be monitored.</p> <p>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as those of funding for major infrastructure projects. Although it is important that policies are flexible, the DPM should make clear that major change may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</p>
Anthony G Thorne Lip				5462 - Pear Tree House	No	No	No	<p>The question fails to provide a definition of the laws to which the plan should comply being The Town and Country Planning (Local Planning) (England) Regulations 2012.</p> <p>19. Before submitting a local plan to the Secretary of State under section 22 of the Act, the local planning authority must:</p> <p>(a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and</p> <p>(b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 18(1).</p> <p>14(1) A local planning authority must:</p> <p>(a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and</p> <p>(b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.</p> <p>(2) The bodies or persons referred to in paragraph (1) are"</p> <p>(a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p> <p>(b) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;</p>	<p>Based on the personal knowledge of the location and the problems associated with recent developments it is not believe the plan to be sound.</p> <p>Currently Chingford suffers from a major problem with emissions from the Edmonton Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient than will still be emissions. Although they suggest these toxic will be removed / do have my doubts or will there be others which could be more toxic.</p> <p>A number of the proposed sites are right on the boundary of the LAE2 zone and downwind of the road meaning there will be the first area to pick up the extra CO2 and NO2 from vehicles avoiding the LAE2 charge. But the rest of the area will also be subject to these increases and the proposed said the natural air flows possibly result in pockets with even a higher concentration.</p> <p>Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the area to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of the problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the motters listed above.</p> <p>If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. It is the same as in the 1930's that people needed space and New Towns were built with green spaces, low density areas, and the LAE2 zone.</p>	Yes	<p>Because there are too many unanswered q</p>	<p>This response is noted.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2012 and in accordance with the Council's Statement of Community Involvement.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. Peter Lobov				S462 - Pear Tree House	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to sit a few pass because they are full (pre-pandemic which is what you need to compare with and at the very times we need to travel into work. At other times buses are not complying their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider queuing more people into an already vastly over populated area?	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to sit a few pass because they are full (pre-pandemic which is what you need to compare with and at the very times we need to travel into work. At other times buses are not complying their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider queuing more people into an already vastly over populated area?	Yes	I do not trust the council or planning teams	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Yvonne Sanders				S462 - Pear Tree House	No Response	No	Is the Plan "sound"? There are 4 bits at para 35 of the NPPF:  Has the Plan been "positively prepared"? This means providing a strategy which, as a minimum, seeks to meet the areas objectively assessed needs and is informed by agreements with other authorities, so that unreal need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development. "No an LBWF should be seeking to preserve the "Local Character" of the area residents chose to move to Chingford & Highgate Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the forest. The proposal for 25 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 4,000 signatures objecting to this particular development proposal and residents views are being ignored. The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.3 Pg 564) states 12,440 new homes over 20 years and LBWF is proposing 27,000 new homes by 2035 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London, is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space? Also, the housing targets in the London Plan may be altered as the Government has stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme. The majority of the new properties are flats - the Penderic has shown that families want houses with gardens. There should be a good mix of housing <a href="https://www.bbc.com/news/health-57401408">https://www.bbc.com/news/health-57401408</a> <a href="https://www.bbc.com/news/health-57401408">https://www.bbc.com/news/health-57401408</a> One should not be encouraging new development because of embedded carbon contrary to net carbon zero targets	This property has been refurbished during 2020/2021 and is supposed to be a Care Home but appears to be a House in Multiple Occupation for homeless people?  Is it likely that it will become available for Development in the next 10-15 years?  If it does, it is essential that the development is no more than 3 storeys high, so that it is keeping with adjacent properties, does not spoil the view of the skyline and does not take the ancient "right to light" of the properties behind it.	Yes	I wish to have the opportunity to explain why the Councils proposed developments are not suitable.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport.
Bill Robney				S462 - Pear Tree House	No	No	<a href="https://www.bbc.com/news/health-57401408">https://www.bbc.com/news/health-57401408</a> <a href="https://www.bbc.com/news/health-57401408">https://www.bbc.com/news/health-57401408</a> One should not be encouraging new development because of embedded carbon contrary to net carbon zero targets	Refurbish rather than redevelop. Subject to a structural survey, it should be possible to add further floors using lightweight sustainable materials.	Yes	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP practices, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  In April 2020, The Council declared a Climate Emergency. In the chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it is new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
Mrs Geraldine Kendall				S462 - Pear Tree House	No	No	With regard to the Pear Tree House site, the proposed development is entirely out of character within its setting, which is a largely low rise 2/3 storey suburban area adjoining Epping Forest and on the perimeter of the boundary with Essex. Its height and density would have a detrimental impact on adjoining residents and the immediate neighbourhood, and its views and skyline. It would also contribute to the urbanisation of North Chingford, when all the other proposed sites in the area are taken into account. Parking requirements in an area of poor public transport and few cross boundary public transport options have also been ignored which would have a negative impact on older people, and those requiring cars to get to work (so many work outside of London). Car free developments are not suitable for a suburban area, adjacent to Epping Forest, within poor public transport because if residents need a car to get to work, they will simply have one anyway and just add to the local parking problems. LBWF housing targets for the LP far exceeds those required of it, which will adversely affect the character of North Chingford. Development proposals exceeding 3 storeys would not meet policy D9 of the London Plan. The site should only be re-developed to offer low rise family homes with gardens which fit in with the surrounding domestic architecture, rather than 33 flats, in an 'office style' ugly apartment block with large windows and balconies, without garden or parking spaces. This is far too dense for its location and should be rejected.	LBWF has shown that it does not listen to the residents/local community of North Chingford. It now needs to reduce the number of proposed homes in the LP to the required number only and include only suitable site specific development proposals which will not impact adversely on the character of the area - and which would forever transform the village-like feel of the edge of Epping Forest suburbs, into a wholly urban one.  Bring back empty domestic properties around the borough into use through a program of refurbishment. Respect the Chingford Green Conservation Area and restrict any development in suburban neighbourhoods, to less dense, low rise - no more than 3 storeys.  Only use site specific high quality, aesthetically pleasing design, respecting local character, architecture, and history for sensitive proposals adjacent to Epping Forest boundaries. The ugly concrete and glass box building with balconies which are springing up (or proposed for) elsewhere around the borough are just not appropriate.  Include a better mix of housing in the LP - houses, maisonettes and bungalows, with gardens - not just endless, soul-less flats.  Provide parking for each and every home and all necessary requirements / amenities such as school places, public transport, and healthcare.	No	-	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to identification, including tall buildings, and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of identification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Identification Study (2019).  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
									No

Miss Vignati				S462 - Pear Tree House	No	No	No	All the LHRF are flats stop wasting tax payers money and do your jobs properly. You are all useless. These plans are rubbish		-	-	This response is noted.
Lloyd Parkinson				S462 - Pear Tree House	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy consistent levels of affordable housing, no parking provision, this will disadvantage older people. The plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no sufficient public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc	build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	-	Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. The engagement events took place online as a response to the spike in the number of Covid-19 cases at the time to protect both our residents and Council Officers.
Paul Wellard				S462 - Pear Tree House	No	No	No	These proposals are completely out of keeping with the character of Chingford. The area is predominantly low rise suburban (semi rural in terms of buildings and streetscape). In addition these tall buildings will overlook existing properties and have a serious detrimental effect on greenery. There is no parking provision, which will pose a problem for older people. The area also does not have enough infrastructure to cope, such as doctors surgeries (this is already a problem with the existing development and will be substantially worsened) and schools provision.  It must also be said that the consultation process has been appalling. Very few people are aware of or have an understanding of these proposals and the advertising of it has been very poor indeed. Online meetings such as via Teams or Zoom are no substitute whatsoever for a proper public consultation and effectively exclude many of the older population of the area.	If additional homes must be built in the area, they should be low rise to match the existing 2 and 3 storey development, should provide parking, and should be of a far lower density to reduce the additional stress on services. A public consultation of a far higher standard than that provided should also be undertaken.	Yes	Residents and other stakeholders were consulted on this document at its draft consultation stage which ran from October to December 2020. Planning considerations raised at this consultation were taken on board to produce this version of Local Plan 2. Due to a spike in the number of Covid-19 cases at the time of pre-submission consultation, the Council decided for the safety of residents and officers to hold engagement sessions online.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.	
Kathryn Uman				S462 - Pear Tree House	No	No	No	There is a shortage of care homes in the borough. This site could be repurposed as one and this would free up local houses for rent and sale. A much more environmentally friendly solution.	Renovate and open care home.	-	No one takes any notice of emails	Where proposals affect existing care facilities, the policy set out in Local Plan Part 1 ensures that there can be no loss without demonstrating that there is a surplus of that form of accommodation in the area and that it is no longer required. There is a considerable need for additional capacity to meet the needs of an ageing population.  New supported and specialised accommodation will meet stringent criteria to ensure that facilities are high quality and fit for purpose.
Terry Miles				S462 - Pear Tree House	No	No	No	1. Has the Plan been "thoughtfully prepared"? This means providing a strategy which, as a minimum, seeks to meet the area objectively assessed needs, and is informed by agreements with other authorities, so that unmet need from neighbouring areas is accommodated where it is practical to do so and is consistent with achieving sustainable development.  The LHRF should be seeking to preserve the 'local character' of the area - residents chose to move to Chingford & Highams Park as they are low rise suburbs of mostly houses at the very edge of London - the gateway to Epping Forest. It is NOT appropriate to change the character of the area by proposing to build tall blocks of flats and urbanise the area which is the gateway to the Forest. The proposal for a 5 storey building in a Conservation Area next to the village green, historic wooden cottages and St Peter & St Paul's Church, is particularly offensive! There is a petition of over 6,000 signatures objecting to this particular development proposal and residents' views are being ignored.  The Council is seeking to build more than the London Plan requires. The London Plan (Fig 4.79 164) states 12,640 new homes over 21 years and LHRF is proposing 27,000 new homes by 2031 - a very significant excess of 42% over the required target. Since the London Plan was drafted, due to Brexit and Covid, the number of people living in London is estimated to have fallen by 1 million, so why is there pressure on local councils to build on every possible space?  Also, the housing target in the London Plan may be altered as the Government have stated that they are proposing to require less development in London and the South-East and more in the North as part of the levelling up programme.  The majority of the new properties are flats - the pandemic has shown that families want houses with gardens. There should be a good mix of housing to meet the needs and desires of the population. When was the last time that a bungalow was built in Waltham Forest? Bungalows are the preferred property for many older residents and the Council should be ensuring that this mix of housing is provided and not replaced with more flats.		No	no one is listening to the residents of Chingford !!	The Local Plan requires a character-led approach to intensification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2019).  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sizes. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.  In Local Plan Part 1, Policy 22 - Designated Heritage Assets; There is a strong presumption in favour of retention and enhancement of Designated Heritage Assets in the borough such as Grade I listed buildings and their settings as their retention helps to ensure the borough's history, identity and sense of place are protected for future generations to celebrate and enjoy. Planning permissions will not be granted unless robust justification is provided in the planning process for any deviation from these clauses that would lead to either substantial harm or total loss of a designated heritage asset.  As set out in the Local Plan, if new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine walking, cycling and public transport use.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include new GPs and healthcare facilities.

Peter Labov				542 - Pear Tree House	No	No	No	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to sit a few pass because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?	Chingford is not a high rise area and does not have the transport links to support it. How will the people get around? The roads are completely choked, no tube, buses are overflowing, often have to sit a few pass because they are full (pre-pandemic which is what you need to compare with) and at the very times we need to travel into work. At other times buses are not completing their route due to traffic chaos. Until the lack of effective public transport is resolved, how can we consider squeezing more people into an already vastly over populated area?	Yes	Do not trust the council or planning teams	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan Active Travel and Transport chapter sets out measures to ensure connectivity and integration of the public transport network with other active transport modes including walking and cycling. The Local Plan aims to ensure that new development does not lead to excessive car parking provision that can undermine cycling, walking and public transport use.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noticeable alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.
Richard Iles				542 - Pear Tree House	No	No	No	A proposal for an Elderly residential accommodation development on this site by McCarthy and Stone was rejected by the Council and (on Appeal) by a Planning Inspector. I would have thought that there is a shortage of such provision in the Borough. There is a growing need as the population is ageing. One reason the Council gave for rejection was the use of the development and I hope they are not following the same path. The site is currently undergoing extensive refurbishment/redevelopment however presumably to accommodate a significant number of occupants although there appears to be no information about the purpose of this activity.	I think the existing building which is modern and sound should be retained for elderly residents. I should also perhaps declare a future interest!	Yes	-	This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  The Local Plan sets out requirements in Policy 14 and 15 for the proportions of homes in a scheme which are expected to be low-cost rented, and which are to be intermediate and the expected mix of sizes. Variations are considered when they can be justified based on a number of factors including site location, area characteristics, design constraints, scheme viability and end-user affordability.  The Local Plan contains requirements for access to Policy 16 - Accessible and Adaptable Housing. This sets out that all newly built self-contained homes are to be accessible and adaptable in line with Building Regulation M4(2) and a minimum of 10% of new-built, self-contained homes are to be suitable for occupation by a wheelchair user or easily adapted for occupation by a wheelchair user in accordance with Building Regulation M4(3). This will be applied to the site allocations and ensure that they contribute to meeting housing needs.
-				542 - Pear Tree House	No	No	No	Should not encourage new building when not necessary.	Retain and refurbish existing building.	No	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  This is noted. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.
-				542 - Pear Tree House	No	No	No	Surely all of these proposals are not made by local residents but presumably by people that live out side Chingford/Highams Park areas?	NO COMMENT	-	-	The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.
Christine Shepherd				542 - Pear Tree House	No	No	No	The need in this area is for affordable houses rather than flats with no parking or outside space, since the London plan was drafted, COVID has placed the need for outside space has been demonstrated in terms of the mental and physical health of WF residents. The number of Existing vacant housing and flats has not been investigated fully, making the judgement of the units currently needed not legitimate.	The current number of units available needs to be calculated, the wishes of those on the housing waiting list needs to be acknowledged in terms of area they want to live in and what level of accommodation they need.	-	-	The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2021/26. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response	
Key Anderson				S463 - Pear Tree House	No	No	No	No	All developments should be stopped while council is investigated as to why they are building houses in excess of requirements. Claire Coghil didn't act alone....	Council is corrupt and building for profit not the needs of Chingford citizens	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.	
Conservative Councillors (Alicia)				S463 - Pear Tree House	No	No	No	No	We support the redevelopment of this site in accordance with the granted planning consent for sheltered housing.		Yes		This response is noted.	
Tim Hancock				S463 - Pear Tree House	No	No	No	No	I Strongly Object to this exploitation (Development implies something positive and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding/denigration to the surrounding environment, negatively affecting the current residential) This inconsiderate and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the Burden for generations to come. A significant and holy origin to this approach to development activity is to provide a resolution to an upstream problem created from weak decisions centring on failure to control immigration, and defend the sanctity of the family by previous and current politicians, contrasted by commercial interests, and pushed on the public by propaganda from the media that is suggested by corporate interests who are not attached to the community and therefore not affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.  Fundamentally the building of this nature is an antithetical and aggressive attack on the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.  The reason this is an obvious attack is; the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is virtually impossible to maintain a cohesive culture without the historically stable family unit, which has a high dependency on a home that serves as a liberal foundation for its existence.  The current proposed developments are a reversion of the failures that are	Reject		Yes	This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by importing anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few elite masses and long run cost for the local community. This approach is creating a social and cultural desert one enclave at a time. SO YES, STRONGLY OBJECT, and I am keen to understand how the people who profit first and most in short-term financial terms will underwrite the future wellbeing of the indigenous community?	Offensive Response
Anthony G Thorne Lip				S463 - North Circular S12	No	No	No	No	18. Before submitting a local plan to the Secretary of State under section 19 of the Act, the local planning authority must: (a) make a copy of each of the proposed submission documents and a statement of the representations procedure available in accordance with regulation 35, and (b) ensure that a statement of the representations procedure and a statement of the fact that the proposed submission documents are available for inspection and of the places and times at which they can be inspected, is sent to each of the general consultation bodies and each of the specific consultation bodies invited to make representations under regulation 31(1).  18.17(1) A local planning authority must: (a) notify each of the bodies or persons specified in paragraph (2) of the subject of a local plan which the local planning authority propose to prepare, and (b) invite each of them to make representations to the local planning authority about what a local plan with that subject ought to contain.  (2) The bodies or persons referred to in paragraph (1) are" (a) each of the specific consultation bodies as the local planning authority consider may have an interest in the subject of the proposed local plan;	Based on the personal knowledge of the location and the problems associated with recent developments I do not believe the plan to be sound. Currently Chingford suffers from a major problem with emissions from the Emerson Waste Plant which results in higher than normal infant mortality rates and even though they state the new larger plant will be more efficient there will still be emissions. Although they suggest these toxic will be removed I do have my doubts or will there be others which could be more toxic.  A number of the proposed sites are right on the boundary of the L1E2 zone and driveway of the road meaning these will be the first areas to pick up the extra CO2 and NO2 from vehicles avoiding the L1E2 charge. But the rest of the area will also be subject to these increases and the proposed actual air flow possibly result in pockets with even higher r concentrations.  Waltham Forests current population density is far to high and as such we have seen significant increases anti-social behaviour, crime and in particular violent crime and mental health issues. Also the recent Covid pandemic showed that areas of high density being allowed the virus to spread more rapidly. In fact history has shown that people need space in which to live with green space. There has been an example of problems with the Chingford Hall Estate where the 1960's tower block was removed as there were major problems with all the matters listed above.  If we look at the East End in the Victorian era the population density led to high infant mortality, low life expectancy, crime, what we now call anti-social behaviour, and mental health problems. In it was featured in the 1930's that people needed space and New Towns were built to reduce population density. The 1930's 1940's 1950's		Yes	Because there are too many unwanted work	This response is noted.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement.  The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a new urban environment with reduced congestion, parking problems and improved air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/rented vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  The Local Plan states that the loss of existing social or community infrastructure will usually not be permitted unless there are adequate alternative facilities. It is no longer required or would not lead to a shortfall in provision.  The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an L106 planning obligation.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
Lloyd Parkinson				S463 - North Circular S12	No	No	No	No	Proposed developments would be out of keeping with the area, they cannot be delivered with policy Compliant level of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no sufficient/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life etc		Yes	Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life	Through the evidence published in the Character Identification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver a higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life etc  The London Plan (2021) sets a 30 year minimum housing target for Waltham Forest of 22,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 2,830 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate level of infrastructure needed to be truly sustainable. During the pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.	
John Duffell				S463 - North Circular S12	Yes	Yes	Yes	Yes			No	-	This response is noted.	

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Mike Chimes				S464 - Justin Road and Troxy Way	No	No	No	It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed. Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plan may be rejected. Failing to comply with "rules that are not transparent to consultees. Consultation on the site allocation (LPA) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LP2) for 2020-2035. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the topics of meetings which have been very coloured by political point-scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders. One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online. In general however it has been apparent both from LP1 and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1800 homes per year. While WFPF has a large waiting list (2020), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the borough will meet expressed housing need. More	It is suggested that until master plans are developed, through consultation, for the main centres identified in LP2 consultation on individual sites is paused. This site should be considered as part of a group comprising SA 46, 47, SA 53, 64 and 74, possibly extended further to include along the north circular, with full consideration of the implications for these developments on active transport infrastructure, improvements to east west public transport beyond and within the borough, and opportunities and needs for soft infrastructure eg health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are: Positively Prepared This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved. Justified This means that the Local Plan should be based on a robust and credible evidence base involving: • Research/fact finding, the choices made in the plan are backed up by facts. • Evidence of participation of the local community and others having a stake in the area, and • The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved. Effective This means the Local Plan should be deliverable, requiring evidence of: • Sound infrastructure delivery planning. • Having no regulatory or national planning barrier to delivery. • Delivery partners who are signed up to it; and • Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities. • The Local Plan should be flexible and able to be monitored. The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the ODP should make clear that major changes may require a formal review including public consultation. Any measure which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report. Consistent with National Policy and in general conformity with the London Plan. Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough's, in "general conformity" with the London Plan. Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.
Lloyd Parkinson				S464 - Justin Road and Troxy Way	No	No	No	Proposed developments would be out of keeping with the area. They cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes that require by the London Plan. Existing residents will be over looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the effects on the quality of life etc	Build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demand on the roads, the effects on the quality of life	This document demonstrates that the Council's consultation and commitment to work together with neighbouring boroughs and other stakeholders to maximise the effectiveness of the Local Plan Document, better and more
Simon Binks				S464 - Justin Road and Troxy Way	Yes	Yes	Yes			Yes		Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocation process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured. The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres. The London Plan (2021) sets a 20 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London. This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable. The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.
Muhammad Reza Nasirullah-Jabbar-Masoodah				S465 - Hainault Road	Yes	Yes	Yes			No		This response is noted.
Peter Bearman				S467 - Barrett Road	No	No	No			No		This response is noted.

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Sound Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)? 				S468 - Highams Park Industrial Estate	Yes	No	No	Lack of facilities with no provision to improve infrastructure.		-	-	The Local Plan Infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Ray Anderson				S468 - Highams Park Industrial Estate	No Response	No	No	All developments need to be scrutinised as council is building/ developing above requirements. See why Claire Coghil "resigned" and how all these plans were developed under her watch.	Stop all developments until current Council fully investigated as they do not have Chingford residents interests.	-	-	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has a substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan.  The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,640 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2027/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.
Mike Turpin				S468 - Highams Park Industrial Estate	No	No	No	It does not comply with the LBWF commitment to abide by the accepted local Plan. All new building should not be too high and should be designed to match the local style.	It should comply with the limitations contained in the Local plan.	Yes	To ensure that LBWF comply with the approved Local Plan.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Van Ashley				S468 - Highams Park Industrial Estate	No Response	No	No Response	There is insufficient parking to support additional industrial, retail or residential capacity at this location. It is likely that existing industrial activity would be lost during redevelopment and be unlikely to return. The site is not well connected - contrary to the assertion in the plan.	Remove this location designation and suitable for development from the plan	Yes	-	As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  Waltham Forest has an identified need to provide additional industrial floorpace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorpace, and the intensification of industrial provision is encouraged.
Benjamin Faulkner				S468 - Highams Park Industrial Estate	Yes	Yes	-	-	The plan should include guarantees to retain the same amount of green space and recreation space as we have today.	-	-	The Borough's Local Plan has a policy on protecting and enhancing the environment (as the objective of protecting, restoring and enhancing the Borough's natural environment). A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
										No

				S468 - Highams Park Industrial Estate	No	No	No				-	This response is noted.
Simon Binks				S468 - Highams Park Industrial Estate	Yes	Yes	Yes				-	This response is noted.
Beryl Lough				S468 - Highams Park Industrial Estate	Yes	Yes	Yes			No	-	This response is noted.
Tom Hancock				S468 - Highams Park Industrial Estate	No Response	No Response	No Response	<p>I Strongly Object, to this exploitation (Development implies something horrible and THIS IS NOT THE CASE, these proposals are simply adding to overcrowding, designations to the surrounding environment, negatively affecting the current residents)"</p> <p>This is an expedient and arbitrary decision to simply drop a development in to this community is a classic case of developers maximising their profits and externalising the cost on to others who shoulder the burden for generations to come. A significant and likely origin to this approach to development activity is to provide a resolution to an intractable problem created from weak decisions (centering on failure to control immigration), and defend the sanctity of the family by previous and current politicians) orchestrated by commercial interests, and pushed on the public by propaganda from the media that is puppetsed by corporate interests who are not attached to the community and therefore are affected by the devastating and painful outcomes for all families and communities down on the ground in local areas.</p> <p>Fundamentally the building of this nature is an antithetical and aggressive attack at the roots and future of the indigenous culture and English people of this town, while also expanding this attack to the wider country.</p> <p>The reason this is an obvious attack is, the nature of these developments, are completely void of any substance or virtue related to accommodating, or fostering any semblance of a family, and by virtue of follow-on the strengthening of English culture that has existed and been nurtured over many hundreds of years in this town and country. By its blood, soil and spirit, it is verifiably responsible to maintain a cohesive culture without the historically stable family units, which has a high dependency on a home that serves as a literal foundation for its existence.</p> <p>The current proposed developments are reminiscent of the failures that are</p>	<p>Reject based on continued denigration to local community and strain on local services, as pointed out above.</p>	Yes	<p>This development is another step on the way to creating a dead zone and destruction of a healthy balanced community, through the method of Salami slicing tactics to displace current communities. This approach also seeks to compound the destruction of local communities by impacting anyone at breakneck speed, with a contempt for the consideration toward the current people in the vicinity, while it is also an assault on their existing culture and community values for the profit of a few at a massive and long run cost for the local community. This approach is creating a social and cultural desert we enclose as a time. SO YES, I STRONGLY OBJECT, and I am keen to understand how the people who profits first and most in short term financial terms, will underwrite the future wellbeing of the indigenous community?</p>	Offensive Response
Michael Phillips				S469 - Heathcote Lane S13	No Response	No	No	<p>The plans make no mention of the hundreds of un-occupied dwellings in the south. This area does not need more shabby built high-rise blocks, which will increase traffic, increasing risks for pedestrians and cyclists, and dislodge local residents for many years. What is needed is (a) green space and better access to the wetlands, (b) commercial space for local businesses, and (c) sensitive development of existing industrial areas to enhance its character and utility. Adding thousands of residential units will stretch infrastructure and diminish the character of the local area.</p> <p>If residential units are required, build quality family houses, not flats!!</p>		No	-	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p> <p>Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan requires that utilities infrastructure and connections must be designed into the development from the outset and all new development must demonstrate that there is sufficient utilities infrastructure capacity to adequately support their proposal. Additionally Where there is an identified deficit, the developer will be expected to make sure that necessary infrastructure will be provided as part of the proposal and secured through an s106 planning obligation.</p>

Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Ben Tompson				5469 - Blackshore Lane S1L3	Yes	No	Yes	I recognise the need for new homes but this proposal talks about optimising the volume of homes, which will put too much pressure on the surrounding green space and building at height, which will harm the value of the marshes as open green space uninterrupted by unnatural structures. There is no mention of a pre-sustainability strategy with regard to protecting the surrounding green space and the development itself being carbon neutral and sustainable. Many people attribute their mental health and wellbeing to being able to access the open space of the Marshes. The open green space of the Marshes has been a saviour for so many local residents. The benefits of open, unobstructed green space is backed up by over 1000 clinical studies in the last 5 years alone.	A development at this scale should have the environmental impact and sustainable building practices at its heart. This means low rise buildings that complement their surroundings and don't obstruct views of green space for local residents. Buildings that use sustainable resources. A building strategy that means the development is self sufficient through sustainable energy technologies like solar and wind. This approach needs to be outlined from the start, before any high level permissions are granted.		-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  Through the evidence published in the Character Interference Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  In April 2020, The Council declared a Climate Emergency. In the Chapter in Local Plan Part 1 entitled Addressing the Climate Emergency, The Council sets out a strategic objective to build the borough's climate change resilience by targeting net zero carbon emissions by 2030. This will be achieved by delivering more energy efficient development that is constructed to a more sustainable design and where possible connect, whether it's new build or the retrofitting of existing property, reducing the dependency on cars by encouraging modal shift to more active forms of transport such as walking and cycling, consuming less and recycling more which is in line with the GLA's Circular Economy Statement and the promotion of nature, health and wellbeing to increase resilience against climate change conditions such as heatwaves and flooding.
Ashley Fletcher				5469 - Blackshore Lane S1L3	No	No	No	The plan appears to have ignored the 100s of residential units to the south of the S1L, indeed they are not even represented on the map (and residential blocks are missing on Moorlands Road/ Champneys Close/ Hoffmans Road etc.). Further, the plan says "New development is required to mitigate for potential impacts (noise, odour and air quality, visual amenity, hours of operation and lighting) to protect the operations of the existing businesses" again totally ignoring existing residents to the south of the area. Why should the new development only have to mitigate potential impacts to existing business but not existing residents? Tall towers are being suggested to be very near the south of the area, again this totally ignores the 100s of residents that live to the south who would have a huge tower block look on top of them. Why is Waltham Forest suggesting tall towers, the Taylor Wimpey development just south of this area was only allowed to be six stories this would seem a sensible height for these new developments.  The area is already struggling with a lack of social infrastructure for local residents, a new GP was promised years ago as part of another recent development but that is still not open. Have Waltham Forest considered local GP's etc., do we have the capacity for these additional residents? Will you be requiring new schools/ dentist practices/ GP, etc.  Have Waltham Forest considered the air quality/ noise issues from "industrial intensification"? It seems odd that Waltham Forest are seeking to do this when they have acknowledged that there are air quality/ noise issues already coming from the industrial estate which they are struggling to reduce/ deal with. I understand there are a number of active noise/ pollution complaints that Waltham Forest are investigating from this area.  I think this area should be developed, but more consideration for local residents is required (in particular those to the south of the area, that means the low income, pensioners, carless, disabled etc.)	The plan needs to be modified to take into account the 100s of residents living to the south of the area, which appear to have been totally ignored/ forgotten (to the extent that residential blocks do not even appear on the map included with this plan.). The tall blocks should be further north in the area, and all new development should have to consider existing residents and not just businesses.	No	To ensure local residents are fully consulted	Through the evidence published in the Character Interference Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The site allocation requires that replacement commercial floorspace is reproduced, ensuring that the site still provides economic opportunities.  The Local Plan infrastructure policy requires that the development would need to provide adequate contributions towards physical, community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to local Plan consultations have always been welcome either through the online portal or by email and post.
Cheryl Gayer				5469 - Blackshore Lane S1L3	No Response	No	No	The Local Plan completely ignores the substantial residential development Hoffmans Road/ Hoffmans Road/ Champneys Close immediately below the site boundary at the bottom of the plan. Not only is that area blank on the plan, but your development guidelines ignore it. The guidelines discuss mitigating potential impacts (noise, odour and air quality, visual amenity, hours of operation and lighting) to protect the operations of the existing businesses but they make no mention of mitigating potential impacts on local residents. This is unacceptable. Moreover, the Local Plan suggests potential for height at the south of the site. That would be in close proximity to the residential development, which is only six floors high, and adjacent to the Wetlands. A tall building in that location is completely inappropriate.	The substantial residential development located immediately below the site boundary should be included in the Local Plan both in terms of the placement plan and in terms of the development guidelines. It is essential to consider potential impacts to these residents and how to mitigate them. Moreover, neither high-rise buildings nor heavy industry should be allowed in the south part of the site in view of the large number of residents living immediately south of there. Any tall buildings and heavy industry should be reserved for the central or north part of the site and query whether either is appropriate given the proximity of the Wetlands.	Yes	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The new Local Plan sets stringent environmental standards, including with respect to pollution. It requires that development should meet or improve upon air quality network standards over the lifetime of a development and does not contribute to a decrease in air quality during the construction or operating stages of development.  The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimize these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.
Dominic				5469 - Blackshore Lane S1L3	No	No	No	Because it's not for local people who won't be able to afford anything there	Don't build anything there that is natural for the local wildlife to inhabit	No	No it's not necessary	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  This is noted. However, it's through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this the appropriate development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.

Julian Cheyne				S469 - Blackhorse Lane S13	No Response	No	<p>Development of this site will adversely affect the neighbouring Walthamstow Wetland which is a Site of Special Scientific Interest (SSSI), a RAMSAR (wetland of international importance) site and part of the Lee Valley Special Protection Area (SPA).</p> <p>The Site Allocation fails to mention these important features of this site and fails to consider the harmful impacts this site will have on the Walthamstow Wetland.</p> <p>Waltham Forests Policy 86 H states:</p> <p>Policy 86 H: Development proposals will not normally be granted planning permission where they pose adverse direct or indirect effects on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA). Development on or near to Walthamstow Reservoirs Special Protection Area, Walthamstow Wetlands and Walthamstow Marshes Sites of Special Scientific Interest must not have a detrimental impact on the biodiversity or nature conservation value of the site.</p> <p>Waltham Forest lists the following policies in its Draft Local Plan:</p> <p>a) Protect and enhance existing green and blue infrastructure, including open space and leisure facilities, biodiversity and nature conservation (17 'Protecting and Enhancing the Environment')</p> <p>Policy 14.5 A.5 C. (relating to any negative impacts it may have on visual amenity, access, health and safety)</p> <p>14.6 amenity will be carefully assessed in regards to its associated environmental, health and social impacts, in relation to both the immediate surroundings and the wider environment.</p>	<p>Development should be restricted in terms of population and the number of units. Tall buildings should not be allowed. This site has a number of important environmental designations. As Waltham Forest states in its policies it should respect and protect green open spaces in all parts of the borough, whether they be Epping Forest, the Lee Valley Park or local open spaces. Green open spaces provide important health, social and economic benefits which are all the more important in dense urban settings. Increased population pressure is unsustainable and tall buildings reduce the same of openness of open spaces harming visual amenity.</p>	Yes	<p>I am a member of Save Lee Marshes, which campaigns to protect and enhance green open spaces in this part of London</p>	<p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to new development sites in the Borough.</p> <p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a brief of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p>
Tara				S469 - Blackhorse Lane S13	No	No	<p>We are facing a climate emergency, potentially one of the biggest emergencies and thus crises of our lives. We need to create more green spaces, not build the ones we have. We need less emissions, pollution and waste, not more. We need to protect the biodiversity of special green spaces such as marsh land, ecological habitats that pollinate flowers, clean the air and soak up flood water. This is anti progressive and not for the benefit of the people.</p>	Keep the site as is	Yes	To make sure its fair	<p>Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.</p> <p>This is noted. However, it is through the adoption of Local Plan, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p>
Caroline Day				S469 - Blackhorse Lane S13	No Response	Yes	<p>The 'potential for height' i.e. blocks of 16-27 directly adjacent to Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.</p>	<p>To be in line with the protections afforded to SSSI, RAMSAR sites of international importance for nature conservation and the SPA, there should be no 'potential for height' afforded to this site allocation. Development, if any, should be strictly limited in terms of height, purpose and scale in order not to have a significant adverse impact on the neighbouring wetlands.</p> <p>This relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lights and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed.</p>	Yes	<p>If further detail is required, for submissions to be taken fully into consideration.</p>	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Consultee	Consultee Organisation Details	Agent	Agent Organisation Details	Site Number	Legally Compliant	Sound	Duty to Cooperate Compliance	Comments detailing why the plan is not legally compliant, unsound or fails to comply with the Duty to Cooperate	Modification(s) you consider necessary to make the Local Plan legally compliant and sound, in respect of any legal compliance or soundness matters identified	Do you consider it necessary to participate in examination hearing session(s)?	If yes, please explain why?	Council's response
Tushar Kulkar				S469 - Blackhorse Lane S113	No	No	No	<p>The plan fails the duty to cooperate because it arbitrarily increases the assigned houses gross from 1800 to 2300. This is completely unnecessary and was not consulted on in any other document. There is no evidence provided for why this is the correct amount for this area. 2300 is a very substantial amount which would substantially reduce the ability of the landowners to help provide industrial use cases. Therefore this should be reduced to 1800 otherwise the plan is not sound or cooperative.</p> <p>Furthermore the plan fails the agent of change principle because it does not state that it will mitigate pollution impact on local residents, such as those living in the development south. By increasing connectivity through these developments the council is merely increasing ASB and noise pollution affecting as 1000s of people will be walking down residential streets that are not intended for such use.</p> <p>Lastly, there needs to be clear statement that local areas accessible to the public are being created rather than private use cases for specific residents only.</p>	<p>Reduce the houses target to 1800.</p> <p>Put language in to the principles stating "the new area will ensure that there will be safeguarding of local residents to prevent spillover effects such as increased noise pollution and use of residential roads". This is achieved by ensuring pedestrians and cyclists use new infrastructure along Blackhorse Lane, and along the west path along the wetlands.</p> <p>Another statement stating that development must prioritise creating public spaces accessible for all, rather than private uses.</p>	No	-	<p>The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to that set out in the London Plan.</p> <p>The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.</p> <p>As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/motorised vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The Duty-to-Cooperate demonstrates the Council's cooperation and commitment to work together with neighbouring boroughs and other public bodies to maximise the effectiveness of the Local Plan Documents being produced.</p>
Colin Miller				S469 - Blackhorse Lane S113	Yes	Yes	Yes	The area needs more hospitality, retail and housing, plans look great!	-	No	-	<p>The Council sets out its strategy for managing change in the Borough's Town Centres, High Street L, and Local Parades to ensure that they remain relevant into the future and evolve and develop to continue to help residents meet their daily shopping, work and recreational needs and help the Council ensure an effective delivery of its 15-minute neighbourhood objectives. These policies also support new high street and town centre uses that may emerge in the future. Additionally, the Local Plan sets out how the Council will introduce measures to protect and enhance the retail offer in the borough to maintain vitality in our distinctive high streets and town centres.</p>

Colin Dear				S469 - Blackhorse Lane S13	Yes	No	Yes	The proposal makes no mention of the fact that this proposed development site fringes on the Lee Valley Special Protection Area (SPA) and the Wetlands which are a Site of Special Scientific Interest (SSSI) and a RAMSAR site of international importance. This is inconsistent with the protection the council is ensuring for Epping Forest (a Special Area of Conservation) if the forest is being protected, the Wetlands area should also be protected. The current proposed site development is not consistent and unsound.	The developments should protect this important habitat. The height of developments and numbers of people involved should be limited and the development should be reformed.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Dominic				S469 - Blackhorse Lane S13	No	No	No	Because its not for local people who wont be able to afford anything there	Don't build anything there leave it natural for the local wildlife to inhabit	No	No its not necessary	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.  There are many definitions of affordable housing. Because of the severity of the housing crisis, an increasing number of households on a range of income are affected. This means a range of options are needed. Low-cost rent including Social Rent and London Affordable Rent will form the basis of genuinely affordable homes, however intermediate housing can and will still play an important role. Shared Ownership for example, supports home ownership aspirations for people who might otherwise struggle to get on the housing ladder.  The allocations require affordable housing in line with the policy approach set out in Local Plan 1.
Melina Lurie				S469 - Blackhorse Lane S13	Yes	No	No	The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of jobs and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Borough's Local Plan has a policy on protecting and enhancing the environment (as the objective of protecting, restoring and enhancing the Borough's natural environment). A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Stephanie Anderson				S469 - Blackhorse Lane S13	Yes	No	Yes	I agree with wanting to regenerate the area, but building 8 up in such a way will change the feel of the area without providing facilities that are so badly needed (childcare/ transport to facilitate the number of people already living in the area/ food shops). The wetlands are a big draw to Blackhorse Road, and building up the skyline will have a negative impression.	It should remain in the nature it is now, i.e. not residential and with no tower blocks.	No	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.  Through the evidence published in the Character Identification Study, sites that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development any infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Borough's Local Plan has a policy on protecting and enhancing the environment (as the objective of protecting, restoring and enhancing the Borough's natural environment). A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
Amy Brites				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 sits alongside the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of jobs and an increase in lighting and so on. -				S469 - Blackhorse Lane S13	Yes	No	Yes	Access to greenery in the marshes has been one of the few consistent pleasant escapes possible to me in the last 2 years. This kind of access to nature is very rare in London and one of the reasons that made me want to live on this side of the borough. I believe that further grand scale constructions will further denature the space. Londoners need more green space and less speculative high-rises.	Respect the importance of the marshes as a key nature site in the life of East London residents. Keeping the marshes wild is the best option. Alternatively minimize as much as possible the impact of new constructions on the identity of the marshes, one of the rare easily accessible open spaces in a busy city, leaving it as a low rise and inviting nature to flourish.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorrie Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
-				S469 - Blackhorrie Lane S113	No Response	No	No Response	The Blackhorrie Lane S113 abuts the Wathamstown Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. Camilla Wilson				S469 - Blackhorrie Lane S113		No		The Blackhorrie Lane S113 abuts the Wathamstown Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound. The proposed development at S113 - Blackhorrie Lane will put huge population pressure on the neighbouring wetlands. Land in the planning proposals, there is absolutely no mention of the impact thousands of new residents, will have on the Wetlands and the surrounding areas. This population increase will in turn increase congestion, air, noise and light pollution on the vulnerable wetland area it sits besides.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorrie Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.  The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, so the Wetlands cant, then the development should be reformed.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. Victor Smith				S469 - Blackhorse Lane S13	Yes	No	Yes	Walthamstow Wetlands, which is next to this proposed site, is part of the Lea Valley Special Protection Area, a Site of Special Scientific Interest, and a Ramsar site wetland of international importance. This Local Plan is unsound because it does not take this into account, therefore potentially enveloping the impact of this Plan on the valuable wetlands it is next to.	This Local Plan should be modified to take into account the protected status of the Walthamstow Wetlands, and it must be ensured that any development does not negatively impact the Wetlands. Like Egging Forest, Walthamstow Wetlands and the Hackney and Lonon Marshes, area should be protected from development. This is particularly important as this area is a floodplain that act as a buffer to protect local residential and commercial areas from increased risk of flooding caused by climate change.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. C Martin				S469 - Blackthorne Lane S113	Yes	No	Yes	I think the size of the proposed development would be incredibly overwhelming to a neighbourhood who use the space for mental health and wellbeing. I work as a counsellor and regularly have clients who describe the positive and life changing effects of visiting open green spaces - often with particular reference to 'openness', 'wildness' and 'freedom'. Tower blocks like this would not only totally ruin this sense of space, a real rarity for Londoners, but also bring a huge influx of population who the demographic (due to the proposed high prices) are not necessarily those who would use the space, or most sustainable. Additionally it seems impossible that the wildlife and biodiversity will be unaffected by these changes. I believe these plans are unsound and unethical, motivated only by money - complete object.	I believe the only justifiable plan would be to leave the site as it is, to see how any building is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  In April 2019, the Council declared a Climate Emergency. Reducing private car travel will improve air quality by reducing air pollution. This will also be of beneficial for the health of our residents. Most residential development proposed within the Plan is car-free and employment development is car capped. Additionally, the Policies in Local Plan Part 1, ensure that development coming forward in the borough meets and where possible improves air quality standards over its lifetime and does not contribute to a decrease in air quality during the construction or operation stage as a passive measure.
Jade Crowland				S469 - Blackthorne Lane S113	Yes	No	Yes	The Blackthorne Lane S113 about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations documents, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. Nina Pearلمان				S469 - Blackthorne Lane S113	Yes	No	Yes	Walthamstow Wetlands is a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). The Blackthorne Lane S113 proposal directly impacts the Wetlands adjacent to it. Surprisingly this information is absent from the development guidelines. The borough should apply the same approach to our blue and green spaces worth of protection as it does to Epping Forest, a Special Area of Conservation (SAC). To apply a different approach to sites equally worth of protection is inconsistent and, therefore, unsound.	The borough should apply a consistent approach to the relationship between people and green spaces across the borough, and seek to protect natural habitats from damage caused by an increase in population density and all that it entails (increase number of pets and lighting, congestion etc). If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackthorne Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	My quality of life and the value of my property will be directly affected by this proposal, which will have negative impact on wellbeing and the existing community. I seek to ensure my voice is heard.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

Paul Bolding				S469 - Blackhorse Lane S113	No Response	No	Yes	It's inconsistent to seek to minimise access to Egging Forest in one part of the borough, as the council rightly does, and yet put forward proposals like this, given that the Blackhorse Lane S113 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance, a RAMSAR site and part of the Lee Valley Special Protection Area (SPA).	Stop the development completely because the scale and massing of these blocks is such that they would dominate an important open space and greatly reduce their amenity by imposing a feeling of enclosure and being surrounded. An important part of the enjoyment of these green spaces is to get away from the pressures of daily life and no cost to the ordinary people of London. These blocks would hugely reduce that enjoyment for all consumers.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.

Leanne Davis				S469 - Blackhorse Lane S13	No Response	No	No Response	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Mary Ruddy				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Marion O'Brien				S469 - Blackhorse Lane S13	Yes	No	No	As the Blackhorse Lane S13 abouts the Wetlands the plan would dramatically affect the delicate ecosystem of this SSSI as well as bring additional pressure to the local transport links which are already stretched by all the new developments in the immediate area. The Wetlands are part of the Lea Valley Special Protection Area (SPA) yet there is absolutely no mention of this in the development guidelines. The borough's green and blue space is vital to the physical and mental health of residents	Development should be restricted in terms of number of units and height (no more than 5 stories) with a focus on people-centred urban development and social housing. As Waltham Forest states in its policies it should respect and protect green open spaces in all parts of the Borough, whether they be Epping Forest, the Lea Valley Park or local open spaces.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. 				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. The proposal is unsound in many ways. Damage to precious wildlife, ecosystems and local biodiversity. This will happen as the area is built on and then further impact will come from the population increase in the area. Increase of people, cars, noise, lights, vehicles and pollution will have a hugely negative affect. Decreased mental wellbeing of local residents. Local have relied on the sanctuary of the marshes for decades and especially so over lockdown. South open green spaces boost mental wellbeing, help reduce crime and help people recover from illness. Creating a multi-storey eye wall will completely change the place and take something very precious away from locals. A less effective flood plain. The area is a flood plain for the local area. This needs to be kept in tact for greatest effectiveness. The site weather is only getting more extreme. The flood plain needs to be preserved.	would like to see the site left as it is for the benefit of the existing local community and wildlife. It would support a diverse ecosystem and benefit peoples mental and physical health as well as protecting them from flooding, pollution and overcrowding, with detrimental affect would also be reduced.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. Sarah Hutchings				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Jodie Cahill				S469 - Blackhorse Lane S13	No Response	No	No Response	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Egging Forest and mitigate for urban effects to ensure no adverse effect on the Egging Forest SAC. However, to the south of the borough, access to the marshes is being used to support intensive development. Protecting Egging Forest is essential, but it is also essential to protect the marshes and smaller scale parks such as Pocket Park that will be destroyed in this construction. To have two different approaches to the protection of green spaces in the borough is unsound. While protecting Egging Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes and pocket park. Pocket park hosts over 100 trees and its destruction will increase the likelihood of flooding in the area should the River Lea overflow. Therefore its loss of protection with the marshes, compared to Egging Forest is unsound.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting, pollution and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. These areas are harmful as they will undoubtedly lead to a loss of trees all along the east side of the Marshes and further destruction of local green spaces. I suggest the modification that this be kept as it is that Orient Way Pocket Park is retained. The number of units and the scale of the towers should be significantly decreased, to reduce population pressure on a vulnerable natural area that can absorb it. The figures quoted for population increase are in line with pre-pandemic and pre-flood statistics, which while understandable are official figures, it is clear that population increase at this scale will not happen in the next 10 years, therefore the modifications suggested are sound.	No	As this has a massive impact on the community	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.  The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.  The allocation of this site requires the creation of high quality green space.  Through the evidence published in the Character Interconnection Study, sites that are appropriate for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some areas identified within strategic locations such as town and district centres and is close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation Document (Local Plan Part 2), means that through development by infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.
Burak Can Akcik				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). 				S469 - Blackhorse Lane S11	No	No	No	This proposal is on a risky flood plain, the marshes are a great public amenity & more high rise development rising to 50 stories strikes as mad on a safety aspect. Council was last rescued if ever needed from this height would be impossible. Try converting existing redundant factory buildings to achieve more friendly neighbourhoods. Instead of turning a well loved natural area for Hackney residents to escape to.		No	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1, Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exception test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocation document (Local Plan Part 2) means that through development key infrastructure as identified in the infrastructure Delivery Plan (IDP) can be secured.  Delivery of public space must be balanced with the need for new housing and employment. The Local Plan sets out requirements for the amount of open space to be delivered within new developments.
				S469 - Blackhorse Lane S11	Yes	No	No	The Local Plan does not consider how traffic noise and pollution will affect existing neighbours. HGVs moving in and out of the industrial estate at different hours of the day and night cause annoyance to local residents. The Local Plan needs to provide solutions to ensure the development does not cause residents in the surrounding areas to suffer.	Limit the hours where HGVs are able to access the site. Introduce no idling areas so the HGVs do not leave their engines running while waiting to unload.	No	-	The Local Plan requires that any new development must respect the amenity of existing residents and avoid harmful impacts from overlooking, enclosure, loss of privacy and loss of daylight/sunlight.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality. Additionally, Waltham Forest Waste and Recycling guidance for the developers sets out operational requirements and measures to enable safe, regular and easy refuse collections and to alleviate traffic congestion. Moreover, the Local Plan directs planned growth to previously developed sites that are currently under-utilised and tend to generate high numbers of private car/instored vehicle trips. Redevelopment of these sites in accordance with Local Plan policies should significantly reduce vehicle traffic across the borough.  As per the local plan policies, to adequately evaluate the impacts of development on the transport network and to ensure development contributes to encourage walking, cycling and public transport use planning applications must include Transport Assessments, Travel Plans, and Construction Logistics Plans. These documents will outline the potential impacts of construction traffic and detail strategies to minimise these impacts. Additionally, suitable measures and monitoring methods will be agreed upon to address and mitigate any potential issues that may arise during the construction phase.

Rebecca Flint				S469 - Blackhorse Lane S13	Yes	No	No Response	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.  I also think that further building on a flood plain is very illogical. We are aware from friends that live on the edge of the marshes near Coppinmill that they have been informed they now live in an area at risk of flooding due to the fact that there has been so much building work near Ferry Lane/Blackhorse. For them, long term residents of over 20 years, who's homes have never flooded this was really quite shocking. Have you taken into account the rise in insurance for houses affected by the building in a flood plain?	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.  I cannot see that building on the area that is an area of SSSI and a Flood plain is logical in a time of increased global warming, higher sea level, and as we saw last year flash flooding across the borough of Walthamstow - it will only increase.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Dr Daniel Hartley				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats. The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Asha				S469 - Blackhorse Lane S13	Yes	No	Yes	I have been a WF resident my whole life, have lived next to and gone to school near to the Marshes. The Marshes is a special site for plants and wildlife, it is a haven for the local community who use it for education, recreation and for their mental and physical health. The proposed plans are announced as they would significantly adversely affect the Marshes and its wildlife and landscape and in turn impacting the local communities who use it daily. This I believe would go against the wishes of Waltham Forest Council who recognise the importance of green spaces. In other areas of the borough plans next to Egging Forest are showing consideration for green spaces, I believe this should be the case for the Marshes too.	Due to the nature of the plans above, I believe the only modification in this case would be to have the site as, with light industrial use. This is the only way to ensure no disturbance is made to the natural environment.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Alex Birtles				S469 - Blackthorne Lane S13	Yes			In my view the local plan is not sound. First and foremost it is acknowledged that the Blackthorne Lane S13 is adjacent to Walthamstow Wetlands. This area has been designated as a Site of Scientific Interest and as such a wetland of international importance. There is no reference to the fact that it is a SSSI in the plan. This is an appalling omission and perhaps a deliberate omission to not inform residents of the impact of these plans on such a special area. Other conservation areas of special interest in the north of the borough have been protected from development. The policy across the borough should be consistent. Furthermore this area	I believe that S469 Blackthorne Road should be protected because of its SSSI status and that there be no further development plans accepted for discussion in the future. This would be in line with actions taken in respect of the north of the borough.		-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINCs), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Adam Burch				S469 - Blackthorne Lane S13	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green space, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to 'minimise access to Epping Forest and 'mitigate' for urban effects to ensure no adverse effect on the Epping Forest SAC. However, the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.  The Blackthorne Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lee Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.  The following threats are all further reasons why the site is unsound: Blocks of 18-27 storeys Abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI) A RAMSAR (Wetland of International Importance) site Part of the Lee Valley Special Protection Area (SPA)	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackthorne Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
	Kilian Strong			S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-allocated. I propose that S469 Blackhorrie Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
-				S469 - Blackhorrie Lane S13	Yes	No	Yes	The Blackhorrie Lane S13, about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-allocated. Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refrained. I propose that S469 Blackhorse Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
-				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Hannah				S469 - Blackhorse Lane S13	No	No	No	The Walthamstow Wetlands should be protected for multiple reasons, as a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). It is ridiculous that areas in the North of the borough get this protection.	The site should be left as is. The Wetlands can not take on this level of change. The area can not take on the additional pressure, and these proposals will irrevocably destroy this SSSI, RAMSAR site and SPA.	Yes	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Olivia Healy				S469 - Blackhorse Lane S13	No Response	No	No	This is building is infringing on a green space filled with wildlife. It is destructive to the ecology and biodiversity of the area. This green space should be protected.	Do not build next to the wetlands, reservoirs and marshes.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Alice Mead				S469 - Blackhorse Lane S13	Yes	No	Yes	I welcome proposals to improve the pedestrian and cycling experience along the roads that border Hadley and Walthamstow Marshes, but a development on this scale will inevitably be detrimental to the character of this important area of open green space as a result of the impact of the construction itself, followed by increased motor traffic and footfall. All of this is likely to cause physical damage to the Marshes and wetlands and their associated biodiversity, increasing the number of high rise towers is not appropriate when so many local residents use the Wetlands as a refuge from the urban environment. The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats. Alternatively, any development should be reduced in scale and kept low rise to minimise its negative physical, environmental and visual impacts.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. Eamon Keane				S469 - Blackhorse Lane S13	Yes	No	Yes	Waltham Forest Council rightly acknowledges that access to green spaces, particularly open green spaces, is essential for physical and mental health and wellbeing. In the north of the borough, developments must be designed to "minimise access to Epping Forest and mitigate for urban effects to ensure no adverse effect on the Epping Forest SAC. However, in the south of the borough, access to the marshes is being used to support intensive development. Protecting Epping Forest is essential, but it is also essential to protect the marshes. To have two different approaches to the protection of green open spaces in the borough is unsound. While protecting Epping Forest SAC is driven by legislation, there is no reason why the same approach cannot be taken towards the marshes.	The relationship between people and green spaces should be consistent across the borough. Green spaces should be protected from developments which will cause damage by an increase in the number of people, in the number of pets, lighting and the impact of tall buildings. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, which the Marshes certainly can't, then the development should be reframed. Furthermore, these plans are harmful as they will undoubtedly lead to a line of towers all along the east side of the Marshes. I suggest the modification that this site be kept as it is, as a light industrial site. Waltham Forest needs employment sites. This is already a low rise employment site (Locally Significant Industrial Site) with good road (A12) connections with the potential to create good railway links to the site, with no residential neighbours. This is compatible with open green space, affording the same level of protection to the Marshes as Epping Forest, and would be a suitable modification.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Anthony Wrang				S469 - Blackthorne Lane S13	Yes	No	Yes	The Blackthorne Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocation document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackthorne Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

S Pender-Hughes				S469 - Blackhorse Lane S13	No Response	No	No Response	The proposals at S469 are unsound because:  The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should four equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	Ramsar Sites are wetlands of international importance that have been designated under the criteria of the Ramsar Convention on Wetlands for containing representative, rare or unique wetland types or for their importance in conserving biological diversity. As such Waltham Forest must protect them from development and the resultant impact of population pressure, increased light/noise/air pollution, increased runoff and significant change to the character of the space.  Considering this, the current proposals must be modified and the only way to make these sound would be to protect the area at S469 as the SSSI and RAMSAR site that it is and to ensure it is made immune from further development threats.	-	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Sara Hussell				S469 - Blackhorrie Lane S13	Yes	No	Yes	The Blackhorrie Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorrie Road be protected as the SSS and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas for Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.

To do otherwise is inconsistent and, thus, unsound.	Respond to the proposed plans around the Marshes // Threats to Lee Marshes: How to respond //  *Final date to do this by is 31st January 2022*  Waltham Forest has plans for a number of new developments around Hackney and Walthamstow Marshes that, if approved, will create a line of lower blocks all along the River Lee (to 50-metre high). If these plans go ahead, they will irreversibly change the face, feel, openness and biodiversity of the Marshes. While recognising more affordable housing is essential, the placement (and predicted late price of these new developments) are more likely to degrade and erode our human and wildlife communities than support them.  The plans for high rise developments around the Marshes are in the second stage and Save Lee Marshes have done amazing work to bring together how we can object to these plans to try and save our beloved open green spaces around Hackney and Walthamstow Marshes.  Here is a summary of the information they have put together and how to object through the official channels:  There are 3 main sites that Save Lee Marshes have chosen to object to:  The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pits and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pits and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reformed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	No	-	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
										No	-

Eleanor May Alford				S469 - Blackhorrie Lane S13	Yes	No	Yes	The Blackhorrie Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should these as equally important green spaces for the surrounding communities. This development is therefore inconsistent and, thus, unsound.	Green and blue spaces across urban areas should not only be protected but developed themselves. Developments that propose increase in population, traffic, waste, domestic pets, pollution and light directly impact surrounding wildlife, biodiversity and clean air. This means the green and blue areas around the new development cannot efficiently or sustainably absorb its impact, therefore the development should be re-worked or removed. I propose that S469 Blackhorrie Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.		Born in the area I am hugely connected to these green spaces and its surrounding communities so believe I have a voice when it comes to its potential threat.	The Local Plan policies aim to balance the need for housing and infrastructure with the preservation of green spaces and environmental assets. The highest level of protection is accorded to Ramsar sites, Special Protection Areas (SPA), Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) in the borough. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Isolde Godfrey				S469 - Blackhorrie Lane S13	Yes	No	Yes	The Blackhorrie Lane S13 abouts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be re-framed. I propose that S469 Blackhorrie Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats. There is a statutory requirement to consult Natural England in cases where development may affect these sites. Any development proposals that pose an adverse direct or indirect effect on the biodiversity or nature conservation value on any land or area within the identified Sites of Special Scientific Interest (SSSI), Sites of Importance to Nature Conservation (SINC), Special Areas of Conservation (SAC), Ramsar sites, or Special Protection Areas (SPA) will not normally be granted planning permission without appropriate mitigation measures in place prior to development.
Timm Wetters				S469 - Blackhorse Lane S13	No	No	No		The council does not seem to take into account the vibrant businesses that have recently founded themselves within the industrial area. This seems like a thinly veiled guise to turn Blackhorse Lane into a residential nightmare without providing adequate other uses to support the current residents. Personally I do not think the council has an idea on how to grow the area sustainably.	This business that will, along with potential new startups, needs to be adequately considered.	Yes	This should not take place behind closed doors. People have lived in this area longer than the council has sat in their post.	The Council is committed to playing its part in tackling the housing crisis. The borough has experienced the fastest house price growth in London, and has substantial need for new homes to ensure affordable, high quality accommodation for residents. The Council is promoting the delivery of genuinely affordable homes, as a blend of tenures to give the Council the best chances of tackling the depth and breadth of the housing crisis. The level of growth proposed in the site allocations responds to the Council's assessment of the capacity using an approach which is aligned to that set out in the London Plan. The site allocation requires that replacement commercial floorspace is reprovided, ensuring that the site still provides economic opportunities.

				S469 - Blackhorse Lane S13	Yes	No	-	The Walthamstow Wetlands is a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA) but there is no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces in the west part of the borough. Hence, the plan is unsound.	The development should be re framed by taking into consideration the vital importance of preserving green space consistently across the borough. The development would inevitably damage the fine fauna habitat: the S469 Blackhorse Road should be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	-	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane St about the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). Yet there is absolutely no mention of this in the development guidelines. If Epping Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green spaces (taking the west of the borough). To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of cars and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be immune from further development threats.	-	-	The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.
				S469 - Blackhorse Lane S13	No Response	No Response	-	-	The area is now a huge condensed new-build residential site. There aren't enough services and amenities for people who live there as it is (1 small supermarket within 5 mins). I really don't think more housing is the answer. We need to re-purpose any industrial buildings to service the existing residents in the area.	-	-	The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.

Hannah Wadsworth				S469 - Blackhorse Lane S13	Yes	No	Yes	The Blackhorse Lane S13 abuts the Walthamstow Wetlands, a Site of Special Scientific Interest (SSSI), a wetland of international importance (a RAMSAR site) and part of the Lea Valley Special Protection Area (SPA). There is absolutely no mention of this in the development guidelines. If Egging Forest, a Special Area of Conservation (SAC), is deemed worthy of protection from development in this site allocations document, so should our equally important blue and green space flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed. I propose that S469 Blackhorse Road be protected as the SSSI and RAMSAR site that it is and be exempted from further development threats.	No	-	Y
Abigail Woodman				S470 - Argill Avenue S14	Yes	No	Yes	I welcome Waltham Forest Council's commitment to protecting Metropolitan Open Land (MOL) in the borough. Open green spaces are essential for physical and mental health and wellbeing, and it is very heartening to see that there are no proposals for developments on MOL. It must be said, however, that numerous tall developments in Leyton and Lea Bridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected.  Furthermore, the habitats of the marshes "Walthamstow Marsh (ss SSSI), Leyton Marsh and Hackney Marshes" must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Egging Forest SAC is deemed worthy of protection from development in this site allocations document, so should our equally important green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by intensification. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be reframed.	No	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The Local Plan requires that all new development should protect and enhance biodiversity in the borough, as well as maximising opportunities to make improvements.  Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.	Y
Wianne Perry				S470 - Argill Avenue S14	Yes	No	No	I dont think its a good idea. We need this land as flood plain and its really short sites to build on this given the flood last year	-	Yes	-	Having sites allocated for development ensures that they demonstrate that flood risk has been successfully managed by following the process set out in Local Plan Part 1; Policy 93 - Managing Flood Risk. This ensures that development at all site allocations passes the Sequential Test or that it can be demonstrated through the exemption test that there are wider sustainability benefits to the community that outweigh flood risk and that that flood risk can be successfully mitigated against for the lifetime of the development and that the development does not increase flood risk either on or off the site.  This response is noted.
Guy Gibbs				S470 - Argill Avenue S14	No Response	No Response	No	Current waste management facility regularly creates strong, unpleasant smell which affects surrounding streets. Unless any further development of site addresses, and prevents, this it should not be implemented as will detrimentally affect local residents.	Supportive of initiative to "reconnect ancient routes, such as the Black Path, and create better links to nearby landmarks such as Coppemill Pump House and other industrial/archaeological features of the Lea Valley as well as the Pump House Museum". Current access to marshes/wetlands from Low Hall area is inadequate and dangerous.	No	-	The site is identified as a priority area for new waste management facilities within the adopted North London Waste Plan. This is consistent with the London Plan approach to the siting of waste facilities within designated industrial estates, where their impact can be best mitigated. The Council supports measures to mitigate the impact of such facilities through appropriate design measures.

Charles Craig				S471 - Rigg Approach S15	Yes	No	No	Enhanced Industrial Floorpace Capacity is not what is required, what is required is more homes on under utilised Industrial Areas.	See above			This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal way which would not be able to secure the adequate levels of infrastructure needed.  As set out in the Local Plan, all new residential development within the borough is required to be car-free. Moreover, developers will have an obligation to incorporate provision for accessible cycle storage and Car Clubs within their proposals. These provisions are strategically designed to encourage and support sustainable and active transport, ultimately resulting in a noteworthy alleviation of congestion, parking problems and improve air quality.  Waltham Forest has an identified need to provide additional industrial floorpace over the Local Plan period. As such, development within existing designated industrial sites is required to re-provide the same quantum of industrial floorpace, and the intensification of industrial provision is encouraged.
Abigail Woodman				S471 - Rigg Approach S15	Yes	No	Yes	I welcome Waltham Forest Council's commitment to protecting Metropolitan Open Land (MOL) in the borough. Open green spaces are essential for physical and mental health and wellbeing, and it is very heartening to see that there are no proposals for developments on MOL. It must be said, however, that numerous tall developments in Leyton and Lea Bridge, including this development, will affect the openness of MOL, a characteristic of MOL that must be protected.  Furthermore, the habitats of the marshes "Walthamstow Marsh (as SSSI), Leyton Marsh and Hackney Marshes" must be protected from the damage caused by an increase in the number of people, an increase in the number of pets and an increase in lighting and so on. If Epping Forest SAC is deemed worth of protection from development in this site allocations document, so should our equally important green spaces flanking the west of the borough. To do otherwise is inconsistent and, thus, unsound.	The relationship between people and green spaces should be consistent across the borough, and developments should seek to protect habitats from damage caused by intensification. If the green spaces near to a proposed development cannot sustainably absorb the impacts of the development, then the development should be refused.	Yes	The local plan is focused on people and development and it is essential that the needs of the environment and wildlife are fully represented.	Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that allows people to live more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.  The local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.  The Local Plan requires the protection of MOL in the Borough, unless very special circumstances can be justified. The impact of development on sites near to MOL will be assessed as part of this process.
				S471 - Rigg Approach S15	No	No	No	The council is favouring their own sites over others and deciding to limit other development with prejudice	The council is favouring their own sites over others and deciding to limit other development with prejudice	Yes		The sites included in LP2 have been through a comprehensive selection process which has factored in national and regional policy and assessments as well as 'Call for Sites' exercises which were undertaken during the plan preparation period, which invited landowners/developers to put forward sites. These have strongly informed the council's decisions when deciding scope and location of development in the borough. We feel the sites chosen ultimately will help us to meet our strategic objectives and build more housing in the borough.

Jeanne Gil				SA72 - Lamma Road SLE	Yes	No	Yes	Encroachment on supposedly protected green space will damage wildlife habitat and wildlife itself. Loss of green space will be detrimental to mental health of residents in surrounding areas	No further development	Yes	-	<p>The Borough's Local Plan has a policy on protecting and enhancing the environment has the objective of protecting, restoring and enhancing the Borough's natural environment. A further objective is to develop a multi-functional network of green and blue infrastructure, recognising the benefits this can bring for people and the environment. This policy will apply to all new development sites in the Borough.</p> <p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough) as well as maximising opportunities to make improvements.</p>
Julian Chayse				SA72 - Lamma Road SLE	No Response	No	No Response	<p>The site allocation suggests there is need for a new walking route to Hackney Marshes.</p> <p>Explore the opportunity of a new walking route linking to the Hackney Marshes to the South</p> <p>It is unclear what this means. There is already a good connection with Hackney Marshes via Friends Bridge so there is no reason to believe this is needed.</p> <p>This suggestion may mean another bridge across the River Lea which would be harmful to the SINC on the Hackney side of the Old River Lea. This would not be desirable and would be harmful to the Old River Lea environment.</p> <p>Another possibility is it would mean a link south to New Spitalfields. This would destroy an at present inaccessible area which acts as a wildlife haven. It also presupposes the desirability of the New Spitalfields development, which is strongly resisted. So again this would be harmful and undesirable.</p> <p>The site allocation refers to the Waterworks Nature Reserve</p> <p>Respond to the sensitive context of the green amenity of the WaterWorks Centre and Nature Reserve</p> <p>However, it also needs to refer to the important Waterworks Meadow or Field. This Meadow is suitable for rewilding and for ecological improvement. It is an important open space for local people to enjoy. Consideration needs to be given to upgrading some or all of this site as a Site of Special Scientific Interest (SSSI) and to protect it from inappropriate development, which is strongly resisted. So again this would be harmful and undesirable.</p>	The context of the site allocation needs to include important local features, notably the Waterworks Meadow and the Old River Lea and the need to protect these sites from inappropriate development usage. It should highlight the ecological significance of these sites. The Waterworks Centre should not be an accommodation centre but should be used as originally intended as an educational and recreational centre. It has been accepted as an Asset of Community Value. Green open spaces is vital for people's health and wellbeing and deserves protection. The industrial site must not harm the neighbouring open spaces. This plan should address and reduce inequalities in the Borough and ensure that those experiencing deprivation and overcrowding development should be spread around the Borough and not concentrated in one sector. Much needed open spaces in deprived areas should be strongly protected and extended to help improve the health and well being of residents in these areas. The future development of the industrial area should aim to enhance and extend the neighbouring open spaces.	No	I am a member of Save Lea Marshes and am concerned for the future of open spaces in this part of London	<p>The Local Plan requires that all new development should protect and enhance biodiversity in the Borough as well as maximising opportunities to make improvements.</p> <p>Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. As set out in the Local Plan, all new residential development in the borough will be car-free and developers are also obligated to include accessible cycle storage and Car Clubs as part of their proposal. These measures aim to promote and encourage sustainable and active modes of travel.</p>

Mike Chrines				S474 - Deacon Way Trading Estate (Cabinet Way)	No	No	No	<p>It is unclear from the online site allocation consultation what legislation the plan is intended to comply with, for that reason it is difficult to see how any submission from a member of the public, as opposed to a planning professional, can judge the legal compliance. That suggests the consultation is flawed.</p> <p>Similarly the concept of soundness probably has a definition in planning law which is difficult for a member of the public to judge. Otherwise valid objections or suggestions for amendment to the plans may be rejected for failing to comply with "rules that are not transparent to consultees.</p> <p>Consultation on the site allocation (LPP) element of the Waltham Forest Plan has been taken forward more or less in parallel with consultation with the main plan (LPI) for 2020-2026. This has coloured the views of many attending the often online consultation meetings, and made it difficult to separate views on the main plan from site specific suggestions. At times it has been difficult to determine the status of meetings which have been very coloured by political point scoring, while officers have been subject to abuse making orderly meetings difficult. It is difficult to determine therefore whether consultation with the public has been legally compliant, never mind businesses and other stakeholders.</p> <p>One would say however that a system of consultation, partly driven by the impact of covid, but essentially reliant on web-based technologies can never be inclusive of the population as a whole. Certainly some meetings have had artificially low numbers, represented by the number of attendees allowed, or have been difficult to get into online.</p> <p>In general however it has been apparent both from LPI and what has been stated at consultation meetings a major driver for the intensification of development across the borough has been a housing target of c. 1800 homes per White BWF has a large meeting lot (60000), and central government guidance is driving all local authorities to ensure they develop brownfield sites, it is not clear that all sites selected for housing development in the Borough will meet expressed housing need. More consultation is needed with the Boroughs housing officers to ensure the housing LPI, BWF.</p>	It is suggested that until master plans are developed, through consultation, for the main centres identified in LPI, consultation on individual sites is paused. This site should be considered as part of a group comprising S4 46, S7, S48, S4 and S4, possibly extended further to the east along the north circular, with full consideration of the implications for these developments on active transport infrastructure, improvements to east west public transport beyond and within the Borough, and opportunities and needs for soft infrastructure e.g. health and education facilities, the creative sector, as well as the impact of the (temporary) loss of retail and employment for the local population	Yes	I do not feel the online consultations enabled attendees to participate fully in the time frame allowed	<p>In order for a Local Plan Document to be adopted, it has to be found "sound" through the Local Plan Examination in Public which is a process undertaken by Independent Planning Inspectors appointed by the Secretary of State. The inspectors need to be satisfied that in the examination that the Local Plan meets the four soundness tests which are:</p> <ul style="list-style-type: none"> <li>Positively Prepared</li> <li>This means that the Local Plan should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development. The National Planning Policy Framework (NPPF) sets out principles through which the Government expects sustainable development can be achieved.</li> <li>Justified</li> <li>This means that the Local Plan should be based on a robust and credible evidence base involving: <ul style="list-style-type: none"> <li>Research/Fact finding: the choices made in the plan are based up by facts.</li> <li>Evidence of participation of the local community and others having a stake in the area, and</li> <li>The Local Plan should also provide the most appropriate strategy when considered against reasonable alternatives. These alternatives should be realistic and subject to sustainability appraisal. The Local Plan should show how the policies and proposals help to ensure that the social, environmental, economic and resource use objectives of sustainability will be achieved.</li> </ul> </li> <li>Effective</li> <li>This means the Local Plan should be deliverable, requiring evidence of: <ul style="list-style-type: none"> <li>Sound infrastructure delivery planning;</li> <li>Having no regulatory or red-tape planning barriers to delivery;</li> <li>Delivery partners who are signed up to it; and</li> <li>Coherence with the strategies of neighbouring authorities, including neighbouring marine planning authorities.</li> </ul> </li> <li>This Local Plan should be flexible and able to be monitored.</li> <li>The Local Plan should indicate who is to be responsible for making sure that the policies and proposals happen and when they will happen. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process or more significant changes to respond to problems such as lack of funding for major infrastructure proposals. Although it is important that policies are flexible, the IDP should make clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met should be clearly linked to an Annual Monitoring Report.</li> </ul> <p>Consistent with National Policy and in general conformity with the London Plan.</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough", in "general conformity" with the London Plan.</p> <p>Local Plans also need to be Legally Compliant to avoid being legally challenged in the examination or through the planning application process.</p> <p><a href="#">The Duty to Cooperate with other Administrations</a>, <a href="#">Councils Cooperation and Collaboration</a> and <a href="#">Councils Working Together with Neighbouring Authorities</a> and other public bodies to support the achievement of the Local Plan Documents, below are used</p>
Lloyd Parkinson				S474 - Deacon Way Trading Estate (Cabinet Way)	No	No	No	<p>Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage other people. The Plan aims to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no halfpenny/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life etc.</p>	build homes to height of existing buildings, provide parking, healthcare, education, roads, infrastructure, etc.	Yes	Shortage of doctors, hospitals, dentists, schools, demands on the roads, the affects on the quality of life	<p>Through the evidence published in the Character Intensification Study, sites that are appropriate for development that have the potential for delivering tall and taller buildings have been identified through the Site Allocations process. The need established in policies in Local Plan Part 1 sets out that development that includes tall and taller buildings is required on some sites identified within strategic locations such as town and district centres and in close proximity to transport hubs. Delivery of higher density development at these locations goes towards addressing the housing requirement and will also provide housing that is more sustainably by reducing the need to travel by car to meet their everyday needs. By identifying sites that have the potential to deliver at higher density in the preparation of the Site Allocations document (Local Plan Part 2) means that through development key infrastructure as identified in the Infrastructure Delivery Plan (IDP) can be secured.</p> <p>The Local Plan infrastructure policy requires that the development would need to contribute adequate contributions towards physical, social and community, green and transport infrastructure to meet the needs associated with the development and this would include GP services, healthcare facilities and education centres.</p> <p>The London Plan (2021) sets a 10 year minimum housing target for Waltham Forest of 12,646 new homes (1,264 per year) based on a London-wide assessment of capacity/available sites in 2023/18. The original draft London Plan figure was equivalent to approx. 1,800 homes per year, but targets were downgraded across London by the Planning Inspectors examining the London Plan as the formula used to calculate supply from small sites was not shown to be justified. The revised target falls short of the Council's identified housing need of 1,810 new homes per year, as well as the London Plan identified need for 65,000 homes per year across London.</p> <p>This is noted. However, it is through the adoption of Local Plans, that the required level of development can deliver both the level of housing and infrastructure to meet the identified need in a planned and sustainable way. Without this in place, development would come forward in a piecemeal manner, which would not be able to secure the adequate levels of infrastructure needed to be truly sustainable.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online.</p>
Jayne				S474 - Deacon Way Trading Estate (Cabinet Way)	No Response	No Response	No Response	Improving pedestrian access to this site is sensible	-	Yes	-	Within Waltham Forest a wide range of measures are being implemented to prioritise road space for active travel modes and reduce the capacity for vehicles. Conservative Councillors (General)								<p>This submission is made on behalf of the Waltham Forest Conservative Councillors Group. In response to "Strategic" THE WALTHAM FOREST LOCAL PLAN (LP2) Draft Site Allocations Document September 2020 (Regulation 19)</p> <p>We are sorry to say that this is, largely, a repeat of what we submitted at the Regulation 18 stage because few of the concerns highlighted have been addressed in the revised documents. We are grateful for the removal of certain sites from the document, but the remaining designations remain of significant concern, because in large part, we do not believe them to be "effective", because to deliver development in the form suggested would be contrary to the NPPF requirement that development should be in keeping with the character and appearance of an area.</p> <p>The designation is also not "effective" because, in certain cases which we will highlight below, the proposed developments are simply not financially viable.</p> <p>We have significant concerns over the consultation process in addition to the specific concerns about the designations. There has been a real effort made by local people and Councillors to raise the profile of the consultation but the Council has made it very difficult for those who are not "online" to engage with it. We know that several residents have raised this and we will let their comments stand for us also.</p> <p>We have separated our response into two sections; a general response on the process as set out in the Introduction and Methodology sections at the beginning of the document and then responses on specific sites based on our own knowledge and experience and on discussions we have had with local residents and community groups.</p>				<p>The Council is committed to delivering the new homes needed to go as far as possible to meet the need for new homes in the borough, whilst also securing high quality exemplar design, protecting and enhancing the character of local areas, providing new and improved green spaces and public realm, responding to the climate emergency, improving air quality, significantly reducing flood risk, creating safer spaces, reducing fear of crime, maximising the number of local jobs and employment spaces, and delivering a whole range of community infrastructure, including health facilities, a new hospital, public transportation improvements, facilities for young people and new cultural amenities. The Council is promoting the delivery of genuinely affordable homes, with a blend of tenures to give the Council the best chance of tackling the depth and breadth of the housing crisis, as recommended by the Housing Commission. The level of growth proposed in the site allocations responds to the Council's assessment of site capacity using an approach which is aligned to the set out in the London Plan, and informed Local Plan Part 1 (LP1).</p> <p>Local Plans should be prepared to be consistent with National Policy (the NPPF) and for London Borough, in "general conformity" with the London Plan.</p> <p>The Local Plan, in both part 1 and 2, is being prepared to ensure it meets the test of soundness and is "effective". It indicates who is to be responsible for making sure that the policies and proposals are met, and when planned growth is expected to be delivered. The plan should be flexible to deal with changing circumstances, which may involve minor changes to respond to the outcome of the monitoring process. Although it is important that policies are flexible, the two-part Plan is clear that major changes may require a formal review including public consultation. Any measures which the Council has included to make sure that targets are met will be clearly listed to an Annual Monitoring Report.</p> <p>The consultation was carried out in accordance with the regulations in the Town and Country Planning Regulations 2017 and in accordance with the Council's Statement of Community Involvement. This document was published for draft consultation between October - December 2020. During this time there were several in-person engagement events held at various locations in the borough. During this pre-submission consultation, there was a spike in the number of Covid-19 cases. For the safety of our residents and officers, the Council took the decision to hold all engagement events online. Responses to Local Plan consultations have always been welcome either through the online portal or by email and post.</p>
Conservative Councillors (General)								<p>General Response</p> <ol style="list-style-type: none"> <li>The Site Allocations Document ("SAD") is vital to the "soundness" of the Local Plan as without sufficient land being identified, there is no way the Council can demonstrate that it can meet its housing target. Accordingly, we believe taking the LP1 policies part of the plan to Public Inquiry prior to the conclusion of the Regulation 19 stage of the LP2 site allocations part of the plan is a flawed approach.</li> <li>We note that the Council have included 65 potential sites within the SAD, but that the document fails to include sites which have been included in the Regulation 19 version of the LP1 document. (See Figure 4.1 Page 25 of that document).</li> <li>We note that the SAD includes only what the Council describes as "Strategic" or "Key" sites, but it is less than transparent, some might say misleading, to consult on a document purporting to show where development will happen and what form that development might take, when a later version of a separate document in the scale of Plan documents is suggesting a greater number of sites for development.</li> <li>We also believe it is misleading to fail to include sites which the Council intends to include on the Brownfield Land Register.</li> <li>The cumulative effect of this approach is to seek to accommodate a higher number of homes within the sites identified in the SAD, leading a need for higher densities and taller buildings on that smaller number of sites than might in fact be necessary.</li> </ol>				<p>This comment is noted. The independent inspectors examining Part 1 of the Plan have raised no concerns with this approach. The strategic spatial vision set out in Local Plan 1 aligns with the site specific requirements and guidance for proposed site allocations in Local Plan 2. As Local Plan Part 2 is further reviewed and revised ahead of a further round of Regulation 19 Consultation, full alignment will be ensured.</p> <p>The site proposed for allocation in Local Plan 2 aligns with the capital growth strategy set out in Local Plan Part 1, particularly the direction of planned growth to identified Strategic Locations. As identified, the Site Allocations focus on "Strategic" and "Key" sites which would benefit from the clear rating of expectations for land use and quality of place making and design. The brownfield register is a useful tool to identify previously developed sites of at least 0.25 hectares, and is capable of providing at least five homes. It is updated annually, and aligns with the allocations proposed in Local Plan Part 2 but also provides the opportunity to identify smaller sites.</p> <p>Local Plan Part 1 establishes the borough-wide housing targets, and the supporting Housing Trajectory and Five Year Housing Land Supply statement identify the capacity in the borough to deliver these targets. This includes a suitable buffer, as required in national planning policy. Local Plan Part 2 aligns with this spatial strategy and the delivery of the targets proposed in Local Plan Part 1.</p>
Conservative Councillors (General)								<ol style="list-style-type: none"> <li>We are disappointed that the SAD pays only scant attention to the need to identify opportunities for development of land for uses other than residential. The LP1 document makes much of its aim to grow employment and provide cultural and leisure opportunities in the Borough, yet very few sites in the SAD focus on these important other uses. 7. We also note that with the exception of the Avenue Road estate and Priory Court estate, both of which are already being progressed as Estate Regeneration projects, the Council has not included its own housing estates. Examples of potential estates which could be included are Ash Grove Way in Highams Park and the Stockfield Road estate in Wood Street, but a comprehensive planned approach is more likely to deliver improved, replacement and new homes over time than piecemeal redevelopment.</li> <li>The Council retains ownership of circa 32,000 homes with approximately 3,500 homes on those estates having been brought under the Right to Buy schemes. A 50% split in the number of homes, which is a low estimate of the potential based on other schemes around London (but comparable to Marlborough Road) would allow almost 7,500 additional homes to be delivered in addition to the identified sites, allowing the target number of homes on the identified sites to be lowered.</li> <li>We are specifically opposed to the document referring to supporting development based on a "minimum" number of homes on the identified sites. In certain locations, the minimum number will require development that is significantly denser and taller than the established character of the area and as such contrary to the policies set out in the National Planning Policy Framework.</li> </ol>				<p>Local Plan Part 2 seeks to allocate sites for a suitable range of uses, in line with the priority established in Local Plan 1 for a mixed-use approach to development in the borough. This includes opportunities for commercial land uses, industrial land uses and cultural and leisure opportunities.</p> <p>The Local Plan team work in close collaboration with other council services, including the Housing Regeneration team to identify all suitable site allocations, including council-owned housing estates where the evidence is available that they are developable and deliverable. This collaborative work will continue during the Plan Period and housing delivery will be monitored in line with requirements established in Local Plan Part 1.</p> <p>Local Plan Part 1 establishes indicative development capacity for new homes rather than minimums.</p>
Conservative Councillors (General)								<ol style="list-style-type: none"> <li>Specifically, in the North of the Borough, the established character is suburban and the recent adoption of the Highams Park Neighbourhood Plan with overwhelming majority support, supports the view that this character should be preserved and enhanced, not changed.</li> <li>We do not believe that the Council has justified its designation of sites in the North of the Borough as "Transformational" against the very clear opposition to taller, denser development that has been expressed in responses to which over 700 people signed a petition asking for inter alia height limits to be included. We will comment on these further below.</li> <li>We believe the proposals contained in the Planning Policy (in Part 1) Paper for design codes should be embraced by the Council, with Neighbourhood Forums established to develop these. Through this process, acceptable forms of development can be established and the number of homes and spaces for new business premises, cultural and leisure opportunities can be ascertained. We do not believe the current approach is consistent with the aims of Government policy in this regard.</li> </ol>				<p>Both parts of the emerging Local Plan require a character-led approach to identification, including tall buildings and building heights, in accordance with London Plan Policy D1. The Local Plan recognises that, based on an understanding of character and context, some sites or areas in the borough are more appropriate for greater levels of intensification and/or height than others. This character-led approach is supported by evidence from the Characterisation and Intensification Study (2018).</p> <p>In accordance with this policy, the identification of sites as appropriate for a Transformation, Transition or Reinforcement approach to character-led intensification aligns with evidence in the Characterisation and Intensification Study (2018), and design-led area based masterplans, feasibility studies and area frameworks. Following adoption, all proposals for redevelopment will be subject to the policy tests relating to character-led intensification and high quality design set out in Local Plan Part 1. Local Plan Part 2 gives the opportunity to establish additional site specific requirements and guidance to ensure that development is of the highest quality and appropriate for its location.</p> <p>The importance of Design Codes is recognised, and the Council is already progressing important guidance through Supplementary Planning Documents to support the implementation of the Local Plan following adoption to ensure that policies relating to character-led intensification and exemplar design are followed. Site specific requirements and guidelines established in Local Plan Part 2 will also play an important role in meeting exemplar design expectations.</p>

**Subject:** Albert Crescent Pedestrianisation

Dear Sirs

I am unable to write my comments on the draft framework link online as it will not open, hence my email to you.

I feel Cherrydown Avenue should not be blocked off as it will adversely affect access for emergency vehicles, residents who live in those roads (plus Marmion Ave, Hurst Ave, Middleton Ave, etc, etc), making the existing traffic congestion, pollution and fuel consumption even worse, going against the Borough's aim to make the Borough more green.

It is also very worrying that the website is not working and people cannot comment and those residents not online, have no chance of knowing what is planned as they have not be notified.

Kind regards

Karen McGill

**Sent on:** [REDACTED]  
**To:** [REDACTED]  
**CC:** [REDACTED]

[REDACTED]

**Subject:** Re: LBWF Regeneration

Dear Cllr Miller,

Thank you for your email.

I am writing to advise that as at 5.25pm this evening and as previously mentioned there are NO PLANNING BOARDS on display in 228 Chingford Mount Road and there are NO HARD COPY LEAFLETS in there regarding the Chingford development. When will these be available and when will the Planning Boards be on display? The only leaflets available in the back room are the dusty old Chingford Treasure Trail Leaflets. These are of no use to residents concerning the development!

You have not answered my question in my earlier email 'Can you please advise the cost of these leaflets compared to the cost of the whole Consultation?' I believe it is a small price to pay to advise residents, many of whom are not online and have no idea whatsoever about the proposed developments. Why are residents not being advised on the developments, many of whom have gardens directly adjacent to the proposed sites? How can they comment?

In addition, please delay the deadline for the Site Allocation Consultation as at the moment we cannot have a public meeting which myself and approximately 600 members of our Facebook Group want to take place. Why was there no public meeting in the summer when there were no restrictions?

For your information, this email will be going on our Facebook Group and may be shared by members to other groups.

Kind regards

Karen McGill

Dear Sir / Madam,

## Representations to the Council's Proposed Submission Local Plan (LP2) - Site Allocations Document Former Webbs Industrial Estate (Site SA34)

Thank you for providing us with the opportunity to engage with the consultation on the Council's Proposed Submission Plan (LP2) - Site Allocations Document. I write on behalf of our clients, Catalyst Housing and Swan Housing Association, who have an interest in the above site and who have secured planning permission from the Council for its comprehensive redevelopment.

Below I set out a brief summary of the context of the site and the approved scheme before turning to specific comments on the consultation document.

### Context

In July 2016 the site was purchased by the Greater London Authority with the intention of finding a development partner to redevelop the site to provide a significant quantum of new homes. Catalyst and Swan were selected as the preferred bidder in August 2017. In October 2018 Catalyst and Swan submitted a detailed planning application to the Council for the following development at the site:

*"Demolition of existing buildings and structures, and comprehensive redevelopment to provide a series of buildings ranging in height from 1 to 15 storeys to provide 359 new affordable homes in a mix of one, two and three bedroom units (Use Class C3) 2,569sqm of non-residential floor space comprising of 720sqm of flexible floor space (Use Class A1 and/or A2 and/or A3 and/or A4 and /or B1 and /or D1 and/or D2), 532sqm of flexible floor space (Use Class B1 and/or D1) and 1,313sqm of floor space (Use Class B1), car parking, cycle parking, landscaping, highways and utilities works."* (LPA Ref. 183424).

Planning permission was granted by the Council in March 2021. A number of pre-commencement planning conditions attached to the current planning permission have already been discharged by the Council with the remainder of the pre-commencement conditions subject to live planning applications. Development is anticipated to start on site in 2022.

### Comments on the Proposed Submission document

Our clients strongly support the allocation of the site in principle, however, they have some comments on specific parts of the allocation. These are discussed in more detail below.

#### *Proposed Site Allocation*

We note that the 'Proposed Site Allocation' now states:

Offices and associates throughout the Americas, Europe, Asia Pacific, Africa and the Middle East.

Savills (UK) Limited. Chartered Surveyors. Regulated by RICS.

A subsidiary of Savills plc. Registered in England No. 2605138. Registered office: 33 Margaret Street, London, W1G 0JD

*"Comprehensive redevelopment to provide industrial led employment space and new homes". (author emphasis).*

The inclusion of 'industrial led' is completely at odds with the current planning permission at the site that was granted by the Council. The B1 floorspace was envisaged to comprise of a mix of office (B1a) and light industrial (B1c) uses depending on the location of the floorspace within the site and at what storey the floorspace is within the approved buildings. It would be incorrect to describe this as purely 'industrial'. This should be described as 'employment-led'. The 'Proposed Site Allocation' text should therefore be reworded to read:

*"Comprehensive redevelopment to provide ~~industrial-led~~ employment-led non-residential floorspace and new homes."*

#### *Indicative Development Capacity*

Given the above comments, the 'Industrial floorspace (sqm)' under the 'Indicative Development Capacity' should be amended to the following: 'Non-residential floorspace (sqm)'.

#### *Site Requirements*

The second bullet point of the Site Requirements on page 116 of the consultation document states that:

*"Make provision for 2,560sqm of non-residential floorspace comprising 720sqm of flexible floor space; 532sqm of flexible floor space and 1313sqm of employment floor space, car parking, cycle parking, landscaping, highways and utilities works."*

This appears to have just been copy and pasted from the current planning permission at the site (minus the stated use classes). Notwithstanding the fact that the current wording is unclear, this is considered too specific for a site allocation. The second bullet point should be amended to the following:

*"Deliver around 2,560sqm of non-residential floorspace including a large proportion of employment floorspace."*

The suggested wording still reflects the quantum of non-residential floorspace approved as part of the existing planning permission at the site and would still ensure that the floorspace is employment-led (a key policy requirement), but it would also allow a degree of flexibility within the wider 'non-residential' banner for the site to respond to future changes in the market. This is considered a far more effective and appropriate approach for the site allocation.

#### *Placemaking Plan*

The Placemaking Plan on page 117 of the consultation document does not fully accord with the approved scheme at the site. The approved scheme includes servicing from both Sutherland Road and Blackhorse Lane, however, the Placemaking Plan only shows this from Sutherland Road. Furthermore, the approved scheme includes a new publically accessible east-west green link through the site between Blackhorse

Lane and Sutherland road. Whilst the Placemaking Plan shows 'enhanced pedestrian & cycle connectivity' east-west through the site only part of this is 'greened'. The whole route should be 'greened' but using a narrower shading to reflect the extent of the actual green link approved on site. These elements should be updated on the Placemaking Plan on the next iteration.

#### **Future Participation**

I trust that the above is of assistance in the preparation of the new Local Plan. I would be grateful for confirmation of receipt of these representations and would welcome the opportunity to engage with further versions of the new Local Plan in the future. If you have any queries or would like to discuss, please don't hesitate to get in contact with me.

Yours faithfully

**From:** Mary Cutajar [REDACTED]  
**Sent:** 09 January 2022 11:25  
**To:** regeneration <regeneration@walthamforest.gov.uk>  
**Subject:**

Just wondering where the extra schools, medical centres, and parking provision will be situated to support this proposed program? Also there are other areas in Chingford, such as the old Poundland store, which has been an eyesore since a fire over 4 years ago which could be utilized, plus other sites on which building works appear to have come to a halt, both in Old Church Road and Chingford Mount Road. Has the additional increase in traffic been considered? Hall Lane is already subject to traffic overload. Are we to suffer more as a result of this proposal? It seems obvious that officials supporting this do not live in the area. From Mary Cutajar [REDACTED]

## Chingford Mount development

**To:** regeneration <regeneration@walthamforest.gov.uk>;  
localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Chingford Mount development

Good Evening

I am sending this email as I am opposed to the online consultation it is too complicated for me, as a 74 year old doing anything online is not my first choice. I do use the internet, but this online consultation is not user friendly, is this the reason you have used this form of communication to exclude anyone who does not use technology?

**I am totally opposed to this scheme in its current form.**

The consultation ask is it legally compliant? **No**

Is it sound? **No**

Does it comply with the duty to co-operate? **No**

Proposed developments within the area, they cannot be delivered with policy compliant levels of affordable housing, there is no parking provisions, this will disadvantage older and the disabled residents of the borough. The plan seeks to build more homes than required by the London plan.

Existing residents would be overlooked, loss of privacy and lose normal daylight sunlight.

Additional demand for parking.

The consultation was flawed as there was no public meeting to advise residents, only Zoom meetings which were not publicised.

Vast amounts of residents do not have zoom facilities.

These developments do not purpose improved infrastructure to cope with increased numbers of residents/ population. No additional hospital spaces, dentists, doctors, schools (students already don't get their first choice and many have to travel to get to the school they have been given), public transport links. Trying to get a doctors appointment before covid was unacceptable if this proposal happens it will be impossible to see anyone.

I need a blood test, I have to wait 14 days for that appointment, there is no walk-in facilities anymore, totally unacceptable.

Homes should only be built to complement the existing buildings (Waltham Forest should have learnt from previous high-rise buildings now demolished Chingford Hall Estate Priory Court etc).

It has been proved that high rise buildings have an adverse effect on the surrounding area. The development in Ferry Lane is high rise and an eyesore, it has totally changed the look of the place. I see some of these flats are on the market for in excess of £400,000 hardly affordable for the local residents.

Up to 90 homes on each of the Sainsbury's and Iceland sites.

Is there any facilities planned for these stores to remain in the mount? I can't see them, if so where are residents meant to shop. By taking away these stores you will destroy the retail area there. Where do we park, I use the Sainsbury's car park, it is well used which shows there is a need for it. I use both these stores on a regular basis, again very well used.

I also understand Morrisons is part of plan, where do I and all the other residents of Chingford shop if these stores/shops are not replaced.

Your vision of more walking and cycling is something I strongly support but unfortunately to put these measures in at the expense of the needs of the elderly, disabled, parents with small children and the convenience of all the public, cannot be justified, should they not run alongside not instead off.

If Albert Crescent is pedestrianised, how do the emergency vehicles enter the road to help the residents who live of the Crescent? as far as I can see they would have to go via Hall Lane to the Stewardson Road. It is too ridiculous for words and another negative effect on the environment, moving traffic from one road to another.

Plans for the Leisure Centre in New Road, what is happening to the Leisure Centre that is currently there, where is that going?

Coupled with the Station Road plans you are turning a lovely suburban borough our into a Concrete Jungle that's worse than any London inner borough.

If this goes through you will ruin thousands of peoples lives for a few hundred new homes, totally inappropriate.

Regards

Brian Gallacher

## Chingford Mount development

**From:** [REDACTED]

**Sent on:** Monday, January 10, 2022 1:13:02 PM

**To:** regeneration <regeneration@walthamforest.gov.uk>

**CC:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** Chingford Mount development

I moved to Chingford to be able to raise my children in a safe and clean environment. There was plenty of green and open spaces that didn't require getting in the car. We could also walk to the high street which had a few independent shops plus supermarket. The residents were also welcoming and friendly.

Imagine my horror to now find that you want to build high rises which is not in keeping with the area and also increase the population by such a vast amount. I am not opposed to development but now when it destroys the aesthetics of the area rather than enhance it.

Currently, the traffic on New Road alone during the school run is gridlock when you are trying to accommodate parked cars, buses and parents trying to get their kids to school. There is insufficient infrastructure e.g doctors, dentist, and schools in the surrounding area to support this yet you think it makes sense due to your tunnel vision in stating that Chingford should take its fair share. You also wish to destroy green spaces and then appease us by planting a couple of trees to keep us happy, you clearly think we are stupid.

Blocking off roads then moves the traffic to what was a quiet residential street causing further pollution which is what I moved away from. Also damaging the wellbeing of residents especially the older generation. I have already noticed an increase of cars parked along Larkshall road in the evenings and also the number of people with mental health issues walking the streets and crime is also becoming a further problem. Increasing the population to such an extent is going to exacerbate this 10 fold.

Improving the area for walkers and cycling is great, updating the shops, preferably with more boutiques rather than pound and food shops we have too many of those already so a variety would enhance it.

All I can say is that you are looking for Utopia Town, in short turning our village into a town without amenities, you don't want people to drive, who are you to dictate how people travel, they may not have a choice, you do however have a choice on how this moves forward. What you want does not exist in the real world.

I don't know whether you have breached standards/compliance as the ordinary person cannot understand the documents which is what you are hoping for. All I know is it does not make sense.

Thank you.

Regards

## Chingford Mount over-development

**From:** [REDACTED]

**Sent on:** Monday, January 10, 2022 12:35:58 PM

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** Chingford Mount over-development

Dear Sirs

I have just received a letter describing the planned housing developments at Chingford Mount where I live at a walking distance from the shops. I am horrified by the plan of getting rid of the only supermarkets like Sainsbury and Iceland which provide easy shopping especially for us elderly. Also all the new planned homes without parking facilities will be horrendous for us locals. I live in Brook Crescent E4 and my street is already parked solidly, especially vans and lorries are a nuisance. Whatever will happen with 280 new homes. Also, Chingford Mount will be looking like a council estate. Please re-consider saving this neighbourhood.  
Aila Bloom (82).

## Chingford Mount redevelopment

**From:** [REDACTED]

**Sent on:** Sunday, December 19, 2021 9:37:55 AM

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** Chingford Mount redevelopment

We want shops like Sainsbury and Iceland to stay in Chingford. The Hub is doing a great job for the aged in Waltham Forest, where are you going to put them and the other shops etc that you are getting rid of. You will make The Mount not a viable place to go as there will be nothing left to go there for only high rise housing which spoils the ethos of the area. There are already empty shops because people are not coming to the area. These developments won't help, just destroy the area more.  
The medical practices in the area are overwhelmed with patients at the present time so putting more pressure on them with all this proposed housing will not be good.  
You should put back the toilets, that would make more sense.  
WE DO NOT WANT HIGH RISE OR MORE HOUSING IN CHINGFORD, leave us alone and do your damage in other parts of the borough.

## Chingford Mount regeneration

**From:** [REDACTED]  
**Sent:** 20 December 2021 13:43  
**To:** regeneration <regeneration@walthamforest.gov.uk>  
**Subject:** Chingford Mount regeneration

Hello

After reading your proposals for regenerating the Chingford Mount area around Albert Crescent, I agree with a lot of the comments in the paper, but what I do not agree with, although it is not stated in the paper, is high rise flats that will mask the views over our area.

It was pleasing to see that our Sainsbury's Supermarket will continue because this is a lifeline for many local elderly and disabled people who cannot get to the larger stores, Sainsburys is a friendly and necessary facility where shoppers often meet and chat with people they know while doing their shopping.

I also agree strongly with greening up the area with trees and plants. The extension of bus routes is also favourable especially as we have no tube or rail in our vicinity (by the way on page 31 it says bus 58, there is no bus 58 at Chingford Mount). Bus drivers will need a stopping place though to rest.

It is also pleasing to see the new streetlamps in our area, but some of the darker places need a street lamp especially the garage area at the back of Chase Gardens (although this may not be within your remit here).

We need our community facilities as South Chingford Community Library and Hub has been closed since covid lockdown, this is urgently required and hopefully will stop anti social behaviour especially in darker places as mentioned above. I have lived in Chingford Mount 25 years and have seen how the area has declined.

Please keep me informed of any progress on the regeneration of Chingford Mount.

Thank you.

Mrs. Carole Rogers  
Chingford Mount resident

[REDACTED]

**Subject:** Fwd: LBWF Regeneration

Please note my previous email contained a typo where I said the Consultation deadline was 14th December but I should have said 14th January. Apologies.

**Subject:** LBWF Regeneration

Dear Cllr Miller,

I understand from correspondence that there are LBWF leaflets about the redevelopment in Chingford, but you are unable to provide them to residents due to the cost. Can you please advise the cost of these leaflets compared to the cost of the whole Consultation?

You stated in the last couple of days that there are leaflets in 228 Chingford Mount Road but there are none there. The old plans/boards that were in the window for about 5 days are now the back room of the shop!

Obviously time is of the essence as comments to the Consultation need to be received by 14th January.

Regarding the 4th December council officer event at 228 Chingford Mount Road/Albert Crescent, there were only two officers present and no leaflets were handed out, contrary to your email. The shop (228) was a pop up shop selling clothes and the officers just stood outside. The only leaflets handed out were about the Chingford treasure trail, nothing about the redevelopment.

What steps have been taken to advise residents where English is not their first language? The boards in 228 Chingford Mount Road were only in English with nothing to help non-English speakers.

Zoom meetings are not sufficient as most people are not au fait with Zoom.

We are extremely concerned that most residents have no access to the information and therefore cannot respond in time.

You also say we cannot have a public meeting due to covid concerns but you've had all year to do so when it was safer, especially in the summer.

By residents not responding I presume you will believe that they are happy with the plans but I can assure you that many people want the chance to have their say but have no idea how to.

The websites are not user friendly with questions in 'planner-speak' asking questions like "are these plans legally compliant and sound". Most people have no idea what means. It appears that it has been made as difficult as possible for residents to respond.

Can you either provide leaflets as soon as possible or delay the deadline? We just want ALL residents to have their say, whether good or bad.

Many thanks.

Kind regards,

Karen McGill

## Chingford

From: [REDACTED]  
Date: Sun, 9 Jan 2022, 11:24  
Subject:

Just wondering where the extra schools, medical centres, and parking provision will be situated to support this proposed program? Also, there are other areas in Chingford, such as the old Poundland store, which has been an eyesore since a fire over 4 years ago which could be utilized, plus other sites on which building works appear to have come to a halt, both in Old Church Road and Chingford Mount Road. Has the additional increase in traffic been considered? Hall Lane is already subject to traffic overload. Are we to suffer more as a result of this proposal? It seems obvious that officials supporting this do not live in the area.

## Guidance on LP2 regulation 19 Consultation

**From:** [REDACTED]  
**Sent on:** Sunday, January 2, 2022 8:32:16 AM  
**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Guidance on LP2 regulation 19 Consultation

Good morning, on the below link, further links are provided for two documents

<https://www.walthamforest.gov.uk/planning-and-building-control/planning-policy/local-plan>

LP2 Consultation Notice  
LP2 Consultation Guidance

I'm trying to access the Guidance doc but the link for both the above appears to go to the same document (the Notice). Please could you therefore point me in the direction of where I can find the guidance.

Could you also confirm for each of the Leytonstone Town Centre proposals, if any changes were made to any of the proposals based on original consultation responses from the public.

Many thanks  
Fiona

## Hall Lane car park

**From:** [REDACTED]

**Sent on:** Saturday, January 8, 2022 1:05:58 PM

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** Hall Lane car park

Re-Development of 90 homes in a 5 storey development of flats without parking facilities in hall lane.

This parking facility is the only one in the Chingford Mount area. Has the council considered the need of the elderly, disabled and people with mobility issues. Not every resident in the area is capable of cycling! Or walking a distance! The hall lane car park, especially the disabled bays is always in constant use. Lots of residents prefer shopping in a smaller compact supermarket rather than the superstores which are often too big to navigate.

Closing this car park would be detrimental to many residents and traders in the Chingford area people need to shop in the post office, pharmacy, dry cleaners etc. Without the use of the car park people will be forced to park in the neighbouring streets which are already full to capacity.

I strongly urge you to reconsider the folly of going ahead with this project.

## LP1 Strategic Policies and LP2 Site Allocations

**From:** [REDACTED]

**Sent on:** Friday, January 7, 2022 6:32:25 PM

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** LP1 Strategic Policies and LP2 Site Allocations

To whom it may concern, I am writing to raise further questions and to voice my concerns regarding the Council's planning proposals.

I do not feel that the consultation process is being handled correctly (or even legally) with very little access to information for residents not online and I also feel that documents LP1 and LP2 should have been issued together as the issues raised in both documents need to be considered together.

I note that LP1 stated that all new developments would be car free. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus you have workmen who may live in these new homes – where do they park their vans? In addition, surely the Council should insist that all new developments include allocated parking for each household with an electric car charging point in order to encourage residents to switch to electric cars and improve air quality in the area. I also note that while the Council seems to be anti-cars, it asked volunteers with cars to come forward in the pandemic to help residents keep hospital appointments, get prescriptions, shopping, etc

Transport provision is overlooked by LP2. Where will the transport hub at Albert Crescent be relocated to? Has TFL been consulted on providing public transport for an increased population? In fact there are no details on

how or if any infrastructure improvements will be delivered. An increasing population will require improvements to the infrastructure – more detail needs to be provided on this.

Why would the Council think it acceptable to remove the Sainsbury's supermarket and car park at Hall Lane and the Morrisons supermarket and car park and reduce the capacity of the Sainsbury's at Low Hall? Where are current residents to shop even without the proposed new residents? It just doesn't seem to be well thought through!

Why does the Council wish to house another 27,000 people in this Borough? It is not acceptable that future development should change the suburban feel of the Chingford and Highams Park areas. There is no justification for any building to exceed the height of those immediately surrounding them. It is important to retain the character of the area.

## Objections to Draft Chingford mount town Centre framework.

From: [REDACTED]  
Sent: 10 January 2022 13:49  
To: regeneration <regeneration@walthamforest.gov.uk>  
Subject: Objections to Draft Chingford mount town Centre framework

Viewing the consultation documents please note my objection to this development

The reasons are detailed below:

'Proposed developments would be out of keeping with the area, they cannot be delivered with policy compliant levels of affordable housing, no parking provision, this will disadvantage older people. The Plan seeks to build more homes than required by the London Plan. Existing residents will be over-looked, loss of privacy, daylight/sunlight, additional demand for parking. Consultation flawed as no leaflets/public meeting to advise residents, only an online Zoom meeting. Shortage of doctors, hospitals, dentists, schools, and other mental health facilities needed (green space) Set out modifications. 'Build homes to height of existing buildings, provide parking, healthcare, education, etc.'

Please log my objections and confirm by return email.

Thank you,

Deana vango

## Waltham Forest: New event available

**From:** [REDACTED]  
**Sent on:** Wednesday, December 1, 2021 10:56:37 AM  
**To:** [REDACTED]  
**Subject:** RE: Waltham Forest: New event available

Good Morning Team,

Thank you for consulting us on the Site Allocations proposed submissions document for the Waltham Forest Local Plan.

Would it be possible to provide the GIS layer of the site allocation outlines/boundaries? This will help us and our consultees in assessing the constraints associated with each individual site.

Best Regards,

Tom Craig

## Site Allocation Consultation - Chingford Mount E4

**From:** [REDACTED]  
**Sent on:** Friday, December 31, 2021 6:57:43 PM  
**To:** regeneration <regeneration@walthamforest.gov.uk>;  
localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Site Allocation Consultation - Chingford Mount E4

I feel that the Site Allocation Consultation is not legally compliant, not sound and does not comply with the duty to co-operate.

My comments are as follows:

### Sainsbury's Hall Lane, Albert Corner, Former South Chingford Library Sites

The plan is seeking to build more homes than required by the London Plan.

To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause 'harm' to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.

Without parking these proposed developments will disadvantage older people.

My father's home, which I also part-own, is in Albert Avenue which backs on to Sainsbury's in Hall Lane. Building five plus storeys of flats would completely destroy my father's way of life. He spends a lot of his time in the garden enjoying the peace and quiet and can actually see the sky. With a high rise block of flats in the way, his mental health would suffer greatly. He is so worried about the loss of privacy and light and his way of life would be changed forever. Throughout the various Covid lockdowns, my father's only safe place has been his garden and who knows how Covid will change people's behaviour in the future.

The Sainsbury's in Hall Lane has been a lifeline especially over the last couple of years for local residents, many of whom are elderly. Should this close down whilst redevelopment takes place, there will be no-where for them to shop.

These proposed developments cannot be delivered with policy compliant levels of affordable housing.

Blocking off Cherrydown Avenue from Albert Crescent making it pedestrianised will cause gridlock to an already extremely busy crossroad junction. Residents in Cherrydown Avenue, Marmion Avenue and Hurst Avenue will have to drive the long way round causing more congestion, pollution and using more petrol.

The Consultation is flawed as non online residents have not had a chance to comment as they received no leaflets through the door advising of the plans. There has also been no public meeting. Zoom meetings were too short and not everyone could comment as there was not enough time to ask questions and there was not enough capacity for those who wanted to register.

In this area there is a shortage of doctors, hospitals, dentists, schools, and with over 200 extra homes, this would only make matters worse for existing residents.

In the past we realised the massive mistakes of putting people in little boxes in Chingford Hall Estate and many other soul-destroying, high rise flats and in the case of Chingford Hall Estate, this was knocked down and low rise houses built instead. It is widely known that these homes are not good for mental health. Why would the Council want to repeat their mistakes?

If new homes are required, why not look at the empty half-built eyesore of a building at the Morrisons junction. Another site which is empty and awaiting redevelopment, is in Old Church Road where the old shoe shop was, which was called Dollybirds.

Any homes should not be built any higher than existing buildings to keep the character of the area. If high-rise developments go ahead in Chingford Mount, it will totally destroy the village feel of the existing area.

Please consider the above points when making your decision.

Kind regards,

Karen McGill

## Site Allocations Document LP2 Representation

**From:** [REDACTED]

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Site Allocations Document LP2 Representation

Dear Sir/Madam,

On behalf of the owner, Sewardstone Holdings Limited, we support proposed allocation SA55 (60-74 Sewardstone Road). However, it would be prudent to state in the supporting text there is an opportunity to create a focal point on the junction of Sewardstone Road and Kings Head Hill. This

could take the form of a building with height subject to the normal development control criteria (up to 8 - 9 storeys). Such a building would compliment the proposed allocation on the other side of Sewardstone Road (Motorpoint SA53).

## Site SA46 Sainsbury's Car Park and Adjacent Sites

**From:** [REDACTED]

**Sent on:** Monday, January 3, 2022 5:45:37 PM

**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>

**Subject:** Site SA46 Sainsbury's Car Park and Adjacent Sites

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

As a frequent user of the Sainsbury's supermarket on this site I am concerned regarding the reduced parking capacity that will no doubt result if 430 new homes are built on this site. It is already difficult to park on this site at peak times. Are you proposing that we drive further afield to larger outlets for our shopping needs as this would not be environmentally friendly. Traffic coming on and off this site is already congested.

I understand that the 430 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus, you have workmen who may live in these new homes – where do they park their vans?

On a more general note:

- The circa 19,000 homes (as mentioned on page (i) of your document) is in line with Government guidance, so why is the council proposing 27,000 additional new homes (page 1 of your document)?
- More detail is needed on how the Council intends to improve infrastructure to meet the demands of the new residents, including schools, GP surgeries, dentists, new roads, more buses, etc
- We need our new hospital up and running before we build more new homes. The area has already seen extensive building of residential properties and Whipps Cross Hospital is unable to provide existing residents with a service fit for purpose.
- Our police force is already over stretched, how will the new residents impact on this.
- Has Thames Water been consulted on ensuring water pressure and supply can be maintained even during periods of lower than average rainfall without drawing on our rivers?

I have to say that I write this with a heavy heart as I do not believe that the Council cares about the opinions of its existing residents, which is painfully apparent based on the Consultation process which excludes a large proportion of the community who don't have access to the internet and who are completely unaware of the proposal.

## Site SA59 - 472-510 Larkshall Road & James Yard

**From:** [REDACTED]  
**Sent on:** Monday, January 3, 2022 6:00:45 PM  
**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Site SA59 - 472-510 Larkshall Road & James Yard

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

I note that your objectives include “ensuring unique character of the borough is protected and enhanced” and “responds to the local character”. In my mind this would preclude the building of flats higher than 3 floors on this site. However, I see that you have “included the potential for taller buildings” on this site, which clearly does not meet your previous objectives. Traffic in the area is already congested due to the level crossing or are you proposing to shut that?

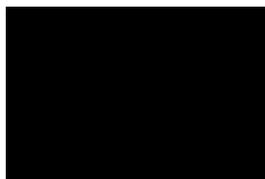

I understand that the 145 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus you have workmen who may live in these new homes – where do they park their vans?

## Site SA61 - Larkwood Leisure Centre

**From:** [REDACTED]  
**Sent on:** Monday, January 3, 2022 6:07:23 PM  
**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:** Site SA61 - Larkwood Leisure Centre

To whom it may concern, I am writing to raise my concerns regarding Site Allocations LP2.

I am a frequent user of the Nuffield Health Centre. How would this be impacted? It is a Government priority to improve the Nation's fitness in an attempt to relieve some of the pressure on the NHS. How would reducing local access the health centres meet this objective? I had understood that as a result of the pandemic increasing housing in already over populated areas was to be reconsidered and that we all need more access to open green spaces and health facilities.

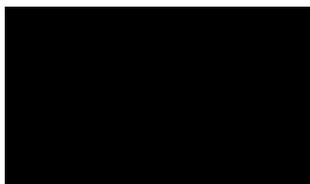

I understand that the 280 new homes would have little or no parking. No parking does not mean no cars and many of the residents would need to find alternative places to park. No parking is discriminating against the old and infirm who need cars to get around (being unable to cycle or walk long distances) and they need parking for their carers to park on often twice daily visits so that they can live at home. Plus you have workmen who may live in these new homes – where do they park their vans?

## SOUTH CHINGFORD

**From:** [REDACTED]  
**Sent on:** Saturday, December 18, 2021 4:39:09 PM  
**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>;  
regeneration <regeneration@walthamforest.gov.uk>  
**Subject:** SOUTH CHINGFORD

Hi

I am writing to oppose ALL proposals for development in South Chingford that include high rise buildings.

(But in particular, Sainsburys in Hall Lane E4 8HH.)

The plans are seeking to build more homes than required by the London Plan.

To achieve that higher number, the form of development is significantly out of keeping with the existing character of the area and will cause harm to existing residents who will suffer the consequences of over-looking, loss of privacy, daylight and sunlight and from the additional demand for on-street parking from flats built without adequate parking for new residents.

Schools, Gp surgeries etc are already full to bursting, we can't support any more people in this area until more facilities are added.

If possible, please take this email as THREE objections, as my parents don't have internet so can't email you.

Thank you,  
Lisa Valen

## Chingford mount development

**From:** [REDACTED]  
**Sent on:** Monday, January 10, 2022 12:06:11 PM  
**To:** localplanconsultations <localplanconsultations@walthamforest.gov.uk>  
**Subject:**

Plans for redevelopment at the Mount look dreadful. How are buses going to turn around – do a 3-point turn? Or is TFL going to extend all the routes to Chingford Station? What about now the old library building the CREST building, this is a local asset well used by the elderly before COVID and there are no other buildings locally that could accommodate this service. Why should a cemetery be more a part of the area. It is not a park it is a place to be with the dead. Dogs are already a problem and should be banned again as I have seen owners let them off the lead so they can wander through the graves and go to the toilet.

Why does the local plan site not send me an email as it says it will? Tried 10 times now.

R → 31/12

Planning  
Policy Team  
LBWF

26<sup>th</sup> December 2021

Dear Sirs,

I am completely against all the large developments planned in Chingford. The council is seeking to build more than the London plan requires, and the government is proposing less development in the south east and more in the north.

Tall buildings should only be built if they are not having a bad impact on the surrounding area. Any tall buildings in Chingford would be detrimental to all areas in the town.

I am also really worried about

how all the new residents will affect our services, schools GPs & hospitals.

It would be interesting to know how many homeless people there were in LBWf 5 years ago and how many there are now. LBWf has built hundreds of flats in Walthamstow, but are any of them allocated to people desperate for accommodation?

Yours sincerely

Geraldine McFarlane

This submission is made on behalf of the Waltham Forest Conservative Councillors Group. In response to "SHAPING THE BOROUGH Waltham Forest local plan (LP2) Draft Site Allocations Document September 2020 (Regulation 19).

We are sorry to say that this is, largely, a repeat of what we submitted at the Regulation 18 stage because few of the concerns highlighted have been addressed in the revised documents. We are grateful for the removal of certain sites from the document, but the remaining designations remain of significant concern, because in large part, we do not believe them to be "effective", because to deliver development in the form suggested would be contrary to the NPPF requirement that development should be in keeping with the character and appearance of an area. The designation is also not "effective" because, in certain cases which we will highlight below, the proposed developments are simply not financially viable.

We have significant concerns over the consultation process in addition to the specific concerns about the designations. There has been a real effort made by local people and Councillors to raise the profile of the consultation but the Council has made it very difficult for those who are not "online" to engage with it. We know that several residents have raised this and we will let their comments stand for us also.

We have separated our response into two sections; a general response on the process as set out in the Introduction and Methodology sections at the beginning of the document and then responses on specific sites based on our own knowledge and experience and on discussions we have had with local residents and community groups.

#### General Response

1. The Site Allocations Document ( "SAD" ) is vital to the "soundness" of the Local Plan as without sufficient land being identified, there is no way the Council can demonstrate that it can meet its housing target. Accordingly, we believe taking the LP1 policies part of the plan to Public Inquiry prior to the conclusion of the Regulation 19 stage of the LP2 site allocations part of the plan is a flawed approach.
2. We note that the Council have included 65 potential sites within the SAD, but that this document fails to include sites which have been included in the Regulation 19 version of the LP1 document. (See Figure 4.1 Page 25 of that document).
3. We note that the SAD includes only what the Council describes as "Strategic" or "Key" sites, but it is less than transparent, some might say misleading, to consult on a document purporting to show where development will happen and what form that development might take, when in a later version of a separate document in the suite of Plan documents is suggesting a greater number of sites for development.
4. We also believe it is misleading to fail to include sites which the Council intends to include on the Brownfield Land Register.
5. The cumulative effect of this approach is to seek to accommodate a higher number of homes within the sites identified in the SAD, leading to a need for higher densities and taller buildings on that smaller number of sites than might in fact be necessary.
6. We are disappointed that the SAD pays only scant attention to the need to identify opportunities for development of land for uses other than residential. The LP1 document makes much of its aim to grow employment and provide cultural and leisure opportunities in the Borough, yet very few sites in the SAD focus on these important other uses.
7. We also note that with the exception of the Avenue Road estate and Priory Court estate, both of which are already being progressed as Estate Regeneration projects, the council has not included its own housing estates. Examples of potential estates which could be included

are Aldriche Way in Highams Park and the Stocksfield Road estate in Wood Street, but a comprehensive planned approach is more likely to deliver improved, replacement and new homes over time than piecemeal redevelopment.

8. The Council retains ownership of circa 12,000 homes with approximately 3,500 homes on those estates having been bought under the Right to Buy schemes. A 50% uplift in the number of homes, which is a low estimate of the potential based on other schemes around London (but comparable to Marlowe Road) would allow almost 7,500 additional homes to be delivered in addition to the identified sites, allowing the target number of homes on the identified sites to be lowered.
9. We are specifically opposed to the document referring to supporting development based on a "minimum" number of homes on the identified sites. In certain locations, the minimum number will require development that is significantly denser and taller than the established character of the area and as such contrary to the policies set out in the National Planning Policy Framework.
10. Specifically, in the North of the Borough, the established character is suburban and the recent adoption of the Highams Park Neighbourhood Plan with overwhelming majority support, supports the view that this character should be preserved and enhanced, not changed.
11. We do not believe that the Council has justified its designation of sites in the North of the Borough as "Transformational" against the very clear opposition to taller, denser development that has been expressed in the responses to the Regulation 18 consultation on the LP1 document, in response to which over 700 people signed a petition asking for inter alia height limits to be included. We will comment on these further below.
12. We believe the proposals contained in the Planning Policy White Paper for design codes should be embraced by the Council, with Neighbourhood Forums established to develop these. Through this process, acceptable forms of development can be established and the number of homes and spaces for new business premises, cultural and leisure opportunities can be ascertained. We do not believe the current approach is consistent with the aims of Government policy in this regard.

### **Site Specific comments**

1. SA46 - Sainsbury's and adjacent sites. We do not believe the designation of this site to be "effective" given the embedded value of the existing uses far exceeding the likely residential development value of the site when the Council's policies of seeking 50% affordable housing are taken into account. This is a well-established retail store, hotel, car dealership and community transport hub, with playing fields adjacent to it. The car dealership opened less than five years ago. We do not believe this site to be viable because the value of the proposed 800 residential units is unlikely to be able to bear the cost of either buying out the existing uses or replacing them with adequate compensation to the occupiers for their loss of business during the period of redevelopment. The designation as a "Transformation" site suggests very tall buildings, which will be situated adjacent to an urban motorway and downwind of a waste incinerator. Neither factor would appear to have been properly considered in assessing the likely higher cost of development and the impact of that on viability. The Chingford Hall estate, which lies about 500m west of this site was redeveloped in the 1980s/90s and tower blocks were demolished. The resulting homes, a mix of two and three story terraced houses and three and four storey flats, have established a character for the area which has proved popular and less prone to negative outcomes such as anti-social behaviour and crime. Such factors should be considered when land

is designated, but does not appear to have been. We believe this site should be designated as a "Transition" site with an FAR no greater than 2.0.

2. SA48 - Morrison's and adjacent sites. We do not believe the designation of this site to be "effective" given the embedded value of the existing uses far exceeding the likely residential development value of the site when the Council's policies of seeking 50% affordable housing are taken into account. This is a well-established retail store and adjacent gym. The designation of this site as a "Transformation" site suggests very tall buildings which would be out of keeping with the suburban character of the area and over-dominant in an area of two storey terraced and semi-detached housing. It would also be downwind of the waste incinerator and the additional cost of construction to ameliorate this would not appear to have been considered in assessing the potential viability. We do not believe this site should be considered for any greater level of development than would be supported by a "reinforcement" designation with an FAR no greater than 1.4.
3. SA49 – Sainsburys and Hall Lane Car Park – We do not support the designation of this site as "Transformational". It does not meet the criteria for this designation in the LP1 policies. The parallel masterplan exercise has raised immense local concerns, especially from adjacent residents who fear a significant loss of privacy. We also do not believe that the designation is effective as it is unlikely to be viable taking account of the need to protect existing residents amenity, replace a well-used town centre car park and meet the Council's policy of providing 50% affordable housing, alongside buying out the embedded value of the existing supermarket.
4. SA50 - Former South Chingford Library We do not believe the designation of this site to be effective, against a requirement for the replacement of the community use and the open space, which are likely to make any development unviable, without imposing a form of development on the site totally out of keeping with the character of the homes adjacent to it.
5. SA51 – Albert Corner. The designation of this site has changed from "Reinforcement" to "Transition" between the R18 and R19 versions of the LP2 consultation. We oppose this. The parallel masterplanning exercise showed a building of nine storeys on the Old Church Road frontage and six storeys on the New Road frontage. We do not believe the designation of this site to therefore be "effective" as development in this form would be contrary to the NPPF requirement for development to be in keeping with the character and appearance of an area. It would also cause significant harm to adjoining homes, particularly those in Brook Crescent whose rear gardens would be both over-shadowed and overlooked.
6. SA59/60/68 We are aware of a response from the Highams Park Planning Group which addresses these sites and other opportunities in the Highams Park Neighbourhood Plan area. We support those comments in full.
7. SA61 - In our previous response, we supported the local campaign to designate part of the site as Local Green Space and we are pleased that this has been accepted. A petition in support of that and asking that any development of the site replaced the leisure facilities and that houses for families were built rather than flats, and that the height of the existing buildings was not exceeded was submitted as part of the earlier submission. In order to gather more fine-grained responses on these issues, we asked local residents to complete a survey asking individual questions. A report on the responses to that survey is attached. In summary 93% of the 597 respondents did not want this site included in the Site Allocations; there was an even spread of responses as to which of the existing leisure facilities people wanted to see replaced; support for the inclusion of more non-residential uses on the site; 90% (544) of respondents said the proposed allocation of 280 was too many; 80% of respondents wanted to see large family houses or smaller houses, not flats, built on the site; almost no respondents wanted to see buildings taller than four storeys and most wanted a maximum of two storeys; It is our view that the

designation of this site is therefore not “effective” because it is not possible to replace the leisure facilities and provide policy compliant affordable housing with any form of development which would be remotely acceptable or policy compliant. We do not believe the parallel masterplanning exercise has demonstrated viability, even with a form of development which is deeply unpopular and wholly out of keeping with the character of the area. Again, there is no CPZ in this area and poor public transport, so it is likely developers would seek “exceptional” consent to include parking, further damaging the viability of the scheme.

8. SA65 - Pear Tree house We support the redevelopment of this site in accordance with the granted planning consent for sheltered housing.

This response is made on behalf of Valley Ward Conservative Councillors to the SHAPING THE BOROUGH Waltham Forest local plan (LP2) Draft Site Allocations Document Consultation.

We understand there is a response being prepared by the Waltham Forest Conservative Councillors Group, however, this response is specific to Valley Ward and assesses the impact of the proposals contained in the Site Allocations Document (SAD) and the soundness of those proposals.

## **General**

We are concerned that consultation on this document is separate to the consultation which took place in first in mid 2019 and on the revised document in late 2020 on the text of the Proposed Local Plan document. We believe this disjointed approach has made the consultation for residents unnecessary complicated. We do not believe that the consultation on such an important document should have been handled in this way.

We note that the proposals all refer to further documentation:-

“Additional detail on the development guidelines for the site will be provided in a forthcoming SPD for the area.”

We are concerned, given that several of the sites are quite specific in the number of units proposed that any further consultation that would be required to inform the SPD will be confined to minor items such as finishes or boundary treatments.

We submit that this document is premature.

## **Sites**

SA50 – Former South Chingford Library

This site is a viable and well used community asset. It has an open and pleasant setting. The development of this site should not be contemplated until the facilities and public open space have been secured in this location, as we have been assured. We do not believe this is financially viable and therefore is not deliverable.

SA49 - Sainsbury's, Hall Lane

Although it does not say so, this also includes the multi story car park adjacent to the small Sainsbury's supermarket. At paragraph 3.49.1 under the heading site requirements it states that the site should accommodate town centre car parking. This must be a requirement. The Chingford Mount area has suffered as a retail centre because of the limited retail offer. This directly relates to progressively restrictive parking facilities.

The Sainsbury's site is currently a three story building bounded on its, west and southern sides by predominantly two storey terraced housing and on its eastern side by two story buildings comprising shops and upper parts. We believe that to increase the height of the Sainsbury's building would cause irreparable harm to the amenity of neighbouring dwellings. Without further detail it is impossible to estimate the height of the proposed building housing 19 new flats/ maisonettes. Therefore, if this building is to be redeveloped, the numbers of proposed units should be dramatically reduced.

We also note that under the heading "Development Guidelines" there are a number of axiomatic statements which have little meaning in the context of the site.

We also note that this site has an intensification approach of "reinforcement" we do not believe that the description of the proposed development at 90 new flats can reasonably be described as reinforcement in the context of Policy 8 in the proposed a local plan.

Site SA51 - Albert Corner

Although this is not in Valley ward, we feel that it deserves comment from the Valley Ward Councillors, partly because of its proximity to Valley ward but also because it mentions;-  
“Contribute to transforming Albert Crescent into a pedestrianised public space with green amenity and play space

Enhance the public realm at the junction of Hall Lane and Old Church Road”

There has been some discussion and it has been indicated in other documents (again separate to this document) that the bus terminus at Albert Crescent will be moved, there is no information on where it will be moved to and may disappear altogether. It is well established that development, particularly intense development, should take place around transport hubs. If the transport hub at Albert Crescent is to be removed, we would argue there is no justification this kind of development proposed.

#### SA48 – Morrisons Supermarket and Car Park

Morrisons is a large, well-established retail store and the site also hosts a Bannatynes Health Club and Spa. The site has two story terraced housing on its northern boundary and playing fields to the southern side. There is further green space east. There is little information with which to gauge the density of the proposed development. The reduction of a supermarket will have a detrimental impact. We note the site is Flood Zone 2 & 3 we are aware of issues with the groundwater impact of the stadium development causing flooding in the adjacent gardens. We do not consider this to be a viable site a large scale development.

#### Site SA47 - Cork Tree Retail Park

This site already functions as an industrial site. However, any intensification without proper supporting infrastructure is not, in our view acceptable or practical. Although this site is adjacent to the A406, North circular, it is also opposite and adjacent to residential properties.

#### Site SA46 - Sainsbury's Car Park and Adjacent Sites

This is the largest retail store in the north of the borough and arguably the largest in the borough. It currently serves much of Chingford and Walthamstow and possibly areas beyond. We can only regard the councils ambition for this site as aspirational. The site also hosts a hotel, car dealership and community transport hub. Again it is bounded by the A406 and is surrounded by playing fields. The car dealership and community transport hub are both recent developments

#### SA50/51/52 – Chingford Mount

We believe that there are opportunities to deliver new homes above existing retail uses in the Chingford Mount area as part of a design-led masterplan approach which individual owners can then use as a benchmark. We do not think that identifying individual sites within the SAD is helpful to this approach. This is also in a Flood Zone 2 - 3. We see no evidence that if this development and the Morrisons Site (SA48) development were to be implemented, that the natural environment could cope.

### **Conclusion**

All of the sites have a proposed intensification approach of either “Transition” or “Reinforcement”. No site in Valley should be designated as more intense than “Reinforcement” and only then if they respect the existing character in design and density.

We do mind that this SAD or the local Plan Document should be based on a strategy which seeks to meet objectively assessed development and infrastructure requirements. Therefore in our view it does not meet the necessary test of soundness as required by the NPPF.
