PROPOSALS

Waltham Forest Council has identified the Scotts Road and Morley Road junction as a potential location for junction improvements, to address concerns raised by the community and make crossing the junction easier and safer for pedestrians. As well as making crossing safer, we want to improve the look and feel of the area by introducing a landscaped area with plants and trees for the community to enjoy.

We have developed a design for the junction, and we would now like to hear the views of local people to make sure the proposals are right for the area. The proposals include:

- Narrowing the junction by building out the kerb line between 107 Scotts Road and 87 Morley Road. By narrowing the carriageway, pedestrians can cross the road quicker, improving pedestrian safety and access to the church.
- Introducing a landscaped area with Sustainable Urban Drainage Systems (SuDS) and biodiverse planting to improve the look and feel of the area and improve drainage of surface water.
- Reducing the number of parking bays by one space to enable the carriageway to be narrowed and the planting area to be introduced.
- In addition to the above proposals, Waltham Forest Council is also proposing to install a cycle hangar in the area outside 93-95 Morley Road, to provide some residents with a place to park their bikes. Residents will be written to separately regarding the cycle hangar.

Please see the plans opposite as well as details on how to provide feedback below.

HAVE YOUR SAY

Before we finalise the proposals, we want to understand what local people think about the proposed changes. Therefore, we invite you to take part in a short survey and have your say on the proposals before **28 March 2024** by scanning the QR code on the back page or visiting

<https://forms.office.com/e/hU5Vvs0RXc>

Alongside collecting feedback from the community, we will also advertise the necessary Traffic Management Order (TMO) changes (changes to parking bays and yellow lines) that are needed to deliver the scheme. The TMO changes will be advertised in the East London and West Essex Guardian on 29 February 2024, and street notices will be placed in the area with details of the changes and how to comment. If you would like to send comments on the TMO changes, please contact us using the details on the back page, quoting **“T16(24) - Scotts/Morley Road TMO Comments”** before **28 March 2024** (please include your name and address).

At the end of the consultation period, we will analyse all feedback received and make changes to the designs where necessary. More information about the scheme can be found online at

<https://www.walthamforest.gov.uk/parking-roads-and-travel/active-and-sustainable-transport-schemes/current-schemes/scotts-road-and-morley-road-junction-improvements>

We welcome the community to get involved with finalising the design of the planting area and choosing the plants. We're also looking for residents who can help with long-term maintenance of the planting to ensure the plants stay healthy throughout the seasons. If you're interested in getting involved, please include your contact information when taking part in the survey or get in touch using the contact details on the back page.
